

how
we succeed

2015 Erie Indemnity Company Annual Report

"The insurance industry is
a service industry. Anyone who
enters the industry...who
doesn't have that thought
well-grounded in his mind
is not likely to be a success."

ERIE Co-founder
H.O. Hirt

how we succeed

To Our Shareholders,

Spend any time on LinkedIn®, Twitter®, YouTube® or TED® Talks, and you're bound to run across the secrets of success, often from the world's most accomplished people. On YouTube alone, you'll find Steve Jobs, Oprah and Mark Zuckerberg, Michael Jordan, J.K. Rowling and Richard Branson. Even Warren Buffett and Beyoncé share the public stage to expound on their paths to success.

Though their stories cut across different industries—tech, business, entertainment, sports—they share a few distinct qualities. A clear vision for the future. A focused passion. And the drive to realize a dream. While the talk may be easy, the execution isn't. If it were, we'd all be engineering the next smart device, making gravity-defying dunks or building a global media empire.

Seven and a half years ago, I first walked the halls of a company with its own inspiring and proven success story. As America's industrial age flourished, H.O. Hirt and O.G. Crawford saw an emerging business opportunity. Mass production and affordability would balloon the demand for automobiles—and the need for protection. Their vision became Erie Insurance. And the focus and drive of these entrepreneurs led them to join other captains of industry to position the nation as an economic world leader.

*If the founders were alive today,
you can bet we'd be watching
their YouTube videos and
following them on Twitter.*

H.O., in particular, was a pre-social media mogul. For decades, he shared his prolific, ardent and thoughtful passages in a weekly newsletter to Agents.

*The weekly Bulletin
remains the longest-running
in-house business publication
in the nation.*

H.O.'s great purpose was to bring peace of mind to people by providing the highest level of protection and service at the lowest possible cost. His disciplined execution created a success story 90 years running. ERIE has survived and thrived over a span in which other great companies have toppled under the pressures of a rapidly evolving marketplace.

This was what intrigued me as a leader—and it was the great responsibility I grasped when I became CEO. The founders' vision was now mine to carry. How would we as a company sustain this success?

Talking
about
drones.

TOM
works wherever.

You can see by our 2015 results for Indemnity, Exchange and the ERIE organization* (see insert) that we found a way to not only sustain, but also build on ERIE's track record of profitable growth. Year over year, earnings per share grew, market share in all property and casualty lines grew, direct written premium grew, and life policies and premium grew. ERIE Employees also strengthened our service reputation with their commitment of energy and their generosity within our communities.

These are just a few of our results in a very good and noteworthy year. Throughout 2015, we joyfully celebrated our 90 years in business. But it was also a poignant time for the ERIE family, as we honored the passing of two significant leaders, Board Member Susan Hirt Hagen and former CEO John Petersen* (see pages 13-14).

We also marked the year by looking beyond our nine decades, focusing our outlook and efforts toward the future. It's an exciting time for ERIE. With the support and partnership of our committed Board, a stellar leadership team, talented Employees, and a dedicated agency force, we have positioned the organization for success in the decades ahead.

Throughout my tenure, I've strived to build on ERIE's strengths while also taking decisive actions to secure our future. Along the way, I've gained a deeper awareness of the unique qualities and character of the company. In my final letter as CEO, I'd like to share some of that insight, so that you, like me, might appreciate that how we succeed at ERIE today is why we'll succeed tomorrow.

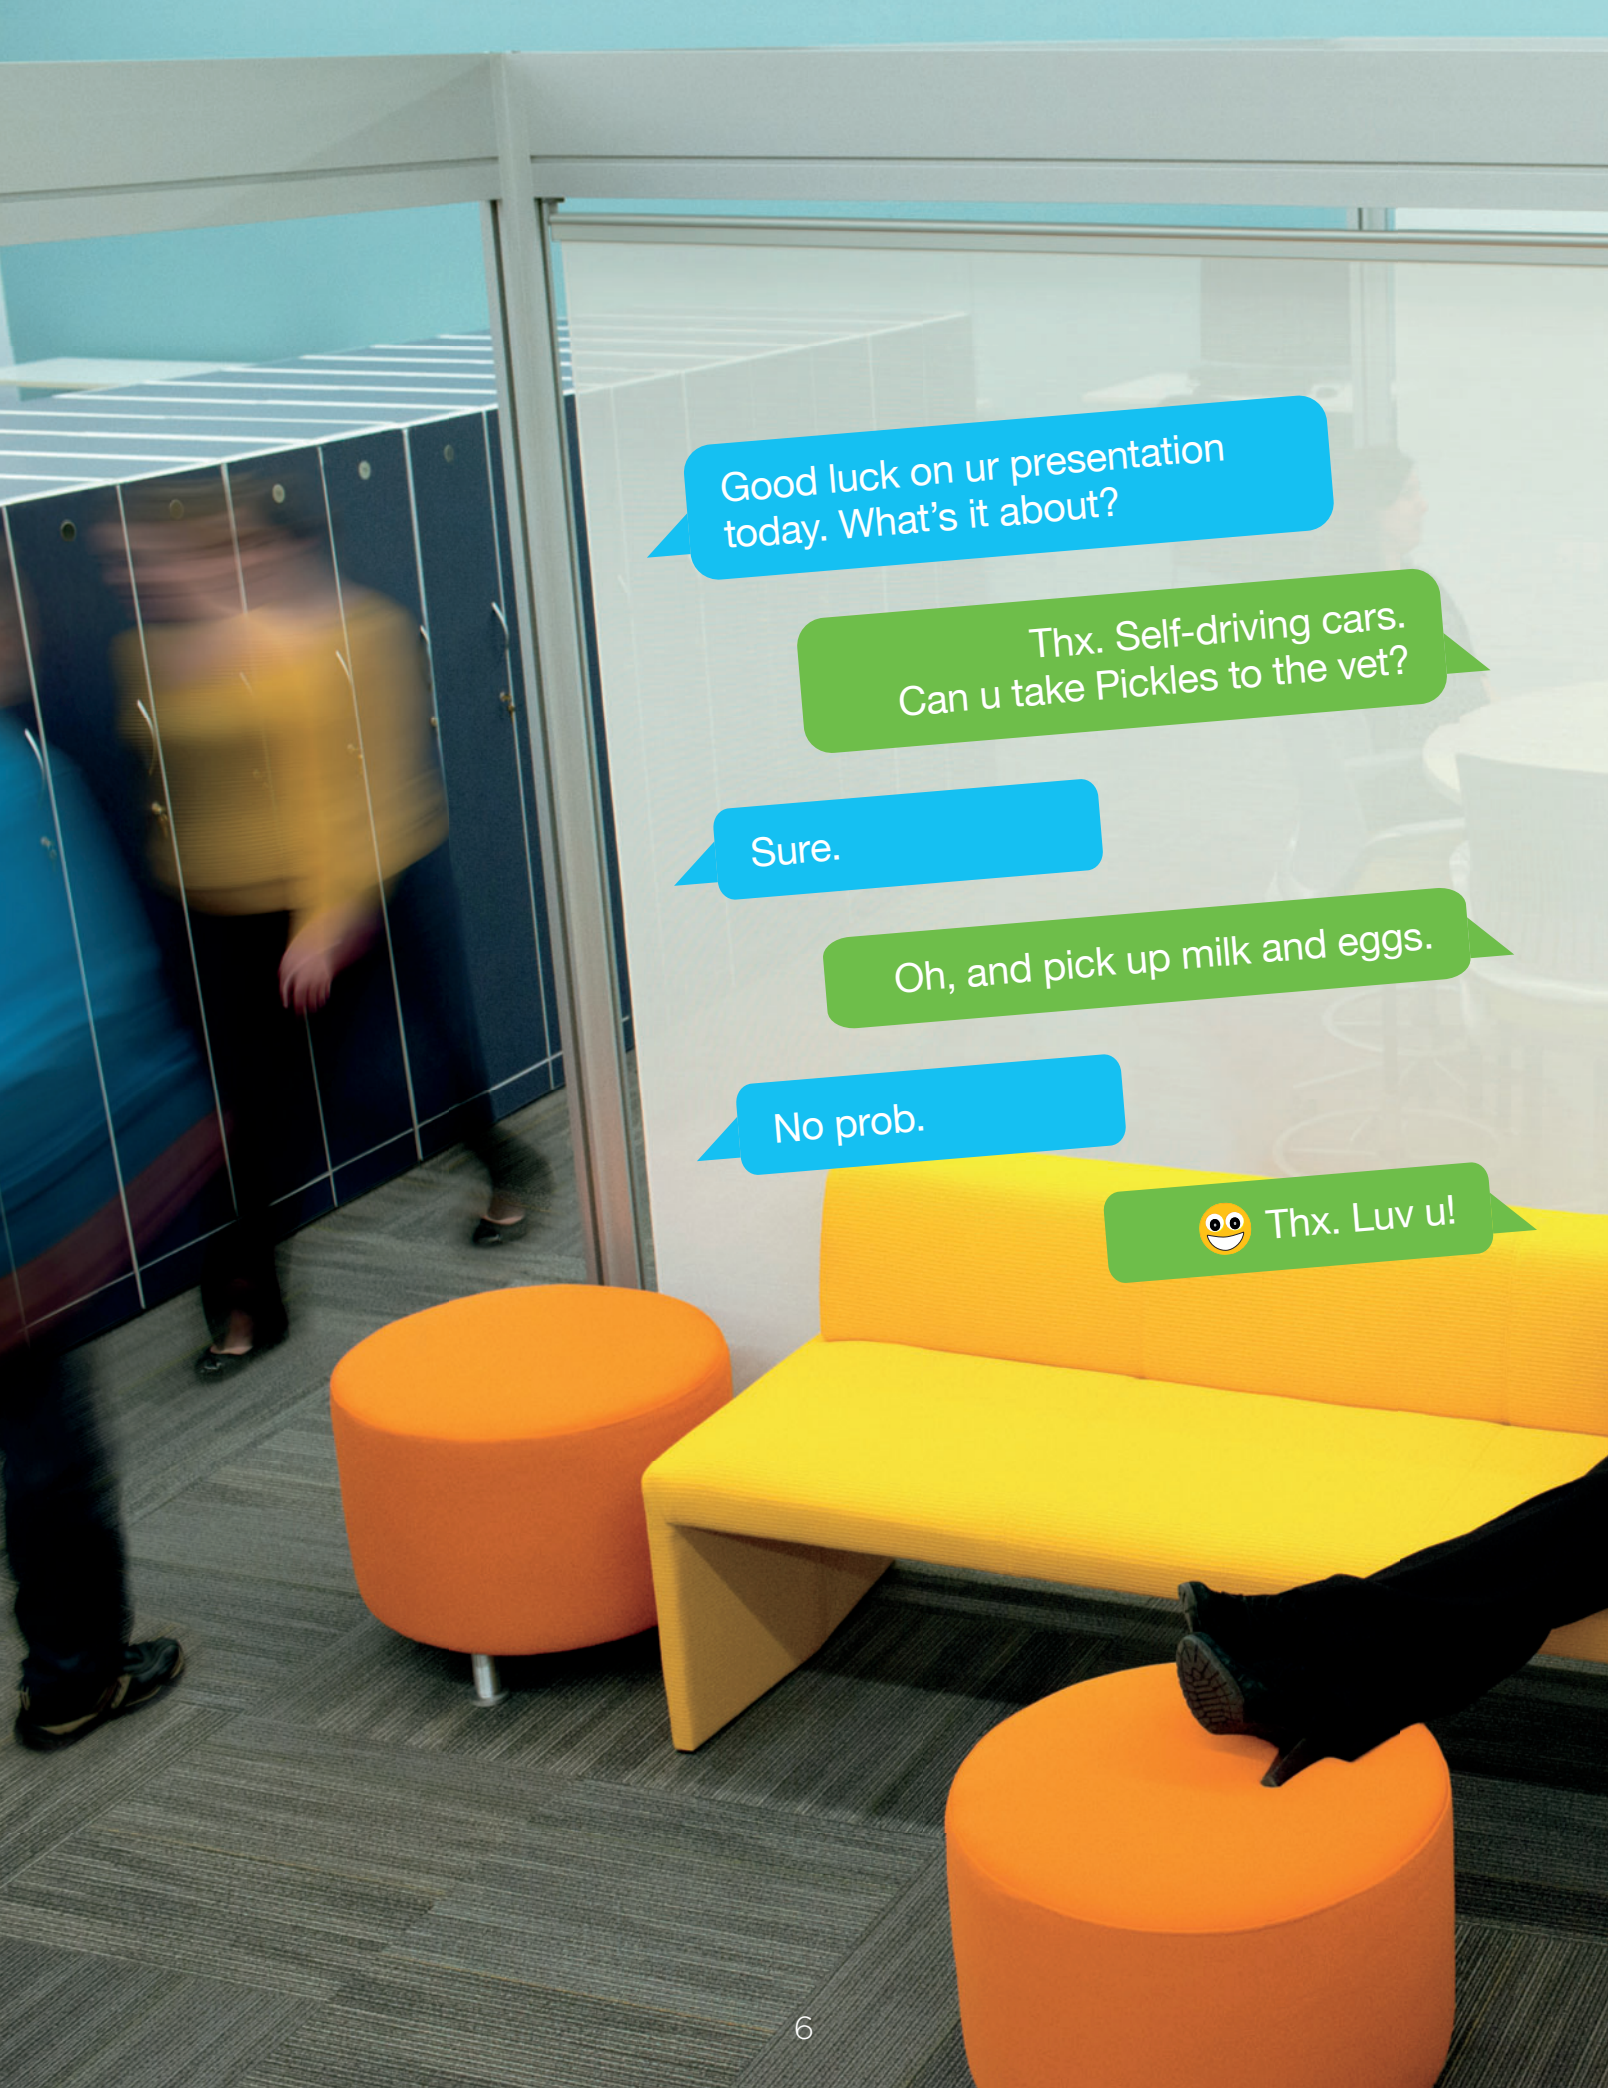

Pride of Place

When I arrived in 2008, I quickly grasped the strong connection between ERIE, the company, and its namesake, Erie, the city. This is a hard-working lake community. When you order a sandwich at a local deli or buy a newspaper from the corner store, you feel a strong sense of goodwill and pride of place. To build their business, H.O. and O.G. hired from the community. ERIE Employees were family, friends and neighbors who looked out for each other, and who were always ready to lend a helping hand. They were guided by what H.O. once described as "simple common sense mixed with just plain decency."

That spirit continues to infuse ERIE today. Across our expanding geography and enabled by technology, people get to know each other and ask about family and friends. Whether I'm heading to the Home Office café or visiting a field location,

I can hardly make my way without stopping several times to say hello and catch up on some news. It's a good feeling and a nice way to work.

And even though we now stretch across 12 states—including our newest, the commonwealth of Kentucky—we continue to hold firm to our foundational values.

Good luck on ur presentation today. What's it about?

Thx. Self-driving cars. Can u take Pickles to the vet?

Sure.

Oh, and pick up milk and eggs.

No prob.

😊 Thx. Luv u!

Shelby

eSignature + quoting platform + online marketing portal

Technology and Touch

“Never lose the human touch,” H.O. reminded his successors in a manifesto framed in my office. I placed it there when I first started as a reminder of what’s most important to us. It’s why we continue to provide insurance through our independent Agents, even as we expand our digital breadth and accelerate our virtual presence.

Some may think this approach is at odds with a world where everything we need is accessible from our desktops, our phones and now even our watches. But at ERIE, we know service and sustainability is and always will be about people, not pixels, and about meaningful conversations, not one-off posts on a web page.

The digital world has brought the global marketplace to our doorstep where everything and everyone is available all the time. But availability is not enough, anymore. It’s the experiences we—and our Agents—create for Customers that truly set us apart from other carriers.

That said, our “human touch” doesn’t mean we’re old-fashioned or techno-phobes. We continue to back our Agents by providing online tools that make their jobs easier and improve their productivity. In 2015, we introduced eSignature capability, Customer-facing social media content, and an enhanced online marketing portal. We also launched a uniquely ERIE online quoting platform that provides potential Customers a competitive quote and funnels the lead to an Agent nearby.

We developed these tools to improve the ERIE-Agent-Customer experience but not replace the personal touch. While companies around the world race to adopt the latest technology, we know there is no computer program, mathematical algorithm or offshore platform that can create the kind of lasting relationships we have at ERIE.

Powered by People

ERIE’s founders—and the leaders who followed them—have always recognized another simple truth: success is the result of not just working hard, but working smart. Vision without execution is just a dream and ERIE is a company of diligent thinkers and doers. That’s why our most important effort will always be to attract, develop and retain talent. In 2015, we continued to bolster our work force with new capabilities and new service teams to better support our consistent growth.

It’s not easy to land a job at ERIE. Applications outpace openings by more than 50 to 1. You have to demonstrate personal and career experience focused on service, technical excellence and a commitment to self-development. You need a great work ethic and an openness to other perspectives, too.

At a company steeped in tradition, there’s a new one that started here just last year. New Employees from across our footprint come to our main campus for orientation. On that first

= Agent Happiness

day, they walk out of the auditorium to a roar of applause from Employees lining a four-story atrium. It's a uniquely ERIE welcome and it speaks to just how much it means to work here.

Arguably, though, one of the more dramatic symbols of our commitment to Employees—and the service they deliver—is an impressive 2015 addition to our ERIE campus. The Technical Learning Center or “TLC” is a 54,000-square-foot facility that serves as a giant, interactive classroom. Here, Employees and Agents get an up-close look at property damage sustained to vehicles, homes and businesses. It even includes a full-size house with an attic and basement, as well as vehicle equipment stations with lifts, repair stations, wheel alignment machines and paint booths.

It's not lost on anyone here that TLC also stands for "tender, loving care." If that seems a little sentimental, so be it.

Our education, whether at the TLC or through our Learning and Development curricula, is focused, first, on caring for the Customer.

We're proud of that.

And we're proud of our history. That's not lost on anyone either, but we never want to take our foundation, our values or our success for granted. In line with our 90th anniversary celebration we opened the Erie Insurance Heritage Center in the newly restored C.F. Adams Building. It was one of ERIE's early headquarters. From his corner office, H.O. watched over and mentored some 180 Employees before building a bigger home across the street in the mid-'50s. The Heritage Center shows visitors through beautifully designed galleries and interactive videos how the vision of two men has developed over decades into a Fortune 500 company.

Always Above All

Service has been central to that vision from the start. It's one of the things that attracted me to ERIE in the first place. Our bold slogan—ERIE is Above All in SERVICE®—continues to be our earnest mantra.

But here's an insight that has truly taken hold at ERIE: You cannot be “above all” in service without always trying to find new and better ways to assist our Agents, provide for our Customers and be mindful of our Shareholders.

In 2015, we continued to demonstrate our passion for winning in the marketplace with an impressive lineup of products for both individuals and small businesses. Early in 2015, the Exchange and its property and casualty subsidiaries reached a new milestone of 5 million policies in force aided by attracting

AWESOME!

Yogesh

Rachael

Juan

How ERIE says hello!

new commercial market segments—including restaurants, pet care services and wholesalers/distributors. We also introduced new motorcycle coverage and expanded our auto insurance offerings. Concurrently, in our Life business, we enhanced our portfolio with a new suite of competitive insurance products, earning results that exceeded plan on both policies and premium.

We're reaching higher in other ways as well. We have a strategy for innovation that focuses on service and the Customer experience. This year, we were named by *Insurance Networking News* as one of the most innovative companies in the industry. This recognition reflects the relationships we're forging with Google® and other high-tech companies and affirms the new and better ways we're reaching our Customers, especially during the claims experience and in catastrophic events.

In 2015, we launched a more effective Customer-focused claims platform, put a fleet of nimble, digitally enabled catastrophe response vehicles on the road and trained Employees to pilot video-enabled drones. Together, these tools ramp up our ability to quickly and efficiently react to accidents and storms, and respond to our Customer needs at their most difficult and vulnerable times.

You can see more of the detail defining our great success this past year for both the Indemnity and the Exchange in the insert.

Future-Focused

In the past several years, I've watched as a whole new generation of Employees has joined the ERIE team, and the ERIE family. They're building on our proud tradition with an awareness and urgency that the world is changing faster than ever. Our Employees, both new and tenured, have a passion and drive like never before. I think this would make all of my predecessors proud

The vision of ERIE's first two
entrepreneurs has become
the collective ambition of
nearly 5,000 Employees and
almost 2,200 independent agencies.

They are determined to make ERIE stand out in the new global marketplace as the caring and competent insurer of choice.

Last fall, I announced I would be retiring from ERIE at year-end 2016. I'm grateful for the confidence of our Shareholders over my tenure. Your support is an important part of ERIE's steady progress. While it's a little bittersweet to be leaving at this truly invigorating time in our history, the time also feels right. I have the utmost belief in the profitable future of the Indemnity, the Exchange and the ERIE family.

I feel great about the platform of capability we've built, and I'll watch with great pride as our team of seasoned leaders takes the organization to the next level.

Over the years, I've often been asked by industry colleagues what the secret is to ERIE's success—the regional insurer that challenges and often bests its biggest rivals. I tell them there's no secret that can be described adequately in words—and I wouldn't share it if I could.

The secret lies in our DNA. It's in our bones. It's in the collective conscience formed over nine decades and passed from generation to generation at ERIE. It's in staying true to our values and our purpose.

It's in our insistence on thinking—and on execution. And it's in never losing the human touch with our Customers, our Agents, our Employees and our communities.

That's how we succeed at ERIE.
Yesterday.
Today.
Tomorrow.

In Memoriam

ERIE lost two extraordinary servant leaders in 2015 with the passing of Susan Hirt Hagen and John M. Petersen.

Susan Hirt Hagen was the only daughter of ERIE Co-founder H.O. Hirt and was the longest-serving current member of the Board of Directors at the time she passed away on June 15th.

John Petersen, ERIE's fourth president and CEO, retired in 1995 following a 33-year career with the organization. He died May 30th.

With deep gratitude, we honor their memory.

Susan Hirt Hagen 1935-2015

Susan Hirt Hagen's affiliation with The ERIE began with her birth on June 20, 1935—just a decade after the company's start. Her father, H.O. Hirt, featured her in his writings in the weekly newsletter, *The Bulletin*, referring to her as "Sister Susie."

Her formal contributions date to 1967, when H.O. named her a co-trustee of The H.O. Hirt Trusts at age 32. Susan succeeded her father on the Erie Indemnity Board of Directors in 1980, becoming the first woman to serve on the Board.

Susan was an accomplished businesswoman and a dedicated philanthropist. She helped shape the

culture at The ERIE and the culture of the community within her hometown and well beyond.

In addition to her service with ERIE's Board of Directors, Susan was a consultant in conflict management and

group relations for more than 25 years. She was managing partner of her own group relations consulting firm, Hagen, Herr & Peppin.

Susan engaged with community organizations and causes at the local, state and national levels. She maintained a lifelong interest in children and families, particularly women's issues and teenage pregnancy prevention, and in support of the arts and education.

Susan was a founding board member and principal sponsor of the Susan Hirt Hagen Center for Community Outreach, Research and Evaluation (C.O.R.E.) at Penn State Erie, The Behrend College. The center researches issues like teen pregnancy, truancy, substance abuse, depression and violence and recommends solutions.

She was also responsible for the establishment of the Susan Hirt Hagen Center for Civic and Urban Engagement at her alma mater, Wittenberg University in Springfield, Ohio.

Over the years, Susan received many honors for her efforts and achievements, including

the Edward C. Doll Award for community service from The Erie Community Foundation. She was only the 18th person to be named a Distinguished Citizen of the Commonwealth by The Pennsylvania Society, joining a prestigious list that includes Princess Grace of Monaco, Pennsylvania Supreme Court Chief Justice Samuel J. Roberts and environmentalist Rachel Carson.

Susan is survived by her husband, Tom, Chairman of ERIE's Board of Directors, son Jonathan, Board Vice Chairman and daughter Sarah McWilliams, as well as three grandchildren.

John M. Petersen

1928-2015

John Petersen returned to his hometown, Erie, in 1962, when he joined The ERIE after 10 years with General Electric Company in Connecticut. He started as ERIE's investment officer and over three decades, worked his way up the ranks to become President and CEO.

John helped lead ERIE through major advances in automation and the development of Erie Family Life, while building an impressive investment portfolio.

"John was a major contributor to The ERIE's financial success and stability. He was our Warren Buffett," said Board Chairman Tom Hagen, who worked with John and knew him for over 50 years. "He expected the best from

those around him and held everyone who worked for him to a high standard that modeled the professional expectations he had of himself."

A number of Pennsylvania educational

institutions have benefited from the philanthropy of John and his wife, Gertrude. Their legacy is a part of the landscape in Pittsburgh, where they donated \$10 million toward the construction of the John M. and Gertrude E. Petersen Events Center, known as "The Pete," at John's alma mater, the University of Pittsburgh. The gift was among the largest ever to the school and helped fund the home court for Pitt Panthers basketball.

