

UNITED STATES SECURITIES AND EXCHANGE COMMISSION WASHINGTON, DC 20549

FORM 10-K (Mark One) ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the fiscal year ended December 31, 2020 OR TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 П For the transition period from to Commission File Number 001-37988 **NexTier Oilfield Solutions Inc.** (Exact Name of Registrant as Specified in its Charter) 38-4016639 Delaware (State or other jurisdiction (I.R.S. Employer of incorporation or organization) Identification No.) 3990 Rogerdale Rd 77042 Houston Texas (Address of principal executive (Zip code) offices) (713) 325-6000 (Registrant's telephone number, including area code) Not Applicable. (Former Name, Former Address, if Changed Since Last Report) Securities registered pursuant to Section 12(b) of the Act: **Title of Each Class Trading Symbol** Name of Each Exchange On Which Registered NEX Common Stock, \$0.01 par value New York Stock Exchange Securities registered pursuant to Section 12(g) of the Act: None Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes 🗆 No 🗵 Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes 🗆 No 🗵 Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes 🗷 No 🗆 Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No □ Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

 Large accelerated filer
 □

 Non-accelerated filer
 □

 Smaller reporting company
 □

Emerging Growth Company

If an emerging growth company, indicate by check mark if the registrant has elected to not use the extended transition period for complying v	with
any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. □	

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes $\ \square$ No $\ \boxtimes$

The aggregate market value of the common stock of the registrant held by non-affiliates of the registrant, computed by reference to the price at which the common stock was last sold on June 30, 2020, was approximately \$399.6 million.

As of February 22, 2021, the registrant had 215,159,686 shares of common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for its 2021 Annual Meeting of Stockholders, which will be filed with the United States Securities and Exchange Commission within 120 days of December 31, 2020, are incorporated by reference into Part III of this Annual Report on Form 10-K.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS AND INFORMATION

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, which are subject to risks and uncertainties. All statements other than statements of historical facts contained in this Annual Report on Form 10-K, including statements regarding our future operating results and financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. Our forward-looking statements are generally accompanied by words such as "may," "should," "expect," "believe," "plan," "anticipate," "could," "intend," "target," "goal," "project," "contemplate," "believe," "estimate," "predict," "potential," or "continue" or the negative of these terms or other similar expressions. Any forward-looking statements contained in this Annual Report on Form 10-K speak only as of the date on which we make them and are based upon our historical performance and on current plans, estimates and expectations. Except as required by law, we have no obligation to update any forward-looking statements made in this Annual Report on Form 10-K to reflect events or circumstances after the date of this Annual Report on Form 10-K or to reflect new information or the occurrence of unanticipated events. Forward-looking statements contained in this Annual Report on Form 10-K include, but are not limited to, statements about:

- the impact of the current COVID-19 pandemic and the evolving response thereto, including the impact of social distancing, shelter-in-place, shutdowns of non-essential businesses and similar measures imposed or undertaken by governments, private businesses or others;
- changing regional, national or global economic conditions, including oil and gas supply and demand;
- our business strategy;
- our plans, objectives, expectations and intentions;
- the competitive nature of the industry in which we conduct our business, including pricing pressures;
- our future operating results;
- crude oil and natural gas commodity prices;
- demand for services in our industry;
- the impact of pipeline and storage capacity constraints;
- the impact of adverse weather conditions;
- the effects of government regulation;
- changes in tax laws;
- legal proceedings, liability claims and effect of external investigations;
- the effect of a loss of, or the financial distress of, one or more customers;
- our ability to obtain or renew customer contracts;
- the effect of a loss of, or interruption in operations of, one or more key suppliers;
- our ability to maintain the right level of commitments under our supply agreements;
- the market price and availability of materials or equipment;
- the impact of new technology;
- our ability to employ a sufficient number of skilled and qualified workers;
- our ability to obtain permits, approvals and authorizations from governmental and third parties;
- planned acquisitions, divestitures and future capital expenditures;
- our ability to maintain effective information technology systems;

- our ability to maintain an effective system of internal controls over financial reporting;
- our ability to service our debt obligations;
- financial strategy, liquidity or capital required for our ongoing operations and acquisitions, and our ability to raise additional capital;
- the market volatility of our stock;
- our ability or intention to pay dividends or to effectuate repurchases of our common stock;
- the impact of ownership by Cerberus (through Keane Investor); and
- the impact of our corporate governance structure.

We caution you that the foregoing list may not contain all of the forward-looking statements made in this Annual Report on Form 10-K.

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Annual Report on Form 10-K primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations and prospects. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties and other factors described in the section entitled Part I, "Item 1A. Risk Factors" and elsewhere in this Annual Report on Form 10-K. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Annual Report on Form 10-K. We cannot assure you that the results, events, circumstances, plans, intentions or expectations reflected in any forward-looking statements will be achieved or occur. Actual results, events or circumstances could differ materially from those described in such forward-looking statements, and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make. We undertake no obligation to revise or update any forward-looking statements for any reason, except as required by law.

This Annual Report on Form 10-K includes market and industry data and certain other statistical information based on third-party sources including independent industry publications, government publications and other published independent sources. Although we believe these third-party sources are reliable as of their respective dates, we have not independently verified the accuracy or completeness of this information. Some data is also based on our own good faith estimates, which are supported by our management's knowledge of and experience in the markets and businesses in which we operate.

While we are not aware of any misstatements regarding any market, industry or similar data presented herein, such data involves risks and uncertainties and is subject to change based on various factors, including those discussed above and in Part 1, "**Item 1A**. Risk Factors" in this Annual Report on Form 10-K.

References Within This Annual Report

As used in this Annual Report on Form 10-K, unless the context otherwise requires, references to (i) the terms "Company," "NexTier," "we," "us" and "our" refer to NexTier Oilfield Solutions Inc. and its consolidated subsidiaries; (ii) the term "Keane Group" refers to Keane Group Holdings, LLC and its consolidated subsidiaries; (iii) the term "Trican Parent" refers to Trican Well Service Ltd. and, where appropriate, its subsidiaries; (iv) the term "Trican U.S." refers to Trican Well Service L.P.; (v) the term "Trican" refers to Trican Parent and Trican U.S., collectively; (vi) the term "RockPile" refers to RockPile Energy Services, LLC and its consolidated subsidiaries; (vii) the term "RSI" refers to Refinery Specialties, Incorporated; (viii) the term "Keane Investor" refers to Keane Investor Holdings LLC; (ix) the term "Cerberus" refers to Cerberus Capital Management, L.P. and its controlled affiliates and investment funds; (x) the term "C&J" refers to C&J Energy Services, Inc.; (xi) the term "C&J Merger" refers to the consummation of the transactions described in that certain Agreement and Plan of Merger, dated as of June 16, 2019 (the "Merger Agreement"), by and among the C&J, us and King Merger Sub Corp., one of our wholly owned subsidiaries.

As used in this Annual Report on Form 10-K, capacity in the hydraulic fracturing business refers to the total number of hydraulic horsepower, regardless of whether such hydraulic horsepower is active and deployed, active and not deployed or inactive. While the equipment and amount of hydraulic horsepower required for a customer project varies, we

calculate our total number of fleets, as used in this Annual Report on Form 10-K, by dividing our total hydraulic horsepower by approximately 48,000 hydraulic horsepower.

As used in this Annual Report on Form 10-K, references to cannibalization of parked equipment refer to the removal of parts and components (such as the engine or transmission of a fracturing pump) from an idle hydraulic fracturing fleet in order to service an active hydraulic fracturing fleet.

BASIS OF PRESENTATION IN THIS ANNUAL REPORT ON FORM 10-K

The consolidated financial statements for the period from January 1, 2019 to October 31, 2019 reflect only the historical results of the Company prior to the completion of the C&J Merger. The financial statements have been prepared using the acquisition method of accounting under existing U.S. GAAP, which requires that one of the two companies in the C&J Merger be designated as the acquirer for accounting purposes. C&J and Keane determined that Keane was the accounting acquirer. Accordingly, consideration given by Keane to complete the C&J Merger was allocated to the underlying tangible and intangible assets and liabilities acquired based on their estimated fair values as of the date of completion of the C&J Merger, with any excess purchase price allocated to goodwill.

For further details, see Note (1) Basis of Presentation and Nature of Operations of Part II, "Item 8. Financial Statements and Supplemental Data." For more details regarding the C&J Merger, refer to Note (3) Mergers and Acquisitions.

All information presented herein is based on our fiscal calendar. Unless otherwise stated, references to particular years, quarters, months or periods refer to our fiscal years and the associated quarters, months and periods of those fiscal years.

PART I

Item 1. Business

General description of the business

NexTier Oilfield Solutions Inc. is a predominately U.S. land focused oilfield service company, with a diverse set of well completion and production services across a variety of active and demanding basins. We provide our services through our operating subsidiaries to exploration and production ("E&P") customers. Our integrated solutions approach is focused on delivering efficiency, and our ongoing commitment to innovation helps our customers capitalize on technological advancements. NexTier is differentiated through four points of distinction, including safety performance, efficiency, partnership and innovation.

We were formed under the name Keane Group, Inc. as a Delaware corporation on October 13, 2016, to be a holding corporation as part of an organizational restructuring of Keane Group Holdings, LLC, which was formed March 1, 2011, and its subsidiaries, for the purpose of facilitating the initial public offering of shares of common stock of the Company in 2017. On January 25, 2017, we consummated an initial public offering ("IPO"). To effectuate the IPO, we completed a series of transactions reorganizing our business, resulting in the Company being a holding company with no material assets other than its ownership of Keane Group. In connection with the restructuring, the Keane Group entities became wholly owned subsidiaries of the Company.

In continuation of our growth through acquisition strategy, since 2013 has notably resulted in the growth of the location and scale of our operational footprint, expansion of our customer base, addition of wireline operations, increase in our pumping capacity and expansion of our hydraulic fracturing operations by more than an additional 1,040,000 hydraulic horsepower, on October 31, 2019, we completed a merger transaction with C&J Energy Services, Inc., a publicly traded Delaware corporation. Pursuant to this transaction, C&J was ultimately merged with and into one of our wholly owned merger subsidiary, with our subsidiary continuing as the surviving entity. On the effective date of the C&J Merger, we changed our name to "NexTier Oilfield Solutions Inc."

In March of 2020, we divested the legal entities and the majority of the assets that comprised our Well Support Services segment. We are currently organized into two reportable segments, consisting of:

- Completion Services, which consists of the following business lines: (1) fracturing services; (2) wireline and pumping services; and (3) completion support services, which includes our research and technology ("R&T") department; and
- Well Construction and Intervention Services ("WC&I"), which consists of the following business lines: (1) cementing services and (2) coiled tubing services.

Completion Services segment

Our completion services are designed in partnership with our customers to enhance both initial production rates and estimated ultimate recovery from new and existing wells. The core services provided through our Completion Services segment are hydraulic fracturing, wireline and pumping services. We utilize our in-house capabilities, including our R&T department and data control instruments business, to offer a technologically advanced and efficiency focused range of completion techniques. The majority of revenue for this segment is generated by our fracturing business.

Hydraulic Fracturing. Hydraulic fracturing services are performed to enhance production of oil and natural gas from formations with low permeability and restricted flow of hydrocarbons. The process of hydraulic fracturing involves pumping a highly viscous, pressurized fracturing fluid, typically a mixture of water, chemicals and proppant, into a well casing or tubing in order to fracture underground mineral formations. These fractures release trapped hydrocarbon particles and free a channel for the oil or natural gas to flow freely to the wellbore for collection. Fracturing fluid mixtures include proppant that becomes lodged in the cracks created by the hydraulic fracturing process, "propping" them open to facilitate the flow of hydrocarbons upward through the well.

Wireline Technologies. Our wireline services involve the use of a truck equipped with a spool of wireline that is unwound and lowered into oil and natural gas wells to convey specialized tools or equipment for well completion, well intervention, pipe recovery and reservoir evaluation purposes. We offer our wireline services in conjunction with our hydraulic fracturing services in "plug-and-perf" well completions to maximize efficiency for our customers. "Plug-and-perf" is a multi-stage well completion technique for cased-hole wells that consists of pumping a plug and perforating guns to a specified depth. Once the plug is set, the zone is perforated and the tools are removed from the well, a ball is pumped down to isolate the zones below the plug and the hydraulic fracturing treatment is applied.

In addition, we offer wireline and pumping services that are not integrated with our fracturing services. We are one of the leading providers of perforating, pumpdown, pipe recovery, pressure pumping, and wellsite make-up and pressure testing services. We are highly experienced in safely servicing deep, high-pressure, high-temperature wells in some of the most active onshore basins in the United States. Our in-house manufacturing capabilities through our R&T department allow us to manage costs and lead times with regard to hardware and perforating guns, switches and accessories, providing us with a competitive advantage and enabling higher returns.

In late 2020, we began evolving our completion service offerings to develop an integrated natural gas treatment and delivery solution. We believe this integration solution will assist our customers to reduce emissions at the wellsite and throughout their operations. This solution is focused on providing gas sourcing, compression, transport, decompression, treatment, and related services for our fracturing operations. We currently expect this additional integrated service to be available to our customers later in 2021.

Well Construction and Intervention Services segment

Cementing. Our cementing services incorporate custom engineered mixing and blending equipment to ensure precision and accuracy in providing annulus isolation and hydraulic seal, while protecting fresh water zones from our customers' zone of interest. Our cement division has the expertise to cement shallow to complex high temperature, high pressure wells. We also offer engineering software and technical guidance for remedial cementing applications and acidizing to optimize the performance of our customers' wells. We are one of the largest providers of specialty cementing services in the United States. Our operations are supported by multiple full-service laboratory facilities with advanced capabilities.

Coiled Tubing. We offer a broad range of coiled tubing services to help customers accomplish a wide variety of goals in their horizontal completion, workover and well maintenance projects. The majority of our coiled tubing fleet consists of large diameter coil, meaning two inches or larger in diameter, which allows us to service wells with longer lateral lengths. Our coiled tubing services allow customers to complete projects quickly and safely across a wide spectrum of pressures, without having to shut in their wells.

Well Support Services segment

On March 9, 2020 we sold our Well Support Services Segment. For additional information on this transaction, see Note (21) Business Segments of Part II, "Item 8. Financial Statements and Supplemental Data." Prior to the sale, our Well Support Services segment focused on post-completion activities at the well site, and includes rig services, such as workover, fluids management, and other specialty well site services. The majority of revenue for this segment was generated by our rig services business, and we considered our rig services and fluids management businesses to be our primary service lines within this reportable segment.

As part of our services that helped prolong the productive life of an oil or gas well, we operated one of the largest rig fleets in the United States. These rigs were involved in the routine repair and maintenance of oil and gas wells, re-drilling operations and plug and abandonment operations. Workover services can include deepening or extending wellbores into new formations by drilling horizontal or lateral wellbores, sealing off depleted production zones and accessing previously bypassed production zones, converting former production wells into injection wells for enhanced recovery operations and conducting major subsurface repairs due to equipment failures. Workover services may last from a few days to several weeks, depending on the complexity of the workover. Maintenance services provided with our rig fleet were generally required throughout the life cycle of an oil or gas well. Examples of these maintenance services include routine mechanical repairs to the pumps, tubing and other equipment, removing debris and formation material from wellbores, and pulling rods and other downhole equipment from wellbores to identify and resolve production problems. Maintenance services were generally less complicated than completion and workover related services and required less time to perform. Our rig fleet was also used in the process of permanently shutting-in oil or gas wells that were at the end of their productive lives. These plugging and abandonment services generally required auxiliary equipment in addition to a well servicing rig. The demand for plugging and abandonment services was not significantly impacted by the demand for oil and gas because well operators are required within a specified period of time by state regulations to plug wells that are no longer productive.

Fluids Management. We provided a full range of fluid services, including the storage, transportation and disposal of various fluids used in various phases including drilling, completion and workover of oil and gas wells. Our fleet of trucks and trailers and portable tanks enabled us to rapidly deploy our equipment across a broad geographic area. Included in our fleet of fluid trucks and trailers were specialized trucks and trailers that were optimized to transport condensate. We also owned private saltwater disposal wells. Demand and pricing for our fluids management services generally corresponded to demand for our rig services.

Business strategy

As part of our integration under the NexTier name, introspection by the resulting management team refined our business mission as one to responsibly grow and continuously improve our business in a way that maximizes shareholder value by taking care of our people, our customers, our communities and the environment. Our principal business objective is to deliver integrated, environmentally conscious completion services and power solutions that help enable our customers to safely and affordably unlock sources of energy. We believe that by successfully deploying this strategy, we can deliver industry leading returns and increase shareholder value. We maintain a strict focus on health, safety and environmental stewardship and cost-effective customer-centric solutions. We expect to achieve this objective through:

- developing and expanding our relationships with existing and new customers;
- continuing our exemplary safety performance;
- investing further in driving efficiencies and environmental stewardship, including through our digital platform and evolving power solutions offering;
- maintaining a conservative balance sheet to preserve operational and strategic flexibility; and

continuing to evaluate potential consolidation opportunities that strengthen our capabilities, increase
our scale and create shareholder value.

For further discussion on the business strategies we plan to continue executing in 2021, see Part II, "**Item 7**. Management's Discussion and Analysis of Financial Condition and Results of Operations."

Customers

Our customers primarily include major integrated and large independent oil and natural gas E&P companies. For the year ended December 31, 2020, we had two customer who individually represented more than 10% of our consolidated revenue. These two customers collectively represented 29% of our consolidated revenue and 11% of our total accounts receivable for the fiscal year ended December 31, 2020. For the year ended December 31, 2019, we had four customers who individually represented more than 10% of our consolidated revenue. These four customers collectively represented 55% of our consolidated revenue and 21% of our total accounts receivable for the fiscal year ended December 31, 2019. For the year ended December 31, 2018, we had three customers who individually represented more than 10% of our consolidated revenue. These three customers collectively represented 39% of our consolidated revenue and 45% of our total accounts receivable for the fiscal year ended December 31, 2018.

Competition and Sales

The markets in which we operate are highly competitive with significant potential for excess capacity. Projects are often awarded on a bid basis, which tends to increase the highly competitive nature of the environment in which we operate. We provide services in various geographic regions, predominately across the U.S., and the competitive landscape varies in each. Utilization and pricing for our services have from time to time been negatively affected by increases in supply relative to demand in our operating areas and geographic markets. This was exacerbated in 2020 due to the COVID-19 pandemic and other oil and gas market drivers. See additional discussion in Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations". Our major competitors for both our Completions Services and Well Construction and Intervention Services segments include FTS International, Inc., Halliburton Company, Liberty Oilfield Services Inc., Patterson-UTI Energy, Inc., ProPetro Services, Inc., RPC, Inc., Schlumberger Limited, Superior Energy Services, Inc. and U.S. Well Services. We also compete regionally in each segment with a significant number of smaller service providers.

Historically, our core competitive factors in the markets we serve have been our multi-basin service capability and close proximity to our customers, technical expertise, equipment reliability, work force competency, efficiency, safety record, reputation, experience and prices. While these factors continue to dominate, we believe that our customers have begun to look beyond these core requirements to prefer suppliers that can provided integrated solutions that align the incentives of operators and service providers.

While we seek to be competitive in our pricing, we believe many of our customers have elected to work with us based on our customer-tailored partnership approach, our safety record, the performance and competency of our crews and the quality of our equipment and our services. We seek to differentiate ourselves from our competitors by delivering the highest-quality services and equipment possible, coupled with superior execution and operating efficiency, resulting in cost effective operations and a safe working environment. NexTier has also been developing and building its digital program for some time. We believe our digital program, continued investment in diesel substitution (such as duel fuel capabilities), and our integrated natural gas treatment and delivery solution are important to achieving emissions reductions initiatives, both for us and our customers, and provide a competitive differentiating factor.

Raw materials

We purchase a wide variety of raw materials, parts and components that are manufactured and supplied for our operations. We are not dependent on any single source of supply for those parts, supplies or materials. To date, we have generally been able to obtain the equipment, parts and supplies necessary to support our operations on a

timely basis. While we believe we will be able to make satisfactory alternative arrangements in the event of any interruption in the supply of these materials and/or products by one of our suppliers, this may not always be the case. In addition, certain materials for which we do not currently have long-term supply agreements could experience shortages and significant price increases in the future.

For the year ended December 31, 2020, purchases from our largest supplier represented approximately 5% of the Company's overall purchases.

Research & technology and intellectual property

We have invested in technological advancement, including the development of a state-of-the-art Innovation Center staffed by a team of highly skilled digital professionals and engineers. Our innovation efforts have been focused on fit-for-purpose solutions designed to enhance our service offerings, increase efficiencies, lower our operating costs, optimize capital expenditures and add value for our customers. This includes developing an innovative digital infrastructure, NexHub, which is an internal, real-time, digital platform that allows around-the-clock remote operations support across our active fleets. Driven by artificial intelligent logistics and digital operations engineering, NexHub provides key benefits of remote operations to allow for less employees at the well-site, extended equipment life through equipment health monitoring with machine learning and generated alerts, rapid response and adjustment to changing wellsite and equipment conditions, enhanced service quality, and powers data driven decisions.

Our research and development and digital initiatives generate recurring cost savings for our integrated completion services operations, which is central to our overall strategy of proactively managing our costs to maximize returns. Several of these investments provide value-added products and services that, in addition to producing revenue, are creating increasing demand from key customers. In our day-to-day operations, we utilize equipment and products manufactured by our vertically integrated businesses which are managed through our Innovation Center, and we may also sell such equipment and products to third-party customers in the global energy services industry. We believe that our focus on innovation, with the objective of reducing costs and improving sustainability of our operations, provides a strategic benefit through the ability to fund, develop, and implement new technologies and quickly respond to changes in customer requirements and industry demand.

We own a number of patents and have pending certain patent applications covering various products and services. We are also licensed to utilize technology covered by patents owned by others. Furthermore, we believe the information regarding our customer and supplier relationships are valuable proprietary assets, and we have pending applications and registered trademarks for various names under which our entities conduct business or provide products or services. We do not own or license any patents, trademarks or other intellectual property that we believe to be material to the success of our business.

Seasonality

Our results of operations have historically reflected seasonal tendencies, generally in the first and fourth quarters, related to the conclusion and restart of our customers' annual capital expenditure budgets, the holidays and inclement winter weather, during which we may experience declines in our operating results. Our operations in North Dakota and Pennsylvania are particularly affected by seasonality due to inclement winter weather. During the spring and summer months, our operations in certain areas may be impacted by transportation restrictions due to the work-site conditions caused by the spring thaws or tropical weather systems.

Human Capital Resources

NexTier is committed to conducting our activities in a safe and responsible manner, while fostering a culture to treat every person with respect and dignity. We seek to attract, retain and develop high quality talent who can drive the success of our business while emulating our core values.

Health and Safety

In our industry, a strong safety record is key to attracting and retaining top-tier customers and employees. We believe we are among the safest service providers in the industry. In 2020, we achieved a total recordable

incident rate of 0.42, which is substantially less than the 1.00 incident rate derived from an industry average from 2016 to 2019. We believe total recordable incident rate is a reliable measure of safety performance.

We offer comprehensive health and welfare, disability, and retirement benefits to eligible employees. The core health and welfare benefits are supplemented with discount programs for health-related goods and services, a variety of voluntary benefits and paid time off programs. Health benefits include low-cost telehealth services as well as mental and behavioral health resources, including on-demand access to an Employee Assistance Program (EAP) for employees and their dependents.

In response to the COVID-19 pandemic, we implemented significant changes that we determined were in the best interest of our employees as well as the communities in which we operate. This includes having the vast majority of our employees work from home for periods of time, while implementing additional safety measures for employees continuing critical on-site work. To maintain minimized exposure points, a flex-work program was developed and deployed in an effort to balance time in the office with remote work from home. To mitigate COVID-19 exposure further pro-active measures have been implemented including, among other things, additional hand sanitizer stations; temperature check kiosks at the entrance to our corporate headquarters; eliminating guests to campuses; shifting all meetings to a virtual format; closing meeting rooms and common/shared areas in the office such as cafeterias and fitness rooms; mandatory face mask wearing (unless the person is eating or alone at work station); installation of signage for CDC guideline distancing and other reminders, and established absence management and tracing protocols to reduce transmission risk. Frequent and consistent communication efforts reinforce the importance of these health and safety measures.

Growth and Development

Hiring, developing and retaining quality employees is important to maximize the success of our operations. We actively foster a learning culture where employees are empowered to drive their career progression, supporting professional development and providing an on-demand learning platform. Competency assessments drive skill development plans and succession plans drive leadership development plans. To further support these objectives, we have designed human resources programs to:

- Enhance the company culture through employee experiences, policies and practices aimed at making the workplace more safe, healthy and inclusive;
- Align leader and team member behaviors to our purpose;
- Facilitate talent acquisition to create a high-performing and diverse workforce;
- Reward employees through competitive pay and benefits;
- Develop employees at all levels through learning strategies focused on new skills required to support operational excellence and advancement within the Company; and
- Evolve and invest in technology and other resources that enable employees to learn and grow more
 effectively.

General

As of December 31, 2020, we had 1,969 employees, of which, approximately 73% were compensated on an hourly basis. This was approximately a 70% decrease from the 6,525 employees we had on December 31, 2019, and reflects the Company's ongoing initiative to streamline its cost structure to ensure the Company has the most appropriate model in place to navigate the current market conditions stemming from, among other things, the impacts of COVID-19 and the resulting unforeseeable business circumstances, and to position the Company for success as the market recovers.

Our employees are neither covered by collective bargaining agreements, nor are they members of labor unions. While we consider our relationship with our employees to be satisfactory, disputes may arise over certain classifications of employees that are customary in the oilfield services industry. We are not aware of any other potentially adverse matters involving our employment practices on a company-wide level.

Material Government Regulation

Our operations are subject to stringent and complex federal, state and local laws, rules and regulations relating to the oil and natural gas industry, including the discharge of materials into the environment or otherwise relating to health and safety or the protection of the environment. Numerous governmental agencies, such as the Environmental Protection Agency (the "EPA"), issue regulations to implement and enforce these laws, which often require costly compliance measures. Failure to comply with these laws and regulations may result in the assessment of substantial administrative, civil and criminal penalties, expenditures associated with exposure to hazardous materials, remediation of contamination, property damage and personal injuries, imposition of bond requirements, and restricting permits or other authorizations, as well as the issuance of injunctions limiting or prohibiting our activities. In addition, some laws and regulations relating to protection of the environment may, in certain circumstances, impose strict liability for environmental contamination, rendering a person liable for environmental damages and clean-up costs without regard to negligence or fault on the part of that person. Strict compliance with these regulatory requirements increases our cost of doing business and consequently affects our profitability. However, environmental laws and regulations have been subject to frequent changes over the years, and the imposition of more stringent requirements, including those that result in any limitation, suspension or moratorium on the services we provide, whether or not short-term in nature, by federal, state, regional or local governmental authority, could have a material adverse effect on our business, financial condition and results of operations.

The Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA" or the "Superfund law"), and comparable state laws impose liability on certain classes of persons that are considered to be responsible for the release of hazardous or other state-regulated substances into the environment. These persons include the current owner or operator of the site and the owner or operator of the site at the time of the release and the parties that disposed or arranged for the disposal or treatment of hazardous or other state-regulated substances that have been released at the site. Under CERCLA, these persons may be subject to strict liability, joint and several liability, or both, for the costs of investigating and cleaning up hazardous substances that have been released into the environment, damages to natural resources and human health without regard to fault. In addition, companies that incur CERCLA liability frequently confront claims by neighboring landowners and other third parties for personal injury and property damage allegedly caused by the release of hazardous or other regulated substances or pollutants into the environment.

The federal Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 ("RCRA"), and analogous state laws generally excludes oil and gas exploration and production wastes (e.g., drilling fluids, produced waters) from regulation as hazardous wastes. However, these wastes remain subject to potential regulation as solid wastes under RCRA and as hazardous waste under other state and local laws. Wastes from some of our operations (such as, but not limited to, our chemical development, blending and distribution operations, as well as some maintenance and manufacturing operations) are or may be regulated under RCRA and analogous state laws under certain circumstances. Further, any exemption or regulation under RCRA does not alter treatment of the substance under CERCLA. The impact of future revisions to environmental laws and regulations cannot be predicted. Moreover, stricter standards for waste handling and disposal may be imposed on the oil and

natural gas industry in the future. Removal of RCRA's exemption for exploration and production wastes has the potential to significantly increase waste disposal costs, which in turn will result in increased operating costs and could adversely impact our business and results of operations. Naturally Occurring Radioactive Materials ("NORM") may contaminate extraction and processing equipment used in the oil and natural gas industry. The waste resulting from such contamination is regulated by federal and state laws. Standards have been developed for: worker protection; treatment, storage, and disposal of NORM and NORM waste; management of NORM-contaminated waste piles, containers and tanks; and limitations on the relinquishment of NORM contaminated land for unrestricted use under RCRA and state laws. It is possible that we may incur costs or liabilities associated with elevated levels of NORM.

The Federal Water Pollution Control Act (the "Clean Water Act") and comparable state statutes impose restrictions and strict controls regarding the discharge of pollutants into waters of the United States or state waters. The discharge of pollutants into jurisdictional waters is prohibited unless the discharge is permitted by the EPA or applicable state agencies. The Clean Water Act also prohibits the discharge of dredge and fill material into regulated waters, including jurisdictional wetlands, unless authorized by an appropriately issued permit. Clean Water Act program predictability and consistency have been uncertain for several years due to regulatory changes concerning clarity as to the scope of 'waters of the United States' federally regulated under the Act and litigation over those changes. The process for obtaining permits required by the Clean Water Act and analogous state laws has the potential to delay the development of natural gas and oil projects. Also, spill prevention, control and countermeasure regulations imposed under federal law require appropriate containment berms and similar structures to help prevent the contamination of navigable waters in the event of a hydrocarbon tank spill, rupture or leak.

In addition, the Clean Water Act and analogous state laws require individual permits or coverage under general permits for discharges of storm water runoff from certain types of facilities. Moreover, the Oil Pollution Act of 1990 ("OPA") imposes a variety of requirements on responsible parties related to the prevention of oil spills and liability for damages, including natural resource damages, resulting from such spills in waters of the United States. A responsible party includes the owner or operator of an onshore facility. The Clean Water Act and analogous state laws provide for administrative, civil and criminal penalties for unauthorized discharges and, together with the OPA, impose rigorous requirements for spill prevention and response planning, as well as substantial potential liability for the costs of removal, remediation, and damages in connection with any unauthorized discharges.

From time to time, releases of materials or wastes have occurred at locations we own or at which we have operations. These properties and the materials or wastes released thereon may be subject to CERCLA, RCRA, the federal Clean Water Act, the Safe Drinking Water Act (the "SDWA") and analogous state laws. Under these laws or other laws and regulations, we have been and may be required to remove or remediate these materials or wastes and make expenditures associated with personal injury or property damage. At this time, with respect to any properties where materials or wastes may have been released, it is not possible to estimate the potential costs that may arise from unknown, latent liability risks.