John and his wife have three children and five grandchildren.

"Life's most persistent and urgent question is, 'What are you doing for others?'"
-Martin Luther King, Jr.

Organizational Structure

Erie Indemnity Company (Indemnity) is a publicly held Pennsylvania business corporation that has been the managing attorney-in-fact for the subscribers (policyholders) at the Erie Insurance Exchange (Exchange) since 1925. The Exchange is a subscriber-owned Pennsylvania-domiciled reciprocal insurer that writes property and casualty insurance.

Indemnity’s primary function is to perform certain services for the Exchange relating to the sales, underwriting and issuance of policies on behalf of the Exchange. This is done in accordance with a subscriber’s agreement (a limited power of attorney) executed by each subscriber (policyholder), who appoints Indemnity as their common attorney-in-fact to transact business on their behalf and manage the affairs at the Exchange.

The property and casualty and life insurance operations are owned by the Exchange, and Indemnity functions as the management company. Indemnity, the Exchange, and its subsidiaries and affiliates, operate collectively as the “Erie Insurance Group” (The ERIE®).

For the fiscal year ended December 31, 2015

OR

[] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 0-24000

ERIE INDEMNITY COMPANY

(Exact name of registrant as specified in its charter)

Pennsylvania

(State or other jurisdiction
of incorporation or organization)

25-0466020

(I.R.S. Employer
Identification No.)

100 Erie Insurance Place, Erie, Pennsylvania

(Address of principal executive offices)

16530

(Zip code)

(814) 870-2000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Class A common stock, stated value \$0.0292 per share, listed on the NASDAQ Stock Market, LLC

(Title of each class)

(Name of each exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer ☒

Accelerated Filer ☐

Non-Accelerated Filer ☐

Smaller Reporting Company ☐

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Aggregate market value of voting and non-voting common stock held by non-affiliates as of the last business day of the registrant's most recently completed second fiscal quarter: \$2.0 billion of Class A non-voting common stock as of June 30, 2015. There is no active market for the Class B voting common stock. The Class B common stock is closely held by few shareholders.

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:
46,189,068 shares of Class A common stock and 2,542 shares of Class B common stock outstanding on February 19, 2016.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of Part III of this Form 10-K (Items 10, 11, 12, 13, and 14) are incorporated by reference to the information statement on Schedule 14(C) to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2015.

PART I

ITEM 1. BUSINESS

General

Erie Indemnity Company ("Indemnity", "we", "us", "our") is a publicly held Pennsylvania business corporation that has since our incorporation in 1925 served as the attorney-in-fact for the subscribers (policyholders) at the Erie Insurance Exchange ("Exchange"). The Exchange, which also commenced business in 1925, is a Pennsylvania-domiciled, reciprocal insurer that writes property and casualty insurance. We function solely as the management company and all insurance operations are performed by the Exchange. We operate our business as one segment.

Our primary function as attorney-in-fact is to perform certain services for the Exchange relating to the sales, underwriting, and issuance of policies on behalf of the Exchange. This is done in accordance with a subscriber's agreement (a limited power of attorney) executed individually by each subscriber (policyholder), which appoints us as their common attorney-in-fact to transact certain business on their behalf and to manage the affairs of the Exchange. Pursuant to the subscriber's agreement and for our services as attorney-in-fact, we earn a management fee calculated as a percentage, not to exceed 25%, of the direct and assumed premiums written by the Exchange. The management fee rate is set annually by our Board of Directors.

Services

The services we provide to the Exchange are related to the sales, underwriting and issuance of policies. The sales related services we provide include agent compensation and certain sales and advertising support services. Agent compensation includes scheduled commissions to agents based upon premiums written as well as additional commissions and bonuses to agents, which are earned by achieving targeted measures. Agent compensation comprised approximately 67% of our 2015 expenses. The underwriting services we provide include underwriting and policy processing expenses and comprised approximately 11% of our 2015 expenses. We provide information technology services that support all functions that comprised approximately 10% of our 2015 expenses. The remaining services we provide include customer service and administrative costs.

Erie Insurance Exchange

Our primary purpose is to manage the affairs at the Exchange for the benefit of the policyholders. The Exchange is our sole customer and our earnings primarily come from management fees based on the direct and assumed premiums written by the Exchange. We have no direct competition in providing these services to the Exchange.

The Exchange generates revenue by insuring preferred and standard risks, with personal lines comprising 70% of the 2015 direct and assumed premiums written and commercial lines comprising the remaining 30%. The principal personal lines products are private passenger automobile and homeowners. The principal commercial lines products are commercial multi-peril, workers compensation and commercial automobile. Historically, due to policy renewal and sales patterns, the Exchange's direct and assumed premiums written are greater in the second and third quarters than in the first and fourth quarters of the calendar year.

The Exchange is represented by independent agencies that serve as its sole distribution channel. In addition to their principal role as salespersons, the independent agents play a significant role as underwriting and service providers and are an integral part of the Exchange's success.

Our results of operations are tied to the growth and financial condition of the Exchange. If any events occurred that impaired the Exchange's ability to grow or sustain its financial condition, including but not limited to lower financial strength ratings, significant catastrophe losses, disruption in the independent agency relationships, or products offered not meeting customer demands, the Exchange could experience difficulty retaining its existing business and attracting new business. A decline in the business of the Exchange would likely result in a reduction of total premiums paid and a corresponding decrease in the amount of the management fees we receive. We also have an exposure to a concentration of credit risk related to the unsecured receivables due from the Exchange for its management fee. See Part II, Item 8. "Financial Statements and Supplementary Data - Note 14, Concentrations of Credit Risk, of Notes to Financial Statements" contained within this report. See the risk factors related to our dependency on the growth and financial condition of the Exchange in Item 1A. "Risk Factors" contained within this report.

Competition

Our primary function is to provide management services to the Exchange as set forth in the subscriber's agreement executed by each policyholder of the Exchange. There are a limited number of companies that provide services under a reciprocal insurance

exchange structure. We do not directly compete against other such companies, given we are appointed by the policyholders of the Exchange to provide these services.

The direct and assumed premiums written by the Exchange drive our management fee which is our primary source of revenue. The property and casualty insurance industry is highly competitive. Property and casualty insurers generally compete on the basis of customer service, price, consumer recognition, coverages offered, claims handling, financial stability and geographic coverage. Vigorous competition, particularly in the personal lines automobile and homeowners lines of business, is provided by large, well-capitalized national companies, some of which have broad distribution networks of employed or captive agents, by smaller regional insurers, and by large companies who market and sell personal lines products directly to consumers. In addition, because the insurance products of the Exchange are marketed exclusively through independent insurance agents, the Exchange faces competition within its appointed agencies based upon ease of doing business, product, price, and service relationships.

Market competition bears directly on the price charged for insurance products and services subject to regulatory limitations. Industry capital levels can also significantly affect prices charged for coverage. Growth is driven by a company's ability to provide insurance services and competitive prices while maintaining target profit margins. Growth is a product of a company's ability to retain existing customers and to attract new customers, as well as movement in the average premium per policy.

The Exchange's strategic focus includes employing an underwriting philosophy and product mix targeted to produce an underwriting profit on a long-term basis through careful risk selection and rational pricing, and consistently providing superior service to policyholders and agents. The Exchange's business model is designed to provide the advantages of localized marketing and claims servicing with the economies of scale and low cost of operations from centralized support services. The Exchange also carefully selects the independent agencies that represent it and seeks to be the lead insurer with its agents in order to enhance the agency relationship and the likelihood of receiving the most desirable underwriting opportunities from its agents.

See the risk factors related to our dependency on the growth and financial condition of the Exchange in Item 1A. "Risk Factors" contained within this report for further discussion on competition in the insurance industry.

Employees

We had over 4,800 full-time employees at December 31, 2015, of which approximately 2,200, or 46%, provide claims related services exclusively for the Exchange. The Exchange reimburses us monthly for the cost of these services.

Government Regulation

Most states have enacted legislation that regulates insurance holding company systems, defined as two or more affiliated persons, one or more of which is an insurer. The Exchange has the following wholly owned property and casualty subsidiaries: Erie Insurance Company, Erie Insurance Company of New York, Erie Insurance Property and Casualty Company and Flagship City Insurance Company, and a wholly owned life insurance company, Erie Family Life Insurance Company ("EFL"). Indemnity and the Exchange, and its wholly owned subsidiaries, meet the definition of an insurance holding company system.

Each insurance company in the holding company system is required to register with the insurance supervisory authority of its state of domicile and furnish information regarding the operations of companies within the holding company system that may materially affect the operations, management, or financial condition of the insurers within the system. Pursuant to these laws, the respective insurance departments may examine us, as the management company, and the Exchange and its wholly owned subsidiaries at any time, and may require disclosure and/or prior approval of certain transactions with the insurers and us, as an insurance holding company.

All transactions within a holding company system affecting the member insurers of the holding company system must be fair and reasonable and any charges or fees for services performed must be reasonable. Approval by the applicable insurance commissioner is required prior to the consummation of transactions affecting the members within a holding company system.

Website Access

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports are available free of charge on our website at www.erieinsurance.com as soon as reasonably practicable after such material is filed electronically with the Securities Exchange Commission. Additionally, copies of our annual report on Form 10-K are available free of charge, upon written request, by contacting Investor Relations, Erie Indemnity Company, 100 Erie Insurance Place, Erie, PA 16530, or calling (800) 458-0811.

Our Code of Conduct and Code of Ethics for Senior Financial Officers are also available on our website and in printed form upon request, and our information statement on Schedule 14(C) is available free of charge on our website at www.erieinsurance.com.

ITEM 1A. RISK FACTORS

Our business involves various risks and uncertainties, including, but not limited to those discussed in this section. The risks and uncertainties described in the risk factors below, or any additional risk outside of those discussed below, could have a material adverse effect on our business, financial condition, operating results, cash flows, or liquidity if they were to develop into actual events. This information should be considered carefully together with the other information contained in this report and in other reports and materials we file periodically with the Securities and Exchange Commission.

If the management fee rate paid by the Exchange is reduced or if there is a significant decrease in the amount of direct and assumed premiums written by the Exchange, revenues and profitability could be materially adversely affected.

We are dependent upon management fees paid by the Exchange, which represent our principal source of revenue. Pursuant to the subscriber's agreements with the policyholders at the Exchange, we may retain up to 25% of all direct and assumed premiums written by the Exchange. Therefore, management fee revenue from the Exchange is calculated by multiplying the management fee rate by the direct and assumed premiums written by the Exchange. Accordingly, any reduction in direct and assumed premiums written by the Exchange would have a negative effect on our revenues and net income.

The management fee rate is determined by our Board of Directors and may not exceed 25% of the direct and assumed premiums written by the Exchange. The Board of Directors sets the management fee rate each December for the following year. At their discretion, the rate can be changed at any time. The factors considered by the Board of Directors in setting the management fee rate include our financial position in relation to the Exchange and the long-term needs of the Exchange for capital and surplus to support its continued growth and competitiveness. If the Exchange's surplus were significantly reduced, the management fee rate could be reduced and our revenues and profitability could be materially adversely affected.

If the costs of providing services to the Exchange are not controlled, our profitability could be materially adversely affected.

Pursuant to the subscriber's agreements with the policyholders at the Exchange, we are appointed to perform certain services. These services relate to the sales, underwriting, and issuance of policies on behalf of the Exchange. We incur significant costs related to commissions, employees, and technology in order to provide these services.

Commissions to independent agents are the largest component of our cost of operations. Commissions include scheduled commissions to agents based upon premiums written as well as additional commissions and bonuses to agents, which are earned by achieving certain targeted measures. Changes to commission rates or bonus programs may result in increased future costs and lower profitability.

Employees are an essential part of the operating costs related to providing services for the Exchange. As a result, our profitability is affected by employee costs, including salaries, healthcare, pension, and other benefit costs. Recent regulatory developments, provider relationships, and economic factors that are beyond our control indicate that employee healthcare costs will continue to increase. Although we actively manage these cost increases, there can be no assurance that future cost increases will not occur and reduce our profitability.

Technological development is necessary to facilitate ease of doing business for the agents and policyholders of the Exchange and our employees. If we are unable to keep pace with advancements in technology, our ability to compete may be negatively affected and result in lower revenues and reduced profitability for us. In order to achieve a greater ease of doing business, additional costs may be incurred as we invest in new technology and systems, which may negatively impact profitability.

We are subject to credit risk from the Exchange because the management fees from the Exchange are not paid immediately when premiums are written.

We recognize management fees due from the Exchange as income when the premiums are written because at that time we have performed substantially all of the services we are required to perform, including sales, underwriting, and policy issuance activities. However, such fees are not paid to us by the Exchange until the Exchange collects the premiums from policyholders. As a result, we hold receivables for management fees on premiums that have been written and assumed but not yet collected.

We also hold receivables from the Exchange for costs we pay on the Exchange's behalf. The receivable from the Exchange totaled \$348.1 million, or approximately 25% of our total assets at December 31, 2015.

Serving as the attorney-in-fact in the reciprocal insurance exchange structure results in the Exchange being our sole customer. We have an interest in the growth of the Exchange as our earnings are largely generated from management fees based on the direct and assumed premiums written by the Exchange. If the Exchange's ability to grow or renew policies were adversely impacted, the premium revenue of the Exchange would be adversely affected which would reduce our management fee revenue. The circumstances or events that might impair the Exchange's ability to grow include, but are not limited to, the items discussed below.

Unfavorable changes in economic conditions, including declining consumer confidence, inflation, high unemployment, and the threat of recession, among others, may lead the Exchange's customers to modify coverage, not renew policies, or even cancel policies, which could adversely affect the premium revenue of the Exchange, and consequently our management fee.

The Exchange faces significant competition from other regional and national insurance companies. The property and casualty insurance industry is highly competitive on the basis of product, price and service. If the Exchange's competitors offer property and casualty products with more coverage or offer lower rates, and the Exchange is unable to implement product improvements quickly enough to keep pace, its ability to grow and renew its business may be adversely impacted. Likewise, an inability to match or exceed the service provided by competitors, which is increasingly relying on digital delivery and enhanced distribution technology, may impede the Exchange's ability to maintain and/or grow its customer base. In addition, due to the Exchange's focus on the automobile and homeowners insurance markets, it may be more sensitive to trends that could affect auto and home insurance coverages and rates over time, for example changing driving patterns or advancements in vehicle or home technology or safety features.

The Exchange markets and sells its insurance products through independent, non-exclusive insurance agencies. These agencies are not obligated to sell only the Exchange's insurance products, and generally also sell products of the Exchange's competitors. If agencies do not maintain their current levels of marketing efforts, bind the Exchange to unacceptable risks, place business with competing insurers, or the Exchange is unsuccessful in maintaining and/or increasing the number of agencies in its distribution system as well as its relationships with those agencies, the Exchange's ability to grow and renew its business may be adversely impacted. Additionally, consumer preferences may cause the insurance industry as a whole to migrate to a delivery system other than independent agencies.

The Exchange maintains a brand recognized for customer service. The perceived performance, actions, conduct and behaviors of employees, independent insurance agency representatives, and third-party service partners may result in reputational harm to the Exchange's brand. Specific incidents which may cause harm include but are not limited to disputes, long customer wait times, errors in processing a claim, failure to protect sensitive customer data, and inappropriate social media communications. If third-party service providers fail to perform as anticipated, the Exchange may experience operational difficulties, increased costs and reputational damage. If an extreme catastrophic event were to occur in a heavily concentrated area of policyholders, an extraordinarily high number of claims could have the potential to strain claims processing and affect the Exchange's ability to satisfy its customers. Any reputational harm to the Exchange could have the potential to impair its ability to grow and renew its business.

Serving as the attorney-in-fact in the reciprocal insurance exchange structure results in the Exchange being our sole customer. We have an interest in the financial condition of the Exchange as our earnings are largely generated from management fees based on the direct and assumed premiums written by the Exchange. If the Exchange were to fail to maintain acceptable financial strength ratings, its competitive position in the insurance industry would be adversely affected. If a rating downgrade led to customers not renewing or canceling policies, or impacted the Exchange's ability to attract new customers, the premium revenue of the Exchange would be adversely affected which would reduce our management fee revenue. The circumstances or events that might impair the Exchange's financial condition include, but are not limited to, the items discussed below.

Financial strength ratings are an important factor in establishing the competitive position of insurance companies such as the Exchange. Higher ratings generally indicate greater financial stability and a stronger ability to meet ongoing obligations to policyholders. The Exchange's A.M. Best rating is currently A+ ("Superior"). Rating agencies periodically review insurers' ratings and change their rating criteria; therefore, the Exchange's current rating may not be maintained in the future. A significant downgrade in this or other ratings would reduce the competitive position of the Exchange, making it more difficult to attract profitable business in the highly competitive property and casualty insurance market and potentially result in reduced sales of its products and lower premium revenue.

The performance of the Exchange's investment portfolio is subject to a variety of investment risks. The Exchange's investment portfolio is comprised principally of fixed income securities, equity securities and limited partnerships. The fixed income portfolio is subject to a number of risks including, but not limited to, interest rate risk, investment credit risk, sector/concentration risk and liquidity risk. The Exchange's common stock and preferred equity securities have exposure to price risk, the risk of potential loss in estimated fair value resulting from an adverse change in prices. Limited partnerships are significantly less liquid and generally involve higher degrees of price risk than publicly traded securities. Limited partnerships, like publicly traded securities, have exposure to market volatility; but unlike fixed income securities, cash flows and return expectations are less predictable. If any investments in the Exchange's investment portfolio were to suffer a substantial decrease in value, the Exchange's financial position could be materially adversely affected through increased unrealized losses or impairments. A significant decrease in the Exchange's portfolio could also put it, or its subsidiaries, at risk of failing to satisfy regulatory or rating agency minimum capital requirements.

Property and casualty insurers are subject to extensive regulatory supervision in the states in which they do business. This regulatory oversight includes, by way of example, matters relating to licensing, examination, rate setting, market conduct, policy forms, limitations on the nature and amount of certain investments, claims practices, mandated participation in involuntary markets and guaranty funds, reserve adequacy, insurer solvency, restrictions on underwriting standards, accounting standards, and transactions between affiliates. Such regulation and supervision are primarily for the benefit and protection of policyholders. Changes in applicable insurance laws, regulations, or changes in the way regulators administer those laws or regulations could adversely change the Exchange's operating environment and increase its exposure to loss or put it at a competitive disadvantage, which could result in reduced sales of its products and lower premium revenue.

As insurance industry practices and legal, judicial, social and other environmental conditions change, unexpected and unintended issues related to claims and coverage may emerge. In some instances, these emerging issues may not become apparent for some time after the Exchange has issued the affected insurance policies. As a result, the full extent of liability under the Exchange's insurance policies may not be known for many years after the policies are issued. These issues may adversely affect the Exchange's business by either extending coverage beyond its underwriting intent or by increasing the number or size of claims.

The Exchange's insurance operations are exposed to claims arising out of catastrophes. Common natural catastrophic events include hurricanes, earthquakes, tornadoes, hail storms, and severe winter weather. The frequency and severity of these catastrophes is inherently unpredictable. Changing climate conditions have added to the unpredictability, frequency and severity of natural disasters and have created additional uncertainty as to future trends and exposures. A single catastrophic occurrence or aggregation of multiple smaller occurrences could adversely affect the financial condition of the Exchange. Terrorist attacks could also cause losses from insurance claims related to the property and casualty insurance operations. The Exchange could incur large net losses if terrorist attacks were to occur which could adversely affect its financial condition.

Our ability to attract, develop, and retain talented executives, key managers, and employees is critical to our success.

Our success is largely dependent upon our ability to attract and retain executives and other key management. The loss of the services and leadership of certain key officers and the failure to attract and develop talented new executives and managers could prevent us from successfully communicating, implementing, and executing business strategies, and therefore have a material adverse effect on our financial condition and results of operations.

Our success also depends on our ability to attract, develop, and retain a talented employee base. The inability to staff all functions of our business with employees possessing the appropriate technical expertise could have an adverse effect on our business performance. Staffing appropriately skilled employees for the handling of claims and servicing of customers, rendering of disciplined underwriting, and effective sales and marketing are critical to the core functions of our business. In addition, skilled employees in the actuarial, finance, and information technology areas are also essential to support our core functions.

If we are unable to ensure system availability, unable to secure sensitive information, or we make significant decisions based on inaccurate data, we may experience adverse financial consequences and/or may be unable to compete effectively. Our business depends on the uninterrupted operations of our facilities, systems, and business functions.

Our business is highly dependent upon the effective operations of our technology and information systems. We also conduct business functions and computer operations using the systems of third-party vendors, which may provide software, data storage, and other computer services to us. We rely upon our systems, and those of third-party vendors, to assist in key functions of core business operations including processing claims, applications, and premium payments, providing customer support, performing actuarial and financial analysis, and maintaining key data.

We necessarily collect, use, and hold data concerning individuals, businesses, strategic plans, and intellectual property. Threats to data security, including unauthorized access, cyber-attacks, and other computer related penetrations, expose us to additional costs for protection or remediation to secure our data in accordance with customer expectations and statutory and regulatory requirements, including data privacy laws. Preventative actions we take, or our third-party vendors take, to reduce the risk of cyber incidents and protect our information may be insufficient to prevent physical and electronic break-ins or other security breaches to our computer system. Additionally, a breach of security that results in unauthorized access to our data could expose us to an operational disruption, data loss, litigation, fines and penalties, increased compliance costs, and reputational damages. While we maintain cyber liability insurance to mitigate the amount of financial loss, our insurance coverage may not be sufficient to protect against all loss.

We depend on a large amount of data to price policies appropriately, track exposures, perform financial analysis, and ultimately make business decisions. Should this data be inaccurate or insufficient, risk exposure may be underestimated and/or poor business decisions may be made. This may in turn lead to adverse operational or financial performance.

We have an established business continuity plan to ensure the continuation of core business operations in the event that normal business operations could not be performed due to a catastrophic event. While we continue to test and assess our business continuity plan to ensure it meets the needs of our core business operations and addresses multiple business interruption events, there is no assurance that core business operations could be performed upon the occurrence of such an event. Systems failures or outages could compromise our ability to perform our business functions in a timely manner, which could harm our ability to conduct business and hurt our relationships with our business partners and customers. Our business continuity is also dependent on third-party systems on which our information technology systems interface and rely. Our systems and those of our third-party vendors may become vulnerable to damage or disruption due to circumstances beyond our or their control, such as from catastrophic events, power anomalies or outages, natural disasters, network failures, and viruses. The failure of our information systems for any reason could result in a material adverse effect on our business, financial condition, or results of operations.

The performance of our investment portfolio is subject to a variety of investment risks, which may in turn have a material adverse effect on our results of operations or financial condition.

Our investment portfolio is comprised principally of fixed income securities and limited partnerships. At December 31, 2015, our investment portfolio consisted of approximately 85% fixed income securities, 13% limited partnerships, and 2% equity securities.

All of our marketable securities are subject to market volatility. To the extent that future market volatility negatively impacts our investments, our financial condition will be negatively impacted. We review the investment portfolio on a continuous basis to evaluate positions that might have incurred other-than-temporary declines in value. Inherent in management's evaluation of a security are assumptions and estimates about the operations of the issuer and its future earnings potential. The primary factors considered in our review of investment valuation include the extent and duration to which fair value is less than cost, historical operating performance and financial condition of the issuer, short- and long-term prospects of the issuer and its industry, specific events that occurred affecting the issuer, including rating downgrades, and, depending on the type of security, our intent to sell or our ability and intent to retain the investment for a period of time sufficient to allow for a recovery in value. As the process for determining impairments is highly subjective, changes in our assessments may have a material effect on our operating results and financial condition. See also Item 7A. "Quantitative and Qualitative Disclosures about Market Risk".

If the fixed income, equity, or limited partnership portfolios were to suffer a substantial decrease in value, our financial position could be materially adversely affected through increased unrealized losses or impairments.

Currently, 39% of the fixed income portfolio is invested in municipal securities. The performance of the fixed income portfolio is subject to a number of risks including, but not limited to:

- Interest rate risk - the risk of adverse changes in the value of fixed income securities as a result of increases in market interest rates. A sustained low interest rate environment would pressure our net investment income.
- Investment credit risk - the risk that the value of certain investments may decrease due to the deterioration in financial condition of, or the liquidity available to, one or more issuers of those securities or, in the case of asset-backed securities, due to the deterioration of the loans or other assets that underlie the securities, which, in each case, also includes the risk of permanent loss.

- Sector/Concentration risk - the risk that the portfolio may be too heavily concentrated in the securities of one or more issuers, sectors, or industries. Events or developments that have a negative impact on any particular industry, group of related industries, or geographic region may have a greater adverse effect on our investment portfolio to the extent that the portfolio is concentrated within those issuers, sectors, or industries.
- Liquidity risk - the risk that we will not be able to convert investment securities into cash on favorable terms and on a timely basis, or that we will not be able to sell them at all, when desired. Disruptions in the financial markets or a lack of buyers for the specific securities that we are trying to sell, could prevent us from liquidating securities or cause a reduction in prices to levels that are not acceptable to us.

General economic conditions and other factors beyond our control can adversely affect the value of our equity investments and the realization of net investment income, or result in realized investment losses. In addition, downward economic trends also may have an adverse effect on our investment results by negatively impacting the business conditions and impairing credit for the issuers of securities held in their respective investment portfolios. This could reduce fair values of investments and generate significant unrealized losses or impairment charges which may adversely affect our financial results.

In addition to the fixed income securities, a portion of our portfolio is invested in limited partnerships. At December 31, 2015, we had investments in limited partnerships of \$88.5 million, or 6% of total assets. In addition, we are obligated to invest up to an additional \$19.1 million in limited partnerships, including private equity, mezzanine debt, and real estate partnership investments. Limited partnerships are significantly less liquid and generally involve higher degrees of price risk, the risk of potential loss in estimated fair value resulting from an adverse change in prices, than publicly traded securities. Limited partnerships, like publicly traded securities, have exposure to market volatility; but unlike fixed income securities, cash flows and return expectations are less predictable.

The primary basis for the valuation of limited partnership interests are financial statements prepared by the general partner. Because of the timing of the preparation and delivery of these financial statements, the use of the most recently available financial statements provided by the general partners result in a quarter delay in the inclusion of the limited partnership results in our Statements of Operations. Due to this delay, our financial statements at December 31, 2015 do not reflect market conditions experienced in the fourth quarter of 2015.

Our equity securities have exposure to price risk. We do not hedge our exposure to equity price risk inherent in our equity investments. Equity markets, sectors, industries, and individual securities may also be subject to some of the same risks that affect our fixed income portfolio, as discussed above.

Deteriorating capital and credit market conditions or a failure to accurately estimate capital needs may significantly affect our ability to meet liquidity needs and access capital.

Sufficient liquidity and capital levels are required to pay operating expenses, income taxes, and to provide the necessary resources to fund future growth opportunities, pay dividends on common stock, and repurchase common stock. Management estimates the appropriate level of capital necessary based upon current and projected results, which include a loading for potential risks. Failure to accurately estimate our capital needs may have a material adverse effect on our financial condition until additional sources of capital can be located. Further, a deteriorating financial condition may create a negative perception of us by third parties, including rating agencies, investors, agents, and customers which could impact our ability to access additional capital in the debt or equity markets.

Our primary sources of liquidity are management fees and cash flows generated from our investment portfolio. In the event our current sources do not satisfy our liquidity needs, we have the ability to access our \$100 million bank revolving line of credit, from which there were no borrowings as of December 31, 2015, or sell assets in our investment portfolio. Volatility in the financial markets could limit our ability to sell certain of our fixed income securities or, to a greater extent, our significantly less liquid limited partnership investments, or cause such investments to sell at deep discounts.

In the event these traditional sources of liquidity are not available, we may have to seek additional financing. Our access to funds will depend upon a number of factors including current market conditions, the availability of credit, market liquidity, and credit ratings. In deteriorating market conditions, there can be no assurance that we will obtain additional financing, or, if available, that the cost of financing will not substantially increase and affect our overall profitability.

We are subject to applicable insurance laws, tax statutes, and regulations, as well as claims and legal proceedings, which, if determined unfavorably, could have a material adverse effect on our business, results of operations, or financial condition.

We face a significant risk of litigation and regulatory investigations and actions in the ordinary course of operating our businesses including the risk of class action lawsuits. Our pending legal and regulatory actions include proceedings specific to us and others generally applicable to business practices in the industries in which we operate. In our operations, we are, have been, or may become subject to class actions and individual suits alleging, among other things, issues relating to sales or underwriting practices, payment of contingent or other sales commissions, product design, product disclosure, policy issuance and administration, additional premium charges for premiums paid on a periodic basis, charging excessive or impermissible fees on products, recommending unsuitable products to customers, and breaching alleged fiduciary or other duties, including our obligations to indemnify directors and officers in connection with certain legal matters. We are also subject to litigation arising out of our general business activities such as our contractual and employment relationships. Plaintiffs in class action and other lawsuits against us may seek very large or indeterminate amounts, including punitive and treble damages, which may remain unknown for substantial periods of time. We are also subject to various regulatory inquiries, such as information requests, subpoenas, and books and record examinations from state and federal regulators and authorities. Changes in the way regulators administer those laws, tax statutes, or regulations could adversely impact our business, results of operations, or financial condition.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Indemnity and the Exchange share a corporate home office complex in Erie, Pennsylvania, which comprises approximately 620,000 square feet. Additionally, we lease one office building and one warehouse facility from unaffiliated parties. We are charged rent for the related square footage we occupy.

Indemnity and the Exchange also operate 25 field offices in 12 states. Of these field offices, 16 provide both agency support and claims services and are referred to as branch offices, while seven provide only claims services and are referred to as claims offices, and two provide only agency support and are referred to as sales offices. We own three field offices and lease a portion of these buildings to the Exchange. The remaining field offices are leased from other parties as detailed below:

Field office ownership:	Number of field offices
Erie Indemnity Company	3
Erie Insurance Exchange	3
Erie Family Life Insurance Company	1
Unaffiliated parties ⁽¹⁾	18
	<u>25</u>

(1) Lease commitments for these properties expire periodically through 2020. We expect that most leases will be renewed or replaced upon expiration.

ITEM 3. LEGAL PROCEEDINGS

State Court Lawsuit Against Erie Indemnity Company

Erie Indemnity Company (“Indemnity”) was named as a defendant in a complaint filed on August 1, 2012 by alleged subscribers of the Erie Insurance Exchange (the “Exchange”) in the Court of Common Pleas Civil Division of Fayette County, Pennsylvania captioned Erie Insurance Exchange, an unincorporated association, by Joseph S. Sullivan and Anita Sullivan, Patricia R. Beltz, and Jenna L. DeBord, trustees ad litem v. Erie Indemnity Co. (the “Sullivan” lawsuit).

As subsequently amended, the complaint alleges that, beginning on September 1, 1997, Indemnity retained “Service Charges” (installment fees) and “Added Service Charges” (late fees and policy reinstatement charges) on policies written by the Exchange and its insurance subsidiaries, which allegedly should have been paid to the Exchange, in the amount of approximately \$308 million. In addition to their claim for monetary relief on behalf of the Exchange, the plaintiffs seek an accounting of all so-called intercompany transactions between Indemnity and the Exchange from 1996 to date. Plaintiffs allege that Indemnity breached its contractual, fiduciary, and equitable duties by retaining Service Charges and Added Service Charges that should have been retained by the Exchange. Plaintiffs bring these same claims under three separate derivative-type theories. First, plaintiffs purport to bring suit as members of the Exchange on behalf of the Exchange. Second, plaintiffs purport to bring suit as trustees ad litem on behalf of the Exchange. Third, plaintiffs purport to bring suit on behalf of the Exchange pursuant to Rule 1506 of the Pennsylvania Rules of Civil Procedure, which allows shareholders to bring suit derivatively on behalf of a corporation or similar entity.

Indemnity filed a motion in the state court in November 2012 seeking dismissal of the lawsuit. On December 19, 2013, the court granted Indemnity’s motion in part, holding that the Pennsylvania Insurance Holding Company Act “provides the [Pennsylvania Insurance] Department with special competence to address the subject matter of plaintiff’s claims” and referring “all issues” in the Sullivan lawsuit to the Pennsylvania Insurance Department (the “Department”) for “its views and any determination.” The court stayed all further proceedings and reserved decision on all other grounds for dismissal raised by Indemnity. Plaintiffs sought reconsideration of the court’s order, and on January 13, 2014, the court entered a revised order affirming its prior order and clarifying that the Department “shall decide any and all issues within its jurisdiction.” On January 30, 2014, Plaintiffs asked the court to certify its order to permit an immediate appeal to the Superior Court of Pennsylvania and to stay any proceedings in the Department pending completion of any appeal. On February 18, 2014, the court issued an order denying Plaintiffs’ motion. On March 20, 2014, Plaintiffs filed a petition for review with the Superior Court, which was denied by the Superior Court on May 5, 2014.

The Sullivan matter was assigned to an Administrative Judge within the Department for determination. The parties agreed that an evidentiary hearing was not required and they entered into a stipulated record and submitted briefing to the Department. Oral argument was held before the Administrative Judge on January 6, 2015. On April 29, 2015, the Department issued a declaratory opinion and order (1) finding that the transactions between Exchange and Indemnity in which Indemnity retained or received revenue from installment and other service charges from Exchange subscribers complied with applicable insurance laws and regulations and that Indemnity properly retained charges paid by Exchange policyholders for certain installment premium payment plans, dishonored payments, policy cancellations and policy reinstatements and (2) returning jurisdiction for the matter to the Fayette County Court of Common Pleas.

On May 26, 2015, Plaintiffs appealed the Department’s decision to the Pennsylvania Commonwealth Court. Oral argument was held before the Commonwealth Court *en banc* on December 9, 2015. On January 27, 2016, the Commonwealth Court issued an opinion vacating the Department’s ruling and directing the Department to return the case to the Court of Common Pleas, essentially holding that the primary jurisdiction referral of the trial court was improper at this time because the allegations of the complaint do not implicate the special competency of the Department. Indemnity is permitted to file a petition for allowance of appeal to the Pennsylvania Supreme Court seeking further review of the Commonwealth Court opinion. Such a filing currently would be due on February 26, 2016.

Indemnity believes that it continues to have meritorious legal and factual defenses to the Sullivan lawsuit and intends to vigorously defend against all allegations and requests for relief.

Federal Court Lawsuit Against Directors

On February 6, 2013, a lawsuit was filed in the United States District Court for the Western District of Pennsylvania, captioned Erie Insurance Exchange, an unincorporated association, by members Patricia R. Beltz, Joseph S. Sullivan and Anita Sullivan, and Patricia R. Beltz, on behalf of herself and others similarly situated v. Richard L. Stover; J. Ralph Borneman, Jr; Terrence W. Cavanaugh; Jonathan Hirt Hagen; Susan Hirt Hagen; Thomas B. Hagen; C. Scott Hartz; Claude C. Lilly, III; Lucian L. Morrison; Thomas W. Palmer; Martin P. Sheffield; Elizabeth H. Vorsheck; and Robert C. Wilburn (the “Beltz” lawsuit), by alleged policyholders of the Exchange who are also the plaintiffs in the Sullivan lawsuit. The individuals named as defendants in the Beltz lawsuit were the then-current Directors of Indemnity.

As subsequently amended, the Beltz lawsuit asserts many of the same allegations and claims for monetary relief as in the Sullivan lawsuit. Plaintiffs purport to sue on behalf of all policyholders of the Exchange, or, alternatively, on behalf of the Exchange itself. Indemnity filed a motion to intervene as a Party Defendant in the Beltz lawsuit in July 2013, and the Directors filed a motion to dismiss the lawsuit in August 2013. On February 10, 2014, the court entered an order granting Indemnity’s motion to intervene and permitting Indemnity to join the Directors’ motion to dismiss; granting in part the Directors’ motion to dismiss; referring the matter to the Department to decide any and all issues within its jurisdiction; denying all other relief sought in the Directors’ motion as moot; and dismissing the case without prejudice. To avoid duplicative proceedings and expedite the Department’s review, the Parties stipulated that only the Sullivan action would proceed before the Department and any final and non-appealable determinations made by the Department in the Sullivan action will be applied to the Beltz action.

On March 7, 2014, Plaintiffs filed a notice of appeal to the United States Court of Appeals for the Third Circuit. Indemnity filed a motion to dismiss the appeal on March 26, 2014. On November 17, 2014, the Third Circuit deferred ruling on Indemnity’s motion to dismiss the appeal and instructed the parties to address that motion, as well as the merits of Plaintiffs’ appeal, in the parties’ briefing. Briefing was completed on April 2, 2015. In light of the Department’s April 29, 2015 decision in Sullivan, the Parties then jointly requested that the Beltz appeal be voluntarily dismissed as moot on June 5, 2015. The Third Circuit did not rule on the Parties’ request for dismissal and instead held oral argument as scheduled on June 8, 2015. On July 16, 2015, the Third Circuit issued an opinion and judgment dismissing the appeal. The Third Circuit found that it lacked appellate jurisdiction over the appeal, because the District Court’s February 10, 2014 order referring the matter to the Department was not a final, appealable order.

Indemnity believes that it has meritorious legal and factual defenses and intends to vigorously defend against all allegations and requests for relief in the Beltz lawsuit. The Directors have also advised Indemnity that they intend to vigorously defend against the claims in the Beltz lawsuit and have sought indemnification and advancement of expenses from the Company in connection with the Beltz lawsuit.

For additional information on contingencies, see Part II, Item 8. "Financial Statements and Supplementary Data - Note 15, Commitment and Contingencies, of Notes to Financial Statements".

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock Market Prices and Dividends

Our Class A, non-voting common stock trades on The NASDAQ Stock MarketSM LLC under the symbol "ERIE". No established trading market exists for the Class B voting common stock. American Stock Transfer & Trust Company serves as our transfer agent and registrar. As of February 19, 2016, there were approximately 715 beneficial shareholders of record for the Class A non-voting common stock and 9 beneficial shareholders of record for the Class B voting common stock.

Historically, we have declared and paid cash dividends on a quarterly basis at the discretion of the Board of Directors. The payment and amount of future dividends on the common stock will be determined by the Board of Directors and will depend upon, among other things, our operating results, financial condition, cash requirements, and general business conditions at the time such payment is considered. The common stock high and low sales prices and cash dividends declared for each full quarter of the last two years were as follows:

Quarter ended	2015				2014			
	Stock sales price		Cash dividend declared		Stock sales price		Cash dividend declared	
	High	Low	Class A	Class B	High	Low	Class A	Class B
March 31	\$ 93.01	\$ 84.11	\$ 0.681	\$ 102.15	\$ 74.57	\$ 66.63	\$ 0.635	\$ 95.25
June 30	87.15	80.02	0.681	102.15	76.71	68.72	0.635	95.25
September 30	87.82	79.79	0.681	102.15	78.48	72.63	0.635	95.25
December 31	100.56	81.37	0.730	109.50	93.35	75.72	0.681	102.15
Total			<u>\$ 2.773</u>	<u>\$ 415.95</u>			<u>\$ 2.586</u>	<u>\$ 387.90</u>

Stock Performance

The following graph depicts the cumulative total shareholder return, assuming reinvestment of dividends, for the periods indicated for our Class A common stock compared to the Standard & Poor's 500 Stock Index and the Standard & Poor's Supercomposite Insurance Industry Group Index. The Standard & Poor's Supercomposite Insurance Industry Group Index is made up of 55 constituent members represented by property and casualty insurers, insurance brokers, and life insurers, and is a capitalization weighted index.

	2010	2011	2012	2013	2014	2015
Erie Indemnity Company Class A common stock	\$ 100 ⁽¹⁾	\$ 123	\$ 116	\$ 126	\$ 160	\$ 175
Standard & Poor's 500 Stock Index	100 ⁽¹⁾	102	118	156	177	180
Standard & Poor's Supercomposite Insurance Industry Group Index	100 ⁽¹⁾	93	111	161	175	181

(1) Assumes \$100 invested at the close of trading, on the last trading day preceding the first day of the fifth preceding fiscal year, in our Class A common stock, the Standard & Poor's 500 Stock Index, and the Standard & Poor's Supercomposite Insurance Industry Group Index.

Issuer Purchases of Equity Securities

We may purchase shares, from time-to-time, in the open market, through trading plans entered into with one or more brokerage firms pursuant to Rule 10b5-1 under the Securities Exchange Act of 1934, or through privately negotiated transactions. The purchase of shares is dependent upon prevailing market conditions and alternate uses of capital, and at times and in a manner that is deemed appropriate.

Our Board of Directors authorized a stock repurchase program effective January 1, 1999, allowing the repurchase of our outstanding Class A nonvoting common stock. Various approvals for continuation of this program have since been authorized, with the most recent occurring in October 2011 for \$150 million, which was authorized with no time limitation. There were no repurchases of our Class A common stock under this program during the quarter ending December 31, 2015. We had approximately \$17.8 million of repurchase authority remaining under this program, based upon trade date, at both December 31, 2015 and February 19, 2016.

See Part II, Item 8. "Financial Statements and Supplementary Data – Note 11, Capital Stock, of Notes to Financial Statements" contained within this report for discussion of additional shares repurchased outside of this program.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of financial condition and results of operations highlights significant factors influencing Erie Indemnity Company ("Indemnity", "we", "us", "our"). This discussion should be read in conjunction with the audited financial statements and related notes and all other items contained within this Annual Report on Form 10-K as these contain important information helpful in evaluating our financial condition and results of operations.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

"Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995:

Statements contained herein that are not historical fact are forward-looking statements and, as such, are subject to risks and uncertainties that could cause actual events and results to differ, perhaps materially, from those discussed herein. Forward-looking statements relate to future trends, events or results and include, without limitation, statements and assumptions on which such statements are based that are related to our plans, strategies, objectives, expectations, intentions, and adequacy of resources. Examples of forward-looking statements are discussions relating to premium and investment income, expenses, operating results, and compliance with contractual and regulatory requirements. Forward-looking statements are not guarantees of future performance and involve risks and uncertainties that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Among the risks and uncertainties, in addition to those set forth in our filings with the Securities and Exchange Commission, that could cause actual results and future events to differ from those set forth or contemplated in the forward-looking statements include the following:

- dependence upon our relationship with the Exchange and the management fee under the agreement with the subscribers at the Exchange;
- costs of providing services to the Exchange under the subscriber's agreement;
- credit risk from the Exchange;
- dependence upon our relationship with the Exchange and the growth of the Exchange, including:
 - general business and economic conditions;
 - factors affecting insurance industry competition;
 - dependence upon the independent agency system; and
 - ability to maintain our reputation for customer service;
- dependence upon our relationship with the Exchange and the financial condition of the Exchange, including:
 - the Exchange's ability to maintain acceptable financial strength ratings;
 - factors affecting the quality and liquidity of the Exchange's investment portfolio;
 - changes in government regulation of the insurance industry;
 - emerging claims and coverage issues in the industry; and
 - severe weather conditions or other catastrophic losses, including terrorism;
- ability to attract and retain talented management and employees;
- ability to maintain uninterrupted business operations;
- factors affecting the quality and liquidity of our investment portfolio;

- our ability to meet liquidity needs and access capital; and
- outcome of pending and potential litigation.

A forward-looking statement speaks only as of the date on which it is made and reflects our analysis only as of that date. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changes in assumptions, or otherwise.

RETROSPECTIVELY ADOPTED ACCOUNTING STANDARDS

In February 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-02, Consolidation, which changed the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. This guidance changed the conditions to be met in determining if a reporting entity has a variable interest in a legal entity. In accordance with the new accounting guidance, Indemnity is not deemed to have a variable interest in the Exchange as the fees paid for services provided to the Exchange no longer represent a variable interest. The compensation received from the attorney-in-fact fee arrangement with the subscribers is for services provided by Indemnity acting in its role as attorney-in-fact and is commensurate with the level of effort required to perform those services. Under the previously issued accounting guidance, Indemnity was deemed to have a variable interest and was the primary beneficiary of the Exchange and its financial position and operating results were consolidated with Indemnity. Following adoption of the new accounting guidance, the Exchange's results are no longer required to be consolidated with Indemnity.

Indemnity adopted the new accounting standard on a retrospective basis effective with the annual reporting period ending December 31, 2015. The 2014 and 2013 financial information within this report has been conformed to the presentation in accordance with the amended guidance.

RECENT ACCOUNTING STANDARDS

See Part II, Item 8. "Financial Statements and Supplementary Data - Note 2, Significant Accounting Policies, of Notes to Financial Statements" contained within this report for a discussion of adopted and other recently issued accounting standards, none of which had or are expected to have a material impact on our future financial condition, results of operations or cash flows.

OPERATING OVERVIEW

Overview

We are a Pennsylvania business corporation that since 1925 has been the managing attorney-in-fact for the subscribers (policyholders) at the Erie Insurance Exchange ("Exchange"), a reciprocal insurer that writes property and casualty insurance. Our primary function is to perform certain services relating to the sales, underwriting and issuance of policies on behalf of the Exchange. We operate our business as one segment.

The Exchange is a reciprocal insurance exchange organized under Article X of Pennsylvania's Insurance Company Law of 1921 under which individuals, partnerships, and corporations are authorized to exchange reciprocal or inter-insurance contracts with each other, or with individuals, partnerships, and corporations of other states and countries, providing indemnity among themselves from any loss which may be insured against under any provision of the insurance laws except life insurance. Each applicant for insurance to the Exchange signs a subscriber's agreement, which contains an appointment of Indemnity as their attorney-in-fact to transact the business of the Exchange on their behalf.

Pursuant to the subscriber's agreement and for its services as attorney-in-fact, we earn a management fee calculated as a percentage of the direct and assumed premiums written by the Exchange.

Our earnings are primarily driven by the management fee revenue generated for the services we provide relating to certain sales, underwriting, and issuance of policies for the Exchange. Management fee revenue is based upon all direct and assumed premiums written by the Exchange and the management fee rate, which is not to exceed 25%. Our Board of Directors establishes the management fee rate at least annually, generally in December for the following year, and considers factors such as the relative financial strength of Indemnity and the Exchange and projected revenue streams. The management fee rate was set at 25% for 2015, 2014 and 2013. Our Board of Directors set the 2016 management fee rate again at 25%, its maximum level.

The services we provide to the Exchange are related to the sales, underwriting and issuance of policies. The sales related services we provide include agent compensation and certain sales and advertising support services. Agent compensation includes scheduled commissions to agents based upon premiums written as well as additional commissions and bonuses to agents, which are earned by achieving targeted measures. Agent compensation comprised approximately 67% of our 2015 expenses. The underwriting services we provide include underwriting and policy processing expenses and comprised approximately 11% of our 2015 expenses. We provide information technology services that support all functions that comprised approximately 10% of our 2015 expenses. The remaining services we provide include customer service and administrative costs.

Our results of operations are tied to the growth and financial condition of the Exchange as the Exchange is our sole customer and our earnings are largely generated from management fees based on the direct and assumed premiums written by the Exchange. The Exchange generates revenue by insuring preferred and standard risks, with personal lines comprising 70% of the 2015 direct and assumed written premiums and commercial lines comprising the remaining 30%. The principal personal lines products are private passenger automobile and homeowners. The principal commercial lines products are commercial multi-peril, workers compensation and commercial automobile.

We generate investment income from our fixed maturity, equity security, and limited partnership investment portfolios. Our portfolio is managed with the objective of maximizing after-tax returns on a risk-adjusted basis. We actively evaluate the portfolios for impairments, and record impairment write-downs on investments in instances where the fair value of the investment is substantially below cost, and it is concluded that the decline in fair value is other-than-temporary, which includes consideration for intent to sell.

Financial Overview

(dollars in thousands, except per share data)

	Years ended December 31,					
	2015	% Change	2014	% Change	2013	
Total operating revenue	\$ 1,505,508	7.0 %	\$ 1,407,119	8.5 %	\$ 1,297,331	
Total operating expenses	1,272,967	7.5	1,184,272	8.8	1,087,995	
Net revenue from operations	232,541	4.3	222,847	6.5	209,336	
Total investment income	33,708	18.6	28,417	(23.8)	37,278	
Income before income taxes	266,249	6.0	251,264	1.9	246,614	
Income tax expense	91,571	9.3	83,759	(0.3)	84,003	
Net income	<u>\$ 174,678</u>	4.3 %	<u>\$ 167,505</u>	3.0 %	<u>\$ 162,611</u>	
Net income per share - diluted	<u>\$ 3.33</u>	4.5 %	<u>\$ 3.18</u>	3.5 %	<u>\$ 3.08</u>	

Total operating revenue increased 7.0% and 8.5% in 2015 and 2014, respectively, driven by the increase in management fee revenue. The two components of management fee revenue are the management fee rate we charge, and the direct and assumed premiums written by the Exchange. The management fee rate was 25% for both 2015 and 2014. The direct and assumed premiums written by the Exchange were \$5.9 billion in 2015 and \$5.5 billion in 2014.

Total operating expenses increased 7.5% and 8.8% in 2015 and 2014, respectively. The increase in operating expenses was driven primarily by increases in commissions and personnel costs.

Gross margin from operations decreased slightly to 15.4% in 2015 from 15.8% in 2014.

Total investment income increased 18.6% in 2015 primarily due to higher earnings from limited partnership investments.

Reconciliation of Operating Income to Net Income

We disclose operating income, a non-GAAP financial measure, to enhance our investors' understanding of our performance. Our method of calculating this measure may differ from those used by other companies, and therefore comparability may be limited.