There has been increasing public controversy regarding hydraulic fracturing and its use of fracturing fluids, including potential impacts of the process on drinking water supplies, on the use of water and the potential for impacts to surface water, groundwater and the general environment. Companion bills entitled the Fracturing Responsibility and Awareness of Chemicals Act ("FRAC Act") were first introduced in the United States Congress in 2009 and successor bills have been reintroduced in the House of Representatives on multiple occasions, most recently in July 2019. The 116th Congress did not act on that legislation before the session adjourned on January 3, 2021; it is possible that a version of the FRAC Act could be introduced for consideration by the 117th Congress. If the FRAC Act and other similar legislation were to pass, the legislation could significantly alter regulatory oversight of hydraulic fracturing. Currently, unless the fracturing fluid used in the hydraulic fracturing process contains diesel fuel, hydraulic fracturing operations are exempt from permitting under the Underground Injection Control ("UIC") program established by the SDWA, but are subject to regulation by state oil and gas commissions. The FRAC Act would remove this exemption and subject hydraulic fracturing operations to permitting requirements under the UIC program. The FRAC Act and other similar bills propose to also require persons conducting hydraulic fracturing to disclose the chemical constituents of their fracturing fluids to a regulatory agency, although they would not require

the disclosure of the proprietary formulas except in cases of emergency. Currently, several states require public disclosure of non-proprietary chemicals on FracFocus.org and other equivalent Internet sites. Disclosure of our proprietary chemical formulas to third parties or to the public, even if inadvertent, could diminish the value of those formulas and could result in competitive harm to our business. Moreover, in response to seismic events near underground injection wells used for the disposal of oil and gas-related wastewater, federal and some state agencies have begun investigating whether such wells have caused increased seismic activity, and some states have imposed volumetric injection limits, shut down or imposed moratoria on the use of such injection wells. At this time, it is not clear what action, if any, the United States Congress will take on the FRAC Act or other related federal and state bills, or the ultimate impact of any such legislation.

If the FRAC Act or similar legislation becomes law, or the Department of the Interior or another federal agency asserts jurisdiction over certain aspects of hydraulic fracturing operations, additional regulatory requirements could be established at the federal level that could lead to operational delays or increased operating costs, making it more difficult to perform hydraulic fracturing and increasing the costs of compliance and doing business for us and our customers. States in which we operate have considered and may again consider legislation that could impose additional regulations and/or restrictions on hydraulic fracturing operations. At this time, it is not possible to estimate the potential impact on our business of these state actions or the enactment of additional federal or state legislation or regulations affecting hydraulic fracturing.

In addition, at the direction of Congress, the EPA undertook a study of the potential impacts of hydraulic fracturing on drinking water and groundwater and issued its report in December 2016. The EPA report states that there is scientific evidence that hydraulic fracturing activities can impact drinking water resources under some circumstances and identifies certain conditions in which the EPA believes the impact of such activities on drinking water and groundwater can be more frequent or severe. The EPA study could spur further initiatives to regulate hydraulic fracturing under the SDWA or otherwise. Similarly, other federal and state studies may recommend additional requirements or restrictions on hydraulic fracturing operations.

Any regulation that restricts the ability to dispose of produced waters or increases the cost of doing business could cause curtailed or decreased demand for our services and have a material adverse effect on our business. Local governments also may seek to adopt ordinances within their jurisdictions regulating the time, place and manner of drilling activities in general or hydraulic fracturing activities in particular or prohibit the performance of well drilling in general or hydraulic fracturing in particular. We believe that we follow applicable standard industry practices and legal requirements for groundwater protection in our hydraulic fracturing activities. If new federal, state or local laws or regulations that significantly restrict hydraulic fracturing are adopted, such legal requirements could result in delays, eliminate certain drilling and injection activities and make it more difficult or costly to perform hydraulic fracturing. Any such regulations limiting or prohibiting hydraulic fracturing could result in decreased oil and natural gas exploration and production activities and, therefore, adversely affect demand for our services and our business.

The federal Clean Air Act and comparable state laws regulate emissions of various air pollutants through air emissions permitting programs and the imposition of other requirements. In addition, the EPA has developed and continues to develop stringent regulations governing emissions of toxic air pollutants from specified sources. We are or may be required to obtain federal and state permits in connection with certain operations conducted in our manufacturing and maintenance facilities. These permits impose certain conditions and restrictions on our operations, some of which require significant expenditures for filtering or other emissions control devices at each of our manufacturing and maintenance facilities. Changes in these requirements, or in the permits we operate under, could increase our costs or limit certain activities. Many of these regulatory requirements, including New Source Performance Standards and Maximum Achievable Control Technology standards, have been made more stringent over time as a result of stricter national ambient air quality standards ("NAAQS") and other air quality protection goals adopted by the EPA. State implementation of the revised NAAQS could result in stricter permitting requirements, delay or prohibit our ability to obtain such permits, and result in increased expenditures for pollution control equipment, the costs of which could be significant.

Exploration and production activities on federal lands may be subject to review under the National Environmental Policy Act ("NEPA"). NEPA requires federal agencies, including the Department of the Interior, to evaluate major agency actions that have the potential to significantly impact the environment. In the course of such evaluations, an agency will prepare an environmental assessment of the potential direct, indirect and cumulative impacts of a proposed project and, if necessary, will prepare a more detailed environmental impact statement that may be made available for public review and comment. All of our activities and our customers' current E&P activities, as well as proposed exploration and development plans, on federal lands require governmental permits that are subject to the requirements of NEPA. The NEPA review process has the potential to delay the permitting and subsequent development of oil and natural gas projects.

Various state and federal statutes prohibit certain actions that adversely affect endangered or threatened species and their habitat, migratory birds, wetlands and natural resources. These statutes include the Endangered Species Act, the Migratory Bird Treaty Act, the Clean Water Act and CERCLA. Government entities or private parties may act to prevent oil and gas exploration activities or seek damages where harm to species, habitat or natural resources may result from the filling of jurisdictional streams or wetlands, the construction of oil and gas facilities or the release of oil, wastes, hazardous substances or other regulated materials. The U.S. Fish and Wildlife Service must also designate the species' critical habitat and suitable habitat as part of the effort to ensure survival of the species. A critical habitat or suitable habitat designation could result in further material restrictions to land use and may materially delay or prohibit land access for oil and natural gas development. If our customers were to have areas within their business and operations designated as critical or suitable habitat or a protected species, it could decrease demand for our services and have a material adverse effect on our business. At this time, it is not possible to estimate the potential impact on our business of these speculative federal, state or private actions or the enactment of additional federal or state legislation or regulations with respect to these matters.

More stringent laws and regulations relating to climate change may be adopted in the future and could cause us to incur additional operating costs or reduce the demand for our services. The EPA has determined that emissions of carbon dioxide, methane, and other greenhouse gases ("GHGs") present an endangerment to the environment because emissions of such gases are, according to the EPA and many scientists, contributing to the warming of the earth's atmosphere and other climatic changes. Based on these findings, EPA has adopted regulations that restrict emissions of GHGs under existing provisions of the CAA, including rules that require preconstruction and operating permit reviews for GHG emissions from certain large stationary sources.

The EPA has proposed and finalized a number of rules requiring various industry sectors to track and report, and, in some cases, control greenhouse gas emissions. The EPA has also adopted rules requiring the monitoring and reporting of GHG emissions from specified GHG sources, including, among others, certain oil and natural gas production facilities, on an annual basis. Implementation and status of 2016 final rules that establish new air emission controls for emissions of methane from certain equipment and processes in the oil and natural gas source category, including production, processing transmission and storage activities. The EPA's final rule package included first-time standards to address emissions of methane from equipment and processes across the source category, including hydraulically fractured oil and natural gas well completions. However, regulatory developments to ease or rescind these rules have created uncertainty as to their impact on the oil and gas industry.

The trajectory of future greenhouse regulations remains unsettled. In March 2014, the White House announced its intention to consider further regulation of methane emissions from the oil and gas sector. It is unclear whether Congress will take further action on greenhouse gases, for example, to further regulate greenhouse gas emissions or alternatively to statutorily limit the EPA's authority over greenhouse gases. However, almost one-half of the states have established or joined GHG cap and trade programs. Most of these cap and trade programs work by requiring major sources of emissions or major producers of fuels to acquire and surrender emission allowances. The number of allowances available for purchase is reduced each year in an effort to achieve the overall greenhouse gas emission reduction goal. Restrictions on emissions of methane or carbon dioxide that may be imposed in various states could adversely affect the oil and natural gas industry and, therefore, could reduce the demand for our products and services.

Recently, activists concerned about the potential effects of climate change have directed their attention at sources of funding for fossil-fuel energy companies, which has resulted in certain financial institutions, funds and other sources of capital restricting or eliminating their investment in oil and natural gas activities. Ultimately, this could make it more difficult to secure funding for exploration and production activities, which could have a material adverse effect on our business and results of operations. Moreover, incentives to conserve energy or use alternative energy sources as a means of addressing climate change could reduce demand for the oil and natural gas our customers produce. Finally, it should be noted that many scientists have concluded that increasing concentrations of GHGs in the earth's atmosphere may produce climatic changes that have significant physical effects, such as increased frequency and severity of storms, droughts, and floods and other climatic events; if any such effects were to occur, they could have an adverse effect on our assets and operations.

Climate change regulation may also impact our business positively by increasing demand for natural gas for use in producing electricity and as a transportation fuel. Currently, our operations are not materially adversely impacted by existing state and local climate change initiatives. At this time, we cannot accurately estimate how potential future laws or regulations addressing greenhouse gas emissions would impact our business.

We are subject to the requirements of the federal Occupational Safety and Health Act, which is administered and enforced by the Occupational Safety and Health Administration, commonly referred to as OSHA, and of comparable state laws that regulate the protection of the health and safety of workers. In addition, the OSHA hazard communication standard requires that information be maintained about hazardous materials used or produced in operations and that this information be provided to employees, state and local government authorities and the public. We believe that our operations are in substantial compliance with the OSHA requirements, including general industry standards, record keeping requirements and monitoring of occupational exposure to regulated substances. OSHA continues to evaluate worker safety and to propose new regulations, such as but not limited to, the new rule regarding respirable silica sand, which requires the oil and gas industry to implement engineering controls and work practices to limit exposures below the new limits by June 23, 2021.

Among the services we provide, we operate as a motor carrier and therefore are subject to regulation by the United States Department of Transportation ("DOT") and various state agencies. These regulatory authorities exercise broad powers, governing activities such as the authorization to engage in motor carrier operations; regulatory safety; hazardous materials labeling, placarding and marking; financial reporting; and certain mergers, consolidations and acquisitions. There are additional regulations specifically relating to the trucking industry, including testing and specification of equipment and product handling requirements. The trucking industry is subject to possible regulatory and legislative changes that may affect the economics of the industry by requiring changes in operating practices or by changing the demand for common or contract carrier services or the cost of providing truckload services. Some of these possible changes include increasingly stringent environmental regulations, changes in the hours of service regulations which govern the amount of time a driver may drive in any specific period and requiring onboard black box recorder devices or limits on vehicle weight and size, and setting minimum training standards for new drivers seeking a commercial driver's license. Certain motor vehicle operators are required to register with the DOT. This registration requires an acceptable operating record. The DOT periodically conducts compliance reviews and may revoke registration privileges based on certain safety performance criteria, and a revocation could result in a suspension of operations.

Interstate motor carrier operations are subject to safety requirements prescribed by DOT. To a large degree, intrastate motor carrier operations are subject to safety regulations that mirror federal regulations. Such matters as weight and dimensions of equipment are also subject to federal and state regulations. DOT regulations also mandate drug testing of drivers. From time to time, various legislative proposals are introduced, including proposals to increase federal, state or local taxes, including taxes on motor fuels, which may increase our costs or adversely impact the recruitment of drivers. We cannot predict whether, or in what form, any increase in such taxes applicable to us will be enacted.

Some of our operations utilize equipment that contains sealed, low-grade radioactive sources. Our activities involving the use of radioactive materials are regulated by the United States Nuclear Regulatory Commission

("NRC") and state regulatory agencies under agreement with the NRC. Standards implemented by these regulatory agencies require us to obtain licenses or other approvals for the use of such radioactive materials. We believe that we have obtained these licenses and approvals as necessary and applicable. Numerous governmental agencies issue regulations to implement and enforce these laws, for which compliance is often costly and difficult. The violation of these laws and regulations may result in the denial or revocation of permits, issuance of corrective action orders, injunctions prohibiting some or all of our operations, assessment of administrative and civil penalties, and even criminal prosecution. In addition, releases of radioactive material could result in substantial remediation costs and potentially expose us to third-party property damage or personal injury claims.

We seek to minimize the possibility of a pollution event through equipment and job design, as well as through training of employees. We also maintain a pollution risk management program that is activated in the event a pollution event occurs. This program includes an internal emergency response plan that provides specific procedures for our employees to follow in the event of a chemical release or spill. In addition, we have contracted with several third-party emergency responders in our various operating areas that are available on a 24-hour basis to handle the remediation and clean-up of any chemical release or spill. We carry insurance designed to respond to fortuitous environmental pollution events. This insurance portfolio has been structured in an effort to address pollution incidents that result in bodily injury or property damage and any ensuing clean up required at our owned facilities, as a result of the mobilization and utilization of our fleets, as well as any environmental claims resulting from our operations.

We also seek to manage environmental liability risks through provisions in our contracts with our customers that generally allocate risks relating to surface activities associated with the hydraulic fracturing process, other than water disposal, to us and risks relating to "down-hole" liabilities to our customers. Our customers are responsible for the disposal of the fracturing fluid that flows back out of the well as waste water, for which they use a controlled flow-back process. We are not involved in that process or the disposal of the resulting fluid. Our contracts generally require our customers to indemnify us against pollution and environmental damages originating below the surface of the ground or arising out of water disposal, or otherwise caused by the customer, other contractors or other third parties. In turn, we generally indemnify our customers for pollution and environmental damages originating at or above the surface caused solely by us. We seek to maintain consistent risk-allocation and indemnification provisions in our customer agreements to the extent possible. Some of our contracts, however, contain less explicit indemnification provisions, which typically provide that each party will indemnify the other against liabilities to third parties resulting from the indemnifying party's actions, except to the extent such liability results from the indemnified party's gross negligence, willful misconduct or intentional act.

Overall, we do not anticipate that compliance with existing environmental laws and regulations will have a material effect on our financial condition or results of operations. It is possible, however, that substantial costs for compliance or penalties for non-compliance may be incurred in the future. Moreover, it is possible that other developments, such as the adoption of stricter environmental laws, regulations, and enforcement policies, could result in additional costs or liabilities that we cannot currently quantify.

Insurance

Our operations are subject to hazards inherent in the oil and natural gas industry, including blowouts, explosions, cratering, fires, oil spills, surface and underground pollution and contamination, hazardous material spills, loss of well control, damage to or loss of the wellbore, formation or underground reservoir, damage or loss from the use of explosives and radioactive materials, and damage or loss from inclement weather or natural disasters. These conditions can cause personal injury or loss of life, damage to or destruction of property, equipment, the environment and wildlife, and interruption or suspension of operations, among other adverse effects. In addition, claims for loss of oil and natural gas production and damage to formations can occur in the well services industry.

Additionally, our business involves, and is subject to hazards associated with, the transportation of heavy equipment and materials, as well as heavily regulated explosive and radioactive materials. Regularly having a significant number of both commercial and non-commercial motor vehicles on the road creates a high risk of vehicle accidents. The occurrence of a serious accident involving our employees, equipment and/or services, could result in

our being named as a defendant to a lawsuit asserting significant claims, and we may also be liable to indemnify certain third-parties, specifically including its customers, for large claims for damages in situations where our employees, equipment and/or services were involved.

Despite our efforts to maintain high safety standards, we from time to time have experienced accidents in the past, and we anticipate that we could experience accidents in the future. In addition to the property and personal losses from these accidents, the frequency and severity of these incidents affect our operating costs and insurability, as well as our relationships with customers, employees and regulatory agencies. Any significant increase in the frequency or severity of these incidents, or the general level of compensation awards, could adversely affect the cost of, or our ability to obtain, workers' compensation and other forms of insurance, and could have other adverse effects on our financial condition and results of operations.

We carry a variety of insurance coverages for our operations, and we are partially self-insured for certain claims, in amounts that we believe to be customary and reasonable. However, our insurance may not be sufficient to cover any particular loss or may not cover all losses. Historically, insurance rates have been subject to various market fluctuations that may result in less coverage, increased premium costs, or higher deductibles or self-insured retentions.

Availability of filings

Our Annual reports on Form 10-K, Quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are made available free of charge on our internet web site at www.nextierofs.com, as soon as reasonably practicable after we have electronically filed the material with, or furnished it to, the Securities and Exchange Commission (the "SEC"). The SEC maintains an internet site that contains our reports, proxy and information statements and our other SEC filings. The address of that web site is https://www.sec.gov/.

We webcast our earnings calls and certain events we participate in or host with members of the investment community on our investor relations website at https://investors.nextierofs.com/ir-home. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, press and earnings releases and blogs as part of our investor relations website. We have used, and intend to continue to use, our investor relations website as means of disclosing material information and for complying with our disclosure obligations under Regulation Fair Disclosure. Further corporate governance information, including our certificate of incorporation, bylaws, governance guidelines, board committee charters and code of business conduct and ethics, is also available on our investor relations website under the heading "Corporate Governance." The contents of our websites are not intended to be incorporated by reference into this Annual Report on Form 10-K or in any other report or document we file with the SEC, and any references to our websites are intended to be inactive textual references only.

Item 1A. Risk Factors

RISK FACTORS

An investment in our securities involves a variety of risks. In addition to the other information included or incorporated by reference in this annual report, the following risk factors should be carefully considered, as they could have a significant adverse impact on our business, financial condition and results of operations. These risks could cause our future results to differ materially from historical results and from guidance we may provide regarding our expectations of future financial performance. These risk factors do not identify all risks that we face; our operations could also be affected by factors, events, or uncertainties that are not presently known to us or that we currently do not consider to present material risks to our operations. In addition, the global economic and political climate amplifies many of these risks. All forward-looking statements made by us or on our behalf are qualified by the risks described below.

Summary of Risk Factors

A summary of significant risks that could materially adversely impact our business, financial condition or results of operations include:

Risks Related to Our Industry:

- Continuing coronavirus (COVID-19) impacts;
- Cyclical/seasonal business and dependence upon spending of our customers (which is volatile);
- Instability of crude oil and natural gas commodity prices;
- Adverse weather conditions impact demand services and influence costs;
- Competition and availability of equipment within the oilfield services industry affects use and price of services;
- The energy services industry's inherent hazards;
- Competition among oilfield service and equipment providers, including impact of each provider's reputation for environmental impact, safety and quality;
- Oilfield anti-indemnity provisions in many states that restrict or prohibit risk mitigation strategies, such as indemnification;
- New technologies developed by third parties impacting competitiveness;
- Laws and regulations regarding health, safety and protection of the environment increasing costs of doing business, penalties, damages or costs of remediation or implicate corrective measures;
- Legislative and regulatory initiatives prohibiting or impairing hydraulic fracturing operations;
- Laws and regulations addressing greenhouse gases and climate change; and
- Changes in transportation regulations increasing costs or administrative burdens.

Risks Related to Our Business

- Loss of customers;
- Detrimental performance by, or credit risk of, our customers;
- High capital costs of maintenance, upgrades, refurbishment and replacement of assets;
- Ability to employ a sufficient number of key employees, technical personnel and qualified workers;
- Overcommitments to certain supply agreement;
- Delays in deliveries, increases in costs or unavailability of key materials for our operations;
- Litigation and other proceedings, including claims for personal injury and property damage;
- Challenges obtaining or renewing permits or authorizations for our or our customers' operations;

- Successful identification and consummation of beneficial acquisitions;
- Time-consuming and costly integration of any acquisitions;
- Increased labor costs or failure to attract and retain qualified employees;
- Failure of our information technology systems;
- Cyber security risks;
- Failure of internal controls; and
- Violations of the U.S. Foreign Corrupt Practices Act and similar foreign anti-bribery laws.

Risks Related to Our Indebtedness

- Our substantial level of indebtedness;
- Ability to incur additional debt, despite our current indebtedness levels;
- Restrictive covenants in our agreements governing our indebtedness;
- Our variable rate debt that is subject to interest rate fluctuations;
- Restriction on our ability to raise capital on favorable terms, or at all; and
- Potential reduction or expiration of our ability to use net operating loss carryforwards to offset future taxable income for U.S. federal income tax purposes.

Risks Related to Our Common Stock

- The price of our common stock may be volatile or may decline regardless of our operating performance;
- You may not be able to resell your shares at or above the public offering price;
- The market price of our common stock could decline and our stockholders may be diluted if large blocks of stock become available in the market;
- We do not currently pay dividends;
- We have no requirement to execute on any capital return program;
- Stockholders may be diluted by the future issuance of additional common stock;
- Keane Investor and Cerberus own a significant amount of our common stock and continue to have significant influence over us;
- Stockholder actions and/or acquisition of the Company is impacted by restrictive provisions in our charter documents, certain agreements governing our indebtedness, our Stockholders' Agreement (as defined herein) and Delaware law; and
- The Court of Chancery of the State of Delaware is the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders under our formation documents.

Discussion of Risk Factors

Risks Related to Our Industry

The COVID-19 pandemic has significantly reduced demand for our services and has adversely impacted our financial condition, results of operations and cash flows.

The COVID-19 pandemic is ongoing, and it is uncertain when it's impact on the world will wane. The effects of the COVID-19 pandemic, including actions taken by businesses and governments, resulted in a significant and swift reduction in U.S. and international economic activity beginning in the first quarter of 2020. These effects have adversely affected the demand for oil and natural gas, which has resulted in a reduction in demand for our services. This demand reduction has had, and is expected to continue to have for the duration of such reduced demand for our services, an adverse impact on our revenue, which may be material.

We are closely monitoring the effects of the pandemic on commodity demands, our customers, our suppliers, and on our operations and employees. These effects have included, and may continue to include, adverse revenue effects; disruptions to our operations; customer shutdowns of oil and gas exploration and production; employee impacts from illness, school closures and other community response measures; and temporary closures of our facilities or the facilities of our customers and suppliers.

The COVID-19 pandemic, and the volatile regional and global economic conditions stemming from it, could also exacerbate other risk factors that we identify in this Annual Report on Form 10-K. We may also continue to see an increase in the volume of litigation, including contract claims (some of which may result from force majeure claims) and employment related claims.

The COVID-19 pandemic could also have a material adverse effect on our business, results of operations and financial condition in a manner that is not currently known to us or that we do not currently believe presents significant risks to our operations.

Our business is cyclical and depends on spending and well completions by the onshore oil and natural gas industry predominately in the United States, and the level of such activity is volatile. Our business has been, and may continue to be, adversely affected by industry and financial market conditions that are beyond our control.

Our business is cyclical, and we depend on the willingness of our customers to make expenditures to explore for, develop and produce oil and natural gas from predominantly United States ("U.S.") onshore unconventional resources. The willingness of our customers to undertake these activities depends largely upon prevailing industry and financial market conditions that are influenced by numerous factors over which we have no control, including:

- the impacts of the COVID-19 pandemic;
- prices and expectations about future prices for oil and natural gas;
- domestic and foreign supply of, and demand for, oil and natural gas and related products;
- the level of global and domestic oil and natural gas inventories;
- the supply of and demand for hydraulic fracturing and other oilfield services and equipment in the U.S. and the areas in which we operate;
- the cost of exploring for, developing, producing and delivering oil and natural gas;
- the availability of adequate pipeline, storage and other transportation capacity;
- lead times associated with acquiring equipment and products and availability of qualified personnel;
- the rates at which new oil and natural gas reserves are discovered;
- federal, state and local regulation of hydraulic fracturing and other oilfield service activities, as well as
 exploration and production activities, including public pressure on governmental bodies and regulatory
 agencies to regulate our industry;
- the availability of water resources, suitable proppant and chemicals in sufficient quantities for use in hydraulic fracturing fluids;
- geopolitical developments, political instability and recent (and potential future) armed hostilities in oil and natural gas producing countries;
- actions of the Organization of the Petroleum Exporting Countries, its members and other state-controlled oil companies ("OPEC+") relating to oil price and production controls;

- advances in exploration, development and production technologies or in technologies affecting energy consumption;
- the price and availability of alternative fuels and energy sources;
- disruptions due to natural disasters, unexpected or extreme weather conditions, public health crises (such as coronavirus) and similar factors;
- merger and divestiture activity amongst oil and natural gas producers;
- uncertainty in capital and commodities markets and the ability of oil and natural gas producers and oil
 and natural gas midstream operators to raise equity capital and debt financing;
- investor and activist focus on corporate social responsibility and sustainability; and
- U.S. federal, state and local and non-U.S. governmental regulations and taxes.

As we have experienced since late March of 2020, the volatility of the oil and natural gas industry and the resulting impact on exploration and production activity could adversely impact the level of drilling and completion activity by some of our customers. This volatility may result in a decline in the demand for our services or adversely affect the price of our services. In addition, material declines in oil and natural gas prices, or drilling or completion activity in the U.S. oil and natural gas shale regions, could have a material adverse effect on our business, financial condition, prospects, results of operations and cash flows. Furthermore, a decrease in the development of oil and natural gas reserves in the U.S. may also have an adverse impact on our business, even in an environment of strong oil and natural gas prices.

A decline in or substantial volatility of crude oil and natural gas commodity prices could adversely affect the demand for our services.

The demand for our services is substantially influenced by current and anticipated crude oil and natural gas commodity prices, the related level of drilling and completion activity and general production spending in the areas in which we have operations. Volatility or weakness in crude oil and natural gas commodity prices (or the perception that crude oil and natural gas commodity prices will decrease) affects the operational and capital spending patterns of our customers, and the products and services we provide are, to a substantial extent, deferrable in the event oil and natural gas companies reduce capital expenditures. During periods of declining oil and natural gas prices or when pricing remains depressed, such as during the COVID-19 pandemic, our customer base may experience significant declines in drilling, completion and production activities, which in turn may result in reduced utilization and increased competition and pricing pressure to varying degrees across our service lines and operating areas.

Historically, prices for crude oil and natural gas have been extremely volatile, and these prices are expected to experience continued volatility. For example, since 2015, crude oil prices have ranged from a high of \$77.41 per barrel in 2018 to a low of (\$36.98) per barrel in 2020. During 2020, NYMEX crude oil prices ranged from approximately \$(36.98) to \$63.27 per barrel, with natural gas prices ranging from \$1.33 per million British thermal units ("MMbtu") to \$3.14 per MMbtu. Continued price volatility for oil and natural gas is expected during 2021.

Worldwide military, political and economic events, including initiatives by OPEC+, affect both the demand for, and the supply of, oil and natural gas. Weather conditions, governmental regulation (both in the United States and elsewhere), levels of consumer demand, commercial development of economically viable alternative energy sources (such as wind, solar, geothermal, tidal, fuel cells and biofuels), fuel conservation measures, the availability of pipeline capacity and other factors that will be beyond our control may also affect the supply of, demand for, and price of oil and natural gas. This, in turn, could result in lower demand for our services and cause lower pricing and utilization levels for our services.

Adverse weather conditions could impact demand for our services or materially impact our costs.

Our business could be materially adversely affected by adverse weather conditions. Our operations and the operations of our customers may be adversely affected by seasonal weather conditions, severe weather events and natural disasters. For example, periods of drought, hurricanes, tropical storms, heavy snow, ice or rain may result in customer delays and other disruptions to our services, including availability of key products such as sand and water. Repercussions of adverse weather conditions may include:

- curtailment of services;
- weather-related damage to facilities and equipment, resulting in delays in operations;
- inability to deliver equipment, personnel and products to job sites in accordance with contract schedules;
- increase in the price of key products or insurance; and
- · loss of productivity.

Competition and availability of excess equipment within the oilfield services industry may adversely affect our ability to market and price our services.

The oilfield services industry is highly competitive. The principal competitive tactics in our markets are generally price, technical expertise, the availability and condition of equipment, work force capability, safety record, reputation and experience. Furthermore, as a result of this competition, available equipment in the markets in which one or more of our product lines competes at times may exceed the demand for such equipment. This excess supply of equipment may result from many factors, including without limitation, a low commodity price environment, increase in the construction of new equipment, or reactivation and improvement of existing equipment. Excess capacity may result in substantial competition for a diminishing amount of demand and/or significant price competition, which could have a material adverse effect on our results of operations, financial condition and prospects.

The oilfield services industry is highly fragmented and includes several large companies that compete in many of the markets we serve, as well as numerous small companies that compete with us on a local basis. Some of our competitors may have greater resources and/or name recognition, which could allow them to better withstand industry downturns and to compete more effectively on the basis of technology, geographic scope, retained skilled personnel and economies of scale. In addition, our industry has experienced recent consolidation through mergers and acquisitions, which could lead to increased resources and capabilities for our competitors. There may also be new companies that enter our business, or re-enter our business with significantly reduced indebtedness following emergence from bankruptcy, or our existing and potential future customers may develop their own oilfield solutions. Our operations may be adversely affected if our current competitors or new market entrants introduce new products, technology or services with better features, performance, prices or other characteristics than our products and services or expand in service areas where we operate.

We periodically seek to increase prices of our services to offset rising costs and to generate higher returns for our stockholders. Because we operate in a very competitive industry, however, we are not always successful in raising or maintaining our existing prices. Even if we are able to increase our prices, we may not be able to do so at a rate that is sufficient to offset rising costs without adversely affecting our activity levels. The inability to maintain our pricing and to increase our pricing could have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may be unable to replace dedicated contracts that were terminated early, extend expiring contracts or obtain new contracts in the spot market, and the rates and other material terms under any new or extended contracts may be on substantially less favorable rates and terms.

Accordingly, high competition and excess equipment in the market can cause us to have difficulty maintaining pricing, utilization and profit margins and, at times, result in operating losses. We cannot predict the

future level of competition or excess equipment in the oil and natural gas service businesses or the level of demand for our services.

Our operations are subject to hazards inherent in the energy services industry.

Risks inherent to our industry can cause personal injury, loss of life, suspension of or impact upon operations, damage to geological formations, damage to facilities, business interruption and damage to, or destruction of, property, equipment and the environment. Such risks may include, but are not limited to:

- · equipment defects;
- vehicle accidents;
- fires, explosions or uncontrollable flows of gas or well fluids;
- unusual or unexpected geological formations or pressures and industrial accidents;
- blowouts;
- cratering;
- loss of well control;
- · collapse of the borehole; and
- · damaged or lost drilling and well completions equipment.

Catastrophic or significantly adverse events can occur at well sites where we conduct our operations, including explosions, fires, personal injuries, property damage, pollution, clean-up responsibility and regulatory responsibility. In response, we typically seek indemnities, releases and limitations on liability in our contracts with our customers, together with liability insurance coverage, to protect us from potential liability related to such occurrences. However, it is possible that customers or insurers could seek to avoid such provisions (or compliance with such provisions) or be financially unable to meet their obligations, or a court may decline to enforce such provisions. Damages that are not indemnified or released could greatly exceed available insurance coverage and could have a material adverse effect on our business, financial condition, prospects and results of operations.

Catastrophic or significantly adverse events can also occur at our facilities and during transport of our equipment, commodities and personnel to well sites. Our safety procedures may not always prevent such damages. Our insurance coverage or coverage of applicable vendors and service providers may be inadequate to cover our liabilities. In addition, we may not be able to maintain adequate insurance in the future at rates we consider reasonable and commercially justifiable or on terms as favorable as our current arrangements. The occurrence of a significant uninsured claim, a claim in excess of the insurance coverage limits maintained by us or a claim at a time when we are not able to obtain liability insurance could have a material adverse effect on our ability to conduct normal business operations and on our financial condition, results of operations and cash flows.