We define operating income as net income excluding realized capital gains and losses, impairment losses, and related federal income taxes.

We use operating income to evaluate the results of our operations. It reveals trends that may be obscured by the net effects of realized capital gains and losses including impairment losses. Realized capital gains and losses, including impairment losses,

may vary significantly between periods and are generally driven by business decisions and economic developments such as capital market conditions which are not related to our ongoing operations. We are aware that the price to earnings multiple commonly used by investors as a forward-looking valuation technique uses operating income as the denominator. Operating income should not be considered as a substitute for net income prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and does not reflect our overall profitability.

The following table reconciles operating income and net income for the years ended December 31:

(in thousands, except per share data)

	2015	2014	2013
Operating income	\$ 175,371	\$ 166,886	\$ 162,248
Net realized (losses) gains and impairments on investments	(1,066)	952	557
Income tax benefit (expense)	373	(333)	(194)
Realized (losses) gains and impairments, net of income taxes	(693)	619	363
Net income	\$ 174,678	\$ 167,505	\$ 162,611
Per Class A common share-diluted:			
Operating income	\$ 3.34	\$ 3.17	\$ 3.07
Net realized (losses) gains and impairments on investments	(0.02)	0.02	0.01
Income tax benefit (expense)	0.01	(0.01)	0.00
Realized (losses) gains and impairments, net of income taxes	(0.01)	0.01	0.01
Net income	\$ 3.33	\$ 3.18	\$ 3.08

General Conditions and Trends Affecting Our Business

Economic conditions

Unfavorable changes in economic conditions, including declining consumer confidence, inflation, high unemployment, and the threat of recession, among others, may lead the Exchange's customers to modify coverage, not renew policies, or even cancel policies, which could adversely affect the premium revenue of the Exchange, and consequently our management fee. Further, unanticipated increased inflation costs including medical cost inflation, construction and auto repair cost inflation, and tort issues may impact the estimated loss reserves and future premium rates. If any of these items impacted the financial condition or continuing operations of the Exchange, it could have an impact on our financial results.

Financial market volatility

Our portfolio of fixed maturity, equity security, and limited partnership investments is subject to market volatility especially in periods of instability in the worldwide financial markets. Over time, net investment income could also be impacted by volatility and by the general level of interest rates, which impact reinvested cash flow from the portfolio and business operations. Depending upon market conditions, which are unpredictable and remain uncertain, considerable fluctuation could exist in the fair value of our investment portfolio and reported total investment income, which could have an adverse impact on our financial condition, results of operations, and cash flows.

CRITICAL ACCOUNTING ESTIMATES

The financial statements include amounts based upon estimates and assumptions that have a significant effect on reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period and related disclosures. We consider an accounting estimate to be critical if 1) it requires assumptions to be made that were uncertain at the time the estimate was made, and 2) different estimates that could have been used, or changes in the estimate that are likely to occur from period-to-period, could have a material impact on our Statements of Operations or Financial Position.

The following presents a discussion of those accounting policies surrounding estimates that we believe are the most critical to our reported amounts and require the most subjective and complex judgment. If actual events differ significantly from the underlying assumptions, there could be material adjustments to prior estimates that could potentially adversely affect our results of operations, financial condition, and cash flows. The estimates and the estimating methods used are reviewed continually, and any adjustments considered necessary are reflected in current earnings.

Investment Valuation

Available-for-sale securities

We make estimates concerning the valuation of all investments. Valuation techniques are used to derive the fair value of the available-for-sale securities we hold. Fair value is the price that would be received to sell an asset in an orderly transaction between willing market participants at the measurement date.

Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our view of market assumptions in the absence of observable market information. We utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

For purposes of determining whether the market is active or inactive, the classification of a financial instrument is based upon the following definitions:

- An active market is one in which transactions for the assets being valued occur with sufficient frequency and volume to provide reliable pricing information.
- An inactive (illiquid) market is one in which there are few and infrequent transactions, where the prices are not current, price quotations vary substantially, and/or there is little information publicly available for the asset being valued.

We continually assess whether or not an active market exists for all of our investments and as of each reporting date re-evaluate the classification in the fair value hierarchy. All assets carried at fair value are classified and disclosed in one of the following three categories:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 – Unobservable inputs for the asset or liability.

Level 1 includes nonredeemable preferred stock and exchange traded funds, and reflects market data obtained from independent sources, such as prices obtained from an exchange or a nationally recognized pricing service for identical instruments in active markets.

Level 2 includes those financial instruments that are valued using industry-standard models that consider various inputs, such as the interest rate and credit spread for the underlying financial instruments. All significant inputs are observable, or derived from observable information in the marketplace, or are supported by observable levels at which transactions are executed in the marketplace. Financial instruments in this category primarily include corporate bonds, municipal bonds, structured securities, redeemable preferred stock and certain nonredeemable preferred stock.

Level 3 securities are valued based upon unobservable inputs, reflecting our estimates of value based upon assumptions used by market participants. Securities are assigned to Level 3 in cases where non-binding broker quotes are significant to the valuation and there is a lack of transparency as to whether these quotes are based upon information that is observable in the marketplace. Fair value estimates for securities valued using unobservable inputs require significant judgment due to the illiquid nature of the market for these securities and represent the best estimate of the fair value that would occur in an orderly transaction between willing market participants at the measurement date under current market conditions. Fair value for these securities are generally determined using comparable securities or non-binding broker quotes received from outside broker dealers based upon security type and market conditions. Remaining securities, where a price is not available, are valued using an estimate of fair value based upon indicative market prices that include significant unobservable inputs not based upon, nor corroborated by, market information, including the utilization of discounted cash flow analyses which have been risk-adjusted to take into account illiquidity and other market factors. This category primarily consists of collateralized debt obligations priced using non-binding broker quotes.

As of each reporting period, financial instruments recorded at fair value are classified based upon the lowest level of input that is significant to the fair value measurement. The presence of at least one unobservable input would result in classification as a Level 3 instrument. Our assessment of the significance of a particular input to the fair value measurement requires judgment,

and considers factors specific to the asset, such as the relative impact on the fair value as a result of including a particular input and market conditions. We did not make any other significant judgments except as described above.

Estimates of fair values for our investment portfolio are obtained primarily from a nationally recognized pricing service. Our Level 1 category includes those securities valued using an exchange traded price provided by the pricing service. The methodologies used by the pricing service that support a Level 2 classification of a financial instrument include multiple verifiable, observable inputs including benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data. Pricing service valuations for Level 3 securities are based upon proprietary models and are used when observable inputs are not available in illiquid markets. In limited circumstances we adjust the price received from the pricing service when, in our judgment, a better reflection of fair value is available based upon corroborating information and our knowledge and monitoring of market conditions such as a disparity in price of comparable securities and/or non-binding broker quotes. In other circumstances, certain securities are internally priced because prices are not provided by the pricing service.

We perform continuous reviews of the prices obtained from the pricing service. This includes evaluating the methodology and inputs used by the pricing service to ensure we determine the proper classification level of the financial instrument. Price variances, including large periodic changes, are investigated and corroborated by market data. We have reviewed the pricing methodologies of our pricing service as well as other observable inputs, such as benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and transaction volumes, and believe that the prices adequately consider market activity in determining fair value. Our review process continues to evolve based upon accounting guidance and requirements.

When a price from the pricing service is not available, values are determined by obtaining non-binding broker quotes and/or market comparables. When available, we obtain multiple quotes for the same security. The ultimate value for these securities is determined based upon our best estimate of fair value using corroborating market information. Our evaluation includes the consideration of benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data.

Other-than-temporary impairments

Investments are evaluated monthly for other-than-temporary impairment loss. Some factors considered in evaluating whether or not a decline in fair value is other-than-temporary include:

- the extent and duration for which fair value is less than cost;
- historical operating performance and financial condition of the issuer;
- short- and long-term prospects of the issuer and its industry based upon analysts' recommendations;
- specific events that occurred affecting the issuer, including rating downgrades;
- intent to sell or more likely than not we would be required to sell (debt securities); and
- ability and intent to retain the investment for a period of time sufficient to allow for a recovery in value (equity securities).

For available-for-sale equity securities, a charge is recorded in the Statements of Operations for positions that have experienced other-than-temporary impairments. For debt securities in which we do not expect full recovery of amortized cost, the security is deemed to be credit-impaired. Credit-related impairments and impairments on securities we intend to sell or more likely than not will be required to sell are recorded in the Statements of Operations. It is our intention to sell all debt securities with credit impairments.

Limited partnerships

The primary basis for the valuation of limited partnership interests is financial statements prepared by the general partner. Because of the timing of the preparation and delivery of these financial statements, the use of the most recently available financial statements provided by the general partners generally result in a quarter delay in the inclusion of the limited partnership results in our Statements of Operations. Due to this delay, these financial statements do not reflect the market conditions experienced in the fourth quarter of 2015.

The majority of our limited partnership holdings are considered investment companies where the general partners record assets at fair value. These limited partnerships are recorded using the equity method of accounting. We also own some real estate limited partnerships that do not meet the criteria of an investment company. These partnerships prepare audited financial statements on a cost basis. We have elected to report these limited partnerships under the fair value option, which is based on the net asset value (NAV) from our partner's capital statement reflecting the general partner's estimate of fair value for the

fund's underlying assets. Fair value provides consistency in the evaluation and financial reporting for these limited partnerships and limited partnerships accounted for under the equity method.

We have three types of limited partnership investments: private equity, mezzanine debt, and real estate. Our private equity and mezzanine debt partnerships are diversified among numerous industries and geographies to minimize potential loss exposure. Nearly all of the underlying investments in our limited partnerships are valued using a source other than quoted prices in active markets. The fair value amounts for our private equity and mezzanine debt partnerships are based upon the financial statements prepared by the general partners, who use various methods to estimate fair value including the market approach, income approach, and the cost approach. The market approach uses prices and other pertinent information from market-generated transactions involving identical or comparable assets or liabilities. Such valuation techniques often use market multiples derived from a set of comparables. The income approach uses valuation techniques to convert future cash flows or earnings to a single discounted present value amount. The measurement is based upon the value indicated by current market expectations about those future amounts. The cost approach is derived from the amount that is currently required to replace the service capacity of an asset. If information becomes available that would impair the cost of investments owned by the partnerships, then the general partner would adjust the investments to the net realizable value.

The fair value of investments in real estate limited partnerships is determined by the general partner based upon independent appraisals and/or internal valuations. Real estate projects under development are generally valued at cost and impairment tested by the general partner. We minimize the risk of market decline by avoiding concentration in a particular geographic area and are diversified across residential, commercial, industrial, and retail real estate investments.

While we perform various procedures in review of the general partners' valuations, we rely on the general partners' financial statements as the best available information to record our share of the partnership unrealized gains and losses resulting from valuation changes. Due to the limited market for these investments, there is the greatest potential for variability. We survey each of the general partners quarterly about expected significant changes (plus or minus 10% compared to previous quarter) to valuations prior to the release of the fund's quarterly and annual financial statements. Based upon that information from the general partner, we consider whether additional disclosure is warranted. We analyze limited partnerships measured at fair value based upon NAV to determine if the most recently available NAV reflects fair value at the balance sheet date, with an adjustment being made where appropriate (change of plus or minus 5% compared to most recent NAV.)

Retirement Benefit Plans for Employees

Our pension plans consist of a noncontributory defined benefit pension plan covering substantially all employees and an unfunded supplemental employee retirement plan ("SERP") for certain members of executive and senior management. Although we are the sponsor of these postretirement plans and record the funded status of these plans, the Exchange reimburses us for approximately 57% of the annual benefit expense of these plans, which represents pension benefits for our employees performing claims and life insurance functions.

Our pension obligation is developed from actuarial estimates. Several statistical and other factors, which attempt to anticipate future events, are used in calculating the expense and liability related to the plans. Key factors include assumptions about the discount rates and expected rates of return on plan assets. We review these assumptions annually and modify them considering historical experience, current market conditions, including changes in investment returns and interest rates and expected future trends.

Accumulated and projected benefit obligations are expressed as the present value of future cash payments. We discount those cash payments based upon a yield curve developed from corporate bond yield information with maturities that correspond to the payment of benefits. Lower discount rates increase present values and subsequent year pension expense, while higher discount rates decrease present values and subsequent year pension expense. The construction of the yield curve is based upon yields of corporate bonds rated Aa quality. Target yields are developed from bonds at various maturity points and a curve is fitted to those targets. Spot rates (zero coupon bond yields) are developed from the yield curve and used to discount benefit payment amounts associated with each future year. The present value of plan benefits is calculated by applying the spot/ discount rates to projected benefit cash flows. A single discount rate is then developed to produce the same present value. The cash flows from the yield curve were matched against our projected benefit payments in the pension plan, which have a duration of about 19 years. This yield curve supported the selection of a 4.57% discount rate for the projected benefit obligation at December 31, 2015 and for the 2016 pension expense. The same methodology was used to develop the 4.17% and 5.11% discount rates used to determine the projected benefit obligation for 2014 and 2013, respectively, and the pension expense for 2015 and 2014, respectively. A 25 basis point decrease in the discount rate assumption, with other assumptions held constant, would increase pension cost in the following year by \$3.5 million and would increase the pension benefit obligation by \$33.0 million.

Unrecognized actuarial gains and losses arise from several factors, including experience and assumption changes in the obligations and from the difference between expected returns and actual returns on plan assets. These unrecognized gains and losses are recorded in the pension plan obligation and accumulated other comprehensive income (loss) on the Statements of Financial Position. These amounts are systematically recognized to net periodic pension expense in future periods, with gains decreasing and losses increasing future pension expense. If actuarial net gains or losses exceed 5% of the greater of the projected benefit obligation and the market-related value of plan assets, the excess is recognized through the net periodic pension expense equally over the estimated service period of the employee group, which is currently 14 years.

The expected long-term rate of return for the pension plan represents the average rate of return to be earned on plan assets over the period the benefits included in the benefit obligation are to be paid. The expected long-term rate of return is less susceptible to annual revisions, as there are typically no significant changes in the asset mix. To determine the expected long-term rate of return assumption, we utilized models based upon rigorous historical analysis and forward-looking views of the financial markets based upon key factors such as historical returns for the asset class' applicable indices, the correlations of the asset classes under various market conditions and consensus views on future real economic growth and inflation. The expected future return for each asset class is then combined by considering correlations between asset classes and the volatilities of each asset class to produce a reasonable range of asset return results within which our expected long-term rate of return assumption falls. A change of 25 basis points in the expected long-term rate of return assumption, with other assumptions held constant, would have an estimated \$1.4 million impact on net pension benefit cost in the following year, of which our share would be approximately \$0.6 million.

We use a four year averaging method to determine the market-related value of plan assets, which is used to determine the expected return component of pension expense. Under this methodology, asset gains or losses that result from returns that differ from our long-term rate of return assumption are recognized in the market-related value of assets on a level basis over a four year period. The market-related asset experience during 2015 that related to the actual investment return being different from that assumed during the prior year was a loss of \$37.0 million. Recognition of this loss will be deferred and recognized over a four year period, consistent with the market-related asset value methodology. Once factored into the market-related asset value, these experience gains and losses will be amortized over a period of 14 years, which is the remaining service period of the employee group.

Estimates of fair values of the pension plan assets are obtained primarily from our trustee and custodian of our pension plan. Our Level 1 category includes a money market fund that is a mutual fund for which the fair value is determined using an exchange traded price provided by the trustee and custodian. Our Level 2 category includes commingled pools. Estimates of fair values for securities held by our commingled pools are obtained primarily from the trustee and custodian. The methodologies used by the trustee and custodian that support a financial instrument Level 2 classification include multiple verifiable, observable inputs including benchmark yields, reported trades, broker/dealer quotes, issuers spreads, two-sided markets, benchmark securities, bids, offers, and reference data. There were no Level 3 investments in 2015 or 2014.

We expect our net pension benefit costs to decrease from \$40.0 million in 2015 to \$30.0 million in 2016. This decrease is primarily due to the higher discount rate and the mortality tables being updated with two additional years of mortality data, partially offset by less than expected asset returns in 2015. Our share of the net pension benefit costs after reimbursements will decrease from \$17.8 million in 2015 to approximately \$12.9 million in 2016.

The actuarial assumptions we used in determining our pension obligation may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates, or longer or shorter life spans of participants. While we believe that the assumptions used are appropriate, differences in actual experience or changes in assumptions may materially affect our financial position, results of operations, or cash flows. See Part II, Item 8. "Financial Statements and Supplementary Data - Note 8, Postretirement Benefits, of Notes to Financial Statements" contained within this report for additional details on the pension plans.

RESULTS OF OPERATIONS

We earn management fee revenue from providing services relating to the sales, underwriting, and issuance of policies on behalf of the Exchange as a result of its attorney-in-fact relationship. A summary of the financial results of these operations is as follows:

	Years ended December 31,				
	2015	% Change	2014	% Change	2013
Management fee revenue, net	\$ 1,475,511	7.2 %	\$ 1,376,190	8.7 %	\$ 1,266,401
Service agreement revenue	29,997	(3.0)	30,929	NM	30,930
Total operating revenue	1,505,508	7.0	1,407,119	8.5	1,297,331
Total operating expenses	1,272,967	7.5	1,184,272	8.8	1,087,995
Net revenue from operations	<u>\$ 232,541</u>	4.3 %	<u>\$ 222,847</u>	6.5 %	<u>\$ 209,336</u>
Gross margin	<u>15.4%</u>	(0.4) pts.	<u>15.8%</u>	(0.3) pts.	<u>16.1%</u>

NM = not meaningful

Management fee revenue

Management fee revenue is based upon all direct and assumed premiums written by the Exchange and the management fee rate, which is determined by our Board of Directors at least annually. Management fee revenue is calculated by multiplying the management fee rate by the direct and assumed premiums written by the Exchange. The following table presents the calculation of management fee revenue:

	Years ended December 31,				
	2015	% Change	2014	% Change	2013
Direct and assumed premiums written by the Exchange	\$ 5,914,045	7.3 %	\$ 5,513,962	8.6 %	\$ 5,076,003
Management fee rate	25%		25%		25%
Management fee revenue, gross	1,478,511	7.3	1,378,490	8.6	1,269,001
Change in allowance for management fee returned on cancelled policies ⁽¹⁾	(3,000)	NM	(2,300)	NM	(2,600)
Management fee revenue, net of allowance	<u>\$ 1,475,511</u>	7.2 %	<u>\$ 1,376,190</u>	8.7 %	<u>\$ 1,266,401</u>

NM = not meaningful

(1) Management fees are returned to the Exchange when policies are cancelled mid-term and unearned premiums are refunded. We record an estimated allowance for management fees returned on mid-term policy cancellations.

Direct and assumed premiums written by the Exchange

Direct and assumed premiums include premiums written directly by the Exchange and premiums assumed from its wholly owned property and casualty subsidiaries. Direct and assumed premiums written by the Exchange increased 7.3% to \$5.9 billion in 2015, from \$5.5 billion in 2014, driven by an increase in policies in force and increases in average premium per policy. Year-over-year policies in force for all lines of business increased by 3.6% in 2015 as the result of continuing strong policyholder retention and an increase in new policies written, compared to 4.3% in 2014. The year-over-year average premium per policy for all lines of business increased 3.5% at December 31, 2015, compared to 4.2% at December 31, 2014.

Premiums generated from new business increased 3.9% to \$722 million in 2015, compared to 5.8%, or \$695 million, in 2014. Underlying the trend in new business premiums was a 2.3% increase in new business policies written in 2015, compared to 2.9% in 2014, while the year-over-year average premium per policy on new business increased 1.6% at December 31, 2015, compared to 2.9% at December 31, 2014.

Premiums generated from renewal business increased 7.7% to \$5.2 billion in 2015, compared to 9.0%, or \$4.8 billion, in 2014. Underlying the trend in renewal business premiums were increases in average premium per policy and steady policy retention ratios. The renewal business year-over-year average premium per policy increased 3.8% at December 31, 2015, compared to 4.3% at December 31, 2014.

The Exchange implemented rate increases in 2015, 2014, and 2013 in order to meet loss cost expectations. As the Exchange writes policies with annual terms only, rate actions take 12 months to be fully recognized in written premium and 24 months to

be fully recognized in earned premiums. Since rate changes are realized at renewal, it takes 12 months to implement a rate change to all policyholders and another 12 months to earn the increased or decreased premiums in full. As a result, certain rate actions approved in 2014 were reflected in 2015, and recent rate actions in 2015 will be reflected in 2016. The Exchange continuously evaluates pricing and product offerings to meet consumer demands.

Personal lines – Total personal lines premiums written increased 6.5% to \$4.2 billion in 2015, from \$3.9 billion in 2014, driven by an increase of 3.7% in total personal lines policies in force and an increase of 2.7% in the total personal lines year-over-year average premium per policy.

Commercial lines – Total commercial lines premiums written increased 9.1%, to \$1.8 billion in 2015, from \$1.6 billion in 2014, driven by a 2.9% increase in total commercial lines policies in force and a 6.0% increase in the total commercial lines year-over-year average premium per policy.

Future trends-premium revenue – The Exchange plans to continue its efforts to grow premiums and improve its competitive position in the marketplace. Expanding the size of its agency force through a careful agency selection process and increased market penetration in our existing operating territories will contribute to future growth as existing and new agents build their books of business.

Changes in premium levels attributable to the growth in policies in force directly affects the profitability of the Exchange and has a direct bearing on our management fee. The Exchange's continued focus on underwriting discipline and the maturing of our pricing sophistication models has contributed to its growth in new policies in force, steady policy retention ratios, and increased average premium per policy. The continued growth of its policy base is dependent upon the Exchange's ability to retain existing policyholders and attract new policyholders. A lack of new policy growth or the inability to retain existing customers could have an adverse effect on the Exchange's premium level growth, and consequently our management fee.

Changes in premium levels attributable to rate changes also directly affect the profitability of the Exchange and have a direct bearing on our management fee. Pricing actions contemplated or taken by the Exchange are subject to various regulatory requirements of the states in which it operates. The pricing actions already implemented, or to be implemented, have an effect on the market competitiveness of the Exchange's insurance products. Such pricing actions, and those of the Exchange's competitors, could affect the ability of the Exchange's agents to retain and attract new business. We expect the Exchange's pricing actions to result in a net increase in direct written premium in 2016; however, exposure reductions and/or changes in mix of business as a result of economic conditions could impact the average premium written and assumed by the Exchange, as customers may reduce coverages.

Management fee rate

The management fee rate was set at 25%, the maximum rate, for 2015, 2014 and 2013. The management fee rate for 2016 was set at 25% by our Board of Directors. Changes in the management fee rate can affect our revenue and net income significantly. See also, the "Transactions/Agreements with Related Parties" section within this report.

Change in allowance for management fee returned on cancelled policies

Management fees are returned to the Exchange when policyholders cancel their insurance coverage mid-term and unearned premiums are refunded to them. We maintain an allowance for management fees returned on mid-year policy cancellations that recognizes the management fee anticipated to be returned to the Exchange based on historical mid-term cancellation experience. Our cash flows are unaffected by the recording of this allowance.

Service agreement revenue

Service agreement revenue includes service charges we collect from policyholders for providing extended payment terms on policies written and assumed by the Exchange and late payment and policy reinstatement fees. The service charges are fixed dollar amounts per billed installment. Service agreement revenue totaled \$30.0 million in 2015 and \$30.9 million in 2014 and 2013. The consistency in the service agreement revenue compared to the growth in policies in force reflects the continued shift in policies to the monthly direct debit payment plan, which does not incur service charges, and the no-fee single payment plan, which offers a premium discount. The shift to these plans is driven by the consumers' desire to avoid paying service charges and to take advantage of the discount in pricing offered for paid-in-full policies.

Cost of management operations

(dollars in thousands)	Years ended December 31,				
	2015	% Change	2014	% Change	2013
<i>Commissions:</i>					
Total commissions	<u>\$ 847,880</u>	8.3 %	<u>\$ 783,017</u>	10.3 %	<u>\$ 710,058</u>
<i>Non-commission expense:</i>					
Underwriting and policy processing	\$ 134,837	6.4	\$ 126,779	5.8	\$ 119,777
Information technology	123,362	1.9	121,094	12.5	107,605
Sales and advertising	64,403	6.7	60,334	2.1	59,079
Customer service	29,325	10.6	26,522	18.4	22,397
Administrative and other	<u>73,160</u>	10.0	<u>66,526</u>	(3.7)	<u>69,079</u>
Total non-commission expense	<u>425,087</u>	5.9	<u>401,255</u>	6.2	<u>377,937</u>
Total cost of management operations	<u>\$ 1,272,967</u>	7.5 %	<u>\$ 1,184,272</u>	8.8 %	<u>\$ 1,087,995</u>

Commissions – Commissions increased \$64.9 million in 2015 compared to 2014, and increased \$73.0 million in 2014 compared to 2013, primarily as a result of the 7.3% and 8.6% respective increases in direct and assumed premiums written by the Exchange, while approximately one-quarter of the respective increases for the years ended December 31, 2015 and 2014 was due to higher agent incentive costs primarily related to profitable growth.