In addition, our services could become a source of spills or releases of fluids, including chemicals used during activities, at the site where such services are performed, or could result in the discharge of such fluids into underground formations that were not targeted for fracturing or activities, such as potable aquifers. These risks could expose us to substantial liability for personal injury, wrongful death, property damage, loss of oil and natural gas production, pollution and other environmental damages and could result in a variety of claims, losses and remedial obligations that could have an adverse effect on our business and results of operations. The existence, frequency and severity of such incidents could affect operating costs, insurability, reputation and relationships with customers, employees and regulators. Any litigation or claims, even if fully indemnified or insured, could negatively affect our reputation with our customers and the public and make it more difficult for us to compete effectively or obtain adequate insurance in the future.

Competition among oilfield service and equipment providers is affected by each provider's reputation for environmental impact, safety and quality.

Our activities are subject to a wide range of national, state and local environmental, occupational health and safety laws and regulations. In addition, customers maintain their own compliance and reporting requirements. Failure to comply with these environmental, health and safety laws and regulations, or failure to comply with our customers' compliance or reporting requirements, could tarnish our reputation for safety and quality and have a material adverse effect on our competitive position. In particular, our customers may elect not to purchase our services if they view our environmental or safety record as unsatisfactory, which could cause us to lose customers and substantial revenue.

Oilfield anti-indemnity provisions enacted by many states may restrict or prohibit a party's indemnification of us.

We typically enter into agreements with our customers governing the provision of our services, which usually include certain indemnification provisions for losses resulting from operations. Such agreements may require each party to indemnify the other against certain claims regardless of the negligence or other fault of the indemnified party; however, many states place limitations on contractual indemnity agreements, particularly agreements that indemnify a party against the consequences of its own negligence. Furthermore, certain states, including Louisiana, New Mexico, Texas and Wyoming, have enacted statutes generally referred to as "oilfield anti-indemnity acts" expressly prohibiting certain indemnity agreements contained in or related to oilfield services agreements. Such oilfield anti-indemnity acts, whether enacted/amended in the future or currently in existence, may restrict or void a party's indemnification of us, which could have a material adverse effect on our business, financial condition, prospects and results of operations.

New technology may cause us to become less competitive.

The oilfield services industry is subject to the introduction of new drilling and completion techniques and services using new technologies, some of which may be subject to patent or other intellectual property protections. As competitors and others use or develop new or comparable technologies in the future, we may lose market share or be placed at a competitive disadvantage. In addition, technological changes, process improvements and other factors that increase operational efficiencies could continue to result in oil and natural gas wells being completed more quickly, which could reduce the number of revenue earning days. Furthermore, we may face competitive pressure to develop, implement or acquire certain new technologies at a substantial cost. Some of our competitors have greater financial, technical and personnel resources that may allow them to enjoy technological advantages and develop and implement new products on a timely basis or at an acceptable cost. We cannot be certain that we will be able to develop and implement new technologies or products on a timely basis or at an acceptable cost. Limits on our ability to develop, acquire, effectively use and implement new and emerging technologies may have a material adverse effect on our business, financial condition, prospects or results of operations.

Existing or future laws and regulations related to greenhouse gases and climate change could have a negative impact on our business and may result in additional compliance obligations with respect to the release, capture and use of carbon dioxide that could have a material adverse effect on our business, results of operations, prospects and financial condition.

Changes in environmental requirements related to greenhouse gases and climate change may negatively impact demand for our services. For example, oil and natural gas exploration and production may decline as a result of environmental requirements, including land use policies responsive to environmental concerns. Federal, state and local agencies have been evaluating climate-related legislation and other regulatory initiatives that would restrict emissions of greenhouse gases in areas in which we conduct business. Because our business depends on the level of activity in the oil and natural gas industry, existing or future laws and regulations related to emissions of greenhouse gases and climate change, including incentives to conserve energy or use alternative energy sources, could have a negative impact on our business if such laws or regulations reduce demand for oil and natural gas. Likewise, such restrictions may result in additional compliance obligations with respect to the release, capture, sequestration and use

of carbon dioxide that could have a material adverse effect on our business, results of operations, prospects and financial condition.

Additionally, increasing political and social attention to global climate change has resulted in pressure upon shareholders, financial institutions and/or financial markets to modify their relationships with oil and gas companies and to limit investments and/or funding to such companies, which could increase our costs or otherwise adversely affect our business and results of operations.

We are subject to federal, state and local laws and regulations regarding issues of health, safety and protection of the environment. Under these laws and regulations, we may become liable for penalties, damages or costs of remediation or other corrective measures. Any changes in laws or government regulations could increase our costs of doing business.

Our operations are subject to stringent federal, state, local and tribal laws and regulations relating to, among other things, protection of natural resources, clean air and drinking water, wetlands, endangered species, greenhouse gasses, areas that are not in attainment with air quality standards, the environment, health and safety, chemical use and storage, waste management, waste disposal and transportation of waste and other hazardous and nonhazardous materials. Our operations involve risks of environmental liability, including leakage from an operator's casing during our operations or accidental spills onto or into surface or subsurface soils, surface water or groundwater. Some environmental laws and regulations may impose strict liability, joint and several liability or both. In some situations, we could be exposed to liability as a result of our conduct that was lawful at the time it occurred or the conduct of, or conditions caused by, third parties without regard to whether we caused or contributed to the conditions. Additionally, environmental concerns, including potential emissions affecting clean air, drinking water contamination and seismic activity, have prompted investigations that could lead to the enactment of regulations, limitations, restrictions or moratoria that could potentially have a material adverse impact on our business. Actions arising under these laws and regulations could result in the shutdown of our operations, fines and penalties (administrative, civil or criminal), revocations of or restrictions in permits to conduct business, expenditures for remediation or other corrective measures and/or claims for liability for property damage, exposure to hazardous materials, exposure to hazardous waste, nuisance or personal injuries. Sanctions for noncompliance with applicable environmental laws and regulations may also include the assessment of administrative, civil or criminal penalties, revocation of or restrictions in permits and temporary or permanent cessation of operations in a particular location and issuance of corrective action orders. Such claims or sanctions and related costs could cause us to incur substantial costs or losses and could have a material adverse effect on our business, financial condition, prospects and results of operations. Additionally, an increase in regulatory requirements, limitations, restrictions or moratoria on oil and natural gas exploration and completion activities at a federal, state or local level could significantly delay or interrupt our operations, limit the amount of work we can perform, increase our costs of compliance, or increase the cost of our services; thereby possibly having a material adverse impact on our financial condition. Given the recent administration change in the United States, we expect that the regulations around the oil and gas industry may increase and/or become stricter, which may further any potential material adverse impact on our financial condition.

If we do not perform in accordance with government, industry, customer or our own health, safety and environmental standards (including standards put in place related to the COVID-19 pandemic), we could lose business from our customers, many of whom have an increased focus on environmental, health and safety issues.

We are subject to requirements imposed by the EPA, U.S. Department of Transportation, U.S. Nuclear Regulatory Commission, OSHA and state regulatory agencies that regulate operations to prevent air, soil and water pollution, and protect worker health and safety.

The EPA regulates air emissions from all engines, including off-road diesel engines that are used by us to power equipment in the field. Under these U.S. emission control regulations, we could be limited in the number of certain off-road diesel engines we can purchase. Further, the requirement to comply with emission control and fuel quality regulations could result in increased costs.

In addition, as part of our business, we handle, transport, and dispose of a variety of fluids and substances used by our customers in connection with their oil and natural gas exploration and production activities. We also generate and dispose of nonhazardous and hazardous wastes. The generation, handling, transportation, and disposal of these fluids, substances, and wastes are regulated by a number of laws, including CERCLA, RCRA, the Clean Water Act, the SDWA and analogous state laws. Under RCRA, the generation, transportation, treatment, storage, disposal and cleanup of hazardous and non-hazardous wastes are regulated. RCRA currently exempts many oil and gas exploration and production wastes from classification as hazardous waste. However, these oil and gas exploration and production wastes may still be regulated under state solid waste laws and regulations, and it is possible that certain oil and natural gas exploration and production wastes now classified as non-hazardous could be classified as hazardous waste in the future.

Failure to properly handle, transport or dispose of these materials or otherwise conduct our operations in accordance with these and other environmental laws could expose us to liability for governmental penalties, third-party claims, cleanup costs associated with releases of such materials, damages to natural resources, and other damages, as well as potentially impair our ability to conduct our operations. Moreover, certain of these environmental laws impose joint and several, strict liability even though our conduct in performing such activities was lawful at the time it occurred or the conduct of, or conditions caused by, prior operators or other third-parties was the basis for such liability. In addition, environmental laws and regulations are subject to frequent change and if existing laws, regulatory requirements or enforcement policies were to change in the future, we may be required to make significant unanticipated capital and operating expenditures.

Laws and regulations protecting the environment generally have become more stringent over time, and we expect them to continue to do so. This could lead to material increases in our costs, and liability exposure, for future environmental compliance and remediation.

Federal, state and local legislative and regulatory initiatives relating to hydraulic fracturing could prohibit, restrict or limit hydraulic fracturing operations, could increase our operating costs or could result in the disclosure of proprietary information resulting in competitive harm.

During recent sessions of the U.S. Congress, several pieces of legislation were introduced in the U.S. Senate and House of Representatives for the purpose of amending environmental laws such as the Clean Air Act, the SDWA and the Toxic Substances Control Act with respect to activities associated with extraction and energy production industries, especially the oil and gas industry. Furthermore, various items of legislation and rulemaking have been proposed that would regulate or prevent federal regulation of hydraulic fracturing on federally owned land. Proposed rulemaking from the EPA and OSHA could increase our regulatory requirements, which could increase our costs of compliance or increase the costs of our services, thereby possibly having a material adverse impact on our business and results of operations.

If the EPA or another federal or state agency asserts jurisdiction over certain aspects of hydraulic fracturing operations, an additional level of regulation established at the federal or state level could lead to operational delays and increase our costs. In December 2016, the EPA issued a study of the potential impacts of hydraulic fracturing on drinking water and groundwater. The EPA report states that there is scientific evidence that hydraulic fracturing activities can impact drinking resources under some circumstances, and identifies certain conditions in which the EPA believes the impact of such activities on drinking water and groundwater can be more frequent or severe. The EPA study could spur further initiatives to regulate hydraulic fracturing under the SDWA or otherwise. Many regulatory and legislative bodies routinely evaluate the adequacy and effectiveness of laws and regulations affecting the oil and gas industry. As a result, state legislatures, state regulatory agencies and local municipalities may consider legislation, regulations or ordinances, respectively, that could affect all aspects of the oil and natural gas industry and occasionally take action to restrict or further regulate hydraulic fracturing operations. At this time, it is not possible to estimate the potential impact on our business of these state and municipal actions or the enactment of additional federal or state legislation or regulations affecting hydraulic fracturing. Compliance, stricter regulations or the consequences of any failure to comply by us could have a material adverse effect on our business, financial condition, prospects and results of operations.

Many states in which we operate require the disclosure of some or all of the chemicals used in our hydraulic fracturing operations. Certain aspects of one or more of these chemicals may be considered proprietary by us or our chemical suppliers. Disclosure of our proprietary chemical information to third parties or to the public, even if inadvertent, could diminish the value of our trade secrets or those of our chemical suppliers and could result in competitive harm to us, which could have an adverse impact on our business, financial condition, prospects and results of operations.

We are also aware that some states, counties and municipalities have enacted or are considering moratoria on hydraulic fracturing. For example, New York and Vermont, states in which we have no operations, have banned or are in the process of banning the use of high-volume hydraulic fracturing. Alternatively, some municipalities are considering or have considered zoning and other ordinances, the conditions of which could impose a de facto ban on drilling and/or hydraulic fracturing operations. Further, some states, counties and municipalities are closely examining water use issues, such as permit and disposal options for processed water, which could have a material adverse impact on our financial condition, prospects and results of operations, if such additional permitting requirements are imposed upon our industry. Additionally, our business could be affected by a moratorium or increased regulation of companies in our supply chain, such as sand mining by our proppant suppliers, which could limit our access to supplies and increase the costs of our raw materials. At this time, it is not possible to estimate how these various restrictions could affect our ongoing operations.

Changes in transportation regulations may increase our costs and negatively impact our results of operations.

We are subject to various transportation regulations, including regulation of motor carriers by the U.S. Department of Transportation and by various federal, state and tribal agencies, whose regulations include certain permit requirements imposed by highway and safety authorities. These regulatory authorities exercise broad powers over our trucking operations, generally governing such matters as the authorization to engage in motor carrier operations, safety, equipment testing, driver requirements and specifications and insurance requirements. The trucking industry is subject to possible regulatory and legislative changes that may impact our operations, such as changes in fuel emissions limits, hours of service regulations that govern the amount of time a driver may drive or work in any specific period and limits on vehicle weight and size. As the federal government continues to develop and propose regulations relating to fuel quality, engine efficiency and greenhouse gas emissions, we may experience an increase in costs related to truck purchases and maintenance, impairment of equipment productivity, a decrease in the residual value of vehicles, unpredictable fluctuations in fuel prices and an increase in operating expenses. Increased truck traffic may contribute to deteriorating road conditions in some areas where our operations are performed. Our operations, including routing and weight restrictions, could be affected by road construction, road repairs, detours and state and local regulations and ordinances restricting access to certain roads. Proposals to increase federal, state or local taxes, including taxes on motor fuels, are also made from time to time, and any such increase would increase our operating costs. Also, state and local regulation of permitted routes and times on specific roadways could adversely affect our operations. We cannot predict whether, or in what form, any legislative or regulatory changes or municipal ordinances applicable to our logistics operations will be enacted and to what extent any such legislation or regulations could increase our costs or otherwise adversely affect our business or operations.

Risks Related to Our Business

The loss of one or more significant customers could adversely affect our financial condition, prospects and results of operations.

Our business, financial condition, prospects and results of operations could be materially adversely affected, if one or more of our significant customers ceases to engage us for our services on favorable terms or at all, or fails to pay or delays in paying us significant amounts of our outstanding receivables. Our completions business has historically had contracts with a portion of our customers that are annual to multi-year.

Disruption caused by business and governmental responses to the COVID-19 pandemic has created increased vulnerability to loss of customers or loss of long-term contracts as demand for oilfield services has

decreased and competition for the available jobs has increased. We may be unable to replace dedicated contracts that were terminated early, extend expiring contracts or obtain new contracts in the spot market, and the rates and other material terms under any new or extended contracts may be on substantially less favorable rates and terms.

Additionally, the E&P industry is characterized by frequent consolidation activity. Changes in ownership of our customers may result in the loss of, or reduction in, business from those customers, which could materially and adversely affect our business, financial condition, prospects or results of operations.

We are exposed to the credit risk of our customers, and any material nonpayment or nonperformance by our customers could adversely affect our financial results.

We are subject to the risk of loss resulting from nonpayment or nonperformance by our customers, many of whose operations are concentrated solely in the domestic E&P industry which, as described above, is subject to volatility and, therefore, credit risk. Our credit procedures and policies may not be adequate to fully reduce customer credit risk. If we are unable to adequately assess the creditworthiness of existing or future customers or unanticipated deterioration in their creditworthiness, any resulting increase in nonpayment or nonperformance by them and our inability to re-market or otherwise use our equipment could have a material adverse effect on our business, financial condition, prospects and results of operations.

We have seen an increase in the time accounts receivable are outstanding since the onset of the COVID-19 pandemic, and the effects of the COVID-19 pandemic also may have a material adverse impact on the ability of the Company to collect its accounts receivable in a timely manner, or at all, as customers face higher liquidity and solvency risks and may be unable to continue to operate as a going concern in the future.

Our assets require significant amounts of capital for maintenance, upgrades and refurbishment and may require significant capital expenditures for new equipment.

Our hydraulic fracturing fleets and other service-related equipment require significant capital investment in maintenance, upgrades and refurbishment to maintain their competitiveness. Our fleets and other equipment typically do not generate revenue while they are undergoing maintenance, refurbishment or upgrades. Any maintenance, upgrade or refurbishment project for our assets could increase our indebtedness or reduce cash available for other opportunities. Furthermore, such projects may require proportionally greater capital investments as a percentage of total asset value, which may make such projects difficult to finance on acceptable terms. To the extent we are unable to fund such projects, we may have less equipment available for service, or our equipment may not be attractive to potential or current customers. Additionally, increased demand, competition, environmental and safety requirements or advances in technology within our industry may require us to update or replace existing fleets or build or acquire new fleets. For example, in 2018, we purchased approximately 150,000 newbuild hydraulic horsepower, representing three additional hydraulic fracturing fleets, for approximately \$129.4 million. Such demands on our capital or reductions in demand for our hydraulic fracturing fleets and other service-related equipment and the increase in cost to maintain labor necessary for such maintenance and improvement, in each case, could have a material adverse effect on our business, liquidity position, financial condition, prospects and results of operations.

We may be unable to employ a sufficient number of key employees, technical personnel and other skilled or qualified workers.

The delivery of our services and products requires personnel with specialized skills and experience who can perform physically demanding work. As a result of the volatility in the energy service industry and the demanding nature of the work, workers may choose to pursue employment with our competitors or in fields that offer a less demanding work environment. In addition, since the onset of the COVID-19 pandemic, we may not have sufficient employees who are able to work at job sites, due to illness, school closures and other community response measures; and temporary closures of our facilities or the facilities of our customers and suppliers, or health and safety protocols.

Furthermore, we require full compliance with the Immigration Reform and Control Act of 1986 and other laws concerning immigration and the hiring of legally documented workers. We recognize that foreign nationals may be a valuable source of talent, but that not all foreign nationals are authorized to work for U.S. companies immediately, without first obtaining a required work authorization from the U.S. Department of Homeland Security or similar government agency. Our ability to be productive and profitable will depend upon our ability to employ and retain skilled workers. In addition, our ability to adjust our operations according to geographic demand for our services depends in part on our ability to relocate or increase the size of our skilled labor force. The demand for skilled workers in our areas of operations can be high, the supply may be limited, and we may be unable to relocate our employees from areas of lower utilization to areas of higher demand. A significant increase in the wages paid by competing employers could result in a reduction of our skilled labor force, increases in the wage rates that we must pay, or both. Furthermore, a significant decrease in the wages paid by us or our competitors as a result of reduced industry demand could result in a reduction of the available skilled labor force, and there is no assurance that the availability of skilled labor will improve following a subsequent increase in demand for our services or an increase in wage rates. If any of these events were to occur, our capacity and profitability could be diminished and our growth potential could be impaired.

We depend heavily on the efforts of executive officers, managers and other key employees to manage our operations. The unexpected loss or unavailability of key members of management or technical personnel (including due to illness related to COVID-19) may have a material adverse effect on our business, financial condition, prospects or results of operations.

Our commitments under supply agreements could exceed our requirements, exposing us to risks including price, timing of delivery and quality of products and services upon which our business relies.

We have purchase commitments with certain vendors to supply a majority of the proppant that we may provide in our operations. Some of these agreements are take-or-pay agreements with minimum purchase obligations. If demand for our hydraulic fracturing services decreases, our need for the raw materials and products we supply as part of these services also decreases. If demand decreases enough, we could have contractual minimum commitments that exceed the required amount of goods we need to supply to our customers. In this instance, we could be required to purchase goods that we do not have a present need for, pay for goods that we do not take delivery of or pay prices in excess of market prices at the time of purchase. We may not be able to reduce, extend, eliminate or otherwise address near-term obligations to our satisfaction, which could result in an adverse effect on our financial condition.

Delays in deliveries of key raw materials or increases in the cost of key raw materials could harm our business, results of operations and financial condition.

We have established relationships with a limited number of suppliers of our raw materials (such as proppant, guar, chemicals or coiled tubing) and finished products (such as fluid-handling equipment). Raw materials essential to our business are normally readily available. However, high levels of demand for raw materials, such as gels, guar, proppant and hydrochloric acid, have triggered constraints in the supply chain of those raw materials and could dramatically increase the prices of such raw materials. Should any of our current suppliers be unable to provide the necessary raw materials or finished products or otherwise fail to deliver the products in a timely manner and in the quantities required, any resulting delays in the provision of services could have a material adverse effect on our business, financial condition, results of operations and cash flows. Additionally, increasing costs of certain raw materials, including guar or proppant, may negatively impact demand for our services or the profitability of our business operations. In the past, our industry faced sporadic shortages associated with hydraulic fracturing operations, such as proppant and guar, requiring work stoppages, which adversely impacted the operating results of several competitors. We may not be able to mitigate any future shortages of raw materials, including proppants.

We may be subject to claims for personal injury and property damage, which could materially adversely affect our financial condition, prospects and results of operations.

Our services are subject to inherent risks that can cause personal injury or loss of life, damage to or destruction of property, equipment or the environment or the suspension of our operations. Our operations are subject to, and exposed to, employee/employer liabilities and risks such as wrongful termination, discrimination, labor organizing, retaliation claims and general human resource related matters. Litigation arising from operations where our facilities are located, or our services are provided, may cause us to be named as a defendant in lawsuits asserting potentially large claims including claims for exemplary damages. We maintain what we believe is customary and reasonable insurance to protect our business against these potential losses, but such insurance may not be adequate to cover our liabilities, and we are not fully insured against all risks. Further, our insurance has deductibles or self-insured retentions and contains certain coverage exclusions. The current trend in the insurance industry is towards larger deductibles and self-insured retentions. In addition, insurance may not be available in the future at rates that we consider reasonable and commercially justifiable, compelling us to have larger deductibles or self-insured retentions to effectively manage expenses. As a result, we could become subject to material uninsured liabilities or situations where we have high deductibles or self-insured retentions that expose us to liabilities that could have a material adverse effect on our business, financial condition, prospects or results of operations.

Litigation and other proceedings could have a negative impact on our business.

The nature of our business makes us susceptible to legal proceedings and governmental audits and investigations from time to time. In addition, during periods of depressed market conditions, we may be subject to an increased risk of our customers, vendors, current and former employees and others initiating legal proceedings against us that could have a material adverse effect on our business, financial condition and results of operations. Similarly, any legal proceedings or claims, even if fully indemnified or insured, could negatively impact our reputation among our customers and the public, and make it more difficult for us to compete effectively or obtain adequate insurance in the future. See Note (18) Commitments and Contingencies of Part II, "Item 8. Financial Statements and Supplementary Data" for further discussion of our legal and environmental contingencies for the years ended December 31, 2020, 2019 and 2018.

Delays in obtaining, or inability to obtain or renew, permits or authorizations by our customers for their operations or by us for our operations could impair our business.

In most states, our customers are required to obtain permits or authorizations from one or more governmental agencies or other third parties to perform drilling and completion activities, including hydraulic fracturing. Such permits or approvals are typically required by state agencies, but can also be required by federal and local governmental agencies or other third parties. The requirements for such permits or authorizations vary depending on the location where such drilling and completion activities will be conducted. As with most permitting and authorization processes, there is a degree of uncertainty as to whether a permit will be granted, the time it will take for a permit or approval to be issued and the conditions which may be imposed in connection with the granting of the permit. In some jurisdictions, such as within the jurisdiction of the Delaware River Basin Commission, certain regulatory authorities have delayed or suspended the issuance of permits or authorizations, while the potential environmental impacts associated with issuing such permits can be studied and appropriate mitigation measures evaluated. New York and Vermont, states in which we have no operations, have prohibited hydraulic fracturing statewide. In Texas, rural water districts have begun to impose restrictions on water use and may require permits for water used in drilling and completion activities. Permitting, authorization or renewal delays, the inability to obtain new permits or the revocation of current permits could cause a loss of revenue and potentially have a materially adverse effect on our business, financial condition, prospects or results of operations.

We are also required to obtain federal, state, local and/or third-party permits and authorizations in some jurisdictions in connection with our wireline services. These permits, when required, impose certain conditions on our operations. Any changes in these requirements could have a material adverse effect on our business, financial condition, prospects and results of operations.

We may not be successful in identifying and making acquisitions.

Part of our strategy is to continue to expand our geographic scope and customer relationships, increase our access to technology and to grow our business, which is dependent on our ability to make acquisitions that result in accretive revenues and earnings. We may be unable to make accretive acquisitions or realize expected benefits of any acquisitions for any of the following reasons:

- failure to identify attractive targets;
- incorrect assumptions regarding the future liabilities or future results of acquired operations or assets or
 expected cost reductions or other synergies expected to be realized as a result of acquiring operations
 or assets;
- failure to obtain financing on acceptable terms or at all;
- restrictions in our debt agreements;
- failure to successfully integrate the operations or management of any acquired operations or assets;
- failure to retain or attract key employees;
- new or expanded areas of operational risk (such as offshore, international operations, or power production services) and related costs and demands of any applicable regulatory compliance; and
- diversion of management's attention from existing operations or other priorities.

Our acquisition strategy requires that we successfully integrate acquired companies into our business practices, as well as our procurement, management and enterprise-wide information technology systems. We may not be successful in implementing our business practices at acquired companies, and our acquisitions could face difficulty in transitioning from their previous information technology systems to our own. Furthermore, unexpected costs and challenges may arise whenever businesses with different operations or management are combined. Any such difficulties, or increased costs associated with such integration, could affect our business, financial performance and operations.

If we are unable to identify, complete and integrate acquisitions, it could have a material adverse effect on our growth strategy, business, financial condition, prospects and results of operations.

Integrating acquisitions may be time-consuming and create costs that could reduce our net income and cash flows.

Part of our strategy includes pursuing acquisitions that we believe will be accretive to our business. If we consummate an acquisition, such as the C&J Merger in 2019, the process of integrating the acquired business may be complex and time consuming, may be disruptive to the business and may cause an interruption of, or a distraction of management's attention from, the business as a result of a number of obstacles, including, but not limited to:

- a failure of our due diligence process to identify significant risks or issues;
- the loss of customers of the acquired company or our company;
- customers or suppliers may seek to modify contractual obligations with us;
- negative impact on the brands or banners of the acquired company or our company;
- a failure to maintain or improve the quality of our customer service;
- difficulties assimilating the operations and personnel of the acquired company;

- our inability to retain key personnel of the acquired company;
- the incurrence of unexpected expenses and working capital requirements;
- our inability to achieve the financial and strategic goals, including synergies, for the combined businesses;
- difficulty in maintaining internal controls, procedures and policies;
- mistaken assumptions about the overall costs of equity or debt; and
- unforeseen difficulties operating in new product areas or new geographic areas.

Any of the foregoing obstacles, or a combination of them, could decrease gross profit margins or increase selling, general and administrative expenses in absolute terms and/or as a percentage of net sales, which could in turn negatively impact our net income and cash flows.

We may not be able to consummate acquisitions in the future on terms acceptable to us, or at all. In addition, future acquisitions are accompanied by the risk that the obligations and liabilities of an acquired company may not be adequately reflected in the historical financial statements of that company and the risk that those historical financial statements may be based on assumptions which are incorrect or inconsistent with our assumptions or approach to accounting policies. Any of these material obligations, liabilities or incorrect or inconsistent assumptions could adversely impact our results of operations, prospects and financial condition.

If labor costs increase or we fail to attract and retain qualified employees our business, results of operations, cash flows and financial condition may be adversely affected.

The labor markets in the industries in which we operate are competitive. We must attract, train and retain a large number of qualified employees while controlling related labor costs. We face significant competition for these employees from the industries in which we operate as well as from other industries. Tighter labor markets may make it even more difficult for us to hire and retain qualified employees and control labor costs. Our ability to attract qualified employees and control labor costs is subject to numerous external factors, including prevailing wage rates, employee preferences, employment law and regulation, environmental, health and safety regulation, labor relations and immigration policy. A significant increase in competition or cost increase arising from any of the aforementioned factors in may have a material adverse impact on our business, results of operations and financial condition.

A failure of our information technology systems, including our enterprise resource planning system and our digital hub, could have a material adverse effect on our business, financial condition, results of operations and cash flows and could adversely affect the effectiveness of our internal control over financial reporting.

We rely on sophisticated information technology systems and infrastructure to support our business. Any of these systems may be susceptible to outages due to fire, floods, power loss, telecommunications failures, usage errors by employees, computer viruses, cyber-attacks or other security breaches or similar events. A failure or prolonged interruption in our information technology systems, including our digital logistics platform, or difficulties encountered in upgrading our systems or implementing new systems that compromises our ability to meet our customers' needs or impairs our ability to record, process and report accurate information, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

In 2020, we integrated our enterprise resource planning ("ERP") systems from each of the legacy entities to the C&J Merger that assist with the collection, storage, management and interpretation of data from our business activities to support future growth and to integrate significant processes. Our ERP system is critical to our ability to accurately maintain books and records, record transactions, provide important information to our management and prepare our consolidated financial statements. ERP system integration is complex and involves changes to business processes and, possibly, adjustments to internal control over financial reporting. The integration of the ERP system

is complete, but refinements and work around inter-related system and processes is ongoing. These efforts and the recently implemented ERP system may prove to be more difficult, costly, or time consuming than expected, and there can be no assurance that this system will continue to be beneficial to the extent anticipated. Any disruptions, delays or deficiencies in our ERP system, particularly ones that impact our financial reporting and accounting systems or our ability to provide services, send invoices, track payments or fulfill contractual obligations, could adversely affect our business, financial condition, results of operations and cash flows. Additionally, if the ERP system does not operate as intended, the effectiveness of our internal control over financial reporting could be adversely affected or our ability to assess it adequately could be impacted, which could cause us to fail to meet our reporting obligations.

We are subject to cyber security risks. A cyber incident could occur and result in information theft, data corruption, operational disruption and/or financial loss.

The oil and natural gas industry has become increasingly dependent on digital technologies to conduct certain processing activities. We use these technologies for internal purposes, including data storage (which may include personal identification information of our employees as well as our proprietary business information and that of our customers, suppliers, investors and other stakeholders), processing, and transmissions, as well as in our interactions with customers and suppliers. For example, we depend on digital technologies to perform many of our services and processes and to record operational and financial data. At the same time, cyber incidents, which could include, among other things, deliberate attacks, unintentional events, computer viruses, malicious or destructive code, ransomware, social engineering attacks (including phishing and impersonation), hacking, denial-of-service attacks and other attacks and similar disruptions from the unauthorized use of or access to computer systems, have increased. The U.S. government has issued public warnings that indicate that energy assets might be specific targets of cyber security threats. Our technologies, systems and networks, as well as those of our customers, suppliers and other business partners, may become the target of cyberattacks or information security breaches that could result in the unauthorized release, gathering, monitoring, misuse, loss or destruction of proprietary information, personal information and other data, or other disruption of our business operations. In addition, certain cyber incidents, such as unauthorized surveillance, may remain undetected for an extended period of time. Our systems and insurance coverage for protecting against cyber security risks, including cyberattacks, may not be sufficient and may not protect against or cover all of the losses we may experience as a result of the realization of such risks. In addition, these risks could harm our reputation and our relationships with customers, suppliers, employees, and other thirdparties, and may result in claims against us, including liability under laws that protect the privacy of personal information. As cyber incidents continue to evolve, we may be required to expend additional resources to continue to modify or enhance our protective measures or to investigate and remediate the effects of cyber incidents.

Disruption caused by business responses to the COVID-19 pandemic, including working remote arrangements, may create increased vulnerability to cybersecurity incidents, including breaches of information systems security, which could damage our reputation and commercial relationships, disrupt operations, increase costs and/or decrease revenues, and expose us to claims from customers, suppliers, financial institutions, regulators, employees and others, which, individually or in the aggregate could have a material adverse effect on our financial condition and results of operations.

If we fail to maintain an effective system of internal controls as required by Section 404 of the Sarbanes-Oxley Act of 2002, we may not be able to report our financial results accurately or prevent fraud, which could adversely affect our business and result in material misstatements in our financial statements.

Effective internal controls are necessary for us to provide timely and reliable financial reports, prevent fraud and to operate successfully as a publicly traded company. Our efforts to maintain our internal controls may not be successful, and we may be unable to maintain effective controls over our financial processes and reporting in the future or to comply with our obligations under Section 404 of the Sarbanes-Oxley Act of 2002 ("Section 404"). For example, Section 404 requires us, among other things, to annually review and report on, and our independent registered public accounting firm to attest to, the effectiveness of our internal controls over financial reporting. This assessment includes disclosure of any deficiencies or material weaknesses identified by our management in our

internal control over financial reporting. Any failure to develop, implement or maintain effective internal controls or to improve our internal controls could harm our operating results, prevent us from identifying future deficiencies and material weaknesses or cause us to fail to meet our reporting obligations. Given the difficulties inherent in the design and operation of internal controls over financial reporting, we can provide no assurance as to our, or our independent registered public accounting firm's conclusions, about the effectiveness of our internal controls, and we may incur significant costs in our efforts to comply with Section 404. Ineffective internal controls could result in material misstatements in our financial statements and subject us to increased regulatory scrutiny and a loss of confidence in our reported financial information, which could have an adverse effect on our business.

We could be adversely affected by violations of the U.S. Foreign Corrupt Practices Act and similar foreign antibribery laws.

The United States Foreign Corrupt Practices Act (the "FCPA") and similar worldwide anti-bribery laws generally prohibit companies and their intermediaries and partners from making, offering or authorizing improper payments to non-U.S. government officials for the purpose of obtaining or retaining business. Although we currently have limited international operations, we may do business in the future in countries or regions where strict compliance with anti-bribery laws may conflict with local customs and practices. Our employees, intermediaries, and partners may face, directly or indirectly, corrupt demands by government officials, political parties and officials, tribal or insurgent organizations, or private entities in the countries in which we operate or may operate in the future. As a result, we face the risk that an unauthorized payment or offer of payment could be made by one of our employees, intermediaries, or partners even if such parties are not always subject to our control or are not themselves subject to the FCPA or other anti-bribery laws to which we may be subject. We are committed to doing business in accordance with applicable anti-bribery laws and have implemented policies and procedures concerning compliance with such laws. Our existing safeguards and any future improvements, however, may prove to be less than effective, and our employees, intermediaries, and partners may engage in conduct for which we might be held responsible. Violations of the FCPA and other anti-bribery laws (either due to our acts, the acts of our intermediaries or partners, or our inadvertence) may result in criminal and civil sanctions and could subject us to other liabilities in the U.S. and elsewhere. Even allegations of such violations could disrupt our business and result in a material adverse effect on our business and operations.

Risks Related to Our Indebtedness

Our substantial level of indebtedness could adversely affect our financial condition and prevent us from fulfilling our obligations under our indebtedness.

We have a significant amount of indebtedness. As of December 31, 2020, we had \$335.5 million of debt outstanding, net of discounts and deferred financing costs (not including finance lease obligations). After giving effect to our borrowing base, we had approximately \$73.5 million of availability under our 2019 ABL Facility (as defined herein).

Our substantial indebtedness could have important consequences. For example, it could:

- adversely affect the market price of our common stock;
- increase our vulnerability to interest rate increases and general adverse economic and industry conditions:
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate purposes, including acquisitions;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;

- limit our ability to obtain additional financing on satisfactory terms to fund our working capital
 requirements, capital expenditures, acquisitions, investments, debt service requirements and other
 general corporate requirements; and
- place us at a competitive disadvantage compared to our competitors that have less debt.

In addition, we cannot assure you that we will be able to refinance any of our debt, or that we will be able to refinance our debt on commercially reasonable terms. If we were unable to make payments or refinance our debt or obtain new financing under these circumstances, we would have to consider other options, such as:

- sales of assets;
- sales of equity; or
- negotiations with our lenders to restructure the applicable debt.

Our debt instruments may restrict, or market or business conditions may limit, our ability to use some of our options.

Despite our indebtedness levels, we may still be able to incur additional debt, which could further exacerbate the risks associated with our leverage.

We and our subsidiaries may be able to incur additional indebtedness in the future. The terms of the credit agreements that govern the 2019 ABL Facility and the 2018 Term Loan Facility (as defined herein and, together with the 2019 ABL Facility, the "Senior Secured Debt Facilities") permit us to incur additional indebtedness, subject to certain limitations. If new indebtedness is added to our and our subsidiaries' current debt levels, the related risks that we and they now face would intensify. See Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Principal Debt Agreements" for further details.

The agreements governing our indebtedness contain operating covenants and restrictions that limit our operations and could lead to adverse consequences if we fail to comply with them.

The agreements governing our indebtedness contain certain operating covenants and other restrictions relating to, among other things, limitations on indebtedness (including guarantees of additional indebtedness) and liens, mergers, consolidations and dissolutions, sales of assets, investments and acquisitions, dividends and other restricted payments, repurchase of shares of capital stock and options to purchase shares of capital stock and certain transactions with affiliates. In addition, our Senior Secured Debt Facilities include certain financial covenants.

The restrictions in the agreements governing our indebtedness may prevent us from taking actions that we believe would be in the best interest of our business and may make it difficult for us to successfully execute our business strategy or effectively compete with companies that are not similarly restricted. We may also incur future debt obligations that might subject us to additional restrictive covenants that could affect our financial and operational flexibility.

Failure to comply with these financial and operating covenants could result from, among other things, changes in our results of operations, the incurrence of additional indebtedness, declines in the pricing of our services and products, difficulties in implementing cost reduction initiatives, difficulties in implementing our overall business strategy or changes in general economic conditions, which may be beyond our control. The breach of any of these covenants or restrictions could result in a default under the agreements that govern these facilities that would permit the lenders to declare all amounts outstanding thereunder to be due and payable, together with accrued and unpaid interest. If we are unable to repay such amounts, lenders having secured obligations could proceed against the collateral securing these obligations. The collateral includes the capital stock of our domestic subsidiaries and substantially all of our and our subsidiaries' other tangible and intangible assets, subject in each case to certain exceptions. This could have serious consequences on our financial condition and results of operations and could

cause us to become bankrupt or otherwise insolvent. In addition, these covenants may restrict our ability to engage in transactions that we believe would otherwise be in the best interests of our business and stockholders.

See Part II, "**Item 7**. Management's Discussion and Analysis of Financial Condition and Results of Operations-Principal Debt Agreements" for further details.

Substantially all of our debt is variable rate and increases in interest rates could negatively affect our financing costs and our ability to access capital.

We have exposure to future interest rates based on the variable rate debt under the Senior Secured Debt Facilities, and to the extent we raise additional debt in the capital markets to meet maturing debt obligations, to fund our capital expenditures and working capital needs and to finance future acquisitions. Daily working capital requirements are typically financed with operational cash flow and through borrowings under our 2019 ABL Facility, if needed. The interest rate on these borrowing arrangements is generally determined from the inter-bank offering rate at the borrowing date plus a pre-set margin. Although we employ risk management techniques to hedge against interest rate volatility, significant and sustained increases in market interest rates could materially increase our financing costs and negatively impact our reported results.

In addition, in certain circumstances, our variable rate indebtedness uses the London Interbank Offer Rate ("LIBOR") as a benchmark for establishing the interest rate. The LIBOR has been subject of national, international, and other regulatory guidance and proposals for reform. In July 2017, the U.K. Financial Conduct Authority announced that it intends to stop persuading or compelling banks to submit rates for calculation of LIBOR after 2021. These reforms and other pressures may cause LIBOR to disappear entirely or to perform differently than in the past. The consequences of these developments cannot be entirely predicted, but could include an increase in our financing costs and our ability to access capital.

Disruptions in the capital and credit markets, continued low commodity prices, our debt level and other factors may restrict our ability to raise capital on favorable terms, or at all.

Disruptions in the capital and credit markets (which have and may continue to be impact by COVID-19), in particular with respect to companies in the energy sector, could limit our ability to access these markets or may significantly increase our cost to borrow. Continued low commodity prices, among other factors, have caused some lenders to increase interest rates, enact tighter lending standards which we may not satisfy as a result of our debt level or otherwise, refuse to refinance existing debt at maturity on favorable terms, or at all, and in certain instances have reduced or ceased to provide funding to borrowers. If we are unable to access the capital and credit markets on favorable terms or at all, it could adversely affect our business, financial condition and results of operations.

Ability to use net operating loss carryforwards to offset future taxable income for U.S. federal income tax purposes is subject to limitation under Section 382 of the Internal Revenue Code, and NOLs and other tax attributes is subject to reduction, causing less NOL or tax deductions to be available to offset future taxable income for U.S. federal income tax purpose.

Under U.S. federal income tax law, a corporation is generally permitted to deduct from taxable income net operating losses ("NOLs") carried forward from prior years. As of December 31, 2020, we reported consolidated federal NOL carryforwards of approximately \$1.2 billion of which \$804.6 million are pre-change NOL's subject to limitation. Our ability to utilize our NOL carryforwards to offset future taxable income and to reduce U.S. federal income tax liability is subject to certain requirements and restrictions. In general, under Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"), a corporation that undergoes an "ownership change" is subject to limitations on its ability to utilize its pre-change NOLs to offset future taxable income. An ownership change generally occurs if one or more shareholders (or groups of shareholders) who are each deemed to own at least 5% of our stock have aggregate increases in their ownership of such stock of more than 50 percentage points over such stockholders' lowest ownership percentage during the testing period (generally a rolling three year period). We believe we experienced an ownership change in October 2019 as a result of the C&J Merger. We also believe we experienced an ownership change in January 2017 as a result of the implementation of the IPO. Thus our pre-change

NOLs are subject to limitation under Section 382 of the Code as a result. Such limitation may cause U.S. federal income taxes to be paid earlier than otherwise would be paid if such limitation were not in effect and could cause a portion of our pre-change NOLs generated prior to 2018 to expire unused, in each case reducing or eliminating the benefit of such NOLs. Similar rules and limitations may apply for state income tax purposes.

Risks Related to Our Common Stock

The price of our common stock may be volatile or may decline regardless of our operating performance, and you may not be able to resell your shares at or above the public offering price.

The market price for our common stock is volatile. In addition, the market price of our common stock may fluctuate significantly in response to a number of factors, most of which we cannot control, including

- the failure of securities analysts to cover, or continue to cover, our common stock or changes in financial estimates by analysts;
- changes in, or investors' perception of, the oil field services industry, including hydraulic fracturing;
- the activities of competitors;
- future issuances and sales of our common stock, including in connection with acquisitions;
- our quarterly or annual earnings or those of other companies in our industry;
- the public's reaction to our press releases, our other public announcements and our filings with the SEC:
- regulatory or legal developments in the U.S.;
- litigation involving us, our industry, or both; and
- general economic conditions.

In addition, the stock market often experiences extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of a particular company. These broad market fluctuations and industry factors may materially reduce the market price of our common stock, regardless of our operating performance.

Because we do not currently pay dividends, our stockholders may not receive any return on investment, unless they sell their common stock for a price greater than that which they paid for it.

We do not currently pay dividends, and our stockholders do not have contractual or other rights, to receive dividends. Our board of directors may, in its discretion, modify or repeal our dividend policy. The declaration and payment of dividends depends on various factors, including: our net income, financial condition, cash requirements, future prospects and other factors deemed relevant by our board of directors.

In addition, we are a holding company that does not conduct any business operations of our own. As a result, we would be dependent upon cash dividends and distributions and other transfers from our subsidiaries to make dividend payments. Our subsidiaries' ability to pay dividends is restricted by agreements governing their debt instruments and may be restricted by agreements governing any of our subsidiaries' future indebtedness. Furthermore, our subsidiaries are permitted under the terms of their debt agreements to incur additional indebtedness that may severely restrict or prohibit the payment of dividends. See Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Liquidity and Capital Resources."

Under the Delaware General Corporation Law (the "DGCL"), our board of directors may not authorize payment of a dividend unless it is either paid out of our surplus, as calculated in accordance with the DGCL, or if we

do not have a surplus, it is paid out of our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

We may not have an active capital return program, and such programs may not have the desired effect.

In December 2019, our board of directors approved a capital return program under which we had the authority to expend up to \$100 million through December 31, 2020, through stock repurchases, dividends or other capital return strategies. While, as part of the capital return program, our board of directors had approved a stock repurchase program of up to \$50 million of the Company's common stock, in light of events of 2020, no share repurchases or other capital return programs were made prior to the expiration of the capital return program. We can provide no assurance any similar programs will be implemented in the future, or that if implemented, that we will repurchase our common stock pursuant to such share repurchase program.

Although our board of directors has approved share repurchase programs in the past, they generally have not obligated us to repurchase any specific dollar amount or to acquire any specific number of shares. The timing and amount of repurchases, if any, would depend upon several factors, including market and business conditions, the trading price of our common stock and the nature of other investment opportunities. Any future repurchase program may be limited, suspended or discontinued at any time without prior notice. In addition, repurchases of our common stock pursuant to a share repurchase program could cause our stock price to be higher than it would be in the absence of such a program and could potentially reduce the market liquidity for our stock. Furthermore, a share repurchase program could diminish our cash reserves, which may impact our ability to finance future growth and to pursue possible future strategic opportunities and acquisitions. Although share repurchase programs are intended to enhance long-term stockholder value, there is no assurance that it will do so and short-term stock price fluctuations could reduce the program's effectiveness.

Our stockholders may be diluted by the future issuance of additional common stock in connection with our equity incentive plans, acquisitions or otherwise.

We have 284,840,314 shares of common stock authorized but unissued under our certificate of incorporation. We will be authorized to issue these shares of common stock and options, rights, warrants and appreciation rights relating to common stock for consideration and on terms and conditions established by our board of directors in its sole discretion, whether in connection with acquisitions or otherwise. As of December 31, 2020, we have 15,584,151 shares of our common stock available for award that may be issued under our equity incentive plans. Any common stock that we issue, including under our equity incentive plans or other equity incentive plans that we may adopt in the future, may result in additional dilution to our stockholders.

In the future, we may also issue our securities, including shares of our common stock, in connection with investments or acquisitions. We regularly evaluate potential acquisition opportunities, including ones that would be significant to us, and at any one time we may be participating in processes regarding several potential acquisition opportunities, including ones that would be significant to us. We cannot predict the timing of any contemplated transactions, and none are currently probable. The number of shares of our common stock issued in connection with an investment or acquisition could constitute a material portion of our then-outstanding shares of common stock. Any issuance of additional securities in connection with investments or acquisitions may result in additional dilution to our stockholders.

Keane Investor and Cerberus own a significant amount of our common stock and continue to have significant influence over us, which could limit your ability to influence the outcome of key transactions, including a change of control.

Cerberus currently controls approximately 18.7% of our common stock. Even though Cerberus no longer controls a majority of our common stock, Cerberus continues to have significant influence over us, including the election of our directors, determination of our corporate and management policies and determination of the outcome of any corporate transaction or other matter submitted to our stockholders for approval, including potential mergers or acquisitions, asset sales and other significant corporate transactions. Two of our nine directors are employees of,

appointees of, or advisors to, members of Cerberus. The interests of Cerberus may not coincide with the interests of other holders of our common stock. For example, the concentration of ownership held by Cerberus could delay, defer or prevent a change of control of our company or impede a merger, takeover or other business combination that may otherwise be favorable for us. Additionally, Cerberus is in the business of making investments in companies and may, from time to time, acquire and hold interests in businesses that compete directly or indirectly with us. Cerberus may also pursue, for its own members' accounts, acquisition opportunities that may be complementary to our business, and as a result, those acquisition opportunities may not be available to us. So long as Cerberus continues to directly or indirectly own a significant amount of our equity, Cerberus will continue to be able to substantially influence or effectively control our ability to enter into corporate transactions.

In addition, if Cerberus through Keane Investor decides to sell substantial amounts of our common stock in the public market, the market price of our common stock could decrease. The perception in the public market that Keane Investor might sell shares of common stock could also create a perceived overhang and depress our market price.

Provisions in our charter documents, certain agreements governing our indebtedness, our Stockholders' Agreement (as defined herein) and Delaware law could make acquiring us more difficult and may prevent attempts by our stockholders to replace or remove our current management, even if beneficial to our stockholders.

Provisions in our certificate of incorporation, our bylaws and our Stockholders' Agreement, may discourage, delay or prevent a merger, acquisition or other change in control that some stockholders may consider favorable, including transactions in which our stockholders might otherwise receive a premium for their shares of our common stock. These provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock, possibly depressing the market price of our common stock.

In addition, these provisions may frustrate or prevent any attempts by our stockholders to replace members of our board of directors. Because our board of directors is responsible for appointing the members of our management team, these provisions could in turn affect any attempt by our stockholders to replace members of our management team. Examples of such provisions are as follows:

- on or after such date that Keane Investor and its respective Affiliates (as defined in Rule 12b-2 of the Exchange Act, or any person who is an express assignee or designee of Keane Investor's respective rights under our certificate of incorporation (and such assignee's or designee's Affiliates)) (of these entities, the entity that is the beneficial owner of the largest number of shares is referred to as the "Designated Controlling Stockholder") ceases to own, in the aggregate, at least 50% of the thenoutstanding shares of our common stock (the "50% Trigger Date"), the authorized number of our directors may be increased or decreased only by the affirmative vote of two-thirds of the thenoutstanding shares of our common stock or by resolution of our board of directors;
- on or after the 50% Trigger Date, our stockholders may only amend our bylaws with the approval of at least two-thirds of all of the outstanding shares of our capital stock entitled to vote;
- the manner in which stockholders can remove directors from the board will be limited;
- on or after the 50% Trigger Date, stockholder actions must be effected at a duly called stockholder meeting and actions by our stockholders by written consent are prohibited;
- from and after such date that the Designated Controlling Stockholder ceases to own, in the aggregate, at least 35% of the then-outstanding shares of our common stock (the "35% Trigger Date"), advance notice requirements for stockholder proposals that can be acted on at stockholder meetings and nominations to our board of directors will be established;
- who may call stockholder meetings is limited;

- requirements on any stockholder (or group of stockholders acting in concert), other than, prior to the 35% Trigger Date, the Designated Controlling Stockholder, who seeks to transact business at a meeting or nominate directors for election to submit a list of derivative interests in any of our Company's securities, including any short interests and synthetic equity interests held by such proposing stockholder;
- requirements on any stockholder (or group of stockholders acting in concert) who seeks to nominate directors for election to submit a list of "related party transactions" with the proposed nominee(s) (as if such nominating person were a registrant pursuant to Item 404 of Regulation S-K, and the proposed nominee was an executive officer or director of the "registrant"); and
- our board of directors is authorized to issue preferred stock without stockholder approval, which could be used to institute a "poison pill" that would work to dilute the stock ownership of a potential hostile acquirer, effectively preventing acquisitions that have not been approved by our board of directors.

Our certificate of incorporation authorizes our board of directors to issue up to 50,000,000 shares of preferred stock. The preferred stock may be issued in one or more series, the terms of which may be determined by our board of directors at the time of issuance or fixed by resolution without further action by the stockholders. These terms may include voting rights, preferences as to dividends and liquidation, conversion rights, redemption rights and sinking fund provisions. The issuance of preferred stock could diminish the rights of holders of our common stock, and therefore, could reduce the value of our common stock. In addition, specific rights granted to holders of preferred stock could be used to restrict our ability to merge with, or sell assets to, a third party. The ability of our board of directors to issue preferred stock could delay, discourage, prevent or make it more difficult or costly to acquire or effect a change in control, thereby preserving the current stockholders' control.

In addition, under the agreements governing the Senior Secured Debt Facilities, a change in control may lead the lenders and/or holders to exercise remedies such as acceleration of the obligations thereunder, termination of their commitments to fund additional advances and collection against the collateral securing such obligations.

In connection with the Keane IPO, Keane entered into a Stockholders' Agreement with Keane Investor. This stockholders' agreement was amended and restated in conjunction with the C&J Merger (as amended and restated, the "Stockholders' Agreement") and provides that, except as otherwise required by applicable law, from the date on which (a) Keane Investor or, in the event a Cerberus Holder no longer holds Company shares through Keane Investor, Cerberus Holder has beneficial ownership of at least 12.5% or greater of the aggregate number of company shares then outstanding, Keane Investor or, in the event Cerberus Holder no longer holds company shares through Keane Investor, Cerberus Representative shall have the right to designate to the board of directors two individuals who satisfy the Director Requirements; and (b) Keane Investor or, in the event Cerberus Holder no longer holder company shares through Keane Investor, Cerberus Holder has beneficial ownership of less than 12.5% but at least 7.5% of the aggregate number of company shares then outstanding, Keane Investor or, in the event Cerberus Holder no longer holds company shares through Keane Investor, Cerberus Representative shall have the right to designate to the board of directors one individual who satisfies the Director Requirements. The ability of Keane Investor or a Holder to appoint one or more directors could make an acquisition of us more difficult and may prevent attempts by our stockholders to replace or remove our current management, even if beneficial to our stockholders.

Our certificate of incorporation and bylaws designate the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or other employees.

Our certificate of incorporation provides that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will be the exclusive forum for: (a) any derivative action or proceeding brought on our behalf; (b) any action asserting a claim for breach of a fiduciary duty owed by any of our directors, officers, employees or agents to us or our stockholders; (c) any action asserting a claim arising pursuant to any provision of the DGCL, our certificate of incorporation or our bylaws; or (d) any action asserting a claim

governed by the internal affairs doctrine. Any person or entity purchasing or otherwise acquiring any interest in shares of our capital stock is deemed to have received notice of and consented to the foregoing provisions. This choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds more favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and employees. Alternatively, if a court were to find this choice of forum provision inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business, financial condition, prospects or results of operations.

Item	1R	Unreso	lved 9	Staff	Commen	te

None.

Item 2. Properties

Properties

We lease office space for our principal executive headquarters, which is located at 3990 Rogerdale Rd., Houston, Texas 77042, for our research and technology facility at 10771 Westpark Dr., Houston, Texas 77042 and for our engineering and technology center at 8301 New Trails Dr., The Woodlands, Texas. We also own property for our maintenance facility at 1214 Gas Plant Rd., San Angelo, Texas 76904.

In addition, we own or lease numerous other smaller facilities and administrative offices across the geographic regions in which we operate to support our ongoing operations, including district offices, local sales offices, yard facilities and temporary facilities to house employees in regions where infrastructure is limited. Our leased properties are subject to various lease terms and expirations. We believe that our existing facilities are adequate for our operations and our locations allow us to efficiently serve our customers. However, we continue to evaluate the purchase or lease of additional properties or the consolidation of our properties, as our business requires. We do not believe that any single facility is material to our operations and, if necessary, we could readily obtain a replacement facility.

Item 3. Legal Proceedings

Due to the nature of our business, we are, from time to time and in the ordinary course of business, involved in routine litigation or subject to disputes or claims related to our business activities. It is our management's opinion that although the amount of liability with respect to certain of these known legal proceedings and claims cannot be ascertained at this time, any resulting liability will not have a material adverse effect individually or in the aggregate on our financial condition, cash flows or results of operations; however, there can be no assurance as to the ultimate outcome of these matters.

Litigation Related to the C&J Merger

In connection with the Merger Agreement and the transactions contemplated thereby the following complaints were filed: (i) one putative class action complaint was filed in the United States District Court for the District of Colorado by a purported C&J stockholder on behalf of himself and all other C&J stockholders (excluding defendants and related or affiliated persons) against C&J and members of the C&J board of directors, (ii) two putative class action complaints were filed in the United States District Court for the District of Delaware by a purported C&J stockholder on behalf of himself and all other C&J stockholders (excluding defendants and related or affiliated persons) against C&J, members of the C&J board of directors, the Company and Merger Sub, (iii) one putative class action complaint was filed in the United States District Court for the Southern District of Texas by a purported stockholder of the Company on behalf of himself and all other stockholders of the Company (excluding defendants and related or affiliated persons) against the Company and members of its board of directors, and (iv) one putative class action was filed in the Delaware Chancery Court by a purported stockholder of the Company on behalf of himself and all other stockholders of the Company (excluding defendants and related or affiliated persons) against members of the Company's board of directors. The five stockholder actions are captioned as follows: Palumbos v. C&J Energy Services, Inc., et al., Case No. 1:19-cv-02386 (D. Colo.), Wuollet v. C&J Energy Services, Inc., et al., Case No. 1:19-cv-01411 (D. Del.), Plumley v. C&J Energy Services, Inc., et al., Case No. 1:19cv-01446 (D. Del.), Bushansky v. Keane Group, Inc. et al., Case No. 4:19-cb-02924 (S.D. Tex) and Woods v. Keane Group, Inc., et al., Case No. 2019-0590 (Del. Chan.) (collectively, the "Stockholder Actions").

In general, the Stockholder Actions allege that the defendants violated Sections 14(a) and 20(a) of the Exchange Act, or aided and abetted in such alleged violations, because the Registration Statement on Form S-4 filed with the SEC on July 16, 2019 in connection with the proposed C&J Merger allegedly omitted or misstated material information.

The Stockholder Actions seek, among other things, injunctive relief preventing the consummation of the C&J Merger, unspecified damages and attorneys' fees. C&J, the Company and the other named defendants believe that no supplemental disclosures were required under applicable laws; however, to avoid the risk of the Stockholder Actions delaying the C&J Merger and to minimize the expense of defending the Stockholder Actions, and without admitting any liability or wrongdoing, C&J and the Company filed a Form 8-K on October 11, 2019 making certain supplemental disclosures in connection with the C&J Merger. Following those supplemental disclosures, plaintiffs in the Woods and Bushansky actions voluntarily dismissed their claims as moot on October 16, 2019 and October 29, 2019, respectively. The Company subsequently agreed to pay \$125,000 to plaintiff's counsel for attorneys' fees and expenses in full satisfaction of the claim for attorneys' fees and expenses in the Woods action, and the remaining cases were settled and dismissed as well. No shareholder litigation is currently pending arising out of the C&J Merger.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock trades on the NYSE under the symbol "NEX". On February 22, 2021, the last reported sales price of our common stock on the NYSE was \$4.16 per share.

Comparative Stock Performance Graph

The information contained in this Comparative Stock Performance Graph section shall not be deemed to be "soliciting material" or "filed" or incorporated by reference in future filings with the SEC, or subject to the liabilities of Section 18 of the Exchange Act, except to the extent that we specifically incorporate it by reference into a document filed under the Securities Act or the Exchange Act.

The graph below compares the cumulative total shareholder return on our common stock, the cumulative total return on the Standard & Poor's 500 Stock Index, the Standard & Poor's MidCap Index, the Oilfield Service Index and a composite average of publicly traded peer companies (Nine Energy Services, Inc., FTS International, Inc., Liberty Oilfield Services Inc., Patterson-UTI Energy, Inc., ProPetro Holding Corp., U.S. Well Services, Inc., and RPC, Inc.), since January 20, 2017.

The graph assumes \$100 was invested on January 20, 2017 in our common stock, the Standard & Poor's 500 Stock Index, the Standard & Poor's MidCap Index, the Oilfield Service Index and a composite of publicly traded peer companies. The cumulative total return assumes the reinvestment of all dividends. We elected to include the stock performance of a composite of our publicly traded peers, as we believe it is an appropriate benchmark for our line of business/industry.

Holders

As of February 22, 2021, we had 215,159,686 shares of common stock issued and outstanding, held by approximately 9 registered holders. The number of registered holders does not include holders that have common stock held for them in "street name," meaning that the stock is held for their accounts by a broker or other nominee.

Dividends

We have not paid any cash dividends on our common stock to date. However, our board of directors may consider the payment of dividends in the future based on our levels of profitability and indebtedness. The declaration and payment of any future dividends will be at the sole discretion of our board of directors and will depend upon, among other things, our earnings, financial condition, capital requirements, level of indebtedness, contractual restrictions with respect to the payment of dividends and other considerations that our board of directors deems relevant. Our board of directors may decide, in its discretion, at any time, to modify or repeal the dividend policy or discontinue entirely any payment of dividends.

The ability of our board of directors to declare a dividend is also subject to limits imposed by Delaware corporate law. Under Delaware law, our board of directors and the boards of directors of our corporate subsidiaries incorporated in Delaware may declare dividends only to the extent of our "surplus," which is defined as total assets at fair market value minus total liabilities, minus statutory capital, or if there is no surplus, out of net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year.

On December 11, 2019, we announced that our board of directors had authorized a stock repurchase program of up to \$50 million of our outstanding common stock. The program did not obligate us to purchase any particular number of shares of common stock during any period, and no shares were repurchased under the program prior to its expiration on December 31, 2020.

Purchases of Equity Securities

Issuer Purchases of Equity Securities

Settlement Period	` '			(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs ⁽¹⁾
October 1, 2020 through October 31, 2020	4,922	\$	1.97	_	\$ 50,000,000
November 1, 2020 through November 30, 2020	1,165	\$	1.95	_	\$ 50,000,000
December 1, 2020 through December 31, 2020	129,216	\$	3.60		\$ 50,000,000
Total	135,303	\$	3.52		\$ 50,000,000

⁽¹⁾ On December 11, 2019, the Company announced the board of directors approved a new share repurchase program for up to \$50.0 million through December 31, 2020. This share repurchase program expired on December 31, 2020 with no shares having been repurchased under the program.

⁽²⁾ Consists of shares that were withheld by us to satisfy tax withholding obligations of employees that arose upon the vesting of restricted shares. The value of such shares is based on the closing price of our common shares on the vesting date.

Item 6. Selected Financial Data

The selected financial data for the periods presented was derived from our audited consolidated financial statements. The selected historical financial data presented below is not intended to replace our historical financial statements, and should be read in conjunction with Part I, "Item 1A. Risk Factors," Part II, "Item 7. Management's Discussion and Analysis of Financial and Results of Operations" and our audited consolidated financial statements included in Part II, "Item 8. Financial Statements and Supplementary Data" of this Annual Report in order to understand those factors, such as the C&J Merger, which may affect the comparability of the Selected Financial Data.

	Year Ended December 31,

- Commencing on November 1, 2019, our consolidated financial statements also include the financial position, results of operations and cash flows of C&J.
- (2) Commencing on July 3, 2017, our consolidated financial statements also include the financial position, results of operations and cash flows of RockPile.
- (3) Commencing on March 16, 2016, our consolidated financial statements also include the financial position, results of operations and cash flows of the Acquired Trican Operations.
- (4) Excludes depreciation and amortization, shown separately.
- (5) Interest expense during the year ended December 31, 2019 includes \$0.5 million in write-offs in connection with the modification of the 2017 ABL Facility. Interest expense during the year ended December 31, 2018 includes \$7.6 million in write-offs of deferred financing costs, incurred in connection with the early debt extinguishment of our 2017 Term Loan Facility (as defined herein). Interest expense during the year ended December 31, 2017 includes \$15.8 million of prepayment penalties and \$15.3 million in write-offs of deferred financing costs, incurred in connection with the refinancing of our then existing revolving credit and security agreement (as amended, the "2016 ABL Facility") and the early debt extinguishment of our the term loan facility provided by that certain credit agreement entered into on March 16, 2016 by KGH Intermediate Holdco I, LLC, Holdco II and Keane Frac, LP (as amended, the "2016 Term Loan Facility") with certain financial institutions (collectively, the "2016 Term Lenders") and CLMG Corp., as administrative agent for the 2016 Term Lenders, and Senior Secured Notes (as defined herein).
- (6) The pro forma earnings per unit amounts for 2017, 2016 and 2015 have been computed to give effect to the Organizational Transactions, including the limited liability company agreement of Keane Investor to, among other things, exchange all of our Existing Owners' membership interests for the newly-created ownership interests. The computations of pro forma earnings per unit do not consider the 15,700,000 shares of common stock newly-issued by the Company to investors in the IPO.
- (7) Long-term debt includes \$5.7 million, \$7.1 million, \$7.5 million, \$8.2 million and \$18.4 million of unamortized debt discount and debt issuance costs for 2020, 2019, 2018, 2017, and 2016 respectively, and excludes capital lease obligations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes included within Part II, "Item 8. Financial Statements and Supplementary Data" in this Annual Report on Form 10-K. For additional information related to forward looking statements or information related to the basis of presentation and comparability of financial information, please see "Cautionary Statement Regarding Forward-Looking Statements and Information" and "Basis of Presentation in this Annual Report on Form 10-K", both of which immediately follow the table of contents of this Form 10-K.