Non-commission expense – Non-commission expense increased \$23.8 million in 2015 compared to 2014. Underwriting and policy processing costs increased \$8.0 million due to increased personnel and postage costs. Information technology costs increased \$2.3 million primarily due to hardware and software costs. Sales and advertising costs increased \$4.1 million primarily due to personnel costs. Customer service costs increased \$2.8 million due to an increase in personnel costs and credit card processing fees. Administrative and other costs increased \$6.6 million due to personnel costs and professional fees. Personnel costs in all expense categories were impacted by increased pension and medical costs, and increased estimates for incentive plan compensation costs related to underwriting performance.

In 2014, compared to 2013, non-commission expense increased \$23.3 million. Underwriting and policy processing costs increased \$7.0 million due to the increased cost of underwriting reports, postage, and printing costs related to increased volume. Information technology costs increased \$13.5 million, which included \$6.1 million of professional fees, \$3.9 million of personnel costs, and \$3.5 million of hardware and software costs. Customer service costs increased \$4.1 million due to an increase of \$2.1 million in credit card processing fees and \$2.0 million in personnel costs. All other operating costs decreased \$1.3 million.

Gross margin

The gross margin in 2015 was 15.4%, compared to 15.8% in 2014 and 16.1% in 2013.

Total Investment Income

A summary of the results of our investment operations is as follows for the years ended December 31:

(dollars in thousands)	2015		2014		2013
		% Change		% Change	
Net investment income	\$ 17,791	7.6%	\$ 16,536	10.0 %	\$ 15,027
Net realized investment gains	492	(53.4)	1,057	11.8	945
Net impairment losses recognized in earnings	(1,558)	NM	(105)	NM	(388)
Equity in earnings of limited partnerships	<u>16,983</u>	55.4	<u>10,929</u>	(49.6)	<u>21,694</u>
Total investment income	<u>\$33,708</u>	18.6%	<u>\$28,417</u>	(23.8)%	<u>\$37,278</u>

NM = not meaningful

Net investment income

Net investment income primarily includes interest and dividends on our fixed maturity and equity security portfolios.

Net investment income increased by \$1.3 million in 2015, compared to 2014, and increased by \$1.5 million in 2014, compared to 2013. The increases in net investment income in both 2015 and 2014 were primarily attributable to income from fixed maturity investments, reflecting higher invested balances and higher investment yields.

Net realized investment gains

A breakdown of our net realized investment gains (losses) is as follows for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Securities sold:			
Fixed maturities	\$ (193)	\$ 120	\$ 847
Equity securities	685	937	98
Total net realized gains ⁽¹⁾	<u>\$ 492</u>	<u>\$ 1,057</u>	<u>\$ 945</u>

(1) See Part II, Item 8. "Financial Statements and Supplementary Data – Note 5, Investments, of Notes to Financial Statements" contained within this report for additional disclosures regarding net realized investment gains (losses).

Net realized investment gains and losses include gains and losses resulting from the sales of our fixed maturity or equity securities.

Net realized gains were \$0.5 million in 2015, compared to gains of \$1.1 million in 2014 and \$0.9 million in 2013. Net realized gains in 2015 were due to gains from sales of nonredeemable preferred stock, which were partially offset by losses from sales of fixed maturities. Net realized gains were primarily attributable to gains from sales of equity securities in 2014, and gains from sales of fixed maturity securities in 2013.

Net impairment losses recognized in earnings

Net impairment losses recognized in earnings were \$1.6 million in 2015, compared to \$0.1 million in 2014, and \$0.4 million in 2013. Net impairment losses recognized in earnings in 2015 were primarily due to several securities in an unrealized loss position where we determined the loss was other-than-temporary based on credit factors. Impairment losses were also recognized in 2015 on securities in an unrealized loss position that we intended to sell prior to an expected recovery to our cost basis.

Equity in earnings of limited partnerships

The components of equity in earnings of limited partnerships are as follows for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Private equity	\$ 12,169	\$ 4,060	\$ 6,377
Mezzanine debt	1,788	1,882	2,761
Real estate	3,026	4,987	12,556
Total equity in earnings of limited partnerships	<u>\$ 16,983</u>	<u>\$ 10,929</u>	<u>\$ 21,694</u>

Limited partnership earnings pertain to investments in U.S. and foreign private equity, mezzanine debt, and real estate partnerships. Valuation adjustments are recorded to reflect the changes in fair value of the underlying investments held by the limited partnerships. These adjustments are recorded as a component of equity in earnings of limited partnerships in the Statements of Operations.

Limited partnership earnings tend to be cyclical based upon market conditions, the age of the partnership, and the nature of the investments. Generally, limited partnership earnings are recorded on a quarter lag from financial statements we receive from our general partners. As a consequence, earnings from limited partnerships reported at December 31, 2015 reflect investment valuation changes resulting from the financial markets and the economy for the twelve month period ending September 30, 2015.

Equity in earnings of limited partnerships increased by \$6.1 million in 2015, compared to 2014, and decreased by \$10.8 million in 2014, compared to 2013. The increase in earnings in 2015 was due to higher earnings from private equity investments that were partially offset by lower earnings from real estate investments. The decrease in earnings in 2014 was the result of lower earnings from each investment sector.

Financial Condition of Erie Insurance Exchange

Serving in the capacity of attorney-in-fact for the Exchange, we are dependent on the growth and financial condition of the Exchange, who is our sole customer. The strength of the Exchange and its wholly owned subsidiaries is rated annually by A.M. Best Company. Higher ratings of insurance companies generally indicate financial stability and a strong ability to pay claims. The ratings are generally based upon factors relevant to policyholders and are not directed toward return to investors. The Exchange and each of its property and casualty subsidiaries are rated A+ "Superior". The outlook for the financial strength rating is stable. According to A.M. Best, this second highest financial strength rating category is assigned to those companies that, in A.M. Best's opinion, have achieved superior overall performance when compared to the standards established by A.M. Best and have a superior ability to meet obligations to policyholders over the long term. Only 11.0% of insurance groups are rated A+ or higher, and the Exchange is included in that group.

The financial statements of the Exchange are prepared in accordance with statutory accounting principles prescribed by the Commonwealth of Pennsylvania. Financial statements prepared under statutory accounting principles focus on the solvency of the insurer and generally provide a more conservative approach than under GAAP. Statutory direct written premiums of the Exchange and its wholly owned property and casualty subsidiaries grew 7.3% to \$5.9 billion in 2015 from \$5.5 billion in 2014. These premiums, along with investment income, are the major sources of cash that support the operations of the Exchange. Policyholders' surplus, determined under statutory accounting principles was \$7.1 billion and \$6.8 billion at December 31, 2015 and 2014, respectively. The Exchange and its wholly owned property and casualty subsidiaries' year-over-year policy retention ratio continues to be high at 89.9% at December 31, 2015 and 90.3% at December 31, 2014.

FINANCIAL CONDITION

Investments

Our investment portfolio is managed with the objective of maximizing after-tax returns on a risk-adjusted basis.

Distribution of investments

	Carrying value at December 31,			
	2015	% to total	2014	% to total
(dollars in thousands)				
Fixed maturities	\$ 587,209	85 %	\$ 564,540	80 %
Equity securities:				
Preferred stock	0	0	12,541	2
Common stock	12,732	2	12,689	2
Limited partnerships:				
Private equity	48,397	7	51,379	7

Real estate	27,437	4	47,260	7
Real estate mortgage loans	333	0	490	0
Total investments	\$ 688,809	100 %	\$ 702,877	100 %

We continually review our investment portfolio to evaluate positions that might incur other-than-temporary declines in value. We record impairment write-downs on investments in instances where the fair value of the investment is substantially below cost, and we conclude that the decline in fair value is other-than-temporary, which includes consideration for intent to sell. For all investment holdings, general economic conditions and/or conditions specifically affecting the underlying issuer or its industry, including downgrades by the major rating agencies, are considered in evaluating impairment in value. In addition to specific factors, other factors considered in our review of investment valuation are the length of time the fair value is below cost and the amount the fair value is below cost.

We individually analyze all positions with emphasis on those that have, in our opinion, declined significantly below cost. In compliance with impairment guidance for debt securities, we perform further analysis to determine if a credit-related impairment has occurred. Some of the factors considered in determining whether a debt security is credit impaired include potential for the default of interest and/or principal, level of subordination, collateral of the issue, compliance with financial covenants, credit ratings and industry conditions. We have the intent to sell all credit-impaired debt securities; therefore, the entire amount of the impairment charges are included in earnings and no impairments are recorded in other comprehensive income. For available-for-sale equity securities, a charge is recorded in the Statements of Operations for positions that have experienced other-than-temporary impairments. (See the "Total Investment Income" section herein for further information.)

We believe our investment valuation philosophy and accounting practices result in appropriate and timely measurement of value and recognition of impairment.

Fixed maturities

Under our investment strategy, we maintain a fixed maturity portfolio that is of high quality and well diversified within each market sector. This investment strategy also achieves a balanced maturity schedule. Our fixed maturity portfolio is managed with the goal of achieving reasonable returns while limiting exposure to risk. Our municipal bond portfolio accounts for \$231.8 million, or 39%, of the total fixed maturity portfolio at December 31, 2015. The overall credit rating of the municipal portfolio without consideration of the underlying insurance is AA+.

Fixed maturities classified as available-for-sale are carried at fair value with unrealized gains and losses, net of deferred taxes, included in shareholders' equity. Net unrealized gains on fixed maturities, net of deferred taxes, amounted to \$3.4 million at December 31, 2015, compared to \$6.2 million at December 31, 2014.

The following table presents a breakdown of the fair value of our fixed maturity portfolio by sector and rating as of December 31, 2015: ⁽¹⁾

(in thousands)

Industry Sector	AAA	AA	A	BBB	Non-investment grade	Fair value
Indemnity						
Basic materials	\$ 0	\$ 0	\$ 1,965	\$ 3,016	\$ 2,901	\$ 7,882
Communications	0	0	2,008	18,584	12,473	33,065
Consumer	0	0	7,126	22,638	36,139	65,903
Diversified	0	0	0	0	235	235
Energy	0	0	3,565	7,739	3,657	14,961
Financial	0	2,102	27,599	46,801	12,297	88,799

Utilities	0	0	8,169	3,002	1,319	12,490
Total	\$ 144,695	\$ 140,109	\$ 87,805	\$ 126,441	\$ 88,159	\$ 587,209

(1) Ratings are supplied by S&P, Moody's, and Fitch. The table is based upon the lowest rating for each security.

(2) Structured securities include residential mortgage-backed securities, commercial mortgage-backed securities, collateralized debt obligations, and asset-backed securities.

Equity securities

Our equity securities consist of common stock and nonredeemable preferred stock. Investment characteristics of common stock and nonredeemable preferred stock differ from one another. Our nonredeemable preferred stock portfolio provides a source of current income that is competitive with investment-grade bonds.

The following table presents an analysis of the fair value of our preferred and common stock securities by sector at December 31:

(in thousands)

Industry sector	2015		2014	
	Preferred stock	Common stock	Preferred stock	Common stock
Communications	\$ 0	\$ 0	\$ 1,251	\$ 0
Financial	0	0	6,964	0
Funds ⁽¹⁾	0	12,732	0	12,689
Utilities	0	0	4,326	0
Total	\$ 0	\$ 12,732	\$ 12,541	\$ 12,689

(1) Includes certain exchange traded funds with underlying holdings of fixed maturity securities. These securities meet the criteria of a common stock under U.S. GAAP, and are included on the balance sheet as available-for-sale equity securities.

Equity securities classified as available-for-sale include preferred and certain common stock securities, and are carried at fair value on the Statements of Financial Position with all changes in unrealized gains and losses reflected in other comprehensive income. The net unrealized loss on equity securities classified as available-for-sale, net of deferred taxes, was \$0.1 million at December 31, 2015, compared to a net unrealized gain of \$0.6 million at December 31, 2014.

During 2015, we sold our preferred stock portfolio to fund purchases of additional fixed maturity investments.

Limited partnerships

In 2015, investments in limited partnerships decreased from the investment levels at December 31, 2014. Changes in partnership values are a function of contributions and distributions, adjusted for market value changes in the underlying investments. The decrease in limited partnership investments was due to net distributions received from the partnerships which were partially offset by increases in underlying asset values. We have made no new limited partnership commitments since 2006, and the balance of limited partnership investments is expected to decline over time as additional distributions are received. The results from our limited partnerships are based upon financial statements received from our general partners, which are generally received on a quarter lag. As a result, the market values and earnings recorded at December 31, 2015 reflect the partnership activity experienced during the twelve month period ending September 30, 2015.

Shareholders' Equity

Postretirement benefit plans

The funded status of our postretirement benefit plans is recognized in the Statements of Financial Position, with a corresponding adjustment to accumulated other comprehensive income, net of tax. At December 31, 2015, shareholders' equity amounts related to these postretirement plans increased by \$25.1 million, net of tax, of which \$9.4 million represents amortization of the prior service cost and net actuarial loss and \$15.7 million represents the current period actuarial gain. The 2015 actuarial gain was primarily due to the change in the discount rate assumption used to measure the future benefit obligations to 4.57% in 2015, from 4.17% in 2014. At December 31, 2014, shareholders' equity amounts related to these postretirement plans decreased by \$59.4 million, net of tax, of which \$4.4 million represents amortization of the prior service cost and net actuarial loss and \$63.8 million represents the current period actuarial loss. The 2014 actuarial loss was primarily due to the change in the discount rate assumption used to measure the future benefit obligations to 4.17% in 2014, from 5.11% in 2013. Although we are the sponsor of these postretirement plans and record the funded status of these plans, the Exchange reimburses us for approximately 57% of the annual benefit expense of these plans, which represents pension benefits for our employees performing claims and life insurance functions.

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Cash

Liquidity is a measure of a company's ability to generate sufficient cash flows to meet the short- and long-term cash requirements of its business operations and growth needs. Our liquidity requirements have been met primarily by funds generated from management fee revenue and income from investments. Cash provided from these sources is used primarily to fund the costs of our management operations including commissions, salaries and wages, pension plans, share repurchases, dividends to shareholders, and the purchase and development of information technology. We expect that our operating cash needs will be met by funds generated from operations.

Volatility in the financial markets presents challenges to us as we do occasionally access our investment portfolio as a source of cash. Some of our fixed income investments, despite being publicly traded, are illiquid. Volatility in these markets could impair our ability to sell certain of our fixed income securities or cause such securities to sell at deep discounts. Additionally, our limited partnership investments are significantly less liquid. We believe we have sufficient liquidity to meet our needs from other sources even if market volatility persists throughout 2016.

Cash flow activities

The following table provides condensed cash flow information for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Net cash provided by operating activities	\$ 217,378	\$ 186,013	\$ 218,008
Net cash provided by (used in) investing activities	622	(5,097)	(65,232)
Net cash used in financing activities	(126,858)	(138,218)	(115,339)
Net increase in cash	<u>\$ 91,142</u>	<u>\$ 42,698</u>	<u>\$ 37,437</u>

Net cash provided by operating activities increased to \$217.4 million in 2015, compared to \$186.0 million in 2014, and \$218.0 million in 2013. Increased cash from operating activities in 2015 was primarily due to increases in management fee revenue received and reimbursements collected from affiliates, combined with a decrease in pension and employee benefits paid. Somewhat offsetting this increase in cash provided were increases in commissions and bonuses paid to agents, and general operating expenses and income taxes paid, compared to 2014. Management fee revenues were higher reflecting the increase in direct and assumed premiums written by the Exchange. Cash paid for agent commissions and bonuses increased to \$822.5 million in 2015, compared to \$748.6 million in 2014, as a result of an increase in cash paid for scheduled commissions due to premium growth and bonus awards due to profitable underwriting results. We contributed \$17.0 million to our pension plan in 2015, compared to \$23.1 million in 2014. Additionally, we made a contribution to our pension plan for \$17.4 million in January 2016. Our funding policy is generally to contribute an amount equal to the greater of the target normal cost for the plan year or the amount necessary to fund the plan to 100% plus interest to the date the contribution is made. We are reimbursed approximately 57% of the net periodic benefit cost of the pension plans from the Exchange, which represents pension benefits for our employees performing claims and life insurance functions. In 2014, decreased cash from operating activities, compared to 2013, was primarily due to increases in commissions and bonuses paid to agents and general operating expenses, combined with decreases in reimbursements collected from affiliates and limited partnership distributions. Somewhat offsetting this decrease in cash provided was an increase in management fee revenue received, compared to 2013.

At December 31, 2015, we recorded a net deferred tax asset of \$40.7 million. There was no deferred tax valuation allowance recorded at December 31, 2015.

Net cash provided by investing activities totaled \$0.6 million in 2015 compared to cash used of \$5.1 million in 2014 and \$65.2 million in 2013. While cash generated from the sale of available-for-sale securities was lower in 2015, compared to 2014, decreases in purchases of available-for-sale securities and fixed assets contributed to net cash being generated for the year. Also impacting our future investing activities are limited partnership commitments, which totaled \$19.1 million at December 31, 2015, and will be funded as required by the partnerships' agreements. Of this amount, the total remaining commitment to fund limited partnerships that invest in private equity securities was \$7.3 million, mezzanine debt securities was \$8.2 million, and real estate activities was \$3.6 million. Changes in our 2014 investing activities primarily included increased cash generated from the sale of available-for-sale securities somewhat offset by an increase in purchases of fixed assets and available-for-sale securities, compared to 2013.

Net cash used in financing activities totaled \$126.9 million in 2015, \$138.2 million in 2014, and \$115.3 million in 2013. While cash was paid in dividends to shareholders, there were no share repurchases under our program in 2015. The increase in cash used in financing activities for 2014, compared to 2013, was driven by an increase in the cash outlay for dividends paid to shareholders, somewhat offset by a decrease in the cash outlay for share repurchases. Dividends paid to shareholders totaled \$126.9 million, \$118.5 million, and \$83.6 million in 2015, 2014 and 2013, respectively. We increased both our Class A and Class B shareholder regular quarterly dividends for 2015 and 2014. Dividends have been approved at a 7.2% increase for 2016.

No shares of our Class A nonvoting common stock were repurchased in 2015 in conjunction with our stock repurchase program. In 2014, shares repurchased under this program totaled 276,390 at a total cost of \$19.5 million, compared to 441,024 shares at a total cost of \$31.9 million in 2013, based upon settlement date. In October 2011, our Board of Directors approved a continuation of the current stock repurchase program for a total of \$150 million with no time limitation. This repurchase authority includes, and is not in addition to, any unspent amounts remaining under the prior authorization. We had approximately \$17.8 million of repurchase authority remaining under this program at December 31, 2015, based upon trade date.

In 2015, we purchased 111,535 shares of our outstanding Class A nonvoting common stock outside of our publicly announced share repurchase program at a total cost of \$10.4 million for the vesting of stock-based awards in conjunction with our long-term incentive plan, for stock-based awards for executive management and an outside director, and for the rabbi trust outside director deferred compensation plan. These shares were delivered in 2015. In 2014, we purchased 64,398 shares of our outstanding Class A nonvoting common stock outside of our publicly announced share repurchase program at a total cost of \$4.9 million for the vesting of stock-based awards for executive management and an outside director, and for awards under our long-term incentive plan. These shares were delivered in 2014. In 2013, we purchased 3,477 shares of our outstanding Class A nonvoting common stock outside of our publicly announced share repurchase program at a total cost of \$0.3 million to settle payments due to a retired executive under our long-term incentive plan. These shares were delivered in 2013.

Capital Outlook

We regularly prepare forecasts evaluating the current and future cash requirements for both normal and extreme risk events. Should an extreme risk event result in a cash requirement exceeding normal cash flows, we have the ability to meet our future funding requirements through various alternatives available to us.

Outside of our normal operating and investing cash activities, future funding requirements could be met through:

1) cash and cash equivalents, which total approximately \$182.9 million at December 31, 2015, 2) a \$100 million bank revolving line of credit, and 3) liquidation of assets held in our investment portfolio, including common stock and investment grade bonds which totaled approximately \$402.8 million at December 31, 2015. Volatility in the financial markets could impair our ability to sell certain of its fixed income securities or cause such securities to sell at deep discounts. Additionally, we have the ability to curtail or modify discretionary cash outlays such as those related to shareholder dividends and share repurchase activities.

As of December 31, 2015, we have access to a \$100 million bank revolving line of credit with a \$25 million letter of credit sublimit that expires on November 3, 2020. As of December 31, 2015, a total of \$98.2 million remains available under the facility due to \$1.8 million outstanding letters of credit, which reduce the availability for letters of credit to \$23.2 million. We had no borrowings outstanding on our line of credit as of December 31, 2015. Bonds with a fair value of \$109.0 million were pledged as collateral on the line at December 31, 2015. These securities have no trading restrictions and are reported as available-for-sale securities in the Statements of Financial Position. The bank requires compliance with certain covenants, which include leverage ratios. We were in compliance with our bank covenants at December 31, 2015.

Contractual Obligations

We have certain obligations and commitments to make future payments under various contracts. As of December 31, 2015, the aggregate obligations were as follows:

(in thousands)

	Payments due by period				
	Total	2016	2017-2018	2019-2020	2021 and thereafter
Limited partnership commitments ⁽¹⁾	\$ 19,108	\$ 19,108	\$ 0	\$ 0	\$ 0
Pension contribution ⁽²⁾	17,357	17,357	0	0	0
Other commitments ⁽³⁾	52,353	28,333	21,306	2,714	0
Operating leases – vehicles	17,243	5,163	8,983	3,097	0
Operating leases – real estate ⁽⁴⁾	7,710	2,607	3,488	1,463	152
Operating leases – computer equipment	2,307	1,587	720	0	0
Gross contractual obligations	116,078	74,155	34,497	7,274	152
Estimated reimbursements from affiliates	50,712	22,163	23,202	5,244	103
Net contractual obligations	\$ 65,366	\$ 51,992	\$ 11,295	\$ 2,030	\$ 49

- (1) Limited partnership commitments will be funded as required for capital contributions at any time prior to the agreement expiration date. The commitment amounts are presented using the expiration date as the factor by which to age when the amounts are due. At December 31, 2015, our total commitment to fund limited partnerships that invest in private equity securities was \$7.3 million, mezzanine debt was \$8.2 million, and real estate activities was \$3.6 million.
- (2) The pension contribution for 2016 was estimated in accordance with the Pension Protection Act of 2006. Contributions anticipated in future years depend upon certain factors that cannot be reasonably predicted. Any contributions required in future years will be an amount equal to the greater of the target normal cost for the plan year or the amount necessary to fund the plan to 100% plus interest to the date the contribution is made. The obligations for our unfunded benefit plans, including the Supplemental Employee Retirement Plan (SERP) for our executive and senior management, are not included in gross contractual obligations. The recorded accumulated benefit obligation for this plan at December 31, 2015 is \$10.5 million. We expect to have sufficient cash flows from operations to meet the future benefit payments as these become due.
- (3) Other commitments include various agreements for services, including such things as computer software, telephones, copiers, and maintenance.
- (4) Operating leases – real estate are for 18 of our 25 field offices and two operating leases are for office space and a warehouse facility.

Balance Sheet Arrangements

Off-balance sheet arrangements include those with unconsolidated entities that may have a material current or future effect on our financial condition or results of operations, including material variable interests in unconsolidated entities that conduct certain activities. We have no material off-balance sheet obligations or guarantees, other than limited partnership investment commitments. See the preceding Contractual Obligations section for further discussion of limited partnership investment commitments.

Enterprise Risk Management

The role of our Enterprise Risk Management ("ERM") function is to ensure that all significant risks are clearly identified, understood, proactively managed and consistently monitored to achieve strategic objectives for all stakeholders. Our ERM program views risk holistically across our entire group of companies. It ensures implementation of risk responses to mitigate potential impacts. See Item 1A "Risk Factors" contained in this report for a list of risk factors.

Our ERM process is founded on a governance framework that includes oversight at multiple levels of our organization, including our Board of Directors and executive management. Accountability to identify, manage, and mitigate risk is embedded within all functions and areas of our business. We have defined risk tolerances to monitor and manage significant risks within acceptable levels. In addition to identifying, evaluating, prioritizing, monitoring, and mitigating significant risks, our ERM process includes extreme event analyses and scenario testing. Given our defined tolerance for risk, risk model output is used to quantify the potential variability of future performance and the sufficiency of capital and liquidity levels.

TRANSACTIONS/AGREEMENTS WITH RELATED PARTIES

Board Oversight

Our Board of Directors has a broad oversight responsibility over our intercompany relationships with the Exchange. As a consequence, our Board of Directors may be required to make decisions or take actions that may not be solely in the interest of our shareholders, such as setting the management fee rate paid by the Exchange to us and ratifying any other significant intercompany activity.