Business Overview

NexTier Oilfield Solutions Inc. is a predominantly U.S. land oilfield service company, with a diverse set of well completion and production services across a variety of active and demanding basins. We have a history of growth through acquisition, including (i) our 2017 acquisition of RockPile, a multi-basin provider of integrated well completion services in the U.S. whose primary service offerings included hydraulic fracturing, wireline perforation and workover rigs, (ii) our 2018 asset acquisition from RSI to acquire approximately 90,000 hydraulic horsepower and related support equipment, (iii) our 2019 transaction with C&J Energy Services, Inc. ("C&J Merger"), a publicly traded Delaware corporation. This history impacts the comparability of our operational results from year to year. See Part I, "Item 1. Business" of this Annual Report for an overview of our history, including additional information on the acquisitions noted above, including the C&J Merger, and business environment. Additional information on these transactions can be found in Note (3) Mergers and Acquisitions of Part II, "Item 8. Financial Statements and Supplemental Data."

Industry Overview and Drivers in 2020

We provide our services in several of the most active basins in the United States, including the Permian, the Marcellus Shale/Utica, the Eagle Ford and the Bakken/Rockies. The high density of our operations in the basins in which we are most active provides us the opportunity to leverage our fixed costs and to quickly respond with what we believe are highly efficient, integrated solutions that are best suited to address customer requirements.

Activity within our business segments is significantly impacted by spending on upstream exploration, development and production programs by our customers. Thus, our financial performance is affected by rig and well counts in North America, as well as oil and natural gas prices, which are summarized in the tables below. Also influencing our activity is the status of the global economy, which impacts oil and natural gas demand. Some of the more significant determinants of current and future spending levels of our customers are oil and natural gas prices, global oil supply, the world economy, the availability of credit, government regulation and global stability, which together drive worldwide drilling activity.

The dual supply and demand shock that emerged in the first quarter of 2020 in response to increasing macro uncertainty related to the COVID-19 pandemic and significantly lower crude oil prices (partly resulting from production decisions from OPEC+) had immediate negative impacts on commodity prices and market conditions, which translated into lower completions activity in 2020. Crude oil prices have improved from their 2020 lows, which if maintained, we believe could drive a healthy level of investment and activity in U.S. shale, especially in 2022, if macro-economic conditions continue to improve.

There has been some attrition through consolidation and other events that have made some progress in realigning frac supply with demand. However, while well completion activity levels are improving, frac supply remains in excess of demand. Against this backdrop, pricing for our services remains highly competitive, as excess frac capacity pursues limited new opportunities. We continued to see pricing pressure and do not expect pricing to return to normal levels in the near future. In addition, horsepower intensity for each fleet continues to grow as our industry adopts more complex completion techniques; and we believe that when horsepower returns, it will likely be utilized across fewer fleets.

We have focused on reducing our marketed fleet to a level that we believe is more in-line with long term demand and with our strategy to harvest the investments made in our traditional fleets, while growing the portion of our fleet that offers better pricing and a lower emissions profile. Since the merger, we have announced a reduction of approximately 650,000 horsepower that can be considered as permanently out of the market. The major components from the decommissioned fleets have and will continue to be used over time as part of our maintenance inventory. Once consumed, we intend to cut up the frames and permanently remove them from our marketed base of equipment.

The following table shows the average historical oil and natural gas prices for WTI and Henry Hub natural gas:

	Year Ended December 31,								
	2020			2019	2018				
Oil price - WTI ⁽¹⁾	\$	39.23	\$	56.98	\$	64.94			
Natural gas price - Henry Hub ⁽²⁾	\$	2.04	\$	2.57	\$	3.17			
(1) Oil price measured in dollars per barrel (2) Natural gas price measured in dollars per million British thermal units (Btu), or MMBtu									

The historical average U.S. rig counts based on the weekly Baker Hughes Incorporated rig count information were as follows:

	Year Ended December 31,					
Product Type	2020	2019	2018			
Oil	346	773	841			
Natural Gas	85	169	190			
Other	2	1	1			
Total	433	943	1,032			
	Year Ended December 31,					
	Year I	Ended December 3	1,			
Drilling Type	Year I 2020	Ended December 3	2018			
Drilling Type Horizontal						
	2020	2019	2018			
Horizontal	384	826	2018 900			

As of January 2021, global liquids demand is expected to average 97.7 barrels per day in 2021. The EIA anticipates continued growth in the long-term U.S. domestic demand for natural gas, supported by various factors, including (i) increased likelihood of favorable regulatory and legislative initiatives, (ii) increased acceptance of natural gas as a clean and abundant domestic fuel source and (iii) the emergence of low-cost natural gas shale developments. As of January 2021, natural gas demand in the United States is expected to average 80.73 cubic feet per day in 2021.

The regions in which we operate, including the Permian, Marcellus Shale / Utica Basins and Eagle Ford, among others, are expected to account for a majority of all new horizontal wells anticipated to be drilled through 2021. As of December 31, 2020, rigs in these basins accounted for approximately 67% of the total, and were up approximately 47% as compared to low total U.S. rig count noted on August 14, 2020.

In January 2021, a new U.S. President took office. He has made statements regarding the desire to support alternative energy sources, reduce U.S. emissions of greenhouse gases and generally address climate change. This new administration has implemented executive orders in pursuit of those goals and has indicated a desire to reverse certain business and energy industry policies of the prior President. At this time, it is unclear what impact the new administration's actions and policy platform may have on our business, our customers and our industry.

Operating Approach & Strategy

We believe that there is competitive value in providing integrated solutions that align the incentives of operators and service providers. We are pursuing opportunities to leverage our investment in our digital program and diesel substitution technologies (such as duel fuel capabilities), to provide a service strategy targeted at achieving emissions reductions, both for us and our customers. NexTier has been developing and building its digital program for some time, and we have now applied our digital platform to all of our operating fleets. We've also announced the expected addition in 2021 of a natural gas treatment and delivery solution that will power NexTier's fleet with field gas or compressed natural gas. This addition seeks to address wellsites where there is not a reliable nearby gas supply, and thus, the full benefit and value of dual fuel or other lower emissions technologies may not otherwise be

fully realized. To address this situation, we are developing an integrated natural gas treatment and delivery solution designed to provide gas sourcing, compression, transport, decompression, treatment, and related services for our fracing operations. This integrated strategy will provide our customers with a streamlined approach to driving more sustainable, cost effective operations at the wellsite.

We believe our integrated approach and proven capabilities enable us to deliver cost-effective solutions for increasingly complex and technically demanding well completion requirements, which include longer lateral segments, higher pressure rates and proppant intensity and multiple fracturing stages in challenging high-pressure formations. In addition, our technical team and our innovation centers, provide us with the ability to supplement our service offerings with engineered solutions specifically tailored to address customers' completion requirements and unique challenges.

Our revenues are generated by providing services and equipment to customers who operate oil and gas properties and invest capital to drill new wells and enhance production or perform maintenance on existing wells. Our results of operations in our core service lines are driven primarily by five interrelated, fluctuating variables: (1) the drilling, completion and production activities of our customers, which is primarily driven by oil and natural gas prices and directly affects the demand for our services; (2) the price we are able to charge for our services and equipment, which is primarily driven by the level of demand for our services and the supply of equipment capacity in the market; (3) the cost of materials, supplies and labor involved in providing our services, and our ability to pass those costs on to our customers; (4) our activity, or deployed equipment "utilization" levels; and (5) the quality, safety and efficiency of our service execution.

Our operating strategy is focused on maintaining high utilization levels of deployed equipment to maximize revenue generation while controlling costs to gain a competitive advantage and drive returns. We believe that the quality and efficiency of our service execution and aligning with customers who recognize the value that we provide are central to our efforts to support equipment utilization and grow our business.

However, equipment utilization cannot be relied on as wholly indicative of our financial or operating performance due to variations in revenue and profitability from job to job, the type of service to be performed and the equipment, personnel and consumables required for the job, as well as competitive factors and market conditions in the region in which the services are performed. Given the volatile and cyclical nature of activity drivers in the U.S. onshore oilfield services industry, coupled with the varying prices we are able to charge for our services and the cost of providing those services, among other factors, operating margins can fluctuate widely depending on supply and demand at a given point in the cycle.

Historically, our utilization levels have been highly correlated to U.S. onshore spending by our customers. Generally, as capital spending by our customers increases, drilling, completion and production activity also increases, resulting in increased demand for our services, and therefore more days or hours worked (as the case may be). Conversely, when drilling, completion and production activity levels decline due to lower spending by our customers, we generally provide fewer services, which results in fewer days or hours worked (as the case may be). Additionally, during periods of decreased spending by our customers, we may be required to discount our rates or provide other pricing concessions to remain competitive and support deployed equipment utilization, which negatively impacts our revenue and operating margins. During periods of pricing weakness for our services, we may not be able to reduce our costs accordingly, and our ability to achieve any cost reductions from our suppliers typically lags behind the decline in pricing for our services, which could further adversely affect our results. Furthermore, when demand for our services increases following a period of low demand, our ability to capitalize on such increased demand may be delayed while we reengage and redeploy equipment and crews that have been idled during a downturn. The mix of customers that we are working for, as well as limited periods of exposure to the spot market, also impacts our deployed equipment utilization.

Our Reportable Segments

Prior to the C&J Merger, the Company was organized as two reportable segments. Between the C&J Merger and the divestiture of our well support services business in March of 2020, our business was organized into three reportable segments. Additional information on these transactions can be found in Note (21) Business Segments. As of December 31, 2020, we were organized into two reportable segments, described below. This history impacts the comparability of our operational results from year to year.

- Completion Services, which consists of the following businesses and services lines: (1) hydraulic fracturing; (2) wireline and pumpdown services; and (3) completion support services, which includes our innovation centers and activities.
- Well Construction and Intervention Services, which consists of the following businesses and service lines: (1) cementing services and (2) coiled tubing services.

Completion Services

The core services provided through our Completion Services segment are hydraulic fracturing, wireline and pumpdown services. As of December 31, 2020, we had approximately 37 marketable hydraulic fracturing fleets, 116 wireline trucks and 80 pumpdown units capable of being deployed. Our completion support services are focused on supporting the efficiency, reliability and quality of our operations. Our Innovation Centers provide in-house manufacturing capabilities that help to reduce operating cost and enable us to offer more technologically advanced and efficiency focused completion services, which we believe is a competitive differentiator. For example, through our Innovation Centers we manufacture the data control instruments used in our fracturing operations and the perforating guns and addressable switches used in our wireline operations; these products are also available for sale to third-parties. The majority of revenue for this segment is generated by our fracturing business.

Well Construction and Intervention Services

The core services provided through our Well Construction and Intervention Services segment are cementing and coiled tubing services. The majority of revenue for this segment is generated by our cementing business. As of December 31, 2020, we had approximately 25 coiled tubing units and 101 cementing units capable of being deployed.

Historical Segment: Well Support Services

On March 9, 2020, we completed a divestiture of the entities and assets comprising our Well Support Services. This segment had focused on post-completion activities at the well site, including rig services, such as workover and plug and abandonment, fluids management services, and other specialty well site services. Our financials for the full year ended December 31, 2020 include operating results of the Well Support Services business prior to its divestiture.

How we calculate utilization for each segment

Our management team monitors asset utilization, among other factors, for purposes of assessing our overall activity levels and customer demand. For our Completion Services segment, asset utilization levels for our own fleets is defined as the ratio of the average number of deployed fleets to the number of total fleets for a given time period. We define active fleets as fleets available for deployment; we consider one of our fleets deployed if the fleet has been put in service at least one day during the period for which we calculate utilization; and we define fully-utilized fleets per month as fleets that were deployed and working with our customers for a significant portion of a given month. As a result, as additional fleets are incrementally deployed, our utilization rate increases. We define industry utilization of fracturing assets as the ratio of the total industry demand of hydraulic horsepower to the total available capacity of hydraulic horsepower, in each case as reported by an independent industry source. Our method

for calculating the utilization rate for our own fracturing fleets or the industry may differ from the method used by other companies or industry sources which could, for example, be based off a ratio of the total number of days a fleet is put in service to the total number of days in the relevant period. We believe that our measures of utilization, based on the number of deployed fleets, provide an accurate representation of existing, available capacity for additional revenue generating activity.

In our Well Construction and Intervention Services segment, we measure our asset utilization levels for our cementing business primarily by the total number of days that our asset base works on a monthly basis, based on the available working days per month. In our coiled tubing business, we measure certain asset utilization levels by the hour to better understand measures between daylight and 24-hour operations. Both the financial and operating performance of our coiled tubing and cement units can vary in revenue and profitability from job to job depending on the type of service to be performed and the equipment, personnel and consumables required for the job, as well as competitive factors and market conditions in the region in which the services are performed.

In our Well Support Services segment, we measured asset utilization levels primarily by the number of hours our assets work on a monthly basis, based on the available working days per month.

RESULTS OF OPERATIONS

The following table sets forth our financial results for the year ended December 31, 2020 as compared to the year ended December 31, 2019. Our financial results for 2019 include the financial and operating results of the businesses acquired in the C&J Merger for the partial period beginning November 1, 2019 through December 31, 2019.

A comparison of our financial results for the year ended December 31, 2019 and for the year ended December 31, 2018 can be found in the "**Item 7.** Management's Discussion and Analysis of Financial Condition and Results of Operations - Results of Operations" section in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019, filed on March 12, 2020.

Year Ended December 31, 2020 Compared with Year Ended December 31, 2019

			Year Ended I	December 31,		
(Thousands of Dollars)			As a % of	Revenue	Varia	ınce
Description	2020	2019	2020	2019	\$	%
Completion Services	\$1,046,314	\$1,709,934	87%	94%	\$ (663,620)	(39%)

Net loss	\$ (346,883)	\$ (106,157)	(29%)	(6%)	\$ (240,726)	227%

Revenue. Total revenue is comprised of revenue from our Completion Services, Well Construction and Intervention Services and Well Support Services segments. Revenue in 2020 decreased by \$619.0 million, or 34%, to \$1.2 billion from \$1.8 billion in 2019. This change in revenue by reportable segment is discussed below.

Completion Services: Completion Services segment revenue decreased by \$663.6 million, or 39%, to \$1.0 billion in 2020 from \$1.7 billion in 2019. The segment revenue decrease was primarily attributable to a decrease in our average number of fully utilized fracturing fleets, combined with decreases in our wireline and pump down services. The decreases in all service lines were driven by less activity and price reductions as a result of the

continuing impacts from the unforeseen and sudden decline in commodity prices as well as the COVID-19 pandemic that began to impact operations in late first quarter of 2020. Price reductions were slightly offset by efficiency gains delivered at the well site.

Well Construction and Intervention: Well Construction and Intervention Services segment revenue increased by \$35.3 million, or 56%, to \$98.3 million in 2020 from \$63.0 million in 2019. This increase in revenue is primarily attributable to the C&J Merger, partially offset by less utilization and price reductions given as a result of continuing negative impacts from unprecedented declines in the market and the COVID-19 pandemic that began to impact operations in late first quarter 2020.

Well Support Services: Well Support Services segment revenue increased by \$9.3 million or 19% to \$57.9 million in 2020 from \$48.6 million in 2019. In March of 2020 we sold our Well Support Services Segment. For additional information on this transaction, see Note *(21) Business Segments* of Part II, "**Item 8**. Financial Statements and Supplementary Data".

Cost of services. Cost of services in 2020 decreased by \$371.4 million, or 26%, to \$1.0 billion from \$1.4 billion in 2019. This change was driven by several factors including decreased overall activity and fleet utilization, as discussed above under *Revenue*, combined with increased market driven severance and facility closure costs resulting from a suppressed market environment and COVID-19 pandemic impact that began to impact operations in late first quarter of 2020.

Equipment Utilization. Depreciation and amortization expense increased by \$9.9 million, or 3%, to \$302.1 million in 2020 from \$292.2 million in 2019. The change in depreciation and amortization was primarily related to the assets acquired during the C&J Merger. (Gain) loss on disposal of assets in 2020 had a variance of \$18.9 million, compared to a gain of \$14.5 million in 2020 from a loss of \$4.5 million in 2019. This change was primarily driven by the sale of our Well Support Services Segment. For additional information on this transaction, see Note (21) Business Segments of Part II, "Item 8. Financial Statements and Supplementary Data".

Selling, general and administrative expense. Selling, general and administrative ("SG&A") expense, which represents costs associated with managing and supporting our operations, increased by \$20.5 million, or 17%, to \$144.1 million in 2020 from \$123.7 million in 2019, primarily as a direct result of the increased labor force and footprint from the Merger.

Merger and integration expense. Merger and integration expense decreased by \$36.2 million to \$32.5 million in 2020 from \$68.7 million in 2019. The \$32.5 million in merger and integration expense in 2020 is lower due to the C&J Merger closing in 2019 and a reduction in associated costs in 2020. These costs consisted primarily of professional services, severance costs, and facility consolidation.

Other income, net. Other income, net, in 2020 increased by \$6.0 million, or 1,338%, to \$6.5 million in 2020 from \$0.5 million in 2019. This change was primarily due to a \$6.0 million gain on a financial investment we acquired in 2020.

Interest expense, net. Interest expense, net of interest income, decreased by \$1.2 million, or 6%, to \$20.7 million in 2020 from \$21.9 million in 2019. This change was primarily attributable to a reduction in the Company's finance leases and lower interest rates in 2020.

Effective tax rate. Our effective tax rate on continuing operations in 2020 was (0.43)% for \$1.4 million of recorded income tax expense, as compared to (0.96)% for \$1.0 million of recorded income tax expense in 2019. For 2020, the difference between the effective tax rate and the U.S. federal statutory rate is due to state taxes, foreign withholding taxes and a change in valuation allowance. For 2019, the effective rate was primarily made up of state taxes and tax benefits derived from the current period operating income offset by a valuation allowance. As a result of market conditions and their corresponding impact on our business outlook, we determined that a valuation allowance was appropriate as it is not more likely than not that we will utilize our net deferred tax assets. The remaining tax impact not offset by a valuation allowance is related to indefinite-lived assets.

2021 Strategy

We face many challenges and risks in the industry in which we operate. Although many factors contributing to these risks are beyond our ability to control, we continuously monitor these risks and have taken steps to mitigate them to the extent practicable. In addition, while we believe that we are well positioned to capitalize on available growth opportunities, we may not be able to achieve our business objectives and, consequently, our results of operations may be adversely affected. Please read the factors described in the sections titled "Cautionary Note Regarding Forward-Looking Statements" and "Risk Factors" in Part I, Item 1A. of this Annual Report for additional information about the known material risks that we face.

Operating During a Pandemic

In response to the COVID-19 pandemic, we have implemented measures to focus on the safety of our partners, employees, and the communities in which we operate, while at the same time seeking to mitigate the impact on our financial position and operations. These measures include, but are not limited to, the following:

Taking Care of our Partners and Employees. The safety of our partners and employees continues to be a primary focus. As the COVID-19 pandemic has developed, we have taken numerous steps to help customers and employees comply with current health-expert recommendations, including limitation of social functions and non-essential travel, hygiene protocol education, telecommuting as job responsibilities permit, protocols and procedures focused on establishing a safe work environment, protocol for employees who test positive for COVID-19, and a response and mitigation monitoring process.

Expense Management. With the reduction in revenue, we implemented cost saving initiatives, including (i) adjusting active frac fleet count to align with changing demand; (ii) consolidating our footprint; (iii) delaying non-essential maintenance projects; (iv) reducing or suspending other discretionary spending; (v) restructuring our organization in a way that maximizes our managerial talent with a streamlined team; (vi) reductions of salaries or cash retainers, as applicable, by 20% for our directors and executive officers; and (vi) reducing employee-related costs, including furloughing personnel, pay reductions by 15-20%, and moderating headcount. While many of these cost savings initiatives continue, with the increase in activity, we have been able to put most of our furloughed personnel back to work, and we have begun rolling out a portion of pay reinstatement, with the focus on field level personnel. We recognize that the COVID-19 pandemic and responses thereto also impact our suppliers. To date, we have generally been able to obtain the equipment, parts and supplies necessary to support our operations on a timely basis. While we believe we will be able to make satisfactory alternative arrangements in the event of any interruption in the supply of these materials and/or products by one of our suppliers, this may not always be the case. In addition, certain materials for which we do not currently have long-term supply agreements could experience shortages and significant price increases in the future.

Balance Sheet, Cash Flow and Liquidity Management. We have taken actions to increase liquidity and strengthen our financial position. As a result of these actions, our cash and cash equivalents balance as of December 31, 2020 was \$276.0 million. For additional information on our liquidity and capital resources, see "Liquidity and Capital Resources."

Fiscal 2021 Objectives

With commodity prices continuing to be volatile, we intend to closely monitor the market and will adjust our approach as the situation develops. At this time, our principal business objective continues to be growing our business and safely providing best-in-class services in all of our operating segments, while delivering shareholder value and maintaining a disciplined capital deployment strategy.

We are committed to continuing to manage our business in line with demand for our services and make adjustments as necessary to effectively respond to changes in market conditions, customer activity levels, pricing for our services and equipment, and utilization of our deployed equipment and personnel. Our response to the industry's persistent uncertainty is to maintain sufficient liquidity, preserve our conservative capital structure and closely

monitor our discretionary spending. We take a measured approach to asset deployment, balancing our view of current and expected customer activity levels with a focus on generating positive returns for our shareholders. Our priorities remain to drive revenue by maximizing deployed equipment utilization, to improve margins through cost controls, to protect and grow our market share by focusing on the quality, safety and efficiency of our service execution, lower emissions, and to ensure that we are strategically positioned to capitalize on constructive market dynamics.

Completion Services

In our Completion Services segment, our strategy remains focused on deploying our market-ready fracturing fleets and integrating more of our wireline and pumpdown units with our deployed fracturing fleets and on a stand-alone basis. We are focused on increasing our dedicated fracturing fleet count with efficient customers that allow us to achieve high equipment utilization, which should result in improved financial performance. Additionally, we are focused on integrating more of our wireline and pumpdown units with our fracturing fleets to increase operational efficiencies and profitability. With that said, current market conditions remain challenging, and our primary focus remains to lower our overall cost structure by aligning with efficient, dedicated customers with deep inventories of work and proven track records of efficient operations, many of which we have created long-term relationships with over the past several years.

Furthermore, as discussed in Item 1. Business and Item 7. MD&A Overview, as part of our lower emissions initiatives, we are focused on optimizing gas substitution across our fleet, enabled by digital capabilities like NexHub and MDT controls, and the launch of our power solutions business. We believe that natural gas-powered technologies and digital assisted logistics will be a key method of transitioning to lower emissions operations, which strategy we anticipate will be a key driver of returns.

Well Construction and Intervention Services

In our Well Construction and Intervention Services segment, after significantly reducing our footprint during the second and third quarters of 2020 as we seek to position ourselves for strong operational and financial performance in regions that will support both near-term and long-term levels of activity, our strategy remains focused on deploying our market-ready cementing and coil tubing equipment in focused basins where we expect to generate returns. In our cementing business, even though market conditions remain challenged due to customers releasing drilling rigs and declining E&P capital spending, we remain focused on providing high-quality, timely service and deploying more of our stacked units with efficient customers in our focused basins. In our coiled tubing business, we are focused on market share growth, high quality customer service, and deploying additional market ready units at a low cost in response to increases in demand from our customers. We will stay focused on controlling costs and improving market share with an efficient customer base that plan to maintain stable drilling rig counts and levels of activity in 2021.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity represents a company's ability to adjust its future cash flows to meet needs and opportunities, both expected and unexpected.

	 (Thousands of Dollars)			
	Year Ended December 31,			
	 2020		2019	
Cash	\$ 275,990	\$	255,015	
Debt, net of deferred financing costs and debt discount	\$ 335,540	\$	337,623	

	(Thousands of Dollars)											
	Year Ended December 31,											
	2020			2019	2018							
Net cash provided by operating activities	\$	68,885	\$	305,463	\$	350,311						
Net cash used in investing activities	\$	(37,844)	\$	(114,100)	\$	(297,506)						
Net cash used in financing activities	\$	(9,825)	\$	(16,746)	\$	(68,554)						

Significant sources and uses of cash during the year ended December 31, 2020

Sources of cash:

- Operating activities:
 - Net cash generated by operating activities during the year ended December 31, 2020 of \$68.9 million. We continue to closely monitor our discretionary spending to focus on working capital and net operating cash to support our capital expenditures and other investing activities.
- Financing activities:
 - In the first quarter of 2020, the Company drew down \$175 million on the 2019 ABL Facility.
 This borrowing was to provide the Company better flexibility while managing its cash position during the ongoing COVID-19 pandemic.

Uses of cash:

- Investing activities:
 - Net cash used in investing activities for the year ended December 31, 2020 consisted primarily of capital expenditures, net of the cash received as part of the sale of the Well Support Services business segment.
- Financing activities:
 - Cash used to repay our debt facilities (other than described below), excluding finance leases and interest, during the year ended December 31, 2020 was \$3.5 million.
 - In the first quarter of 2020, the Company drew down \$175 million on the 2019 ABL Facility. This borrowing was to provide the Company better flexibility while managing its cash position during the ongoing COVID-19 pandemic. The borrowing on the 2019 ABL Facility was repaid in full during the second quarter of 2020.
 - Cash used to repay our finance leases during the year ended December 31, 2020 was \$3.8 million.
 - Shares withheld and retired related to stock-based compensation during the year ended December 31, 2020 totaled \$2.6 million.

Significant sources and uses of cash during the year ended December 31, 2019

Sources of cash:

- Operating activities:
 - Net cash generated by operating activities in 2019 of \$305.5 million was a result of the thoroughness in receiving collections from our customers and controlling costs.

Uses of cash:

- Operating activities:
 - Net cash used in operating activities for the year ended December 31, 2019, included \$61.9 million of merger and integration costs in connection with the C&J merger.

Investing activities:

- Net cash used in investing activities for the year ended December 31, 2019 consisted primarily of capital expenditures. This activity primarily related to our Completion Services segment.
- Financing activities:
 - Cash used to repay our debt facilities, excluding leases and interest, during the year ended December 31, 2019 was \$3.5 million.
 - Cash used to repay our finance leases during the year ended December 31, 2019 was \$6.0 million.
 - Shares withheld and retired related to share-based compensation during the year ended December 31, 2019 totaled \$6.0 million.

Significant sources and uses of cash during the year ended December 31, 2018

Sources of cash:

- Operating activities:
 - Net cash generated by operating activities in 2018 of \$350.3 million was primarily driven by higher utilization of our combined asset base and increased gross profit in our Completion Services segment.
- Investing activities:
 - Cash provided by the insurance proceeds received for losses resulting from the July 1, 2018 accidental fire was \$18.1 million. For further details see Note (7) Property and Equipment, net of Part II, "Item 8. Financial Statements and Supplementary Data."
 - \$4.7 million in proceeds from sales of various assets, including our idle field operations facility in Mathis, Texas, within the Corporate segment, and hydraulic tractors and light general-purpose vehicles within the Completion Service segment.

• Financing activities:

- Cash provided by the 2018 Term Loan Facility, net of debt discount was \$348.2 million.

Uses of cash:

Operating activities:

- \$13.0 million of transaction costs, including underwriting discounts paid by the Company, primarily incurred to consummate the secondary stock offering completed in January 2018
- \$7.9 million related to the portion of the cash settlement of our RockPile CVR liability that exceeded its acquisition-date fair value, with the remaining \$12.0 million of the cash settlement cost reflected in the use of cash in financing activities as described below.

• Investing activities:

Net cash used in investing activities of \$297.5 million was primarily associated with our asset acquisition from RSI and our newbuild and maintenance capital spend on active fleets, offset by insurance proceeds and proceeds from various asset sales, as discussed above under "Sources of cash." This activity primarily related to our Completion Services segment.

Financing activities:

- Cash used to repay our debt facilities, including capital leases but excluding interest, was \$289.1 million.
- Cash used to pay debt issuance costs associated with our debt facilities was \$7.3 million.
- Shares repurchased and retired related to our stock repurchase program totaled \$104.9 million.
- Shares repurchased and retired related to payroll tax withholdings on our share-based compensation totaled \$3.6 million.
- \$12.0 million related to the portion of the cash settlement of our RockPile CVR liability that was reflective of its acquisition-date fair value.

Future sources and use of cash

Our primary sources of liquidity have historically included, and we have funded our capital expenditures with, cash flows from operations, proceeds from public offerings of our common stock and borrowings under debt facilities. Our ability to generate future cash flows is subject to a number of variables, many of which are outside of our control, including the drilling, completion and production activity by our customers, which is highly dependent on oil and gas prices. See Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview" for additional discussion of certain factors that impact our results and the market challenges within our industry.

Our primary uses of cash are for operating costs, capital expenditures and debt service.

Capital expenditures for the first half of 2021 are projected to be primarily related to maintenance capital spend to support our existing active fleets, wireline trucks, coil units, and cementing units, with the remaining spend expected to be on our gas powered equipment and power solutions service.

Debt service for the year ended December 31, 2021 is projected to be \$23.4 million, of which \$0.8 million is related to finance leases. We anticipate our debt service will be funded by cash flows from operations.

Other factors affecting liquidity

Financial position in current market. As of December 31, 2020, we had \$276.0 million of cash and a total of \$73.5 million available under our revolving credit facility. We currently believe that our cash on hand, cash flow generated from operations and availability under our revolving credit facility will provide sufficient liquidity for at least the next 12 months, including for capital expenditures, debt service, and working capital investments.

Guarantee agreements. Under the 2019 ABL Facility \$28.5 million of letters of credit were outstanding as of December 31, 2020.

Customer receivables. In line with industry practice, we bill our customers for our services in arrears and are, therefore, subject to our customers delaying or failing to pay our invoices. The majority of our trade receivables have payment terms of 30 days or less. In weak economic environments, such as during the continuance of the COVID-19 pandemic, we may experience increased delays and failures to pay our invoices due to, among other reasons, a reduction in our customers' cash flow from operations and their access to the credit markets. If our customers delay paying or fail to pay us a significant amount of our outstanding receivables, it could have a material adverse effect on our liquidity, consolidated results of operations and consolidated financial condition.

Contractual Obligations

In the normal course of business, we enter into various contractual obligations that impact or could impact our liquidity. The table below contains our known contractual commitments as of December 31, 2020.

(Thousands of Dollars)

Contractual obligations	Total	2021		1 2022-2023		2024-2025		 2026+
Long-term debt, including current portion ⁽¹⁾	\$ 341,250	\$	3,500	\$	7,000	\$	330,750	\$ _
Estimated interest payments ⁽²⁾	75,721		17,365		34,105		24,251	_
Finance lease obligations ⁽³⁾	1,172		653		519		_	_
Operating lease obligations ⁽⁴⁾	50,846		20,856		16,639		4,190	9,161
Purchase commitments ⁽⁵⁾	72,908		46,788		24,930		1,190	_
Legal contingency	9,733		9,733		_			
	\$ 551,630	\$	98,895	\$	83,193	\$	360,381	\$ 9,161

- Long-term debt represents our obligations under our 2018 Term Loan Facility, exclusive of interest payments. In addition, these amounts
 exclude \$5.7 million of unamortized debt discount and debt issuance costs associated with our 2018 Term Loan Facility.
- (2) Estimated interest payments are based on debt balances outstanding as of December 31, 2020 and include interest related to the 2018 Term Loan Facility. Interest rates used for variable rate debt are based on the prevailing current London Interbank Offer Rate ("LIBOR").
- (3) Finance lease obligations primarily consist of obligations on our finance leases of light weight vehicles with ARI Financial Services Inc. and Enterprise FM Trust and includes interest payments.
- (4) Operating lease obligations are related to our real estate, rail cars, and light duty vehicles.
- (5) Purchase commitments primarily relate to our agreements with vendors for sand purchases and deposits on equipment. The purchase commitments to sand suppliers represent our annual obligations to purchase a minimum amount of sand from vendors. If the minimum purchase requirement is not met, the shortfall at the end of the year is settled in cash or, in some cases, carried forward to the next year.

Principal Debt Agreements

While there were numerous governmental assistance programs in 2020 to provide loans to qualifying companies facing challenges due to COVID-19, the Company did not seek any loans under these programs. Thus, our principal debt arrangements continue to be the 2019 ABL Facility and the 2018 Term Loan Facility described below.

2019 ABL Facility

Origination. On October 31, 2019, we, and certain of our other subsidiaries as additional

borrowers and guarantors, entered into a Second Amended and Restated Asset-Based Revolving Credit Agreement (the "2019 ABL Facility") to the original Asset-Based Revolving Credit Agreement, dated as of February 17, 2017, as amended December 22, 2017.

Structure. Our 2019 ABL Facility provides for a \$450.0 million revolving credit facility (with a \$100.0 million subfacility for letters of credit), subject to a borrowing base in accordance with the terms agreed between us and the lenders. In addition, subject to approval by the applicable lenders and other customary conditions, the 2019 ABL Facility allows for an additional increase in commitments of up to \$200.0 million. The 2019 ABL Facility is subject to customary fees, guarantees of subsidiaries, restrictions and covenants, including certain restricted payments.

Maturity. The loans arising under the initial commitments under the 2019 ABL Facility mature on October 31, 2024. The loans arising under any tranche of extended loans or additional commitments mature as specified in the applicable extension amendment or increase joinder, respectively.

ABL Facility bear interest at a rate per annum equal to, at Keane Group Holdings, LLC's option, (a) the base rate, plus an applicable margin equal to (x) if the average excess availability is less than 33%, 1.00%, (y) if the average excess availability is greater than or equal to 66%, 0.50%, or (b) the adjusted LIBOR rate for such interest period, plus an applicable margin equal to (x) if the average excess availability is greater than or equal to 33% but less than 33%, 2.00%, (y) if the average excess availability is greater than or equal to 33% but less than 66%, 1.75% or (z) if the average excess availability is greater than or equal to 66%, 1.50%, to a rate per annum equal to, at Keane Group Holdings, LLC's option, (a) the base rate, plus an applicable margin equal to (x) if the average excess availability is less than 33%, 0.75%, (y) if the average excess availability is greater than or equal to 33% but less than 66%, 0.50% or (z) if the average excess availability is greater than or equal to 66%, 0.25%, or (b) the adjusted LIBOR rate for such interest period, plus an applicable margin equal to (x) if the average excess availability is less than 33%, 1.75%, (y) if the average excess availability is greater than or equal to 33% but less than 66%, 1.50% or (z) if the average excess availability is greater than or equal to 33% but less than 66%, 1.50% or (z) if the average excess availability is greater than or equal to 33% but less than 66%, 1.50% or (z) if the average excess availability is greater than or equal to 66%, 1.25%.

Financial Covenants. The 2019 ABL Facility requires that, under certain circumstances, the consolidated fixed charge coverage ratio not be lower than 1.0:1.0 as of the last day of the most recently completed four consecutive fiscal quarters for which financial statements were required to have been delivered, including if excess availability (or liquidity if no loan or letter of credit, other than any letter of credit that has been cash collateralized, is outstanding) is less than the greater of (i) 10% of the loan cap and (ii) \$30.0 million at any time. As of December 31, 2020, the Company was in compliance with all covenants and the circumstances that would require testing of the consolidated fixed charge coverage ratio had not occurred.

2018 Term Loan Facility

On May 25, 2018, Keane Group and the 2018 Term Loan Guarantors (as defined below) entered into the 2018 Term Loan Facility with each lender from time to time party thereto and Barclays Bank PLC, as administrative agent and collateral agent. The proceeds of the 2018 Term Loan Facility were used to refinance Keane Group's then-existing term loan facility and to repay related fees and expenses, with the excess proceeds to fund general corporate purposes.

Structure. The 2018 Term Loan Facility provides for a term loan facility in an initial aggregate principal amount of \$350.0 million (the loans incurred under the 2018 Term Loan Facility, the "2018 Term Loans"). As of December 31, 2020, there was \$341.3 million principal amount of 2018 Term Loans outstanding. In addition, subject to certain customary conditions, the 2018 Term Loan Facility allows for additional incremental term loans to be incurred thereunder in an amount equal to the sum of (a) \$200.0 million plus the aggregate principal amount of voluntary prepayments of 2018 Term Loans made on or prior to the date of determination (less amounts incurred in reliance on the capacity described in this subclause (a)), plus (b) an unlimited amount, subject to, (x) in the case of debt secured on a pari passu basis with the 2018 Term Loans, immediately after giving effect to the incurrence

thereof, a first lien net leverage ratio being less than or equal to 2.00:1.00, (y) in the case of debt secured on a junior basis with the 2018 Term Loans, immediately after giving effect to the incurrence thereof, a secured net leverage ratio being less than or equal to 3.00:1.00 and (z) in the case of unsecured debt, immediately after giving effect to the incurrence thereof, a total net leverage ratio being less than or equal to 3.50:1.00.

Maturity. May 25, 2025 or, if earlier, the stated maturity date of any other term loans or term commitments.

Amortization. The 2018 Term Loans amortize in quarterly installments equal to 1.00% per annum of the aggregate principal amount of all initial term loans outstanding.

Interest. The 2018 Term Loans bear interest at a rate per annum equal to, at Keane Group's option, (a) the base rate plus 2.75%, or (b) the adjusted LIBOR for such interest period (subject to a 1.00% floor) plus 3.75%, subject to, on and after the fiscal quarter ending September 30, 2018, a pricing grid with three 0.25% per annum step-ups and one 0.25% per annum step-down determined based on total net leverage for the relevant period. Following a payment event of default, the 2018 Term Loans bear interest at the rate otherwise applicable to such 2018 Term Loans at such time plus an additional 2.00% per annum during the continuance of such event of default. We currently expect our interest rate to be higher in 2021 than in past years due to our current qualification at the higher end of our applicable margin range.

Prepayments. The 2018 Term Loan Facility is required to be prepaid with: (a) 100% of the net cash proceeds of certain asset sales, casualty events and other dispositions, subject to the terms of an intercreditor agreement between the agent for the 2018 Term Loan Facility and the agent for the 2019 ABL Facility and certain exceptions; (b) 100% of the net cash proceeds of debt incurrences or issuances (other than debt incurrences permitted under the 2018 Term Loan Facility, which exclusion is not applicable to permitted refinancing debt) and (c) 50% (subject to step-downs to 25% and 0%, upon and during achievement of certain total net leverage ratios) of excess cash flow in excess of a certain amount, minus certain voluntary prepayments made under the 2018 Term Loan Facility or other debt secured on a pari passu basis with the 2018 Term Loans and voluntary prepayments of loans under the 2019 ABL Facility to the extent the commitments under the 2019 ABL Facility are permanently reduced by such prepayments.

Guarantees. Subject to certain exceptions as set forth in the definitive documentation for the 2018 Term Loan Facility, the amounts outstanding under the 2018 Term Loan Facility are guaranteed by the Company, Keane Frac, LP, KS Drilling, LLC, KGH Intermediate Holdco I, LLC, KGH Intermediate Holdco II, LLC, and Keane Frac GP, LLC, and each subsidiary of the Company that will be required to execute and deliver a facility guaranty in the future pursuant to the terms of the 2018 Term Loan Facility (collectively, the "2018 Term Loan Guarantors").

Security. Subject to certain exceptions as set forth in the definitive documentation for the 2018 Term Loan Facility, the obligations under the 2018 Term Loan Facility are secured by (a) a first-priority security interest in and lien on substantially all of the assets of Keane Group and the 2018 Term Loan Guarantors to the extent not constituting ABL Facility Priority Collateral (as defined below) and (b) a second-priority security interest in and lien on substantially all of the accounts receivable, inventory, and frac iron equipment, and certain other assets and property related to the foregoing including certain chattel paper, investment property, documents, letter of credit rights, payment intangibles, general intangibles, commercial tort claims, books and records and supporting obligations of the borrowers and guarantors under the 2019 ABL Facility (the "ABL Facility Priority Collateral").

Fees. Certain customary fees are payable to the lenders and the agents under the 2018 Term Loan Facility.

Restricted Payment Covenant. The 2018 Term Loan Facility includes a covenant restricting the ability of the Company and its restricted subsidiaries to pay dividends and make certain other restricted payments, subject to certain exceptions. The 2018 Term Loan Facility provides that the Company and its restricted subsidiaries may, among things, make cash dividends and other restricted payments in an aggregate amount during the life of the facility not to exceed (a) \$100.0 million, plus (b) the amount of net proceeds received by Keane Group from the funding of the 2018 Term Loans in excess of the of such net proceeds required to finance the refinancing of the pre-existing term loan facility and pay fees and expenses related thereto and to the entry into the 2018 Term Loan

Facility, plus (c) an unlimited amount so long as, after giving effect to such restricted payment, the total net leverage ratio would not exceed 2.00:1.00. In addition, the Company and its restricted subsidiaries may make restricted payments utilizing the Cumulative Credit (as defined below), subject to certain conditions including, if any portion of the Cumulative Credit utilized is comprised of amounts under clause (b) of the definition thereof below, the proforma total net leverage ratio being no greater than 2.50:1.00.

"Cumulative Credit", generally, is defined as an amount equal to (a) \$25.0 million, (b) 50% of consolidated net income of the Company and its restricted subsidiaries on a cumulative basis from April 1, 2018 (which cumulative amount shall not be less than zero), plus (c) other customary additions, and reduced by the amount of Cumulative Credit used prior to such time (whether for restricted payments, junior debt payments or investments).

Affirmative and Negative Covenants. The 2018 Term Loan Facility contains various affirmative and negative covenants (in each case, subject to customary exceptions as set forth in the definitive documentation for the 2018 Term Loan Facility). The 2018 Term Loan Facility does not contain any financial maintenance covenants. As of December 31, 2020, the Company was in compliance with all covenants.

Events of Default. The 2018 Term Loan Facility contains customary events of default (subject to exceptions, thresholds and grace periods as set forth in the definitive documentation for the 2018 Term Loan Facility).

Off-Balance Sheet Arrangements

We do not have any material off-balance sheet financing arrangements, transactions or special purpose entities.

Related Party Transactions

Our board of directors has adopted a written policy and procedures (the "Related Party Policy") for the review, approval and ratification of the related party transactions by the independent members of the audit and risk committee of our board of directors. For purposes of the Related Party Policy, a "Related Party Transaction" is any transaction, arrangement or relationship or series of similar transactions, arrangements or relationships (including the incurrence or issuance of any indebtedness or the guarantee of indebtedness) in which (1) the aggregate amount involved will or may be reasonably expected to exceed \$120,000 in any fiscal year, (2) the company or any of its subsidiaries is a participant, and (3) any Related Party (as defined herein) has or will have a direct or indirect material interest. All Related Party Transactions will be reviewed in accordance with the standards set forth in the Related Party Policy after full disclosure of the Related Party's interests in the transaction.

The Related Party Policy defines "Related Party" as any person who is, or, at any time since the beginning of the Company's last fiscal year, was (1) an executive officer, director or nominee for election as a director of the Company or any of its subsidiaries, (2) a person with greater than five percent (5%) beneficial interest in the Company, (3) an immediate family member of any of the individuals or entities identified in (1) or (2) of this paragraph, and (4) any firm, corporation or other entity in which any of the foregoing individuals or entities is employed or is a general partner or principal or in a similar position or in which such person or entity has a five percent (5%) or greater beneficial interest. Immediate family members includes a person's spouse, parents, stepparents, children, stepchildren, siblings, mothers- and fathers-in-law, sons- and daughters-in-law, brothers- and sisters-in-law and anyone residing in such person's home, other than a tenant or employee.

Transaction prices with our related parties are commensurate with transaction prices in arms-length transactions. For further details about our transactions with Related Parties, see Note (19) Related Party Transactions of Part II, "Item 8. Financial Statements and Supplementary Data."

Recently Issued Accounting Standards

For discussion on the impact of accounting standards issued but not yet adopted to our consolidated financial statements, see Note (23) New Accounting Pronouncements of Part II, "Item 8. Financial Statements and Supplementary Data."

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements and related notes included within Part II, "Item 8. Financial Statements and Supplementary Data" requires us to make estimates that affect the reported amounts of assets, liabilities, revenue and expenses and related disclosures of contingent assets and liabilities. We base these estimates on historical results and various other assumptions believed to be reasonable, all of which form the basis for making estimates concerning the carrying values of assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates.

A critical accounting estimate is one that requires a high level of subjective judgment by management and has a material impact to our financial condition or results of operations. We believe the following are the critical accounting policies used in the preparation of our consolidated financial statements, as well as the significant estimates and judgments affecting the application of these policies. This discussion and analysis should be read in conjunction with our consolidated financial statements and related notes included within Part II, "Item 8. Financial Statements and Supplementary Data."

Business combinations

We allocate the purchase price of businesses we acquire to the identifiable assets acquired and liabilities assumed based on their estimated fair values. Any excess purchase price over the fair value of the net identifiable assets acquired is recorded as goodwill. We use all available information to estimate fair values, including quoted market prices, the carrying value of acquired assets and assumed liabilities and valuation techniques such as discounted cash flows, multi-period excess earning or income-based-relief-from-royalty methods. We engage third-party appraisal firms to assist in the fair value determination of inventories, identifiable long-lived assets, identifiable intangible assets, as well as any contingent consideration or earn-out provisions that provide for additional consideration to be paid to the seller if certain future conditions are met. These estimates are reviewed during the 12-month measurement period and adjusted based on actual results. The judgments made in determining the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact our financial condition or results of operations. See Note (3) Mergers and Acquisitions of Part II, "Item 8. Financial Statements and Supplementary Data" for further discussion of our recently completed merger and acquisition during 2019.

Asset acquisitions

Asset acquisitions are measured based on their cost to us, including transaction costs incurred by us. An asset acquisition's cost or the consideration transferred by us is assumed to be equal to the fair value of the net assets acquired. If the consideration transferred is cash, measurement is based on the amount of cash we paid to the seller, as well as transaction costs incurred by us. Consideration given in the form of nonmonetary assets, liabilities incurred or equity interests issued is measured based on either the cost to us or the fair value of the assets or net assets acquired, whichever is more clearly evident. The cost of an asset acquisition is allocated to the assets acquired based on their estimated relative fair values. We engage third-party appraisal firms to assist in the fair value determination of inventories, identifiable long-lived assets and identifiable intangible assets. Goodwill is not recognized in an asset acquisition. See Note (3) Mergers and Acquisitions of Part II, "Item 8. Financial Statements and Supplementary Data" for our asset acquisition from RSI in 2018.

Legal and environmental contingencies

From time to time, we are subject to legal and administrative proceedings, settlements, investigations, claims and actions, as is typical of the industry. These claims include, but are not limited to, contract claims, environmental claims, employment related claims, claims alleging injury or claims related to operational issues. Our assessment of the likely outcome of litigation matters is based on our judgment of a number of factors, including experience with similar matters, past history, precedents, relevant financial information and other evidence and facts specific to the matter. We accrue for contingencies when the occurrence of a material loss is probable and can be reasonably estimated, based on our best estimate of the expected liability. The estimate of probable costs related to a contingency is developed in consultation with internal and outside legal counsel representing us. The accuracy of these estimates is impacted by, among other things, the complexity of the issues and the amount of due diligence we have been able to perform. Differences between the actual settlement costs, final judgments or fines from our estimates could have a material adverse effect on our financial position or results of operations. See Note (18) Commitments and Contingencies of Part II, "Item 8. Financial Statements and Supplementary Data" for further discussion of our legal, environmental and other regulatory contingencies.

Valuation of long-lived assets, indefinite-lived assets and goodwill

We assess our long-lived assets, such as definite-lived intangible assets and property and equipment, for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. We assess our goodwill and indefinite-lived assets for impairment annually, as of October 31, or whenever events or circumstances indicate that the carrying amount of goodwill or the indefinite-lived assets may not be recoverable. If the carrying value of an asset exceeds its fair value, we record an impairment charge that reduces our earnings.

We perform our qualitative assessments of the likelihood of impairment by considering qualitative factors relevant to each of our reporting units or asset groups, such as macroeconomic, industry, market or any other factors that have a significant bearing on fair value. The expected future cash flows used for impairment reviews and related fair value calculations are based on subjective, judgmental assessments of projected revenue growth, unit count, utilization, pricing, gross profit rates, SG&A rates, working capital fluctuations, capital expenditures, discount rates and terminal growth rates. Many of these judgments are driven by crude oil prices. If the crude oil market declines and remains at low levels for a sustained period of time, we would expect to perform our impairment assessments more frequently and could record impairment charges.

See Note (2)(f) Long-Lived Assets with Definite Lives and (2)(h) Goodwill and Indefinite-Lived Intangible Assets of Part II, "Item 8. Financial Statements and Supplementary Data" for further discussion on our impairment assessments of our long-lived assets, indefinite-lived assets and goodwill for the years ended December 31, 2020, 2019 and 2018.

Income Taxes

We account for income taxes in accordance with Accounting Standards Codification ("ASC") 740, "Income Taxes," which requires an asset and liability approach for financial accounting and reporting of income taxes. Under ASC 740, income taxes are accounted for based upon the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss carry-forwards using enacted tax rates in effect in the year the differences are expected to reverse. We estimate our annual effective tax rate at each interim period based on the facts and circumstances available at that time, while the actual effective tax rate is calculated at year-end. Our effective tax rates will vary due to changes in estimates of our future taxable income or losses, fluctuations in the tax jurisdictions in which we operate and favorable or unfavorable adjustments to our estimated tax liabilities related to proposed or probable assessments. As a result, our effective tax rate may fluctuate significantly on a quarterly or annual basis.

In evaluating our ability to recover our deferred tax assets, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. In addition to our historical financial results, we consider forecasted

market growth, earnings and taxable income, the mix of earnings in the jurisdictions in which we operate and the implementation of prudent and feasible tax planning strategies. These assumptions require significant judgment about the forecasts of future taxable income and are consistent with the plans and estimates we use to manage our underlying businesses. We establish a valuation allowance against the carrying value of deferred tax assets when we determine that it is more likely than not that the asset will not be realized through future taxable income. Such amounts are charged to earnings in the period in which we make such determination. Likewise, if we later determine that it is more likely than not that the net deferred tax assets would be realized, we would reverse the applicable portion of the previously provided valuation allowance.

We calculate our income tax liability based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed during the subsequent year. Significant judgment is required in assessing, among other things, the timing and amounts of deductible and taxable items. Due to the complexity of some of these uncertainties, the ultimate resolution may result in payment that is materially different from our current estimate of our tax liabilities. These differences are reflected as increases or decreases to income tax expense in the period in which they are determined.

The amount of income tax we pay is subject to ongoing audits by federal and state tax authorities, which may result in proposed assessments. Our estimate for the potential outcome for any uncertain tax issue is highly judgmental. We believe we have adequately provided for any reasonably foreseeable outcome related to these matters. However, our future results may include favorable or unfavorable adjustments to our estimated tax liabilities in the period the assessments are made or resolved or when statutes of limitation on potential assessments expire. Additionally, the jurisdictions in which our earnings or deductions are realized may differ from our current estimates. We recognize interest and penalties, if any, related to uncertain tax positions in income tax expense.

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act"). The Tax Act makes broad and complex changes to the U.S. tax code, including but not limited to, (1) the requirement to pay a one-time transition tax on all undistributed earnings of foreign subsidiaries; (2) reducing the U.S. federal corporate income tax rate from 35% to 21%; (3) eliminating the alternative minimum tax; (4) creating a new limitation on deductible interest expense; and (5) changing rules related to use and limitations of net operating loss carryforwards created in tax years beginning after December 31, 2017. We evaluated the provisions of the Tax Act and determined only the reduced corporate tax rate from 35% to 21% would have an impact on our consolidated financial statements as of December 31, 2017. Accordingly, we recorded a provision to income taxes for our assessment of the tax impact of the Tax Act on ending deferred tax assets and liabilities and the corresponding valuation allowance. The effects of other provisions of the Tax Act are not expected to have an adverse impact on our consolidated financial statements. We will continue to assess the impact of other aspects of U.S. tax reform on our tax positions and our consolidated financial statements.

See Note (17) Income Taxes of Part II, "Item 8. Financial Statements and Supplementary Data" for further discussion on income taxes for the years ended December 31, 2020, 2019 and 2018.

Leases

Per ASU 2016-02, "Leases (Topic 842)," lessees can classify leases as finance leases or operating leases, while lessors can classify leases as sales-type, direct financing or operating leases. All leases, with the exception of short-term leases, are capitalized on the balance sheet by recording a lease liability, which represents our obligation to make lease payments arising from the lease, along with a corresponding right-of-use asset, which represents our right to use the underlying asset being leased. For leases in which we are the lessee, we use a collateralized incremental borrowing rate to calculate the lease liability, as in most cases we do not know the lessor's implicit rate in the lease. Establishing our lease obligations on our consolidated balance sheets require judgmental assessments of the term lengths of each and the interest rate yield curve that best represents the collateralized incremental borrowing rate to apply to each lease. We engage third-party specialists to assist us in determining the collateralized incremental borrowing rate yield curve. Errors in determining the lease term lengths and/or selecting the best representative collateralized incremental borrowing rate can have a material adverse effect on our consolidated

financial statements. For further details about our leases, see Note (16) Leases of Part II, "Item 8. Financial Statements and Supplementary Data".

New Accounting Pronouncements

For discussion on the potential impact of new accounting pronouncements issued but not yet adopted, see Note (23) New Accounting Pronouncements of Part II, "Item 8. Financial Statements and Supplementary Data."

Item 7A. Quantitative and Qualitative Disclosure About Market Risk

Exchange Rate Risk. Our operations are currently conducted predominantly within the U.S.; therefore, we had no significant exposure to foreign currency exchange rate risk during 2020.

Interest Rate Risk. As of December 31, 2020, we held variable-rate debt, the exposure to which we manage with our interest-rate-related derivative instrument. We held no derivative instruments that increased our exposure to market risks for foreign currency rates, commodity prices or other market price risks. We are exposed to changes in interest rates on our floating rate borrowings under our 2019 ABL Facility and 2018 Term Loan. As of December 31, 2020, we had no debt outstanding under our 2019 ABL Facility and \$341.3 million aggregate principal amount outstanding under the 2018 Term Loan. The impact of a 1.0% increase in interest rates under the terms of the 2019 ABL Facility would have no impact on interest expense for the 2020 year, and a 1.0% increase in interest rates under the terms of the 2018 Term Loan would have a \$3.5 million impact on interest expense for the 2020 year.

Commodity Price Risk. Our material and fuel purchases expose us to commodity price risk. Our material costs primarily include the cost of inventory consumed while performing our stimulation services such as proppant, chemicals and guar. Our fuel costs consist primarily of diesel fuel used by our various trucks and other motorized equipment. The prices for fuel and the raw materials (particularly guar and proppant) in our inventory are volatile and are impacted by changes in supply and demand, as well as market uncertainty and regional shortages. Depending on market conditions, we have generally been able to pass along price increases to our customers; however, we may be unable to do so in the future. We generally do not engage in commodity price hedging activities. However, we have purchase commitments with certain vendors to supply a majority of the proppant used in our operations. Some of these agreements are take-or-pay agreements with minimum purchase obligations. As a result of future decreases in the market price of proppants, we could be required to purchase goods and pay prices in excess of market prices at the time of purchase.

For further quantitative disclosure about our market risk related to our variable-rate debt, interest-rate-related derivative instrument and purchase commitments, see Part II, "**Item 7**. Management Discussion and Analysis of Financial Condition and Results of Operations" for the contractual commitments and obligations table as of December 31, 2020.

Customer Credit Risk. Financial instruments that potentially subject us to concentrations of credit risk are trade receivables. We extend credit to customers and other parties in the normal course of business. We have established various procedures to manage our credit exposure, including credit evaluations and maintaining an allowance for credit losses.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors NexTier Oilfield Solutions Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of NexTier Oilfield Solutions Inc. and subsidiaries (the Company) as of December 31, 2020 and 2019, the related consolidated statements of operations and comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2020, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2020, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 24, 2021 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Change in Accounting Principle

As discussed in Notes 2 and 16 to the consolidated financial statements, the Company changed its method of accounting for leases as of January 1, 2019 due to the adoption of Accounting Standards Update 2016-02, *Leases (Topic 842)*, and the related amendments.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Valuation of goodwill for the Completion Services reporting unit

As described in Notes 2 and 5 to the consolidated financial statements, at the reporting unit level, the Company tests goodwill for impairment on an annual basis as of October 31 of each year, and when events or changes in circumstances, referred to as triggering events, indicate the carrying value of goodwill may not be recoverable and that a potential impairment exists. During the first quarter of 2020, a significant decline in the Company's share price, which resulted in the Company's market capitalization dropping below the book value of equity, as well as reductions in commodity prices driven by the potential impact of the COVID-19 pandemic and global supply and demand dynamics, were deemed triggering events that led the Company to test for goodwill impairment. Subsequently, during the third quarter of 2020, sustained reductions in commodity prices and continuing market economic disruptions were deemed triggering events that led the Company to test for goodwill impairment. If the carrying value of a reporting unit exceeds its fair value, the Company recognizes an impairment expense in an amount equal to that excess, limited to the total amount of goodwill allocated to the reporting unit. The Company recognized an impairment expense of \$32.2 million during the first quarter of 2020 and no impairment expense during the third quarter of 2020, related to the Completion Services reporting unit. The goodwill balance at December 31, 2020 was \$104.2 million, of which the entire balance related to the Completion Services reporting unit.

We identified the evaluation of the goodwill impairment analysis for the Completions Services reporting unit as a critical audit matter. Subjective and challenging auditor judgment was required in evaluating the following key assumptions used in the valuation of the Completions Services reporting unit: (a) estimates of projected revenue growth, gross profit rates, SG&A rates, and capital expenditures, (b) the weighted average cost of capital (WACC) discount rate, (c) forward-looking market multiples consisting of enterprise value to revenues and to EBITDA multiples of peer companies and enterprise value to revenues and to book value of invested capital of actual control transactions for comparable companies (collectively, the market multiples), and (d) the implied control premium utilized in the market capitalization reconciliation. Changes in these key assumptions may have a significant effect on the Company's assessment of the carrying value of goodwill.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's goodwill impairment process, including controls over the development of the key assumptions. We evaluated the Company's key assumptions used in the goodwill impairment assessment by: (1) comparing the Company's projected revenue growth, gross profit rates, SG&A rates, and capital expenditures assumptions to historical actual results, peer companies' analyst reports and peer companies' historical financial information, and to relevant industry benchmark data; (2) evaluating the market multiples used by the Company for each reporting unit by comparing them to comparable company market multiples; (3) evaluating that the comparable companies used by the Company were representative of each reporting units' operations by reviewing the comparable companies' profiles and that the comparable companies used in the analysis were consistent with historical impairment assessments; and (4) assessing the Company's ability to accurately estimate projected revenue growth, gross profit rates, SG&A rates, and capital expenditures by comparing historical forecasts to actual results.

In addition, we involved valuation professionals with specialized skills and knowledge, who assisted in:

- evaluating the Company's WACC discount rate by comparing it against a WACC discount rate range that was independently developed using publicly available market data for comparable entities
- evaluating the Company's selected market multiples by comparing them to publicly available market data for comparable entities
- assessing the implied control premium determined based on the aggregate fair value of the Company's reporting units, in relation to the Company's market capitalization as of March 31, 2020 and September 30, 2020
- performing sensitivity analyses over the key assumptions to assess their impact on the Company's determination of the fair value of the Completion Services reporting unit.

Recoverability of Long-Lived Assets

As described in Note 2 to the consolidated financial statements, the Company evaluates property and equipment and definite-lived intangible assets (long-lived assets) on a quarterly basis to identify events or changes in circumstances, referred to as triggering events, that indicate the carrying value of certain long-lived assets may not be recoverable or upon the occurrence of a triggering event. During the first quarter of 2020, reductions in commodity prices driven by the potential impact of the COVID-19 pandemic and global supply and demand dynamics were deemed a triggering event that led the Company to test long-lived assets for impairment. Subsequently, during the third quarter of 2020, sustained reductions in commodity prices and continuing market economic disruptions were deemed a triggering event that led the Company to test longlived assets for impairment. The determination of recoverability is made based upon the estimated undiscounted future net cash flows of assets grouped at the lowest level for which there are identifiable cash flows independent of the cash flows of other groups of assets with such cash flows to be realized over the estimated remaining useful life of the primary asset within the asset group. If the estimated undiscounted future net cash flows for a given asset group is less than the carrying amount of the asset group, an impairment loss is determined by comparing the estimated fair value with the carrying value of the related asset group. The Company determined that the estimated undiscounted future net cash flows for all assets groups was greater than the carrying amount of their related assets in the first quarter of 2020 and in the third quarter of 2020 and no impairment loss was recorded. As of December 31, 2020, the property and equipment, net balance was \$470.7 million and the definite-lived intangible asset, net balance was \$51.2 million.

We identified the assessment of the recoverability of long-lived assets as a critical audit matter. Subjective and challenging auditor judgment was required in evaluating the estimated undiscounted cash flows used in the long-lived assets impairment analysis, specifically the estimates of projected revenue growth, gross profit rates, SG&A rates, and capital expenditures. Changes in these key assumptions may have a significant effect on the Company's assessment of the recoverability of long-lived assets.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls over the Company's long-lived asset impairment process. This included controls over the development of the key assumptions used in the estimated undiscounted cash flows, including estimates of projected revenue growth, gross profit rates, SG&A rates, and capital expenditures. We evaluated the Company's key assumptions used in the long-lived asset impairment assessment by comparing the Company's projected revenue growth, gross profit rates, SG&A rates, and capital expenditures assumptions to historical actual results, peer companies' analyst reports and peer companies' historical financial information, and to relevant industry benchmark data. We assessed the Company's ability to accurately estimate projected revenue growth, gross profit rates, SG&A rates, and capital expenditures by comparing historical forecasts to actual results.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors NexTier Oilfield Solutions Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited NexTier Oilfield Solutions Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2020 and 2019, the related consolidated statements of operations and comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2020, and the related notes (collectively, the consolidated financial statements), and our report dated February 24, 2021 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

(1) Basis of Presentation and Nature of Operations

The accompanying consolidated financial statements were prepared using United States Generally Accepted Accounting Principles ("GAAP") and the instructions to Form 10-K and Regulation S-X and include all of the accounts of NexTier and its consolidated subsidiaries. All intercompany transactions and balances have been eliminated.