Subscriber's Agreement

We serve as attorney-in-fact for the policyholders at the Exchange, a reciprocal insurance exchange. Each applicant for insurance to a reciprocal insurance exchange signs a subscriber's agreement that contains an appointment of an attorney-in-fact. Through the designation of attorney-in-fact, we are required to provide certain sales, underwriting, and policy issuance services to the policyholders of the Exchange, as discussed previously. Pursuant to the subscriber's agreement, we earn a management fee for these services calculated as a percentage of the direct and assumed premiums written by the Exchange.

Insurance holding company system

Most states have enacted legislation that regulates insurance holding company systems, defined as two or more affiliated persons, one or more of which is an insurer. The Exchange has the following wholly owned property and casualty subsidiaries: Erie Insurance Company, Erie Insurance Company of New York, Erie Insurance Property and Casualty Company and Flagship City Insurance Company, and a wholly owned life insurance company, Erie Family Life Insurance Company ("EFL"). Indemnity and the Exchange, and its wholly owned subsidiaries, meet the definition of an insurance holding company system.

Intercompany Agreements

Service agreements

We make certain payments on behalf of the Exchange and EFL. These amounts are reimbursed to us on a cost basis in accordance with service agreements between us and the Exchange's wholly owned subsidiaries. These reimbursements are settled on a monthly basis.

Leased property

We lease certain office space from the Exchange including the home office and three field office facilities. We also have a lease commitment with EFL for a field office. Rents are determined considering returns on invested capital and building operating and overhead costs. Rental costs of shared facilities are allocated based upon usage or square footage occupied.

Cost Allocation

The allocation of costs affects the financial condition of us and the Exchange and its wholly owned subsidiaries. Management's role is to determine that allocations are consistently made in accordance with the subscriber's agreements with the policyholders at the Exchange, intercompany service agreements, and applicable insurance laws and regulations. Allocation of costs under these various agreements requires judgment and interpretation, and such allocations are performed using a consistent methodology, which is intended to adhere to the terms and intentions of the underlying agreements.

Intercompany Receivables

(dollars in thousands)

	2015	Percent of total assets	2014	Percent of total assets
Receivables from the Exchange and other affiliates (management fees, costs and reimbursements)	\$348,055	24.7 %	\$335,220	25.4 %
Note receivable from EFL	25,000	1.8	25,000	1.9
Total intercompany receivables	<u>\$373,055</u>	<u>26.5 %</u>	<u>\$360,220</u>	<u>27.3 %</u>

We have significant receivables from the Exchange that result in a concentration of credit risk. These receivables include management fees due for services performed by us for the Exchange under the subscriber's agreement, and certain costs we pay on behalf of the Exchange and EFL. We periodically evaluate credit risks related to the receivables from the Exchange. The receivable from the Exchange for management fees and costs we pay on behalf of the Exchange and EFL is settled monthly.

Surplus Note

We hold a surplus note for \$25 million from EFL that is payable on demand on or after December 31, 2018; however, no principal or interest payments may be made without prior approval by the Pennsylvania Insurance Commissioner. Interest payments are scheduled to be paid semi-annually. We recognized interest income on the note of \$1.7 million in 2015, 2014 and 2013.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk is the risk of loss arising from adverse changes in interest rates, credit spreads, equity prices, or foreign exchange rates, as well as other relevant market rate or price changes. The volatility and liquidity in the markets in which the underlying assets are traded directly influence market risk. The following is a discussion of our primary risk exposures, including interest rate risk, investment credit risk, concentration risk, liquidity risk, and equity price risk, and how those exposures are currently managed as of December 31, 2015.

Interest Rate Risk

We invest primarily in fixed maturity investments, which comprised 85% of our invested assets at December 31, 2015. The value of the fixed maturity portfolio is subject to interest rate risk. As market interest rates decrease, the value of the portfolio increases with the opposite holding true in rising interest rate environments. We do not hedge our exposure to interest rate risk. A common measure of the interest sensitivity of fixed maturity assets is effective duration, a calculation that utilizes maturity, coupon rate, yield, and call terms to calculate an expected change in fair value given a change in interest rates. The longer the duration, the more sensitive the asset is to market interest rate fluctuations. Duration is analyzed quarterly to ensure that it remains in the targeted range we established.

A sensitivity analysis is used to measure the potential loss in future earnings, fair values, or cash flows of market-sensitive instruments resulting from one or more selected hypothetical changes in interest rates and other market rates or prices over a selected period. In our sensitivity analysis model, a hypothetical change in market rates is selected that is expected to reflect reasonably possible changes in those rates. The following pro forma information is presented assuming a 100-basis point increase in interest rates at December 31 of each year and reflects the estimated effect on the fair value of our fixed maturity portfolio. We used the effective duration of our fixed maturity portfolio to model the pro forma effect of a change in interest rates at December 31, 2015 and 2014.

Fixed maturities interest-rate sensitivity analysis

(dollars in thousands)

	At December 31,	
	2015	2014
Fair value of fixed maturity portfolio	\$ 587,209	\$ 564,540
Fair value assuming 100-basis point rise in interest rates	\$ 571,167	\$ 552,230
Effective duration (as a percentage)	2.5	2.6

At December 31, 2015, we began reporting effective duration instead of a previously utilized modified duration calculation to measure the interest rate risk of our fixed maturity portfolio. We believe effective duration more appropriately reflects the economic impact of features such as call provisions contained in certain securities in our fixed maturity portfolio.

While the fixed maturity portfolio is sensitive to interest rates, the future principal cash flows that will be received by contractual maturity date are presented below at December 31, 2015 and 2014. Actual cash flows may differ from those stated as a result of calls, prepayments, or defaults.

Contractual repayments of principal by maturity date

(in thousands)

Fixed maturities:	December 31, 2015
2016	\$ 61,608
2017	76,526
2018	92,108
2019	37,921
2020	53,169
Thereafter	237,824
Total ⁽¹⁾	\$ 559,156
Fair value	\$ 587,209

(1) This amount excludes Indemnity's \$25 million surplus note due from EFL.

(in thousands)

Fixed maturities:	December 31, 2014
2015	\$ 62,563
2016	110,845
2017	62,239
2018	28,617
2019	32,721
Thereafter	233,100
Total ⁽¹⁾	\$ 530,085
Fair value	\$ 564,540

(1) This amount excludes Indemnity's \$25 million surplus note due from EFL.

Investment Credit Risk

Our objective is to earn competitive returns by investing in a diversified portfolio of securities. Our portfolios of fixed maturity securities, nonredeemable preferred stock, mortgage loans and, to a lesser extent, short-term investments are subject to credit risk. This risk is defined as the potential loss in fair value resulting from adverse changes in the borrower's ability to repay the debt. We manage this risk by performing upfront underwriting analysis and ongoing reviews of credit quality by position and for the fixed maturity portfolio in total. We do not hedge the credit risk inherent in our fixed maturity investments.

Generally, the fixed maturities in our portfolio are rated by external rating agencies. If not externally rated, we rate them internally on a basis consistent with that used by the rating agencies. We classify all fixed maturities as available-for-sale securities, allowing us to meet our liquidity needs and provide greater flexibility to appropriately respond to changes in market conditions.

The following table shows our fixed maturity investments by rating as of December 31, 2015: ⁽¹⁾

(dollars in thousands)

	Amortized cost	Fair value	Percent of total
AAA, AA, A	\$ 363,088	\$ 372,609	63 %
BBB	127,489	126,441	22
Total investment grade	490,577	499,050	85
BB	35,145	34,765	6
B	43,350	42,311	7
CCC, CC, C, and below	12,900	11,083	2
Total non-investment grade	91,395	88,159	15
Total	\$ 581,972	\$ 587,209	100 %

(1) Ratings are supplied by S&P, Moody's, and Fitch. The table is based upon the lowest rating for each security.

Approximately 18% of the fixed income portfolio is invested in structured products. This includes residential mortgage-backed securities, commercial mortgage-backed securities, collateralized debt obligations, and asset-backed securities. The overall credit rating of the structured product portfolio is AA-.

Our municipal bond portfolio accounts for \$231.8 million, or 39% of the total fixed maturity portfolio. The overall credit rating of our municipal portfolio is AA+.

Our limited partnership investment portfolio is exposed to credit risk, as well as price risk. Price risk is defined as the potential loss in estimated fair value resulting from an adverse change in prices. Our investments are directly affected by the impact of changes in these risk factors on the underlying investments held by our fund managers, which could vary significantly from fund to fund. We manage these risks by performing up-front due diligence on our fund managers, ongoing monitoring, and through the construction of a diversified portfolio.

We are also exposed to a concentration of credit risk with the Exchange. See the section, "Transactions/Agreements with Related Parties, Intercompany Receivables" for further discussion of this risk.

Concentration Risk

While our portfolio is well diversified within each market sector, there is an inherent risk of concentration in a particular industry or sector. We continually monitor our level of exposure to individual issuers as well as our allocation to each industry and market sector against internally established policies. See the "Financial Condition" section of Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" contained within this report for details of investment holdings by sector.

Liquidity Risk

Periods of volatility in the financial markets can create conditions where fixed maturity investments, despite being publicly traded, can become illiquid. However, we actively manage the maturity profile of our fixed maturity portfolio such that scheduled repayments of principal occur on a regular basis. Additionally, there is no ready market for limited partnerships, which increases the risk that these investments may not be converted to cash on favorable terms and on a timely basis.

Equity Price Risk

Common stocks designated as available-for-sale securities represent investments in certain exchange traded funds with underlying holdings of fixed maturity securities. While the performance of the exchange traded funds closely tracks that of the underlying fixed maturity securities, these investments are reported as common stock based on U.S. GAAP requirements. The average effective duration of these investments as reported by the funds was 4.7 at December 31, 2015, compared to 6.3 at December 31, 2014.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Erie Indemnity Company

We have audited the accompanying statements of financial position of Erie Indemnity Company as of December 31, 2015 and 2014, and the related statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Erie Indemnity Company at December 31, 2015 and 2014, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Erie Indemnity Company's internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 25, 2016 expressed an unqualified opinion thereon.

/s/ Ernst & Young

ERIE INDEMNITY COMPANY NOTES TO FINANCIAL STATEMENTS

Note 1. Nature of Operations

Erie Indemnity Company ("Indemnity", "we", "us", "our") is a publicly held Pennsylvania business corporation that has since its incorporation in 1925 served as the attorney-in-fact for the subscribers (policyholders) at the Erie Insurance Exchange ("Exchange"). The Exchange, which also commenced business in 1925, is a Pennsylvania-domiciled reciprocal insurer that writes property and casualty insurance. We function solely as the management company and all insurance operations are performed by the Exchange.

Our primary function, as attorney-in-fact, is to perform certain services for the Exchange relating to the sales, underwriting, and issuance of policies on behalf of the Exchange. This is done in accordance with a subscriber's agreement (a limited power of attorney) executed individually by each subscriber (policyholder), which appoints us as their common attorney-in-fact to transact certain business on their behalf and to manage the affairs of the Exchange. Pursuant to the subscriber's agreement and for its services as attorney-in-fact, we earn a management fee calculated as a percentage of the direct and assumed premiums written by the Exchange.

The services we provide to the Exchange are related to the sales, underwriting and issuance of policies. The sales related services we provide include agent compensation and certain sales and advertising support services. Agent compensation includes scheduled commissions to agents based upon premiums written as well as additional commissions and bonuses to agents, which are earned by achieving targeted measures. Agent compensation comprised approximately 67% of our 2015 expenses. The underwriting services we provide include underwriting and policy processing expenses and comprised approximately 11% of our 2015 expenses. We provide information technology services that support all functions that comprised approximately 10% of our 2015 expenses. The remaining services we provide include customer service and administrative costs.

Our results of operations are tied to the growth and financial condition of the Exchange. If any events occurred that impaired the Exchange's ability to grow or sustain its financial condition, including but not limited to reduced financial strength ratings, disruption in the independent agency relationships, significant catastrophe losses, or products not meeting customer demands, the Exchange could find it more difficult to retain its existing business and attract new business. A decline in the business of the Exchange almost certainly would have as a consequence a decline in the total premiums paid and a correspondingly adverse effect on the amount of the management fees we receive. We also have an exposure to a concentration of credit risk related to the unsecured receivables due from the Exchange for its management fee. See Note 14, "Concentrations of Credit Risk" contained within this report.

Note 2. Significant Accounting Policies

Basis of presentation

The accompanying financial statements have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP").

Use of estimates

The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Retrospective adoption of recently issued accounting standards

In February 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-02, *Consolidation*, which changed the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. This guidance changed the conditions to be met in determining if a reporting entity has a variable interest in a legal entity. In accordance with the new accounting guidance, Indemnity is not deemed to have a variable interest in the Exchange as the fees paid for services provided to the Exchange no longer represent a variable interest. The compensation received from the attorney-in-fact fee arrangement with the subscribers is for services provided by Indemnity acting in its role as attorney-in-fact and is commensurate with the level of effort required to perform those services. Under the previously issued accounting guidance, Indemnity was deemed to be the primary beneficiary of the Exchange and its financial

position and operating results were consolidated with Indemnity. Following adoption of the new accounting guidance, the Exchange's results are no longer required to be consolidated with Indemnity.

Indemnity adopted the new accounting standard on a retrospective basis effective with the annual reporting period ending December 31, 2015. The 2014 and 2013 financial information within this report has been conformed to the presentation in accordance with the amended guidance. The effects on the financial statements of no longer consolidating the Exchange include:

- Indemnity's management fee revenues are included on the face of the Statements of Operations. The Noncontrolling Interest - Exchange revenues and expenses are no longer included in the Statements of Operations, Statements of Comprehensive Income or Statements of Cash Flows.
- The assets and liabilities of the Noncontrolling Interest - Exchange are not included on the Statements of Financial Position. The assets and liabilities of Indemnity are presented on a classified basis, which distinguishes between current and noncurrent on the Statements of Financial Position.
- There is no cumulative effect to Indemnity's shareholders' equity. The noncontrolling interest in total equity that represented the amount of the Exchange's subscribers' equity was presented separately from Indemnity's shareholders' equity.

In May 2015, the FASB issued ASU 2015-07, *"Fair Value Measurement"*, which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient and limits the disclosure requirements. ASU 2015-07 is effective for annual and interim periods beginning after December 15, 2015 with early adoption permitted. Our disclosure was prepared in accordance with this amended guidance at December 31, 2015.

In November 2015, the FASB issued ASU 2015-17, *"Balance Sheet Classification of Deferred Taxes"*. ASU 2015-17 simplifies the presentation of deferred income taxes by requiring deferred tax assets and liabilities to be classified as noncurrent in a classified statement of financial position. ASU 2015-17 is effective for annual periods beginning after December 15, 2016 with early adoption permitted. We adopted the guidance on a retrospective basis effective December 31, 2015. Prior to December 31, 2015, we were not required to present a classified balance sheet that distinguished between current and noncurrent deferred taxes.

Recently issued accounting standards

In May 2014, the FASB issued ASU 2014-09, *"Revenue from Contracts with Customers"*. ASU 2014-09 clarifies the principles for recognizing revenue and provides a common revenue standard for GAAP. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, ASU 2015-14, *"Revenue from Contracts with Customers"*, deferred the effective date of ASU 2014-09 to annual and interim reporting periods beginning after December 15, 2017. Earlier application is permitted only as of annual and interim reporting periods beginning after December 15, 2016. We do not expect the adoption of ASU 2014-09 related to the management fee and service agreement revenue to have a material impact on our financial statements.

Cash and cash equivalents – Cash, money market accounts and other short-term, highly liquid investments with a maturity of three months or less at the date of purchase, are considered cash and cash equivalents.

Investments

Available-for-sale securities – Fixed maturity, preferred stock, and common stock securities classified as available-for-sale are reported at fair value. Available-for-sale securities with a remaining maturity of 12 months or less are reported as current assets on the Statements of Financial Position. Unrealized holding gains and losses, net of related tax effects, on available-for-sale securities are recorded directly to shareholders' equity as accumulated other comprehensive income (loss).

Common stock securities classified as available-for-sale represent certain exchange traded funds with underlying holdings of fixed maturity securities.

Realized gains and losses on sales of available-for-sale securities are recognized in income based upon the specific identification method. Interest and dividend income are recognized as earned.

Available-for-sale securities are evaluated monthly for other-than-temporary impairment loss.

For fixed income and redeemable preferred stock (debt securities) that have experienced a decline in fair value and that we intend to sell, or for which it is more likely than not we will be required to sell the security before recovery of its amortized cost, an other-than-temporary impairment is deemed to have occurred, and is recognized in earnings.

Debt securities that have experienced a decline in fair value and that we do not intend to sell, and that we will not be required to sell before recovery, are evaluated to determine if the decline in fair value is other-than-temporary.

Some factors considered in this evaluation include:

- the extent and duration to which fair value is less than cost;
- historical operating performance and financial condition of the issuer;
- short and long-term prospects of the issuer and its industry based upon analysts' recommendations;
- specific events that occurred affecting the issuer, including a ratings downgrade;
- near term liquidity position of the issuer; and
- compliance with financial covenants.

If a decline is deemed to be other-than-temporary, an assessment is made to determine the amount of the total impairment related to a credit loss and that related to all other factors. Consideration is given to all available information relevant to the collectability of the security in this determination. If the entire amortized cost basis of the security will not be recovered, a credit loss exists. Currently, we have the intent to sell all of our securities that have been determined to have a credit-related impairment. As a result, the entire amount of any impairment would be recognized in earnings. If we had securities with credit impairments that we did not intend to sell, the non-credit portion of the impairment would be recorded in other comprehensive income.

For equity securities in an unrealized loss position where fair value is not expected to recover to our cost basis in a reasonable time period, or where we do not expect to hold the security for a period of time sufficient to allow for a recovery to our cost basis, an other-than-temporary impairment is deemed to have occurred, and is recognized in earnings.

Limited partnerships – Limited partnerships include U.S. and foreign private equity, mezzanine debt, and real estate investments. The majority of our limited partnership holdings are considered investment companies and are recorded using the equity method of accounting. For these limited partnerships the general partners record assets at fair value, including any other-than-temporary impairments of these individual investments. Our ownership interest in partnerships accounted for under the equity method is generally less than 10%, and does not provide us the ability to significantly influence the operations of the partnerships. However, we believe the equity method most appropriately reflects the value of our economic interest in these investments. We also own certain real estate limited partnerships that do not meet the criteria of an investment company. These partnerships prepare audited financial statements on a cost basis. We have elected to report these limited partnerships under the fair value option, which is based on the net asset value (NAV) from our partner's capital statement reflecting the general partner's estimate of fair value for the fund's underlying assets. Limited partnerships reported under the fair value option are disclosed in Note 4, "Fair Value" as other investments. Fair value provides consistency in the evaluation and financial reporting for these limited partnerships and limited partnerships accounted for under the equity method.

Because of the timing of the preparation and delivery of financial statements for limited partnership investments, the use of the most recently available financial statements provided by the general partners results in a quarter delay in the inclusion of the limited partnership results in our Statements of Operations. Due to this delay, these financial statements do not yet reflect the market conditions experienced in the fourth quarter of 2015 for all partnerships other than the real estate limited partnerships that are reported under the fair value option.

Nearly all of the underlying investments in our limited partnerships are valued using a source other than quoted prices in active markets. The fair value amounts for our private equity and mezzanine debt partnerships are based upon the financial statements of the general partners, who use multiple methods to estimate fair value including the market approach, income approach or the cost approach. The market approach uses prices and other pertinent information from market-generated transactions involving identical or comparable assets or liabilities. Such valuation techniques often use market multiples derived from a set of comparables. The income approach uses valuation techniques to convert future cash flows or earnings to a single discounted present value amount. The measurement is based upon the value indicated by current market expectations on those future amounts. The cost approach is derived from the amount that is currently required to replace the service capacity of an asset. If information becomes available that would impair the cost of investments owned by the partnerships, then the general partner would adjust to the net realizable value. For real estate limited partnerships, the general partners record these at fair value based upon an independent appraisal or internal estimates of fair value.

While we perform various procedures in review of the general partners' valuations, we rely on the general partners' financial statements as the best available information to record our share of the partnership unrealized gains and losses resulting from valuation changes. Due to the limited market for these investments, there is a greater potential for market price variability.

Unrealized gains and losses for these investments are reflected in equity in earnings (losses) of limited partnerships in our Statements of Operations in accordance with the equity method of accounting or the fair value option, as applicable. Cash contributions made to and distributions received from the partnerships are recorded in the period in which the transaction occurs.

Deferred taxes

Deferred tax assets and liabilities are recorded for temporary differences between the tax basis of assets and liabilities and the reported amounts in the financial statements, using the statutory tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date under the law. The need for valuation allowances on deferred tax assets are estimated based upon our assessment of the realizability of such amounts.

Software costs

We capitalize certain computer software and software development costs incurred in connection with developing or obtaining computer software for internal use. Capitalized software costs are included in fixed assets and amortized on a straight-line basis over the estimated useful lives of the software, which do not exceed seven years.

Agent bonus estimates

Agent bonuses are based upon an individual agency's property and casualty underwriting profitability and also include a component for growth in agency property and casualty premiums if the agency's underwriting profitability targets for the book of business are met. The estimate for agent bonuses, which are based upon the performance over 36 months, is modeled on a monthly basis using actual underwriting data by agency for the prior two years combined with the current year-to-date actual data.

At December 31 of each year, we use actual data available and record an accrual based upon the expected payment amount. These costs are included in commissions expense in the Statements of Operations.

Recognition of management fee revenue

We earn management fees from the Exchange for providing certain sales, underwriting, and policy issuance services. Pursuant to the subscriber's agreements with the policyholders at the Exchange, we may retain up to 25% of all direct and assumed premiums written by the Exchange. Management fee revenue is calculated by multiplying the management fee rate by the direct and assumed premiums written by the Exchange. The Exchange issues policies with annual terms only. Management fees are recorded as revenue upon policy issuance or renewal, as substantially all of the services required to be performed by us have been satisfied at that time. Certain activities are performed and related costs are incurred by us subsequent to policy issuance in connection with the services provided to the Exchange; however, these activities are inconsequential and perfunctory.

Recognition of service agreement revenue

Service agreement revenue consists of service charges we collect from policyholders for providing multiple payment plans on policies written by the Exchange. Service charges, which are flat dollar charges for each installment billed beyond the first installment, are recognized as revenue when bills are rendered to the policyholder. Service agreement revenue also includes late payment and policy reinstatement fees.

Note 3. Earnings Per Share

Class A and Class B basic earnings per share and Class B diluted earnings per share are calculated under the two-class method. The two-class method allocates earnings to each class of stock based upon its dividend rights. Class B shares are convertible into Class A shares at a conversion ratio of 2,400 to 1. See Note 11, "Capital Stock".

Class A diluted earnings per share are calculated under the if-converted method, which reflects the conversion of Class B shares to Class A shares. Diluted earnings per share calculations include the dilutive effect of assumed issuance of stock-based awards under compensation plans that have the option to be paid in stock using the treasury stock method. See Note 9, "Incentive and Deferred Compensation Plans".

A reconciliation of the numerators and denominators used in the basic and diluted per-share computations is presented as follows for each class of common stock:

(dollars in thousands,
except per share data)

	2015			For the years ended December 31,			2014			2013		
	Allocated net income (numerator)	Weighted shares (denominator)	Per- share amount	Allocated net income (numerator)	Weighted shares (denominator)	Per- share amount	Allocated net income (numerator)	Weighted shares (denominator)	Per- share amount	Allocated net income (numerator)	Weighted shares (denominator)	Per- share amount
Class A – Basic EPS:

Note 4. Fair Value

Our available-for-sale and trading securities are recorded at fair value, which is the price that would be received to sell the asset in an orderly transaction between willing market participants as of the measurement date.

Valuation techniques used to derive the fair value of our available-for-sale and trading securities are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources. Unobservable inputs reflect our own assumptions regarding fair market value for these securities. Although the majority of our prices are obtained from third-party sources, we also perform an internal pricing review for securities with low trading volumes under current market conditions. Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 – Unobservable inputs for the asset or liability.

Estimates of fair values for our investment portfolio are obtained primarily from a nationally recognized pricing service. Our Level 1 category includes those securities valued using an exchange traded price provided by the pricing service. The methodologies used by the pricing service that support a Level 2 classification of a financial instrument include multiple verifiable, observable inputs including benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data. Pricing service valuations for Level 3 securities are based upon proprietary models and are used when observable inputs are not available or in illiquid markets.

In limited circumstances we adjust the price received from the pricing service when, in our judgment, a better reflection of fair value is available based upon corroborating information and our knowledge and monitoring of market conditions such as a disparity in price of comparable securities and/or non-binding broker quotes. In other circumstances, certain securities are internally priced because prices are not provided by the pricing service.

We perform continuous reviews of the prices obtained from the pricing service. This includes evaluating the methodology and inputs used by the pricing service to ensure that we determine the proper classification level of the financial instrument. Price variances, including large periodic changes, are investigated and corroborated by market data. We have reviewed the pricing methodologies of our pricing service as well as other observable inputs, such as data, and transaction volumes and believe that the prices adequately consider market activity in determining fair value. Our review process continues to evolve based upon accounting guidance and requirements.

When a price from the pricing service is not available, values are determined by obtaining broker/dealer quotes and/or market comparables. When available, we obtain multiple quotes for the same security. The ultimate value for these securities is determined based upon our best estimate of fair value using corroborating market information. Our evaluation includes the consideration of benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data.

For certain securities in an illiquid market, there may be no prices available from a pricing service and no comparable market quotes available. In these situations, we value the security using an internally-developed, risk-adjusted, discounted cash flow model.

The following tables present our fair value measurements on a recurring basis by asset class and level of input:

(in thousands)	At December 31, 2015			
	Fair value measurements using:			
	Total	Quoted prices in active markets for identical assets Level 1	Observable inputs Level 2	Unobservable inputs Level 3

Other investments ⁽¹⁾	7,583	—	—	—
Total	\$ 597,353	\$ 14,757	\$ 575,013	\$ 0

- (1) Other investments measured at fair value represent real estate funds included on the balance sheet as limited partnership investments that are reported under the fair value option using the net asset value practical expedient. These amounts are not required to be categorized in the fair value hierarchy. The investments can never be redeemed with the funds. Instead, distributions are received when liquidation of the underlying assets of the funds occur. It is estimated that the underlying assets will generally be liquidated between 5 and 10 years from the inception of the funds. The fair value of these investments is based on the net asset value (NAV) information provided by the general partner. Fair value is based on our proportionate share of the NAV based on the most recent partners' capital statements received from the general partners, which is generally one quarter prior to our balance sheet date. These values are then analyzed to determine if the NAV represents fair value at our balance sheet date, with adjustment being made where appropriate. We consider observable market data and perform a review validating the appropriateness of the NAV at each balance sheet date. It is likely that all of the investments will be redeemed at a future date for an amount different than the NAV of our ownership interest in partners' capital as of December 31, 2015 and December 31, 2014. During the year ended December 31, 2015, no contributions were made and distributions totaling \$3.5 million were received from these investments. During the year ended December 31, 2014, no contributions were made and distributions totaling \$12.9 million were received from these investments. As of December 31, 2015 and 2014, the amount of unfunded commitments related to the investments was \$0.6 million.

Level 3 Assets –Year-to-Date Change:

<i>(in thousands)</i>	Beginning balance at December 31, 2014	Included in earnings ⁽¹⁾	Included in other comprehensive income	Purchases	Sales	Transfers in and (out) of Level 3	Ending balance at December 31, 2015
Available-for-sale securities:							
Corporate debt securities	\$ 0	\$ (1)	\$ (59)	\$ 180	\$ 0	\$ (51)	\$ 69
Collateralized debt obligations	0	3	(7)	8,581	0	0	8,577
Total fixed maturities	0	2	(66)	8,761	0	(51)	8,646
Total available-for-sale securities	0	2	(66)	8,761	0	(51)	8,646
Total Level 3 assets	\$ 0	\$ 2	\$ (66)	\$ 8,761	\$ 0	\$ (51)	\$ 8,646

(1) These amounts are reported in the Statements of Operations as net investment income (losses) for the year ended December 31, 2015 on Level 3 securities.

We review the fair value hierarchy classifications each reporting period. Transfers between hierarchy levels may occur due to changes in available market observable inputs. Transfers in and out of level classifications are reported as having occurred at the beginning of the quarter in which the transfers occurred.

There were no transfers between Level 1 and Level 2 for the year ended December 31, 2015. Level 2 to Level 3 transfers totaled \$0.1 million related to one fixed maturity holding due to the use of unobservable market data to determine the fair value at December 31, 2015. Level 3 to Level 2 transfers totaled \$0.2 million related to two fixed maturity holdings due to the use of observable market data to determine the fair value at December 31, 2015.

Level 3 Assets – Year-to-Date Change:

<i>(in thousands)</i>	Beginning balance at December 31, 2013	Included in earnings ⁽¹⁾	Included in other comprehensive income	Purchases	Sales	Transfers in and (out) of Level 3	Ending balance at December 31, 2014
Available-for-sale securities:							
Corporate debt securities	\$ 1,054	\$ 0	\$ (28)	\$ 0	\$ (85)	\$ (941)	\$ 0
Commercial mortgage-backed securities	0	1	9	2,976	0	(2,986)	0
Collateralized debt obligations	378	(47)	(40)	0	(291)	0	0
Total fixed maturities	1,432	(46)	(59)	2,976	(376)	(3,927)	0
Total available-for-sale securities	1,432	(46)	(59)	2,976	(376)	(3,927)	0
Total Level 3 assets	\$ 1,432	\$ (46)	\$ (59)	\$ 2,976	\$ (376)	\$ (3,927)	\$ 0

(1) These amounts are reported in the Statements of Operations as net realized investment gains (losses) for the year ended December 31, 2014 on Level 3 securities.

There were no transfers between Level 1 and Level 2, or from Level 2 to Level 3, for the year ended December 31, 2014. Level 3 to Level 2 transfers totaled \$3.9 million related to two fixed maturity holdings due to the use of observable market data to determine the fair value at December 31, 2014.

Quantitative and Qualitative Disclosures about Unobservable Inputs

When a non-binding broker quote was the only input available, the security was classified within Level 3. Use of non-binding brokers quotes totaled \$8.6 million at December 31, 2015. The unobservable inputs are not reasonably available to us.

The following table presents our fair value measurements on a recurring basis by pricing source:

(in thousands)

	At December 31, 2015			
	Total	Level 1	Level 2	Level 3
Fixed maturities:				
Priced via pricing services	\$ 578,516	\$ 0	\$ 578,516	\$ 0
Priced via market comparables/broker quotes	8,693	0	47	8,646
Total fixed maturities	587,209	0	578,563	8,646
Common stock:				
Priced via pricing services	12,732	12,732	0	0

Non-investment grade	56,094	2,699	0	0	56,094	2,699	236
Total fixed maturities	<u>\$ 201,458</u>	<u>\$ 3,648</u>	<u>\$ 2,378</u>	<u>\$ 15</u>	<u>\$ 203,836</u>	<u>\$ 3,663</u>	<u>294</u>

The above securities have been evaluated and determined to be temporary impairments for which we expect to recover our entire principal plus interest. The primary components of this analysis include a general review of market conditions and financial performance of the issuer along with the extent and duration at which fair value is less than cost. Any securities that we intend to sell or will more likely than not be required to sell before recovery are included in other-than-temporary impairments with the impairment charges recognized in earnings.

Net investment income

Interest and dividend income are recognized as earned and recorded to net investment income. Investment income, net of expenses, was generated from the following portfolios for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Fixed maturities	\$ 16,457	\$ 14,173	\$ 11,945
Equity securities	1,045	1,550	2,126
Cash equivalents and other	1,174	1,207	1,439
Total investment income	18,676	16,930	15,510
Less: investment expenses	885	394	483
Investment income, net of expenses	<u>\$ 17,791</u>	<u>\$ 16,536</u>	<u>\$ 15,027</u>

Realized investment gains (losses)

Realized gains and losses on sales of securities are recognized in income based upon the specific identification method.

Realized gains (losses) on investments were as follows for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Available-for-sale securities:			
Fixed maturities:			
Gross realized gains	\$ 1,571	\$ 453	\$ 890
Gross realized losses	(1,764)	(333)	(43)
Net realized (losses) gains	<u>(193)</u>	<u>120</u>	<u>847</u>
Equity securities:			
Gross realized gains	759	1,132	391
Gross realized losses	(74)	(195)	(293)
Net realized gains	<u>685</u>	<u>937</u>	<u>98</u>
Net realized investment gains	<u>\$ 492</u>	<u>\$ 1,057</u>	<u>\$ 945</u>

The components of other-than-temporary impairments on investments are included below for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Fixed maturities	\$ (1,558)	\$ (105)	\$ (388)
Total other-than-temporary impairments	<u>(1,558)</u>	<u>(105)</u>	<u>(388)</u>
Portion recognized in other comprehensive income	0	0	0
Net impairment losses recognized in earnings	<u>\$ (1,558)</u>	<u>\$ (105)</u>	<u>\$ (388)</u>

In considering if fixed maturity securities were credit-impaired, some of the factors considered include: potential for the default of interest and/or principal, level of subordination, collateral of the issue, compliance with financial covenants, credit ratings, and industry conditions. We have the intent to sell all credit-impaired fixed maturity securities; therefore, the entire amount of the impairment charges were included in earnings and no non-credit impairments were recognized in other comprehensive income. See also Note 2, "Significant Accounting Policies".

Limited partnerships

Limited partnership investments, excluding certain real estate limited partnerships recorded at fair value, are generally reported on a one-quarter lag; therefore, our year-to-date limited partnership results through December 31, 2015 are comprised of partnership financial results for the fourth quarter of 2014 and the first, second and third quarters of 2015. Given the lag in reporting, our limited partnership results do not reflect the market conditions of the fourth quarter of 2015. Cash contributions made to and distributions received from the partnerships are recorded in the period in which the transaction occurs.

Amounts included in equity in earnings of limited partnerships by method of accounting are included below for the years ended December 31:

<i>(in thousands)</i>	2015	2014	2013
Equity in earnings of limited partnerships accounted for under the equity method	\$ 16,545	\$ 8,517	\$ 20,488
Change in fair value of limited partnerships accounted for under the fair value option	438	2,412	1,206
Equity in earnings of limited partnerships	<u>\$ 16,983</u>	<u>\$ 10,929</u>	<u>\$ 21,694</u>

The following table summarizes limited partnership investments by sector at December 31:

<i>(in thousands)</i>	2015	2014
Private equity	\$ 48,397	\$ 51,379
Mezzanine debt	12,701	13,978
Real estate	22,911	39,677
Real estate - fair value option	4,526	7,583
Total limited partnerships	<u>\$ 88,535</u>	<u>\$ 112,617</u>

See also Note 15, "Commitments and Contingencies", for investment commitments related to limited partnerships.

Note 6. Capitalized Software Development Costs

Capitalized software costs include internal and external labor and overhead and are included in fixed assets in the Statements of Financial Position. Capitalization ceases and amortization begins when a computer software project is complete and ready for its intended use.

The following table outlines the total capitalized software development costs subject to amortization and the related amortization expense:

	Years ended December 31,		
	2015	2014	2013
Gross carrying amount	\$ 81,007	\$ 67,820	\$ 58,408
Accumulated amortization	(34,210)	(25,210)	(17,804)
Net carrying amount	<u>\$ 46,797</u>	<u>\$ 42,610</u>	<u>\$ 40,604</u>
Amortization expense	<u>\$ 9,000</u>	<u>\$ 7,406</u>	<u>\$ 6,909</u>

Included in the gross carrying amount above are costs not yet subject to amortization of \$15.8 million, \$10.9 million and \$9.2 million in 2015, 2014 and 2013, respectively.

The following table outlines the estimated future amortization expense related to capitalized software development costs as of December 31, 2015:

(in thousands)	
Years ending December 31,	Estimated amortization expense
2016	\$ 9,314
2017	8,674
2018	4,906
2019	3,467
2020	2,405

Note 7. Bank Line of Credit

As of December 31, 2015, we have access to a \$100 million bank revolving line of credit with a \$25 million letter of credit sublimit that expires on November 3, 2020. As of December 31, 2015, a total of \$98.2 million available under the facility due to \$1.8 million outstanding letters of credit, which reduce the availability for letters of credit to \$23.2 million. We had no borrowings outstanding on our line of credit as of December 31, 2015. Bonds with a fair value of \$109.0 million were pledged as collateral on the line at December 31, 2015. The securities pledged as collateral have no trading restrictions and are reported as available-for-sale securities in the Statements of Financial Position as of December 31, 2015. The banks require compliance with certain covenants, which include leverage ratios, for our line of credit. We are in compliance with all covenants at December 31, 2015.

Note 8. Postretirement Benefits

Pension plans

Our pension plans consist of a noncontributory defined benefit pension plan covering substantially all employees and an unfunded supplemental employee retirement plan ("SERP") for certain members of executive and senior management. The pension plans provide benefits to covered individuals satisfying certain age and service requirements. The defined benefit pension plan and SERP each provide benefits through a final average earnings formula.

Although we are the sponsor of these postretirement plans and record the funded status of these plans, the Exchange reimburses us for approximately 57% of the annual benefit expense of these plans, which represents pension benefits for our employees performing claims and life insurance functions. For our funded pension plan, amounts are settled in cash for the portion of pension costs allocated to the Exchange. For our unfunded plans, we pay the obligations when due and amounts are settled in cash between entities when there is a payout.

Prior to 2003, the employee pension plan purchased annuities from Erie Family Life Insurance Company ("EFL"), a wholly owned subsidiary of the Exchange, for certain plan participants that were receiving benefit payments under the pension plan. These are nonparticipating annuity contracts under which EFL has unconditionally contracted to provide specified benefits to beneficiaries; however, the pension plan remains the primary obligor to the beneficiaries. A contingent liability of \$22.6 million at December 31, 2015, exists in the event EFL does not honor the annuity contracts.

Cost of pension plans

Pension plan cost includes the following components:

(in thousands)

	2015	2014	2013
Service cost for benefits earned	\$ 30,433	\$ 22,510	\$ 26,896
Interest cost on benefit obligation	30,755	28,112	25,474
Expected return on plan assets	(35,921)	(31,419)	(30,414)
Prior service cost amortization	670	712	798
Net actuarial loss amortization	14,031	6,344	14,946
Pension plan cost ⁽¹⁾	\$ 39,968	\$ 26,259	\$ 37,700

(1) Pension plan costs represent the total cost before reimbursements to Indemnity from the Exchange and EFL.

Actuarial assumptions

The following table describes the assumptions at December 31 used to measure the year-end obligations and the net periodic benefit costs for the subsequent year:

	2015	2014	2013	2012
Employee pension plan:				
Discount rate	4.57%	4.17%	5.11%	4.19%
Expected return on assets	7.00	7.00	7.50	7.50
Compensation increases ⁽¹⁾	3.32	3.32	4.15	4.15
SERP:				
Discount rate – pre-retirement/post-retirement	4.57/4.07	4.17/3.67	5.11/4.61	4.19/3.69
Rate of compensation increase	5.00	5.00	6.00	6.00

(1) The rate of compensation increase for the employee plan is age-graded. An equivalent single compensation increase rate of 3.32% in 2015 and 2014, and 4.15% in 2013 would produce similar results.

The economic assumptions that have the most impact on the postretirement benefits expense are the discount rate and the long-term rate of return on plan assets. The discount rate assumption used to determine the benefit obligation for 2015 was based upon a yield curve developed from corporate bond yield information. The same methodology was employed to develop the discount rates used to determine the benefit obligation for 2014 and 2013.

The pension plan's expected long-term rate of return represents the average rate of return to be earned on plan assets over the period the benefits included in the benefit obligation are to be paid. To determine the expected long-term rate of return assumption, we utilized models based upon rigorous historical analysis and forward-looking views of the financial markets

based upon key factors such as historical returns for the asset class' applicable indices, the correlations of the asset classes under various market conditions and consensus views on future real economic growth and inflation. The expected future return for each asset class is then combined by considering correlations between asset classes and the volatilities of each asset class to produce a reasonable range of asset return results within which our expected long-term rate of return assumption falls.

Projected benefit obligations decreased \$12.1 million at December 31, 2015 compared to December 31, 2014, driven primarily by the higher discount rate and the mortality tables being updated with two additional years of mortality data, partially offset by less than expected asset returns in 2015.

Funding policy/funded status

Our funding policy is generally to contribute an amount equal to the greater of the target normal cost for the plan year or the amount necessary to fund the plan to 100% plus interest to the date the contribution is made. Employer contributions of \$17.4 million were made to the defined benefit pension plan in January 2016. The following table sets forth the funded status of the pension plans and the amounts recognized in the Statements of Financial Position at December 31:

(in thousands)

	2015	2014
Funded status at end of year	<u>\$ (173,089)</u>	<u>\$ (188,917)</u>
Pension liabilities – due within one year ⁽¹⁾	\$ (389)	\$ (97)
Pension liabilities – due after one year	(172,700)	(188,820)
Net amount recognized	<u>\$ (173,089)</u>	<u>\$ (188,917)</u>

(1) The current portion of pension liabilities is included in accrued expenses and other current liabilities in the Statements of Financial Position.

Benefit obligations

Benefit obligations are described in the following tables. Accumulated and projected benefit obligations represent the obligations of a pension plan for past service as of the measurement date. The accumulated benefit obligation is the present value of pension benefits earned as of the measurement date based on employee service and compensation prior to that date. It differs from the projected benefit obligation in that the accumulated benefit obligation includes no assumptions to reflect expected future compensation. The following table sets forth a reconciliation of beginning and ending balances of the projected benefit obligation, as well as the accumulated benefit obligation at December 31:

(in thousands)

	2015	2014
Projected benefit obligation, beginning of year	\$ 736,705	\$ 557,279
Service cost for benefits earned	30,433	22,510
Interest cost on benefit obligation	30,755	28,112
Plan amendments	0	164
Actuarial (gain) loss	(60,774)	139,816
Benefits paid	(12,539)	(11,176)
Projected benefit obligation, end of year	<u>\$ 724,580</u>	<u>\$ 736,705</u>
Accumulated benefit obligation, end of year	<u>\$ 583,432</u>	<u>\$ 583,469</u>

The following table describes plans with assets less than accumulated benefit obligation at December 31:

(in thousands)

	2015	2014
Projected benefit obligation	\$ 724,580	\$ 736,705
Accumulated benefit obligation	583,432	583,469
Plan assets	551,491	547,788

Both the defined benefit pension plan and the SERP had accumulated benefit obligations in excess of plan assets at December 31, 2015 and 2014.

Pension assets

The following table sets forth a reconciliation of beginning and ending balances of the fair value of plan assets at December 31:

(in thousands)

	2015	2014
Fair value of plan assets, beginning of year	\$ 547,788	\$ 462,322
Actual (loss) gain on plan assets	(1,042)	72,932
Employer contributions	17,284	23,710
Benefits paid	(12,539)	(11,176)
Fair value of plan assets, end of year	<u>\$ 551,491</u>	<u>\$ 547,788</u>

Accumulated other comprehensive income

Net actuarial loss and prior service cost included in accumulated other comprehensive income that were not yet recognized as components of net benefit costs were as follows:

(in thousands)

	2015	2014
Net actuarial loss	\$ 148,865	\$ 186,707
Prior service cost	4,605	5,274
Net amount not yet recognized	<u>\$ 153,470</u>	<u>\$ 191,981</u>

The estimated net actuarial loss and prior service cost for the pension plans that will be amortized from accumulated other comprehensive income into pension cost during 2016 is \$7.6 million and \$0.7 million, respectively.

Other comprehensive income

Amounts recognized in other comprehensive income for pension plans:

(in thousands)

	2015	2014
Net actuarial (gain) loss arising during the year	\$ (23,810)	\$ 98,303
Amortization of net actuarial loss	(14,031)	(6,344)
Amortization of prior service cost	(670)	(712)
Amendments	0	164 ⁽¹⁾
Total recognized in other comprehensive income	<u>\$ (38,511)</u>	<u>\$ 91,411</u>

(1) The charges recognized as amendments were the result of factoring in the prior service cost for four new plan participants in 2014.

Asset allocation

The employee pension plan utilizes a return seeking and a liability asset matching allocation strategy. It is based upon the understanding that 1) equity investments are expected to outperform debt investments over the long-term, 2) the potential volatility of short-term returns from equities is acceptable in exchange for the larger expected long-term returns, and 3) a portfolio structured across investment styles and markets (both domestic and foreign) reduces volatility. As a result, the employee pension plan's investment portfolio utilizes a broadly diversified asset allocation across domestic and foreign equity and debt markets. The investment portfolio is composed of commingled pools that are dedicated exclusively to the management of employee benefit plan assets.

The target and actual asset allocations for the portfolio are as follows for the years ended December 31:

Asset allocation:	Target asset allocation	Target asset allocation	Actual asset allocation	Actual asset allocation
	2015	2014	2015	2014
Equity securities:				
U.S. equity securities	35% ⁽¹⁾	35%	36%	37%
Non-U.S. equity securities	20 ⁽²⁾	20	20	19
Total equity securities	55	55	56	56
Debt securities	44 ⁽³⁾	44	43	43
Other	1 ⁽⁴⁾	1	1	1
Total	100%	100%	100%	100%

- (1) U.S. equity securities – 22% seek to achieve excess returns relative to the Russell 2000 Index, while 30% seek to achieve excess returns relative to the S&P 500. The remaining 48% of the allocation to U.S. equity securities are comprised of equity index funds that track the S&P 500.
- (2) Non-U.S. equity securities – 11% are allocated to international small cap investments, while another 11% are allocated to international emerging market investments. The remaining 78% of the Non-U.S. equity securities are allocated to investments seeking to achieve excess returns relative to an international market index.
- (3) Debt securities – 44% are allocated to long U.S. Treasury Strips, 44% are allocated to U.S. corporate bonds with an emphasis on long duration bonds rated A or better, while the remaining 12% are allocated to floating rate high income leverage loans.
- (4) Institutional money market fund.

The following tables represent the fair value measurements for the pension plan assets by major category and level of input:

At December 31, 2015				
Fair value measurements of plan assets using:				
(in thousands)	Total	Quoted prices in active markets for identical assets Level 1	Significant observable inputs Level 2	Significant unobservable inputs Level 3
Equity securities:				
U.S. equity securities	\$ 201,021	\$ 0	\$ 201,021	\$ 0
Non-U.S. equity securities	107,945	0	107,945	0
Total equity securities	308,966	0	308,966	0
Debt securities	236,619	0	236,619	0
Other	5,906	5,906	0	0
Total	\$ 551,491	\$ 5,906	\$ 545,585	\$ 0

At December 31, 2014				
Fair value measurements of plan assets using:				
(in thousands)	Total	Quoted prices in active markets for identical assets Level 1	Significant observable inputs Level 2	Significant unobservable inputs Level 3
Equity securities:				
U.S. equity securities	\$ 202,036	\$ 0	\$ 202,036	\$ 0
Non-U.S. equity securities	106,025	0	106,025	0
Total equity securities	308,061	0	308,061	0
Debt securities	236,402	0	236,402	0
Other	3,325	3,325	0	0
Total	\$ 547,788	\$ 3,325	\$ 544,463	\$ 0

Estimates of fair values of the pension plan assets are obtained primarily from our trustee and custodian of our pension plan. Our Level 1 category includes a money market fund that is a mutual fund for which the fair value is determined using an exchange traded price provided by the trustee and custodian. Our Level 2 category includes commingled pools. Estimates of fair values for securities held by our commingled pools are obtained primarily from the trustee and custodian. The methodologies used by the trustee and custodian that support a financial instrument Level 2 classification include multiple

verifiable, observable inputs including benchmark yields, reported trades, broker/dealer quotes, issuers spreads, two-sided markets, benchmark securities, bids, offers, and reference data.

Estimated future benefit payments

The following table sets forth amounts of benefits expected to be paid over the next 10 years from our pension plans as of December 31:

<i>(in thousands)</i>	
Year ending December 31,	Expected future benefit payments
2016	\$ 14,781
2017	16,595
2018	18,632
2019	20,669
2020	23,223
2021 - 2025	163,388

Retiree health benefit plan

The retiree health benefit plan was terminated in 2006. We continue to provide retiree health benefits only to employees who met certain age and service requirements on or before July 1, 2010. The accumulated benefit obligation and net periodic benefit cost of this plan were not material to our financial statements.

Employee savings plan

All full-time and regular part-time employees are eligible to participate in a traditional qualified 401(k) or a Roth 401(k) savings plan. We match 100% of the participant contributions up to 3% of compensation and 50% of participant contributions over 3% and up to 5% of compensation. Matching contributions paid to the plan were \$11.6 million in 2015, \$10.7 million in 2014, and \$10.4 million in 2013. Employees are permitted to invest the employer-matching contributions in our Class A common stock. Employees, other than executive and senior officers, may sell the shares at any time without restriction; sales by executive and senior officers are subject to restrictions imposed by our insider trading policies and the federal securities laws. The plan acquires shares in the open market necessary to meet the obligations of the plan. Plan participants held 0.2 million shares of our Class A common stock at December 31, 2015 and 2014.