The Company's accounting policies are in accordance with GAAP. The preparation of financial statements in conformity with these accounting principles requires the Company to make estimates and assumptions that affect (1) the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and (2) the reported amounts of revenue and expenses during the reporting period. Ultimate results could differ from the Company's estimates. Significant items subject to such estimates and assumptions include the useful lives of property and equipment and intangible assets; allowances for doubtful accounts; inventory reserves; acquisition accounting; contingent liabilities; and the valuation of property and equipment, intangible assets, equity issued as consideration in an acquisition, income taxes, stock-based incentive plan awards and derivatives.

Management believes the consolidated financial statements included herein contain all adjustments necessary to present fairly the Company's financial position as of December 31, 2020 and 2019 and the results of its operations and cash flows for the years ended December 31, 2020, 2019 and 2018. Such adjustments are of a normal recurring nature.

On October 31, 2019, the Company completed its merger (the "C&J Merger") with C&J Energy Services, Inc. ("C&J") and changed its name to "NexTier Oilfield Solutions Inc." For more details regarding the C&J Merger, refer to Note (3) Mergers and Acquisitions.

The consolidated financial statements for 2018 and for the period from January 1, 2019 to October 31, 2019 reflect only the historical results of the Company prior to the completion of the C&J Merger. The financial statements have been prepared using the acquisition method of accounting under existing U.S. GAAP, which requires that one of the two companies in the C&J Merger be designated as the acquirer for accounting purposes. C&J and Keane determined that Keane was the accounting acquirer. Accordingly, consideration given by Keane to complete the C&J Merger was allocated to the underlying tangible and intangible assets and liabilities acquired based on their estimated fair values as of the date of completion of the C&J Merger, with any excess purchase price allocated to goodwill.

(2) Summary of Significant Accounting Policies

(a) Business Combinations and Asset Acquisitions

Business combinations are accounted for using the acquisition method of accounting in accordance with the Accounting Standards Codification ("ASC") 805, "Business Combinations", as amended by Accounting Standards Update ("ASU") 2017-01, "Business Combinations (Topic 805), Clarifying the Definition of a Business." The purchase price is allocated to the assets acquired and liabilities assumed based on their estimated fair values. Fair value of the acquired assets and liabilities is measured in accordance with the guidance of ASC 820, using discounted cash flows and other applicable valuation techniques. Any acquisition related costs incurred by the Company are expensed as incurred. Any excess purchase price over the fair value of the net identifiable assets acquired is recorded as goodwill if the definition of a business is met. Operating results of an acquired business are included in the Company's results of operations from the date of acquisition.

Asset acquisitions are measured based on their cost to the Company, including transaction costs. Asset acquisition costs, or the consideration transferred by the Company, are assumed to be equal to the fair value of the net assets acquired. If the consideration transferred is cash, measurement is based on the amount of cash the Company paid to the seller, as well as transaction costs incurred. Consideration given in the form of non-monetary assets, liabilities incurred or equity interests issued is measured based on either the cost to the Company or the fair value of the assets or net assets acquired, whichever is more clearly evident. The cost of an asset acquisition is

allocated to the assets acquired based on their estimated relative fair values. Goodwill is not recognized in an asset acquisition.

The Company did not complete any mergers or acquisitions in 2020. Refer to Note (3) Mergers and Acquisitions for discussion of the mergers and acquisitions completed in 2019 and 2018.

(b) Cash and Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. The Company's cash is invested in overnight repurchase agreements and certificates of deposit with an initial term of less than three months.

Net cash received from certain dispositions or casualty events of more than \$25.0 million per single transaction or \$50.0 million per series of related transactions, under the 2018 Term Loan Facility (as defined herein), and of more than \$50.0 million, under the 2019 ABL Facility (as defined herein), is not considered to be restricted as long as the Company, at management's discretion, reinvests any part of such proceeds in assets (other than current assets) to be used for its business (in the case of the 2018 Term Loan Facility) and for replacing or repairing the assets in respect of which such proceeds were received (in the case of the 2019 ABL Facility), in each case within 12 months from the receipt date of such proceeds. Otherwise, the proceeds are required to be applied as a prepayment of the 2018 Term Loan Facility or any outstanding commitments under the 2019 ABL Facility. The Company did not have any qualifying asset sale proceeds or insurance proceeds that exceeded the dollar thresholds described above for the years ended December 31, 2020 and 2019.

Cash balances related to the Company's captive insurance subsidiary, which totaled \$5.7 million at December 31, 2020, are included in cash and cash equivalents in the consolidated balance sheets, and the Company expects to use these cash balances to fund the operations of the captive insurance subsidiaries and to settle future anticipated claims.

The Company had less than \$0.1 million restricted cash as of December 31, 2020 and none as of December 31, 2019.

(c) Trade Accounts Receivable

Trade accounts receivable are generally recorded at the invoiced amount. Amounts collected on trade accounts receivable are included in net cash provided by operating activities in the consolidated statements of cash flows. As a result of the adoption of ASU 2016-13 "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," on January 1, 2020 the Company evaluates its accounts receivable through a continuous process of assessing its portfolio on an individual customer and overall basis. This process consists of a thorough review of historical collection experience, current aging status of the customer accounts, and financial condition of customers. Based on our review of these factors, we establish or adjust allowances for specific customers. Trade accounts receivable were \$125.3 million and \$350.6 million at December 31, 2020 and 2019, respectively. As of December 31, 2020, and 2019, the Company had an allowance for credit losses of \$2.7 million and \$0.7 million, respectively.

(d) Inventories

Inventories are stated at the lower of cost or net realizable value. Costs of inventories include purchase, conversion and condition. As inventory is consumed, the expense is recorded in cost of services in the consolidated statements of operations and comprehensive income (loss) using the weighted average cost method for non-manufacturing inventory and standard cost method for manufacturing inventory.

The Company periodically reviews the nature and quantities of inventory on hand and evaluates the net realizable value of items based on historical usage patterns, known changes to equipment or processes and customer demand for specific products. Significant or unanticipated changes in business conditions could impact the magnitude and timing of impairment recognized. Provision for excess or obsolete inventories is determined based on historical usage of inventory on-hand, volume on-hand versus anticipated usage, technological advances and

consideration of current market conditions. Inventories that have not turned over for more than a year are subject to a slow-moving reserve provision. In addition, inventories that have become obsolete due to technological advances, excess volume on-hand or no longer configured to operate with the Company's equipment are written-off.

(e) Revenue Recognition

The Company adopted ASU 2014-09, "Revenue from Contracts with Customers," which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers, effective January 1, 2018, using the modified retrospective method. Changes were made to the relevant business processes and the related control activities, including information systems, in order to monitor and maintain appropriate controls over financial reporting. There were no significant changes to the Company's internal control over financial reporting due to the Company's adoption of ASU 2014-09.

The majority of the Company's performance obligations are satisfied over time. The Company has determined this best represents the transfer of value from its services to the customer as performance by the Company helps to enhance a customer controlled asset (e.g., unplugging a well, enabling a well to produce oil or natural gas). Measurement of the satisfaction of the performance obligation is measured using the output method, which is typically evidenced by a field ticket. A field ticket includes items such as services performed, consumables used, and man hours incurred to complete the job for the customer. Each field ticket is used to invoice customers. Payment terms for invoices issued are in accordance with a master services agreement with each customer, which typically require payment within 30 days of the invoice issuance.

A portion of the Company's contracts contain variable consideration; however, this variable consideration is typically unknown at the time of contract inception, and is not known until the job is complete, at which time the variability is resolved. Examples of variable consideration include the number of hours that will be incurred and the amount of consumables (such as chemicals and proppants) that will be used to complete a job.

Remaining Performance Obligations

The Company invoices its customers for the services provided at contractual rates multiplied by the applicable unit of measurement, including volume of consumables used and hours incurred. In accordance with ASC 606, the Company has elected the "Right to Invoice" practical expedient for all contracts, which allows the Company to invoice its customers in an amount that corresponds directly with the value to the customer of the entity's performance completed to date. With this election, the Company is not required to disclose information about the variable consideration related to its remaining performance obligations. The Company has also elected the practical expedient to expense immediately mobilization costs, as the amortization period would always be less than one year. As a result of electing these practical expedients, there was no material impact on the Company's current revenue recognition processes and no retrospective adjustments were necessary. For those contracts with a term of more than one year, the Company had approximately \$29.8 million of unsatisfied performance obligations as of December 31, 2020, which will be recognized as services are performed over the remaining contractual terms.

The Company's obligations for refunds as well as the warranties and related obligations stated in its contracts with its customers are standard to the industry and are related to the correction of any defectiveness in the execution of its performance obligations.

Contract Balances

In line with industry practice, the Company bills its customers for its services in arrears, typically when the stage or well is completed or at month-end. The majority of the Company's jobs are completed in less than 30 days. Furthermore, it is currently not standard practice for the Company to execute contracts with prepayment features. As such, the Company's contract liabilities are immaterial to its consolidated balance sheets. Payment terms after invoicing are typically 30 days or less.

The Company does not have any significant contract costs to obtain or fulfill contracts with customers; as such, no amounts are recognized on the consolidated balance sheet. Taxes collected from customers and remitted to governmental authorities are accounted for on a net basis and, therefore, are excluded from revenues in the

consolidated statements of operations and comprehensive income (loss) and net cash provided by operating activities in the consolidated statements of cash flows.

The following is a description of the Company's core service lines separated by reportable segments from which the Company generates its revenue. For additional detailed information regarding reportable segments, see (21) Business Segments.

Revenue from the Company's Completion Services, Well Construction and Intervention ("WC&I"), and Well Support Services segments are recognized as follows:

Completion Services

The Company provides hydraulic fracturing, wireline and pumpdown services pursuant to contractual arrangements, such as term contracts and pricing agreements. Revenue from these services are earned as services are rendered, which is generally on a per stage or fixed monthly rate. All revenue is recognized when a contract with a customer exists, the performance obligations under the contract have been satisfied over time, the amount to which the Company has the right to invoice has been determined and collectability of amounts subject to invoice is probable. Contract fulfillment costs, such as mobilization costs and shipping and handling costs, are expensed as incurred and are recorded in cost of services in the consolidated statements of operations and comprehensive income (loss). To the extent fulfillment costs are considered separate performance obligations that are billable to the customer, the amounts billed are recorded as revenue in the consolidated statements of operations and comprehensive income (loss).

Once a stage has been completed, a field ticket is created that includes charges for the service performed and the chemicals and proppant consumed during the course of the service. The field ticket may also include charges for the mobilization of the equipment to the location, any additional equipment used on the job and other miscellaneous items. The field ticket represents the amounts to which the Company has the right to invoice and to recognize as revenue.

Well Construction and Intervention

The Company provides cementing services pursuant to contractual arrangements, such as term contracts, or on a spot market basis. Revenue is recognized upon the completion of each performance obligation, which for cementing services, represents the portion of the well cemented: surface casing, intermediate casing or production liner. The performance obligations are satisfied over time. Jobs for these services are typically short term in nature, with most jobs completed in a day. Once the well has been cemented, a field ticket is created that includes charges for the services performed and the consumables used during the course of service. The field ticket represents the amounts to which the Company has the right to invoice and to recognize as revenue.

The Company provides a range of coiled tubing services primarily used for fracturing plug drill-out during completion operations and for well workover and maintenance, primarily on a spot market basis. Jobs for these services are typically short-term in nature, lasting anywhere from a few hours to multiple days. Revenue is recognized upon completion of each day's work based upon a completed field ticket. The field ticket includes charges for the services performed and the consumables used during the course of service. The field ticket may also include charges for the mobilization and set-up of equipment, the personnel on the job, any additional equipment used on the job, and other miscellaneous consumables. The Company typically charges the customer for the services performed and resources provided on an hourly basis at agreed-upon spot market rates, at times, or pursuant to pricing agreements.

Historical Segment: Well Support Services Segment

On March 9, 2020, the Company completed the divestiture of its Well Support Services Segment. For additional information, see Note (21) Business Segments. Through its rig services line, the Company had provided workover and well servicing rigs that were primarily used for routine repair and maintenance of oil and gas wells, re-drilling operations and plug and abandonment operations. These services were provided on an hourly basis at prices that approximate spot market rates. A field ticket was generated and revenue is recognized upon the earliest of

the completion of a job or at the end of each day. A rig services job can last anywhere from a few hours to multiple days depending on the type of work being performed. The field ticket includes the base hourly rate charge and, if applicable, charges for additional personnel or equipment not contemplated in the base hourly rate. The field ticket may also include charges for the mobilization and set-up of equipment.

Through its fluids management service line, the Company used to provide storage, transportation and disposal services for fluids used in the drilling, completion and workover of oil and gas wells. Rates for these services vary and can be on a per job, per hour, or per load basis, or on the basis of quantities sold or disposed. Revenue is recognized upon the completion of each job or load, or delivered product, based on a completed field ticket.

Through its other special well site service line, the Company used to provide fishing, contract labor and tool rental services for completion and workover of oil and gas wells. Rates for these services vary and can be on a per job, per hour or on the basis of rental days per month. Revenue is recognized based on a field ticket issued upon the completion of each job or on a monthly billing for rental services provided.

Disaggregation of Revenue

Revenue activities during the years ended December 31, 2020, 2019 and 2018 were as follows:

		Year Ended December 31, 2020

(f) Long-Lived Assets with Definite Lives

Property and equipment, inclusive of equipment under finance lease, are generally stated at cost.

Depreciation on property and equipment is calculated using the straight-line method over the estimated useful lives of the assets, which range from 13 months to 40 years. Management bases the estimate of the useful lives and salvage values of property and equipment on expected utilization, technological change and effectiveness of its maintenance programs. Depreciation methods, useful lives and residual values are reviewed annually or as needed based on activities related to specific assets. When components of an item of property and equipment are identifiable and have different useful lives, they are accounted for separately as major components of property and equipment.

Gains and losses on disposal of property and equipment are determined by comparing the proceeds from disposal with the carrying amount of property and equipment and are recognized net within operating costs and expenses in the consolidated statements of operations and comprehensive income (loss).

Major classifications of property and equipment and their respective useful lives are as follows:

Land	Indefinite life
Building and leasehold improvements	13 months – 40 years
Machinery and equipment	13 months – 10 years
Office furniture, fixtures and equipment	3 years – 5 years

Leasehold improvements are assigned a useful life equal to the term of the related lease, or its expected period of use.

In the first quarter of 2018, the Company reassessed the estimated useful lives of select machinery and equipment. The Company concluded that due to an increase in service intensity driven by a shift to more 24-hour work, higher stage volumes, larger stages and more proppant usage per stage, the estimated useful lives of these select machinery and equipment should be reduced by approximately 50%. In accordance with ASC 250, "Accounting Changes and Error Corrections," the change in the estimated useful lives of the Company's property and equipment was accounted for as a change in accounting estimate, on a prospective basis, effective January 1, 2018. This change resulted in an increase in depreciation expense and decrease in net income during the year ended December 31, 2018 of \$15.0 million in the consolidated statement of operations and comprehensive income (loss).

Amortization on definite-lived intangible assets is calculated on the straight-line method over the estimated useful lives of the assets, which range from 2 to 15 years.

Property and equipment and definite-lived intangible assets ("Long-lived Assets") are evaluated on a quarterly basis to identify events or changes in circumstances, referred to as triggering events that indicate the carrying value of certain property and equipment may not be recoverable or upon the occurrence of a triggering

event. An impairment loss is recorded in the period in which it is determined that the carrying amount of Long-lived Asset is not recoverable. The determination of recoverability is made based upon the estimated undiscounted future net cash flows of assets grouped at the lowest level for which there are identifiable cash flows independent of the cash flows of other groups of assets with such cash flows to be realized over the estimated remaining useful life of the primary asset within the asset group. The Company determined the lowest level of identifiable cash flows that are independent of other asset groups to be primarily at the service line level. The Company's asset groups consist of fracturing services, wireline, cementing, and coiled tubing, except for an entity level asset group for Long-lived Assets that do not have identifiable independent cash flows. Estimates of undiscounted future net cash flows of assets groups are projected based on estimates of projected revenue growth, unit count, utilization, pricing, gross profit rates, SG&A rates, working capital fluctuations and capital expenditures. Forecasted cash flows take into account known market conditions as of the assessment date, and management's anticipated business outlook. A terminal period is used to reflect an estimate of stable, perpetual growth. If the estimated undiscounted future net cash flows for a given asset group is less than the carrying amount of the asset groups, an impairment loss is determined by comparing the estimated fair value with the carrying value of the related asset groups. The impairment loss is then allocated across the asset group's major classifications.

During the first quarter of 2020, management determined the reductions in commodity prices driven by the potential impact of the novel COVID-19 pandemic and global supply and demand dynamics coupled with the sustained decrease in the Company's share price were deemed triggering events. As a result of the triggering event, recoverability testing was performed and it was determined that the estimated undiscounted future net cash flow for all asset groups was greater than the carrying amount of their related assets and no impairment loss was recorded.

During the third quarter of 2020, the Company assessed and determined the sustained reductions in commodity prices and continuing market economic disruptions as a triggering event. As a result of the triggering event, recoverability testing was performed and it was determined that the estimated undiscounted future net cash flows for all asset groups was greater than the carrying amount of their related assets and no impairment loss was recorded.

The Company did not recognize any impairment charges related to the Company's long-lived assets for the years ended December 31, 2018, 2019, or 2020.

(g) Major Maintenance Activities

The Company incurs maintenance costs on its major equipment. The determination of whether an expenditure should be capitalized or expensed requires management judgment in the application of how the costs benefit future periods, relative to the Company's capitalization policy. Costs that either establish or increase the efficiency, productivity, functionality or life of a fixed asset by greater than 12 months are capitalized.

(h) Goodwill and Indefinite-Lived Intangible Assets

Goodwill represents the excess of the purchase price of an acquired business over the estimated fair value of the identifiable assets acquired and liabilities assumed by the Company. For the purposes of goodwill impairment assessment, the Company evaluates goodwill for impairment annually, as of October 31, or more often as facts and circumstances warrant. When performing the impairment assessment, the Company evaluates factors, such as unexpected adverse economic conditions, competition and market changes. Goodwill is allocated across the Company's Completions Services, Well Construction and Intervention and Well Support Services reporting units.

Before employing detailed impairment testing methodologies, the Company may first evaluate the likelihood of impairment by considering qualitative factors relevant to each reporting unit, such as macroeconomic, industry, market or any other factors that have a significant bearing on fair value. If the Company first utilizes a qualitative approach and determines that it is more likely than not that goodwill is impaired, detailed testing methodologies are then applied. Otherwise, the Company concludes that no impairment has occurred. The Company may also choose to bypass a qualitative approach and opt instead to employ detailed testing methodologies, regardless of a possible more likely than not outcome. The first step in the goodwill impairment test is to compare the fair value of each reporting unit to which goodwill has been assigned to the carrying amount of net assets, including goodwill, of the respective reporting unit. If the carrying amount of the reporting unit exceeds its fair

value, the Company recognizes an impairment expense in an amount equal to the excess, limited to the total amount of goodwill allocated to the reporting unit.

The Company performed the qualitative analysis of the goodwill impairment assessment by reviewing relevant qualitative factors. In the first and third quarter of 2020, the Company determined there were triggering events that would indicate the carrying amount of its goodwill may not be recoverable, and as such, quantitative detail impairment testing was conducted.

As a result, the Company recognized \$32.6 million in goodwill impairment expense during 2020, of which \$32.2 million related to the Completions Service reporting unit and \$0.4 million representing the entire goodwill balance for the Well Construction and Intervention reporting unit. No goodwill impairment expense was recognized in 2019 or 2018. See Note (5) *Goodwill*.

The Company's indefinite-lived assets consisted of the Company's Keane trade name. The Company assessed its indefinite-lived intangible assets for impairment annually, as of October 31, or whenever events or circumstances indicate that the carrying amount of the assets may not be recoverable. The Company fully impaired its Keane trade name in 2019. For additional detailed information regarding the impairment of the Keane trade name, see Note (4) Intangible Assets. There was no indefinite-lived asset impairment recognized during 2018.

(i) Derivative Instruments and Hedging Activities

The Company utilizes interest rate derivatives to manage interest rate risk associated with its floating-rate borrowings. The Company recognizes all derivative instruments as either assets or liabilities on the consolidated balance sheets at their respective fair values. For derivatives designated in hedging relationships, changes in the fair value are either offset through earnings against the change in fair value of the hedged item attributable to the risk being hedged or recognized in accumulated other comprehensive income (loss) until the hedged item affects earnings.

The Company only enters into derivative contracts that it intends to designate as hedges for the variability of cash flows to be received or paid related to a recognized asset or liability (i.e. cash flow hedge). For all hedging relationships, the Company formally documents the hedging relationship and its risk-management objective and strategy for undertaking the hedge, the hedging instrument, the hedged transaction, the nature of the risk being hedged and how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed prospectively and retrospectively. The Company also formally assesses, both at the inception of the hedging relationship and on an ongoing basis, whether the derivatives that are used in hedging relationships are highly effective in offsetting changes in cash flows of hedged transactions. For derivative instruments that are designated and qualify as part of a cash flow hedging relationship, the gain or loss on the derivative is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

The Company discontinues hedge accounting prospectively, when it determines that the derivative is no longer highly effective in offsetting cash flows attributable to the hedged risk, the derivative expires or is sold, terminated, or exercised, the originally forecasted transaction is no longer probable of occurring or if management decides to remove the designation of the cash flow hedge. The net derivative instrument gain or loss related to a discontinued cash flow hedge shall continue to be reported in accumulated other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the originally hedged transaction affects earnings, unless it is probable that the forecasted transaction will not occur by the end of the originally specified time period. When it is probable that the originally forecasted transaction will not occur by the end of the originally specified time period, the Company recognizes immediately, in earnings, any gains and losses related to the hedging relationship that were recognized in accumulated other comprehensive income (loss). In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the Company continues to carry the derivative at its fair value on the consolidated balance sheets and recognizes any subsequent changes in the derivative's fair value in earnings.

In addition, we evaluate the terms of our operating agreements and other contracts, if any, to determine whether they contain embedded components that are required to be bifurcated and accounted for separately as

derivative financial instruments. For additional detailed information regarding reportable segments, see Note (10) Derivatives.

(j) Fair Value Measurement

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the reporting date. The Company's assets and liabilities that are measured at fair value at each reporting date are classified according to a hierarchy that prioritizes inputs and assumptions underlying the valuation techniques. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The Company determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

- Level 1 Inputs: Quoted prices (unadjusted) in an active market for identical assets or liabilities.
- Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at measurement date.

Assets and liabilities are classified in their entirety based on the lowest priority level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement of assets and liabilities within the levels of the fair value hierarchy. Reclassifications of fair value between Level 1, Level 2 and Level 3 of the fair value hierarchy, if applicable, are made at the end of each quarter.

(k) Stock-based compensation

The Company recognizes compensation expense for restricted stock awards, restricted stock units to be settled in common stock ("RSUs"), performance based RSU award ("PSUs"), and non-qualified stock options ("stock options") based on the fair value of the awards at the date of grant. The fair value of restricted stock awards and RSUs is determined based on the number of shares or RSUs granted and the closing price of the Company's common stock on the date of grant. The fair value of stock options is determined by applying the Black-Scholes model to the grant-date market value of the underlying common shares of the Company. The fair value of PSUs with market conditions is determined using a Monte Carlo simulation method. The Company has elected to recognize forfeiture credits for these awards as they are incurred, as this method best reflects actual stock-based compensation expense.

Compensation expense from time-based restricted stock awards, RSUs, PSUs, and stock options is amortized on a straight-line basis over the requisite service period, which is generally the vesting period.

Deferred compensation expense associated with liability-based awards, such as deferred stock awards that are expected to settle with the issuance of a variable number of shares based on a fixed monetary amount at inception, is recognized at the fixed monetary amount at inception and is amortized on a straight-line basis over the requisite service period, which is generally the vesting period. Upon settlement, the holders receive an amount of common stock equal to the fixed monetary amount at inception, based on the closing price of the Company's stock on the date of settlement.

Tax deductions on the stock-based compensation awards are not realized until the awards are vested or exercised. The Company recognizes deferred tax assets for stock-based compensation awards that will result in future deductions on its income tax returns, based on the amount of tax deduction for stock-based compensation recognized at the statutory tax rate in the jurisdiction in which the Company will receive a tax deduction. If the tax

deduction for a stock-based award is greater than the cumulative GAAP compensation expense for that award upon realization of a tax deduction, an excess tax benefit will be recognized and recorded as a favorable impact on the effective tax rate. If the tax deduction for an award is less than the cumulative GAAP compensation expense for that award upon realization of the tax deduction, a tax shortfall will be recognized and recorded as an unfavorable impact on the effective tax rate. Any excess tax benefits or shortfalls will be recorded as discrete, adjustments in the period in which they occur. The cash flows resulting from any excess tax benefit will be classified as financing cash flows in the consolidated statements of cash flows.

The Company provides its employees with the option to settle income tax obligations arising from the vesting of their restricted or deferred stock-based compensation awards by withholding shares equal to such income tax obligations. Shares acquired from employees in connection with the settlement of the employees' income tax obligations are accounted for as treasury shares that are subsequently retired. Restricted stock awards, RSUs, and PSUs are not considered issued and outstanding for purposes of earnings per share calculations until vested.

For additional information, see Note (12) Stock-Based Compensation.

(1) Taxes

Upon consummation of the Organizational Transactions and the IPO, the Company became subject to U.S. federal income taxes. A provision for U.S. federal income tax has been provided in the consolidated financial statements for the years ended December 31, 2020, 2019 and 2018.

Prior to 2019, the Company had a Canadian subsidiary, which was treated as a corporation for Canadian federal and provincial tax purposes. For Canadian tax purposes, the Company was subject to foreign income tax. As a result of the C&J Merger, the Company had foreign subsidiaries as of December 2020 in Canada, The Netherlands, Luxembourg and Ecuador. With the exception of the Canadian subsidiary, all other subsidiaries are dormant and have no active operations as of December 31, 2020.

The Company is responsible for certain state income and franchise taxes in the states in which it operates, which include, but not limited to California, Colorado, Louisiana, Montana, New Mexico, North Dakota, Oklahoma, Pennsylvania, Texas, Utah and West Virginia. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and tax carryforwards, if applicable.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period that includes the enactment date.

The Company recognizes interest accrued related to unrecognized tax benefits, if any, in income tax expense.

See Note (17) Income Taxes for a detailed discussion of the Company's taxes and activities thereof during the years ended December 31, 2020, 2019 and 2018.

(m) Commitments and Contingencies

The Company accrues for contingent liabilities when such contingencies are probable and reasonably estimable. The Company generally records losses related to these types of contingencies as direct operating expenses or general and administrative expenses in the consolidated statements of operations and comprehensive income (loss).

Legal costs associated with the Company's loss contingencies are recognized immediately when incurred as general and administrative expenses in the Company's consolidated statements of operations and comprehensive income (loss).

(n) Equity-method investments

Investments in non-controlled entities over which the Company has the ability to exercise significant influence over the noncontrolled entities' operating and financial policies are accounted for under the equitymethod. Under the equity-method, the investment in the non-controlled entity is initially recognized at cost and subsequently adjusted to reflect the Company's share of the entity's income (losses), any dividends received by the Company and any other-than-temporary impairments. Investments accounted for under the equity-method are presented within other noncurrent assets in the consolidated balance sheets. The Company did not have any equitymethod investments as of December 31, 2020. As of December 31, 2019, the Company had \$3.6 million in equitymethod investments.

(o) Employee Benefits and Post-Employment Benefits

Contractual termination benefits are payable when employment is terminated due to an event specified in the provisions of a social/labor plan, state or federal law. Accordingly, in situations where minimum statutory termination benefits must be paid to the affected employees, the Company records employee severance costs associated with these activities in accordance with ASC 712, "Compensation—Nonretirement Post-Employment Benefits." In all other situations where the Company pays termination benefits, including supplemental benefits paid in excess of statutory minimum amounts and benefits offered to affected employees based on management's discretion, the Company records these termination costs in accordance with ASC 420, "Exit or Disposal Cost Obligations." A liability is recognized for one-time termination benefits when the Company is committed to 1) making payments and the number of affected employees and the benefits received are known to both parties and 2) terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal for which such amount can be reasonably estimated.

(p) Leases

Effective January 1, 2019, the Company adopted ASU 2016-02, "Leases (Topic 842)," and related amendments, which set out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors, using the modified retrospective method. In connection with the adoption of these standards, the Company implemented internal controls to ensure that the Company's contracts are properly evaluated to determine applicability under ASU 2016-02 and that the Company properly applies ASU 2016-02 in accounting for and reporting on all its qualifying leases.

In accordance with ASU 2016-02, the Company considers any contract that conveys the right to control the use of identified property, plant or equipment for a period of time in exchange for consideration to be a lease. The Company determines whether the contract into which it has entered is a lease at the lease commencement date. Rental arrangements with term lengths of one month or less are expensed as incurred, but not recognized as qualifying leases.

For lessees, leases can be classified as finance leases or operating leases, while for lessors, leases can be classified as sales-type leases, direct financing leases or operating leases. As lessee, all leases, with the exception of short-term leases, are capitalized on the balance sheet by recording a lease liability, which represents the Company's obligation to make lease payments arising from the lease and a right-of-use asset, which represents the Company's right to use the underlying asset being leased.

For leases in which the Company is the lessee, the Company uses a collateralized incremental borrowing rate to calculate the lease liability, as for most leases, the implicit rate in the lease is unknown. The collateralized incremental borrowing rate is based on a yield curve over various term lengths that approximates the borrowing rate the Company would receive if it collateralized its lease arrangements with all of its assets. For leases in which the Company is the lessor, the Company uses the rate implicit in the lease.

For finance leases, the Company amortizes the right-of-use asset on a straight-line basis over the earlier of the useful life of the right-of-use asset or the end of the lease term and records this amortization in rent expense on the consolidated statements of operations and comprehensive loss. The Company adjusts the lease liability to reflect lease payments made during the period and interest incurred on the lease liability using the effective interest method. The incurred interest expense is recorded in interest expense on the consolidated statements of operations and comprehensive loss. For operating leases, the Company recognizes one single lease cost, comprised of the lease

payments and amortization of any associated initial direct costs, within rent expense on the consolidated statements of operations and comprehensive loss. Variable lease costs not included in the determination of the lease liability at the commencement of a lease are recognized in the period when the specified target that triggers the variable lease payments becomes probable.

In accordance with ASC 842, the Company has made the following elections for its lease accounting:

- all short-term leases with term lengths of 12 months or less will not be capitalized; the underlying class of assets to which the Company has applied this expedient is primarily its apartment leases;
- for non-revenue contracts containing both lease and non-lease components, both components will be combined and accounted for as one lease component and accounted for under ASC 842; and
- for revenue contracts containing both lease and non-lease components, both components will be combined and accounted for as one component and accounted for under ASC 606.

As part of the Company's adoption of ASU 2016-02, the Company elected to adopt the standard using the modified retrospective transition method and elected the practical expedient transition method package whereby the Company did not:

- reassess whether any expired or existing contracts contained leases;
- · reassess the lease classification for any expired or existing leases; and
- reassess initial direct costs for any existing leases.

For additional information, see Note (16) Leases.