Note 9. Incentive and Deferred Compensation Plans

Annual incentive plan

Our annual incentive plan is a bonus plan that pays cash to our executive and senior vice presidents annually. The cash awards are based on attainment of corporate and individual performance measures, which can include various financial measures. The plan includes a funding qualifier which considers our financial results, based on operating income, before a payout can be made to plan participants. If the funding qualifier is met, plan participants are eligible to receive the incentive based upon specific performance measures. The measures are established at the beginning of each year by the Executive Compensation and Development Committee of our Board of Directors ("ECDC"), with ultimate approval by the full Board of Directors. For 2015 and 2014, the performance measures primarily included the growth in direct written premium and statutory combined ratio of the Exchange and its property and casualty subsidiaries.

Long-term incentive plan

Our long-term incentive plan ("LTIP") is a performance based incentive plan designed to reward executive and senior vice presidents who can have a significant impact on our long-term performance and to further align the interests of such employees with those of our shareholders. The LTIP permits grants of performance shares or units, or phantom shares to be satisfied with shares of our Class A common stock or cash payment as determined by the ECDC. The ECDC determines the form of the award to be granted at the beginning of each performance period, which is generally a three-year period. The number of shares of the Company's common stock authorized for grant under the LTIP is 1.5 million shares, with no one person able to receive more than 250,000 shares or the equivalent of \$5 million during any one performance period. We repurchase our Class A common stock on the open market to settle stock awards under the plan. We do not issue new shares of common stock to settle stock awards. LTIP awards are considered vested at the end of each applicable performance period.

The LTIP provides the recipient the right to earn performance shares or units, or phantom stock based on the level of achievement of performance goals as defined by us. Performance measures and a peer group of property and casualty

companies to be used for comparison are determined by the ECDC. The performance measures for the 2015, 2014 and 2013 awards were the reported growth in direct written premium and statutory combined ratio of the Exchange and its property and casualty subsidiaries and return on invested assets over a three-year performance period as compared to the results of the peer group over the same period. Because the award is based upon a comparison to results of a peer group over a three-year period, the award accrual is based upon estimates of probable results for the remaining performance period. This estimate is subject to variability if our results or the results of the peer group are substantially different than the results we project.

The fair value of LTIP awards is measured at each reporting date at the current share price of our Class A common stock. A liability is recorded and compensation expense is recognized ratably over the performance period.

At December 31, 2015, the plan awards for the 2013-2015 performance period were fully vested. Distributions will be made in 2016 once peer group financial information becomes available at which time participants will elect the form of payment, either cash or stock. The estimated plan award based upon the peer group information as of September 30, 2015 is \$13.5 million. At December 31, 2014, the awards for the 2012-2014 period were fully vested. Participants had the option of receiving either cash or stock for the 2012-2014 award. The cash award of \$8.2 million was paid in June 2015 and the stock award of 1,567 shares with an average share price of \$81.04 and a market value of \$0.1 million was delivered to plan participants in June 2015. At December 31, 2013, the awards, granted as stock, for the 2011-2013 performance period were fully vested. The average share price on the date the shares were delivered to plan participants for the 2011-2013 performance period was \$75.36. The plan award of 54,371 shares of Class A common stock with a market value of approximately \$4.1 million was paid in June 2014.

Earned compensation costs are allocated to related entities and reimbursed to us in cash once the payout is made. The total compensation cost charged to operations related to these LTIP awards was \$13.4 million in 2015, \$12.5 million in 2014, and \$7.9 million in 2013. The related tax benefits recognized in income were \$4.7 million in 2015, \$4.4 million in 2014, and \$2.8 million in 2013. The Exchange reimburses us for approximately 33% of the annual compensation cost of these plans, which represents the amount of compensation expense for our employees performing claims and life insurance functions.

At December 31, 2015, there was \$11.1 million of total unrecognized compensation cost for non-vested LTIP awards related to open performance periods. Unrecognized compensation is expected to be recognized over a period of two years.

Equity compensation plan

Effective April 17, 2013, our Board of Directors approved an equity compensation plan ("ECP") designed to reward key employees, as determined by the ECDC or the chief executive officer, who can have a significant impact on our long-term performance and to further align the interests of such employees with those of our shareholders. The ECP permits grants of restricted shares, restricted share units and other share based awards, to be satisfied with shares of our Class A common stock or cash. The ECDC determines the form of the award to be granted at the beginning of each performance period. The number of shares of the Company's Class A common stock authorized for grant under the ECP is 100,000 shares, with no one person able to receive more than 5,000 shares in a calendar year. Share awards are settled through the repurchase of our Class A common stock on the open market. We do not issue new shares of common stock to satisfy plan awards.

Restricted share awards may be entitled to receive dividends payable during the performance period, or, if subject to performance goals, to receive dividend equivalents payable upon vesting. Dividend equivalents may provide for the crediting of interest or hypothetical reinvestment experience payable after expiration of the performance period.

Vesting conditions are determined at the time the award is granted and may include continuation of employment for a specific period, satisfaction of performance goals and the defined performance period, and the satisfaction of any other terms and conditions as determined to be appropriate. The plan is to remain in effect until December 31, 2022, unless earlier amended or terminated by our Board of Directors. The total number of restricted stock units granted under the plan was 5,500 and 8,750 in 2015 and 2014, respectively. There were no awards granted during 2013. The total compensation charged to operations related to these ECP awards was \$0.4 million and \$0.3 million in 2015 and 2014, respectively. The Exchange reimburses us for approximately 31% of the annual compensation cost of these plans, which represents the amount compensation expense for our employees performing claims functions. Unrecognized compensation expense of \$0.7 million is expected to be recognized over a period of three years.

Deferred compensation plans

Our deferred compensation plans are arrangements for our executive and senior vice presidents and outside directors that allows participants to elect to defer receipt of a portion of their compensation until a later date. Employer 401(k) matching contributions that are in excess of the annual contribution or compensation limits are also credited to the participant accounts for those who elected to defer receipt of some portion of their base salary. The deferred compensation plan for our outside directors allows participants to defer receipt of a portion of their director and meeting fees until a later date. Employees or

outside directors participating in the respective plans select hypothetical investment funds for their deferrals which are credited with the hypothetical returns generated.

The following summarizes the incentive and deferred compensation plans for the years ended December 31:

(in thousands)

	2015	2014	2013
Awards, employer match, and hypothetical earnings by plan:			
Annual incentive plan awards	\$ 7,057	\$ 6,222	\$ 8,015
Long-term incentive plan awards	13,407	12,523	7,941
Deferred compensation plans, employer match, and hypothetical earnings	2,042	2,789	2,086
Total plan awards and earnings	22,506	21,534	18,042
Total plan awards paid	(14,317)	(14,839)	(10,602)
Compensation deferred under the plans	996	527	146
Distributions from the deferred compensation plans	(1,688)	(1,072)	(823)
Funding of rabbi trust for outside directors	(9,018)	—	—
Gross incentive plan and deferred compensation liabilities at end of period	<u>\$ 37,457</u>	<u>\$ 38,978</u>	<u>\$ 32,828</u>

Stock compensation plan for outside directors

We have a stock compensation plan for our outside directors to further align the interests of directors with those of our shareholders that provides for a portion of the directors' annual compensation in shares of our Class A common stock. Each director vests in the grant 25% every three months over the course of a year. Dividends paid by us are credited to each director's account which vest immediately. We do not issue new shares of common stock to directors. Our practice is to repurchase shares of our Class A common stock in the open market to satisfy these awards.

Prior to October 2015, these shares were accounted for as a liability which was equal to the total number of share credits earned at the current fair market value. Directors were paid shares of our Class A common stock equal to the number of share credits in their deferred stock account upon ending board service.

In October 2015 we established a rabbi trust to hold the shares earned by outside directors. The rabbi trust purchased 94,938 shares of our common stock on the open market at an average price of \$94.99 for \$9.0 million to satisfy the liability of the deferred compensation plan. The rabbi trust is classified and accounted for as equity in a manner consistent with the accounting for treasury stock. Dividends received on the shares in the rabbi trust will be used to purchase additional shares. The shares will be distributed to the outside director from the rabbi trust upon ending board service.

The annual charge related to these awards totaled \$1.9 million, \$2.2 million and \$1.1 million in 2015, 2014 and 2013, respectively.

Note 10. Income Taxes

The provision for income taxes consists of the following for the years ended December 31:

(in thousands)

	2015	2014	2013
Current income tax expense	\$ 106,155	\$ 87,064	\$ 89,005
Deferred income tax benefit	(14,584)	(3,305)	(5,002)
Income tax expense	<u>\$ 91,571</u>	<u>\$ 83,759</u>	<u>\$ 84,003</u>

A reconciliation of the provision for income taxes, with amounts determined by applying the statutory federal income tax rate to pre-tax income, is as follows for the years ended December 31:

(in thousands)

	2015	2014	2013
Income tax at statutory rate	\$ 93,187	\$ 87,943	\$ 86,315
Tax-exempt interest	(2,285)	(2,589)	(2,345)
Other, net	669	(1,595)	33
Income tax expense	<u>\$ 91,571</u>	<u>\$ 83,759</u>	<u>\$ 84,003</u>

Temporary differences and carry-forwards, which give rise to deferred tax assets and liabilities, are as follows for the years ended December 31:

(in thousands)

	2015	2014
Deferred tax assets:		
Other employee benefits	\$ 19,945	\$ 17,846
Pension and other postretirement benefits	48,897	55,443
Allowance for management fee returned on cancelled policies	4,375	3,850
Other	546	44
Total deferred tax assets	<u>73,763</u>	<u>77,183</u>
Deferred tax liabilities:		
Depreciation	17,843	17,290
Prepaid expenses	6,929	8,090
Limited partnerships	5,822	10,526
Unrealized gains on investments	1,360	3,691
Other	1,123	265
Total deferred tax liabilities	<u>33,077</u>	<u>39,862</u>
Net deferred tax asset	<u>\$ 40,686</u>	<u>\$ 37,321</u>

We had no valuation allowance recorded at December 31, 2015 or December 31, 2014. The IRS has examined our tax filings through tax year ended 2009 and is currently examining our federal income tax returns for 2010, 2011 and 2012.

We are the attorney-in-fact for the subscribers (policyholders) at the Exchange, a reciprocal insurance exchange. In that capacity, we provide all services and facilities necessary to conduct the Exchange's insurance business. Indemnity and the Exchange together constitute a single insurance business. Consequently, we are not subject to state corporate income or franchise taxes in states where the Exchange conducts its business and the states collect premium tax in lieu of corporate income or franchise tax, as a result of the Exchange's remittance of premium taxes in those states.

Note 11. Capital Stock

Class A and B common stock

We have two classes of common stock: Class A which has a dividend preference and Class B which has voting power and a conversion right. Each share of Class A common stock outstanding at the time of the declaration of any dividend upon shares of Class B common stock shall be entitled to a dividend payable at the same time, at the same record date, and in an amount at least equal to 2/3 of 1.0% of any dividend declared on each share of Class B common stock. We may declare and pay a dividend in respect to Class A common stock without any requirement that any dividend be declared and paid in respect to Class B common stock. Sole shareholder voting power is vested in Class B common stock except insofar as any applicable law shall permit Class A common shareholders to vote as a class in regards to any changes in the rights, preferences, and privileges attaching to Class A common stock. Holders of Class B shares may, at their option, convert their shares into Class A shares at the rate of 2,400 Class A shares per Class B share. There were no shares of Class B common stock converted into Class A common stock in 2015, 2014 or 2013.

Stock repurchases

Our Board of Directors authorized a stock repurchase program effective January 1, 1999 allowing the repurchase of our outstanding Class A nonvoting common stock. Treasury shares are recorded in the Statements of Financial Position at total cost based upon trade date. There were no shares repurchased under this program during 2015. During 2014, 272,057 shares were repurchased under the program at a total cost of \$19.2 million. In October 2011, our Board of Directors approved a continuation of the current stock repurchase program for a total of \$150 million, with no time limitation. We had approximately \$17.8 million of repurchase authority remaining under this program at December 31, 2015, based upon trade date.

In 2015, we purchased 111,535 shares of our outstanding Class A nonvoting common stock outside of our publicly announced share repurchase program at a total cost of \$10.4 million. Of this amount, we purchased 1,567 shares of our outstanding Class A nonvoting common stock at a total cost of \$0.1 million or \$81.91 per share, for the vesting of stock-based awards in conjunction with our long-term incentive plan. These shares were delivered to plan participants in June 2015. We purchased 2,800 shares of our outstanding Class A nonvoting common stock at a total cost of \$0.2 million, or \$86.24 per share, for the vesting of stock-based awards for executive management. These shares were delivered to executive management in August 2015. In November 2015, we purchased 12,230 shares of our outstanding Class A nonvoting common stock at a total cost of \$1.1 million or \$87.03 per share, for the vesting of stock-based awards for a former outside director. These shares were delivered in November 2015. In November and December 2015, we purchased 94,938 shares of our outstanding Class A nonvoting common stock at a total cost of \$9.0 million or \$94.99 per share, to fund the newly established rabbi trust for the outside director deferred compensation plan. See Note 9, "Incentive and Deferred Compensation Plans".

In 2014, we purchased 64,398 shares of our outstanding Class A nonvoting common stock outside of our publicly announced share repurchase program at a total cost of \$4.9 million. Of this amount, we purchased 2,800 shares of our outstanding Class A nonvoting common stock at a total cost of \$0.2 million, or \$71.93 per share, for the vesting of stock-based awards for executive management. These shares were delivered to executive management in January 2014. In May 2014, we purchased 7,227 shares of our outstanding Class A nonvoting common stock at a total cost of \$0.6 million, or \$76.45 per share, for the vesting of stock-based awards for a former outside director. These shares were delivered in May 2014. In May and June 2014, we purchased 54,371 shares of our outstanding Class A nonvoting common stock at a total cost of \$4.1 million, or \$76.21 per share, for the vesting of stock-based awards in conjunction with our long-term incentive plan. These shares were delivered to plan participants in June 2014.

Note 12. Accumulated Other Comprehensive Income (Loss)

Changes in accumulated other comprehensive income (loss) by component, including amounts reclassified out of accumulated other comprehensive income (loss) and the related line item in the Statements of Operations where net income is presented, are as follows for the year ended December 31:

(in thousands)

	2015	2014	2013
Investment securities:			
Accumulated other comprehensive income, beginning of the year	\$ 6,807	\$ 5,984	\$ 13,325
Other comprehensive (loss) income before reclassifications, net of tax benefit (expense) of \$2,678, \$(633), and \$3,852, respectively	(4,973)	1,175	(7,153)
Realized investment gains, net of tax benefit of \$172, \$226 and \$236, respectively	(320)	(420)	(440)
Impairment losses, net of tax expense of \$(545), \$(37), and \$(136), respectively	1,013	68	252
Other comprehensive (loss) income, net of tax	(4,280)	823	(7,341)
Accumulated other comprehensive income, end of the year	<u>\$ 2,527</u>	<u>\$ 6,807</u>	<u>\$ 5,984</u>
Pension and other postretirement plans:			
Accumulated other comprehensive loss, beginning of the year	\$(124,508)	\$(65,083)	\$(146,516)
Other comprehensive income (loss) before reclassifications, net of tax (expense) benefit of \$(8,433), \$34,378, and \$(38,352), respectively	15,661	(63,845)	71,226
Amortization of prior service costs, net of tax expense of \$234, \$248, and \$278, respectively ⁽¹⁾	434	461	517
Amortization of net actuarial loss, net of tax expense of \$4,858, \$2,131, and \$5,218, respectively ⁽¹⁾	9,022	3,959	9,690
Other comprehensive income (loss), net of tax	25,117	(59,425)	81,433
Accumulated other comprehensive loss, end of the year	<u>\$ (99,391)</u>	<u>\$(124,508)</u>	<u>\$(65,083)</u>
Total			
Accumulated other comprehensive loss, beginning of the year	\$(117,701)	\$(59,099)	\$(133,191)
Investment securities	(4,280)	823	(7,341)
Pension and other postretirement plans	25,117	(59,425)	81,433
Other comprehensive income, net of tax	20,837	(58,602)	74,092
Accumulated other comprehensive loss, end of the year	<u>\$ (96,864)</u>	<u>\$(117,701)</u>	<u>\$(59,099)</u>

(1) These components of accumulated other comprehensive income (loss) are included in the computation of net periodic pension cost. See Note 8, "Postretirement Benefits", for additional information.

Note 13. Related Party

Management fee

A management fee is charged to the Exchange for services we provide under subscriber's agreements with policyholders at the Exchange. The fee is a percentage of direct and assumed premiums written by the Exchange. This percentage rate is adjusted periodically by our Board of Directors but cannot exceed 25%. The effective management fee rate charged the Exchange was 25% in 2015, 2014 and 2013. The Board of Directors elected to maintain the fee at 25% beginning January 1, 2016.

There is no provision in the subscriber's agreement for termination of our appointment as attorney-in-fact by the subscribers of the Exchange and the appointment is not affected by a policyholder's disability or incapacity.

Insurance holding company system

Most states have enacted legislation that regulates insurance holding company systems, defined as two or more affiliated persons, one or more of which is an insurer. The Exchange has the following wholly owned property and casualty subsidiaries: Erie Insurance Company, Erie Insurance Company of New York, Erie Insurance Property and Casualty Company and Flagship City Insurance Company, and a wholly owned life insurance company, Erie Family Life Insurance Company ("EFL"). Indemnity and the Exchange, and its wholly owned subsidiaries, meet the definition of an insurance holding company system.

Expense allocations

All claims handling services for the Exchange are performed by our employees who are entirely dedicated to claims related activities. All costs associated with these employees are reimbursed to us from the Exchange's revenues in accordance with the subscriber's agreement. We are reimbursed by EFL from its revenues for all costs associated with employees who perform life insurance related operating activities for EFL in accordance with its service agreement with us. Common overhead expenses included in the expenses paid by us are allocated based upon appropriate utilization statistics (employee count, square footage, vehicle count, project hours, etc.) specifically measured to accomplish proportional allocations. Executive compensation is allocated based upon each executive's primary responsibilities (management services, property and casualty claims operations, EFL operations, and investment operations). We believe the methods used to allocate common overhead expenses among the affiliated entities are reasonable. See also Note 8, "Postretirement Benefits" for a discussion of intercompany expense allocations under the postretirement benefit plans.

Payments on behalf of related entities

We make certain payments on behalf of the Exchange and EFL. These reimbursements are settled on a monthly basis. The amounts of these cash settlements were as follows for the years ended December 31:

<i>(in thousands)</i>	2015	2014
Erie Insurance Exchange	\$ 406,246	\$ 378,496
Erie Family Life Insurance	35,761	37,159
Total cash settlements	<u>\$ 442,007</u>	<u>\$ 415,655</u>

Office leases

We lease certain office space from the Exchange including the home office and three field office facilities. Rent expenses under these leases totaled \$6.5 million, \$7.8 million and \$5.9 million in 2015, 2014 and 2013, respectively. We also have a lease commitment with EFL for a branch office until 2018. Annual rentals paid to EFL under this lease totaled \$0.4 million in 2015, 2014 and 2013.

Notes receivable from EFL

We are due \$25 million from EFL in the form of a surplus note that was issued in 2003. The note may be repaid only out of unassigned surplus of EFL. Both principal and interest payments are subject to prior approval by the Pennsylvania Insurance Commissioner. The note bears an annual interest rate of 6.7% and will be payable on demand on or after December 31, 2018, with interest scheduled to be paid semi-annually. EFL paid annual interest to us of \$1.7 million in 2015, 2014 and 2013.

Note 14. Concentrations of Credit Risk

Financial instruments could potentially expose us to concentrations of credit risk, including unsecured receivables from the Exchange. A large majority of our revenue and receivables are from the Exchange and affiliates. See also Note 1, "Nature of Operations". Management fee amounts and other reimbursements due from the Exchange and affiliates were \$348.1 million and \$335.2 million at December 31, 2015 and 2014, respectively.

Note 15. Commitments and Contingencies

We have contractual commitments to invest up to \$19.1 million related to our limited partnership investments at December 31, 2015. These commitments are split between private equity securities of \$7.3 million, mezzanine debt securities of \$8.2 million, and real estate activities of \$3.6 million. These commitments will be funded as required by the limited partnership agreements.

We are involved in litigation arising in the ordinary course of conducting business. In accordance with current accounting standards for loss contingencies and based upon information currently known to us, we establish reserves for litigation when it is probable that a loss associated with a claim or proceeding has been incurred and the amount of the loss or range of loss can be reasonably estimated. When no amount within the range of loss is a better estimate than any other amount, we accrue the minimum amount of the estimable loss. To the extent that such litigation against us may have an exposure to a loss in excess of the amount we have accrued, we believe that such excess would not be material to our financial condition, results of operations, or cash flows. Legal fees are expensed as incurred. We believe that our accruals for legal proceedings are appropriate and, individually and in the aggregate, are not expected to be material to our financial condition, operations, or cash flows.

We review all litigation on an ongoing basis when making accrual and disclosure decisions. For certain legal proceedings, we cannot reasonably estimate losses or a range of loss, if any, particularly for proceedings that are in their early stages of development or where the plaintiffs seek indeterminate damages. Various factors, including, but not limited to, the outcome of potentially lengthy discovery and the resolution of important factual questions, may need to be determined before probability can be established or before a loss or range of loss can be reasonably estimated. If the loss contingency in question is not both probable and reasonably estimable, we do not establish an accrual and the matter will continue to be monitored for any developments that would make the loss contingency both probable and reasonably estimable. In the event that a legal proceeding results in a substantial judgment against, or settlement by, us, there can be no assurance that any resulting liability or financial commitment would not have a material adverse effect on our financial condition, results of operations, or cash flows.

Note 16. Supplementary Data on Cash Flows

A reconciliation of net income to net cash provided by operating activities as presented in the Statements of Cash Flows is as follows for the years ended December 31:

(in thousands)

	2015	2014	2013
Cash flows from operating activities:			
Net income	\$ 174,678	\$ 167,505	\$ 162,611
Adjustments to reconcile net income to net cash provided by operating activities:			
Depreciation and amortization	16,461	15,656	14,998
Deferred income tax benefit	(14,584)	(3,305)	(5,002)
Realized losses (gains) and impairments on investments	1,066	(952)	(557)
Equity in earnings of limited partnerships	(16,983)	(10,929)	(21,694)
Net amortization of bond premium	8,160	7,225	6,864
(Decrease) increase in deferred compensation	(1,526)	6,149	6,762
Limited partnership distributions	14,112	15,327	27,050
Increase in receivables from affiliates	(12,835)	(34,778)	(19,655)
Decrease (increase) in accrued investment income	47	(915)	(374)
(Increase) decrease in federal income taxes recoverable	(499)	(8,421)	2,812
Decrease in prepaid pension	20,307	557	17,842
Decrease (increase) in prepaid expenses and other assets	1,193	(1,747)	(5,831)
Increase in accounts payable and accrued expenses	3,633	1,753	4,910
Increase in commissions payable	5,624	20,596	10,508
Increase in accrued agent bonuses	18,524	12,292	16,764
Net cash provided by operating activities	<u>\$ 217,378</u>	<u>\$ 186,013</u>	<u>\$ 218,008</u>

Note 17. Quarterly Results of Operations (unaudited)

	Year ended December 31, 2015				
	First quarter	Second quarter	Third quarter	Fourth quarter	Year
(in thousands, except per share data)					
Operating revenue	\$ 350,831	\$ 401,660	\$ 396,637	\$ 356,380	\$ 1,505,508

(1) The cumulative sum of quarterly basic and diluted net income per share amounts may not equal total basic and diluted net income per share for the year due to differences in weighted average shares and equivalent shares outstanding for each of the periods presented.

Note 18. Subsequent Events

No items were identified in the period subsequent to the financial statement date that required adjustment or disclosure.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosures.

As required by the Securities and Exchange Commission Rule 13a-15(e), we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2015. Based upon the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There has been no change in our internal controls over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect our internal controls over financial reporting. Our process for evaluating controls and procedures is continuous and encompasses constant improvement of the design and effectiveness of established controls and procedures.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting of Erie Indemnity Company, as defined in Rules 13a-15(f) under the Exchange Act. Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the Erie Indemnity Company's internal control over financial reporting based upon the framework in the *Internal Control-Integrated Framework* issued in 2013 by the Committee of Sponsoring Organizations of the Treadway Commission. Based upon our evaluation under the framework in the *Internal Control-Integrated Framework* issued in 2013, management has concluded that Erie Indemnity Company's internal control over financial reporting was effective as of December 31, 2015.

Our independent auditor, Ernst & Young LLP, a registered public accounting firm, has issued an attestation report on our internal control over financial reporting. This report appears on the following page.

ITEM 9B. OTHER INFORMATION

There was no additional information in the fourth quarter of 2015 that has not already been filed in a Form 8-K.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Erie Indemnity Company

We have audited Erie Indemnity Company's internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). Erie Indemnity Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Erie Indemnity Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the statements of financial position of Erie Indemnity Company as of December 31, 2015 and 2014, and the related statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2015 of Erie Indemnity Company and our report dated February 25, 2016 expressed an unqualified opinion thereon.