(q) Research and development costs

Research and development costs are expensed as incurred as general and administrative expenses in the Company's consolidated statements of operations and comprehensive income (loss). Research and development costs incurred directly by the Company were \$4.8 million, \$7.1 million and \$7.1 million for the years ended December 31, 2020, 2019 and 2018, respectively.

(r) Reclassifications

Certain reclassifications have been made to prior period amounts to conform to current period financial statement presentation. These reclassifications did not affect previously reported results of operations, stockholders' equity, comprehensive income or cash flows.

(3) Mergers and Acquisitions

(a) C&J Energy Services, Inc.

On October 31, 2019, the Company completed the C&J Merger in accordance with the terms of the Agreement and Plan of Merger, dated as of June 16, 2019 (the "Merger Agreement"), by and among NexTier, C&J and King Merger Sub Corp., a wholly owned subsidiary of NexTier ("Merger Sub"), pursuant to which Merger Sub merged with and into C&J, with C&J surviving the merger as a wholly owned subsidiary of NexTier, and immediately following the C&J Merger, C&J was merged with and into King Merger Sub II LLC ("LLC Sub"), with LLC Sub continuing as the surviving entity as a wholly-owned subsidiary of NexTier and the successor in interest to C&J.

The C&J Merger was completed for total consideration of approximately \$485.1 million, consisting of (i) equity consideration in the form of 105.9 million shares of Keane common stock issued to C&J stockholders with a value of \$481.9 million and (ii) replacement share based compensation awards attributable to pre-merger services with a value of \$3.2 million.

The Company accounted for the C&J Merger using the acquisition method of accounting. The aggregate purchase price noted above was allocated to the major categories of assets acquired and liabilities assumed based upon their estimated fair values at the date of the acquisition. The majority of the measurements of assets acquired and liabilities assumed, were based on inputs that were not observable in the market and thus represented Level 3 inputs. The fair value of acquired inventory and property and equipment was based on both available market data and a cost approach. The fair value of the financial assets acquired included trade receivables with a fair value of \$312.6 million. The gross amount due under the contracts was \$322.8 million, of which \$10.2 million was expected to be uncollectible. A liability of \$40.2 million was recognized for legal reserves and sales and use tax assessments.

The following table summarizes the fair value of the consideration transferred in the C&J Merger and the allocation of the purchase price to the fair values of the assets acquired and liabilities assumed at the C&J Merger Date:

Total Purchase Consideration:	(Thousan	nds of Dollars)
Equity consideration	\$	481,912
Replacement awards attributable to pre-combination services		3,212
Less: Cash acquired		(68,807)
Total purchase consideration	\$	416,317
Trade and accounts receivable	\$	312,620
Inventories		43,142
Prepaid and other current assets		18,512
Property and equipment		311,886
Intangible assets		17,590
Right of use assets		24,318
Other noncurrent assets		4,409
Total identifiable assets acquired		732,477
Accounts payable		43,620
Accrued expenses		236,959
Short term lease liability		7,842
Long term lease liability		15,517
Non-current liabilities		17,156
Total liabilities assumed		321,094
Goodwill		4,934
Total purchase consideration	\$	416,317

The goodwill in this acquisition was primarily attributable to expected synergies and was allocated across the Company's Completion Services, Well Construction and Intervention and Well Support Services reporting units.

Intangible assets related to the C&J Merger consisted of the following:

		(Thou	isands of Dollars)
	Weighted average remaining amortization period (Years)		Gross Carrying Amounts
Technology	3		17,590
Total		\$	17,590

Merger and integration related costs were recognized separately from the acquisition of assets and assumptions of liabilities in the C&J Merger. Merger costs consist of legal and professional fees and pre-merger notification fees. Integration costs consist of expenses incurred to integrate C&J's operations, aligning accounting processes and procedures, and integrating its enterprise resource planning system with those of the Company. The expenses for all these transactions were expensed as incurred.

Merger and integration costs totaled \$32.5 million and \$68.7 million for the years ended December 31, 2020 and 2019, respectively, and are recorded within merger and integration costs on the Company's consolidated statements of operations and comprehensive income (loss). The following table summarizes merger and integration costs for the years ended December 31, 2020 and 2019.

	(amounts in thousands)			
Transaction Type	Year Ended December 31, 2020	Year Ended December 31, 2019		
Merger	\$ 7,586	\$ 23,775		
Integration	24,953	44,956		
Total merger and integration costs	\$ 32,539	\$ 68,731		

The following combined pro forma information assumes the C&J Merger occurred on January 1, 2018. The pro forma information presented below is for illustrative purposes only and does not reflect future events that occurred after December 31, 2019 or any operating efficiencies or inefficiencies that resulted from the C&J Merger. The information is not necessarily indicative of results that would have been achieved had the Company controlled C&J during the period presented.

	(unaudited, amounts in thousands)			n thousands)
	Year Ended December 31, 2019		Year Ended December 31, 2018	
Revenue	\$	3,406,288	\$	4,359,095
Net income (loss)		(196,577)		66,746
Net income (loss) per share (basic)	\$	(0.93)	\$	0.32
Net income (loss) per share (diluted)	\$	(0.93)	\$	0.31
Weighted-average shares outstanding (basic)		211,376		210,945
Weighted-average shares outstanding (diluted)		211,376		212,964

The Company's consolidated statement of operations and comprehensive income (loss) for 2019 includes revenue of \$196.7 million and net loss of \$21.4 million, from the C&J operations, from November 1, 2019 to December 31, 2019.

(b) Asset Acquisition from Refinery Specialties, Incorporated

On July 24, 2018, the Company executed a purchase agreement with Refinery Specialties, Incorporated ("RSI") to acquire approximately 90,000 hydraulic horsepower and related support equipment for approximately

\$35.4 million, inclusive of an \$0.8 million deposit reimbursement related to future equipment deliveries. This acquisition was partially funded by the insurance proceeds the Company received in connection with a fire that resulted in damage to a portion of one of the Company's fleets (for further details see Note (7) Property and Equipment, net). The Company also assumed operating leases for light duty vehicles in connection with the RSI transaction and RSI entered into a non-compete arrangement in turn with the Company. In September 2018, the Company, and RSI reached an agreement to refund the Company \$0.8 million of the purchase price due to repair costs required for certain acquired equipment. The resulting purchase price after the refund was \$34.6 million, and the Company incurred \$0.4 million of transaction costs related to the acquisition, bringing total cash consideration related to the acquisition to \$35.0 million.

The Company accounted for this acquisition as an asset acquisition pursuant to ASU 2017-01 and allocated the purchase price of the acquisition plus the transactions costs amongst the acquired hydraulic horsepower and related support equipment, as the fair value of the acquired hydraulic horsepower and related support equipment represented substantially all of the fair value of the gross assets acquired in the asset acquisition with RSI.

(4) Intangible Assets

The definite-lived intangible assets balance in the Company's consolidated balance sheets represents the fair value measurement upon initial recognition, net of amortization, as applicable, related to the following:

	(Thousands of Dollars)				
			Dece	mber 31, 2020	
	Gross Carrying Accumulated Amounts Amortization			Net Carrying Amount	
Customer contracts	\$	67,600	\$	(37,607)	\$ 29,993
Non-compete agreements		700		(455)	245
Technology		29,378		(8,434)	20,944
Total	\$	97,678	\$	(46,496)	\$ 51,182

	(Thousands of Dollars)				
			Dec	ember 31, 2019	
	Gross Accumulated Carrying Amortization Amounts		Net Carrying Amount		
Customer contracts	\$	67,600	\$	(32,681)	\$ 34,919
Non-compete agreements		700		(408)	292
Technology		22,054		(2,244)	19,810
Total	\$	90,354	\$	(35,333)	\$ 55,021

Amortization expense related to the intangible assets for the years ended December 31, 2020, 2019 and 2018 was \$12.6 million, \$6.5 million and \$6.3 million, respectively.

In connection with the C&J Merger, the Company was re-branded as NexTier and did not expect to obtain any further benefits or receive any cash flows associated with the Keane indefinite-lived trade name. As a result, the Company impaired \$10.2 million related to the Keane trade name as of December 31, 2019. The impairment is recorded in impairment expense in the consolidated statements of operations and comprehensive income (loss).

Amortization for the Company's definite-lived intangible assets, excluding in-process software, over the next five years, is as follows:

Year-end December 31,	(Thousan	ds of Dollars)
2021	\$	(14,213)
2022		(13,132)
2023		(7,382)
2024		(5,786)
2025		(5,312)

(5) Goodwill

Goodwill is allocated across three reporting units: Completion Services, Well Construction and Intervention Services and Well Support Services reporting units. At the reporting unit level, the Company tests goodwill for impairment on an annual basis as of October 31 of each year, or when events or changes in circumstances, referred to as triggering events, indicate the carrying value of goodwill may not be recoverable and that a potential impairment exists.

Judgment is used in assessing whether goodwill should be tested for impairment more frequently than annually. Factors such as unexpected adverse economic conditions, competition, market changes, and other external events may require more frequent assessments.

During the first quarter of 2020, a significant decline in the Company's share price, which resulted in the Company's market capitalization dropping below the book value of equity, as well as reductions in commodity prices driven by the potential impact of the COVID-19 pandemic and global supply and demand dynamics were deemed triggering events that led to a test for goodwill impairment. The impairment testing methodologies for the first quarter 2020 are discussed below.

Income approach

The income approach impairment testing methodology is based on a discounted cash flow model, which utilizes present values of cash flows to estimate fair value. For the Completions Services and Well Construction and Intervention reporting units, the future cash flows were projected based on estimates of projected revenue growth, unit count, utilization, pricing, gross profit rates, SG&A rates, working capital fluctuations and capital expenditures. Forecasted cash flows took into account known market conditions as of March 31, 2020, and management's anticipated business outlook. A terminal period was used to reflect an estimate of stable, perpetual growth. The terminal period reflects a terminal growth rate of 2.5%. The future cash flows were discounted using a market-participant risk-adjusted weighted average cost of capital ("WACC") of 19.9% for the Completions reporting unit and 22.4% for the Well Construction and Intervention reporting unit. These assumptions were derived from both observable and unobservable inputs and combined reflect management's judgments and assumptions.

Market approach

The market approach impairment testing methodology is based upon the guideline public company method and the guideline transaction method. The application of the guideline public company method was based upon selected public companies operating within the same industry as the Company. Based on this set of comparable competitor data, operational multiples were derived for the reporting units weighted based on management's assessment of reliability. The forward-looking selected market multiples for the guideline public company method were enterprise value to revenue and enterprise value to EBITDA multiples, with multiples ranging from 0.5x to 0.6x for revenues and from 3.3x to 6.2x for EBITDA. The application of the guideline transaction method was based upon valuation multiples derived from actual control transactions for comparable companies. Based on this, valuation multiples are derived from historical data of selected transactions, then evaluated and adjusted, if necessary, based on the strengths and weaknesses of the subject reporting unit relative to each acquired guideline company. The forward-looking selected market multiples for the guideline transaction method were enterprise value to revenue and enterprise value to book value of invested capital, with multiples ranging from 0.7x to 2.1x for revenues and from 0.6x to 1.3x for book value of invested capital.

The fair value determined under the market approach is sensitive to these market multiples, and a decline in any of the multiples could reduce the estimated fair value of the reporting unit below its carrying value. Earnings estimates were derived from unobservable inputs that require significant estimates, judgments and assumptions as described in the income approach.

Reconciliation of value and goodwill impairment conclusion

The estimated fair value determined under the income approach was consistent with the estimated fair value determined under the market approach. The concluded fair value for both reporting units consisted of a weighted average, with a 40.0% weighted under the income approach and 60.0% weight under the market approach. Market data in support of the implied control premium were used in this reconciliation to corroborate the estimated reporting unit fair values with the Company's overall market-indicated value. The results of the impairment testing for goodwill resulted in the Company recognizing an impairment expense of \$32.6 million during the first quarter of 2020, consisting of \$32.2 million related to the Completions Services reporting unit and \$0.4 million representing the entire balance of goodwill for the Well Construction and Intervention reporting unit.

During the third quarter of 2020, the Company assessed and deemed the sustained reductions in commodity prices and continuing market economic disruptions as a triggering event. As a result of the triggering event, the Company performed a test for goodwill impairment using the same methodologies used in the first quarter of 2020; however, no impairment of goodwill was recorded.

During the Company's annual testing as of October 31, 2020, it was determined that there were no events that would indicate the carrying value of goodwill may not be recoverable or that a potential impairment exists.

The changes in the carrying amount of goodwill for the years ended December 31, 2020, 2019 and 2018 were as follows:

	(Thous	ands of Dollars)
Goodwill as of December 31, 2018	\$	132,524
C&J Merger		4,934
Goodwill as of December 31, 2019		137,458
Disposition of Well Support Services reporting unit		(660)
Impairment expense		(32,600)
Goodwill as of December 31, 2020	\$	104,198

The changes in the carrying amount of goodwill for the years ended December 31, 2020 and 2019 consisted of amounts related to the disposition of the Well Support Services reporting unit, impairment expense, and the C&J Merger, respectively. For additional information, see Note (3) (Mergers and Acquisitions) and Note (21) (Business Segments). As discussed above, in 2020 the Company recognized impairment expense of \$32.6 million. There were no triggering events and no impairment expense recorded for the years ended 2019 and 2018.

(6) Inventories, net

Inventories, net, consisted of the following at December 31, 2020 and December 31, 2019:

		(Thousands of Dollars)				
	December 31, 2020			December 31, 2019		
Sand, including freight	\$	5,096	\$	4,405		
Chemicals and consumables		2,993		11,408		
Materials and supplies		21,979		45,828		
Total inventory, net	\$	30,068	\$	61,641		

Inventories are reported net of obsolescence reserves of \$4.4 million and \$1.8 million as of December 31, 2020 and 2019, respectively. The Company recognized \$2.6 million, \$0.8 million and \$0.7 million of obsolescence expense during the years ended December 31, 2020, 2019 and 2018. Additionally, during the year ended December 31, 2020, the Company recognized a \$2.7 million write-down in inventory carrying value down to its net realizable value.

(7) Property and Equipment, net

Property and Equipment, net consisted of the following at December 31, 2020 and December 31, 2019:

		(Thousands of Dollars)			
	De	cember 31, 2020	December 31, 2019		
Land	\$	14,397	\$	35,178	
Building and leasehold improvements		78,078		90,950	
Office furniture, fixtures and equipment		11,400		10,678	
Machinery and equipment		1,284,163		1,259,697	
		1,388,038		1,396,503	
Less accumulated depreciation		(929,290)		(723,060)	
Construction in progress		11,963		35,961	
Total property and equipment, net	\$	470,711	\$	709,404	

Casualty Loss

On July 1, 2018, one of the Company's hydraulic frac fleets operating in the Permian Basin was involved in an accidental fire, which resulted in damage to a portion of the equipment in that fleet. In 2018, the Company received \$18.1 million of insurance proceeds for replacement cost of the damaged equipment, which offset the \$3.2 million impairment loss recognized on the damaged equipment. The resulting gain of \$14.9 million was recognized in other income (expense), net in the consolidated statements of operations and comprehensive income (loss) for the year ended December 31, 2018.

(8) Long-Term Debt

Long-term debt at December 31, 2020 and December 31, 2019 consisted of the following:

	(Thousands of Dollars)			
	December 31, 2020	December 31, 2019		
2018 Term Loan Facility	341,250	\$ 344,750		
Less: Unamortized debt discount and debt issuance costs	(5,710)	\$ (7,127)		
Total debt, net of unamortized debt discount and debt issuance costs	335,540	337,623		
Less: Current portion	(2,252)	\$ (2,311)		
Long-term debt, net of unamortized debt discount and debt issuance costs	\$ 333,288	\$ 335,312		

Below is a summary of the Company's credit facilities outstanding as of December 31, 2020:

		(Thousands of Dollars)			
	20	019 ABL Facility	2018 Term Loan Facility		
Original facility size	\$	450,000	\$	350,000	
Outstanding balance	\$	_	\$	341,250	
Letters of credit issued	\$	28,490	\$	_	
Available borrowing base commitment	\$	73,463		n/a	
Interest Rate ⁽¹⁾	LIBO	OR or base rate plus applicable margin	LIE	OR or base rate plus applicable margin	
Maturity Date		October 31, 2024		May 25, 2025	

⁽¹⁾ London Interbank Offer Rate ("LIBOR") is subject to a 1.00% floor

Maturities of the 2018 Term Loan Facility for the next five years are presented below:

Year-end December 31,	(Thousan	ds of Dollars)
2021	\$	3,500
2022		3,500
2023		3,500
2024		3,500
2025		327,250
	\$	341,250

Deferred Charges and Other Costs

Deferred charges include deferred financing costs and debt discounts or debt premiums. Deferred charges related to the 2019 ABL Facility (defined below) are capitalized. Deferred charges related to the 2018 Term Loan Facility (defined below) are netted against the carrying amount of term debt. Deferred charges are amortized to interest expense using the effective interest method. Interest expense related to the deferred financing costs for the years ended December 31, 2020, 2019 and 2018 was \$2.2 million, \$1.4 million, and \$3.1 million, respectively.

ABL Revolving Credit Facility

On October 31, 2019, the Company entered into the Second Amended and Restated Asset-Based Revolving Credit Agreement ("2019 ABL Facility"), modifying the Company's pre-existing asset-based revolving credit facility ("2017 ABL Facility"). Deferred charges associated with the 2019 ABL Facility were capitalized and totaled \$1.2 million. In connection with the modification of the 2017 ABL Facility, the Company wrote off \$0.5 million of deferred financing costs. The remaining deferred financing costs related to the 2017 ABL Facility will be amortized over the life of the 2019 ABL Facility. Unamortized deferred charges associated with the 2019 and 2017 ABL Facilities were \$3.1 million and \$3.7 million as of December 31, 2020 and 2019, respectively, and are recorded in other noncurrent assets on the consolidated balance sheets. During the first quarter of 2020, the Company provided notice to the lenders to borrow a total of \$175 million under the 2019 ABL Facility. The interest rates for the \$150.0 million LIBOR borrowing and \$25.0 million Base Rate borrowing were 2.125% and 3.75%, respectively. During the second quarter of 2020, the Company repaid the \$150.0 million LIBOR borrowing and the \$25.0 million Base Rate borrowing and did not incur any penalties.

Term Loan Facility

On May 25, 2018, the Company entered into a term loan facility (the "2018 Term Loan Facility"), the proceeds of which were used to repay the Company's pre-existing term loan facility (the "2017 Term Loan Facility"). No prepayment penalties were incurred in connection with the Company's early debt extinguishment of its 2017 Term Loan Facility. Deferred charges associated with the 2017 Term Loan Facility that were expensed upon repayment of the 2017 Term Loan Facility totaled \$7.6 million. Deferred charges associated with the 2018 Term Loan Facility that were netted against the carrying amount of the term debt totaled \$9.0 million. Unamortized deferred charges associated with the 2018 Term Loan Facility were \$5.7 million and \$7.1 million as of December 31, 2020 and 2019, respectively, and are recorded in long-term debt, net of deferred financing costs and debt discount, less current maturities on the consolidated balance sheets.

(9) Significant Risks and Uncertainties

Subsequent to the sale of the Well Support Services segment, the Company operates in two reportable segments: Completion Services and Well Construction and Intervention, with significant concentration in the Completion Services segment. During the years ended December 31, 2020, 2019 and 2018, sales to Completion Services customers represented 87%, 94% and 98% of the Company's consolidated revenue, respectively.

The Company depends on its customers' willingness to make operating and capital expenditures to explore for, develop and produce oil and natural gas onshore in the U.S. This activity is driven by many factors, including current and expected crude oil and natural gas prices. The U.S. energy industry experienced a significant downturn in the second half of 2014 through early 2016, driven primarily by global oversupply and a decline in commodity prices. From early 2016 through late 2018, the U.S. generally experienced some recovery in commodity prices and drilling and completion activity. Over this time frame, the U.S. active rig count increased from a trough of 404 rigs in May 2016 to a peak of 1,083 rigs in December 2018, driving significant demand for the Company's completion services. From December 28, 2018 through December 31, 2019, U.S. active rig count decreased by approximately 26% to 805 rigs as market conditions tightened and competition within the completions industry increased.

In late 2019 and early 2020, and in response to the oversupply of hydraulic fracturing equipment, an increasing number of horsepower retirements were announced, removing a significant base of equipment from the market. Despite some of these announcements, the oversupply of hydraulic fracturing equipment persisted, resulting in a continuation of highly competitive market conditions into 2020.

In late first quarter of 2020, the industry faced sudden and unprecedented circumstances, including major shocks to both supply and demand. COVID-19 has resulted in significant demand destruction for oil products, driven by a significant slowdown in economic activity throughout the U.S. and abroad. This resulted in a rapid and significant decline in crude oil prices and an increasingly utilized storage network, limiting distribution outlets and optionality for production and further exacerbating price declines. U.S. exploration and production companies responded with drastic reductions in budgets and outright completion stoppages. From the end of the fourth quarter of 2019 to the end of the fourth quarter of 2020, U.S. active rig count decreased by 56%, from 805 to 351 rigs.

This backdrop drastically impacted the demand for U.S. completions services and resulted in increased uncertainty throughout much of 2020. While activity has modestly improved relative to the trough in activity experienced in late May / early June 2020, and supply / demand dynamics are improving, the market remains highly competitive. The magnitude, cadence, and resilience of activity improvement is uncertain and dependent on a range of factors including COVID-19 demand resolution.

For the year ended December 31, 2020, revenue from two customers individually represented more than 10% and collectively represented 29% of the Company's consolidated revenue. For the year ended December 31, 2019, four customers individually represented more than 10% and collectively represented 55% of the Company's consolidated revenue. For the year ended December 31, 2018, three customers individually represented more than 10% and collectively represented 39% of the Company's consolidated revenue.

For the years ended December 31, 2020 and 2019, purchases from one supplier represented approximately 5% of the Company's overall purchases, and were primarily incurred within the Completion Services segment.

(10) Derivatives

The Company uses interest-rate-related derivative instruments to manage its variability of cash flows associated with changes in interest rates on its variable-rate debt.

On March 9, 2020, the Company sold its Well Support Services segment to Basic Energy Services, Inc. ("Basic") for \$93.7 million of total proceeds, including \$59.4 million in cash, before transaction costs, escrowed amounts, and subject to customary working capital adjustments, for a net of \$53.3 million received at close, and \$34.4 million of par value Senior Secured Notes, with 10.75% coupon rate, ("WSS Notes") previously issued by Basic. On July 29, 2020, the Company agreed to use the escrowed amount in the final settlement of the working capital reconciliation. Under the terms of the agreement, the WSS Notes are accompanied by a make-whole guarantee at par value, which guarantees the payment of \$34.4 million to NexTier after the WSS Notes are held to the one-year anniversary of March 9, 2021. The cash equivalent make-whole is issued under a fund guarantee by Ascribe III Investments LLC, a private equity investment firm with approximately \$1.0 billion in assets under management. In the event of a Basic restructuring or a credit rating downgrade in conjunction with a change in control prior to the one-year anniversary, the make-whole guarantee accelerates the WSS Notes to par value of \$34.4 million. NexTier is entitled to semi-annual interest payments on the WSS Notes based on the 10.75% annual coupon throughout the holding period. The Company identified the make-whole guarantee as an embedded derivative and bifurcated the valuation of the WSS Note and the make-whole guarantee. The Company elected the fair value option for the WSS Notes at the inception of the transaction. The fair value on the date of the transaction for the makewhole derivative and WSS Notes was \$12.2 million and \$22.2 million, respectively, and resulted in a gain on divestiture of \$8.7 million. The fair value of the WSS Notes and the make-whole guarantee are measured at the end of each reporting period. Unrealized gains and losses recognized in relation to the change in fair value of these instruments are recognized in net income (loss) in the consolidated statements of operations and comprehensive income (loss). The fair value of the WSS Notes and make-whole guarantee are recorded in Other Current Assets on the consolidated balance sheets. See Note (21) Business Segments for further discussion.

On May 25, 2018, the Company entered into the 2018 Term Loan Facility, which has an initial aggregate principal amount of \$350 million, and repaid its pre-existing 2017 Term Loan Facility. The 2018 Term Loan Facility has a variable interest rate based on LIBOR, subject to a 1.0% floor. As a result of this transaction, the Company desired to hedge additional notional amounts to continue to hedge approximately 50% of its expected LIBOR exposure and to extend the terms of its swaps to align with the 2018 Term Loan Facility.

On June 22, 2018, the Company unwound its existing interest rate swaps and received \$3.2 million in proceeds. The Company used the \$3.2 million of proceeds to execute a new off-market interest rate swap. Under the terms of the new interest rate swap, the Company receives 1-month LIBOR, subject to a 1% floor, and makes payments based on a fixed rate of 2.625%. The new interest rate swap is effective through March 31, 2025 and has a notional amount of \$175.0 million. The new interest rate swap was designated in a new cash flow hedge relationship.

The Company discontinued hedge accounting on the pre-existing interest rate swaps upon termination. At the time hedge accounting was discontinued, the exiting interest rate swaps had \$3.5 million of deferred gains in accumulated other comprehensive loss. This amount was not reclassified from accumulated other comprehensive loss into earnings, as it remained probable that the originally forecasted transaction will occur. This amount will be recognized into earnings through August 18, 2022, the termination date of the pre-existing interest rate swap.

The following tables present the fair value of the Company's derivative instruments on a gross and net basis as of the periods shown below:

	(Thousands of Dollars)							
	Derivatives designated as hedging instruments	Derivatives not designated as hedging instruments	Gross Amounts of Recognized Assets and Liabilities	Gross Amounts Offset in the Balance Sheet ⁽¹⁾	Net Amounts Presented in the Balance Sheet ⁽²⁾			
As of December 31, 2020:								
Other current asset	\$ —	\$ 27,243	\$ 27,243	\$ —	\$ 27,243			
Other current liability	(2,861)	_	(2,861)	_	(2,861)			
Other noncurrent liability	(8,260)	_	(8,260)	_	(8,260)			
As of December 31, 2019:								
Other current liability	(1,729)	_	(1,729)	_	(1,729)			
Other noncurrent liability	(5,559)	_	(5,559)	_	(5,559)			

⁽¹⁾ Agreements are in place that allow for the financial right of offset for derivative assets and derivative liabilities at settlement or in the event of a default under the agreements.

The following table presents gains and losses for the Company's interest rate derivatives designated as cash flow hedges (in thousands of dollars):

	Year Ended December 31,					
		2020		2019	2018	Location
Amount of loss recognized in other comprehensive income on derivative	\$	(6,422)	\$	(7,628)	\$ (880)	OCI
Amount of gain (loss) reclassified from accumulated other comprehensive income (loss) ("AOCI") into earnings		(2,334)		239	697	Interest Expense

The gain (loss) recognized in other comprehensive income for the derivative instrument is presented within the hedging activities line item in the consolidated statements of operations and comprehensive income (loss).

There were no gains or losses recognized in earnings as a result of excluding amounts from the assessment of hedge effectiveness. Based on recorded values at December 31, 2020, \$2.7 million of net losses will be reclassified from accumulated other comprehensive loss into earnings within the next 12 months.

The Company recognized a loss on the change in fair market value of the WSS Notes and make-whole derivative of \$0.9 million for the year ended December 31, 2020 which is recorded within other income (expense) on the consolidated statements of operations and comprehensive income (loss). No loss was recorded in the year ended December 31, 2019.

See Note (11) (Fair Value Measurements and Financial Information) for further information related to the Company's derivative instruments.

⁽²⁾ There are no amounts subject to an enforceable master netting arrangement that are not netted in these amounts. There are no amounts of related financial collateral received or pledged.

(11) Fair Value Measurements and Financial Information

The Company discloses the required fair values of financial instruments in its assets and liabilities under the hierarchy guidelines, in accordance with GAAP. The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable, accrued expenses, derivative instruments, long-term debt and finance lease obligations. As of December 31, 2020, and 2019, the carrying values of the Company's financial instruments, included in its consolidated balance sheets, approximated or equaled their fair values.

Recurring Fair Value Measurement

As of December 31, 2020, the Company has four financial instruments measured at fair value on a recurring basis which are its interest rate derivative, make-whole derivative, WSS Notes (see Note (10) Derivatives above), and equity security investment. The equity security investment is composed primarily of common equity shares in a publicly traded company, acquired at a fair value of \$5.3 million. The make-whole derivative, WSS Notes, and the equity security investment are presented within other current assets in the consolidated balance sheets, while the interest rate derivative is presented within other current liabilities and other noncurrent liabilities in the consolidated balance sheets. As of December 31, 2019, the Company had one financial instrument measured on a recurring basis, which was its interest rate derivative.

The fair market value of the derivative financial instruments reflected on the consolidated balance sheets as of December 31, 2020, and 2019 was determined using industry-standard models that consider various assumptions, including current market and contractual rates for the underlying instruments, time value, implied volatilities, nonperformance risk, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace through the full term of the instrument and can be supported by observable data.

The following tables present the placement in the fair value hierarchy of assets and liabilities that were measured at fair value on a recurring basis at December 31, 2020, and 2019 (in thousands of dollars):

			Fair value measurements at reporting date usi					date using
	December 31, 2020		Level 1		Level 2			Level 3
Assets:								
Make-whole derivative	\$	27,243	\$	_	\$	27,243	\$	_
WSS Note		6,322		_		6,322		_
Equity security investment		11,263		11,263		_		_
Liabilities:								
Interest rate derivatives	\$	(11,121)	\$		\$	(11,121)	\$	_
		I	air value mea	sure	ments at repo	rting	date using	
	December 31, 2019		Level 1		Level 2			Level 3
Liabilities:								
Interest rate derivatives	\$	(7,288)	\$	_	\$	(7,288)	\$	_

Non-Routine Fair Value Measurement

The fair values of indefinite-lived assets and long-lived assets are determined with internal cash flow models based on significant unobservable inputs. The Company measures the fair value of its property, plant and equipment using the discounted cash flow method, the fair value of its customer contracts using the multi-period excess earning method and income based "with and without" method, the fair value of its trade names and acquired technology using the "income-based relief-from-royalty" method and the fair value of its non-compete agreement using the "lost income" approach. Assets acquired as a result of the acquisition of the RSI, and C&J transactions were recorded at their fair values on the date of acquisition. See Note (3) Mergers and Acquisitions for further details.

Given the unobservable nature of the inputs used in the Company's internal cash flow models, the cash flows models are deemed to use Level 3 inputs.

Credit Risk

The Company's financial instruments exposed to concentrations of credit risk consist primarily of cash and cash equivalents, derivative contracts and trade receivables.

The Company's cash balances on deposit with financial institutions totaled \$276.0 million and \$255.0 million as of December 31, 2020 and 2019, respectively, which exceeded Federal Deposit Insurance Corporation insured limits. The Company regularly monitors these institutions' financial condition.

The credit risk from the derivative contract derives from the potential failure of the counterparty to perform under the terms of the derivative contracts. The Company minimizes counterparty credit risk in derivative instruments by entering into transactions with high-quality counterparties, whose Standard & Poor's credit rating is higher than BBB. The derivative instruments entered into by the Company do not contain credit-risk-related contingent features.

The majority of the Company's trade receivables have payment terms of 30 days or less. Significant customers are those that individually account for 10% or more of the Company's consolidated revenue or total accounts receivable. As of December 31, 2020, trade receivables from one customer individually represented 17% of the Company's total accounts receivable. As of December 31, 2019, trade receivables from one customer individually represented more than 10% of the Company's total accounts receivable. The Company mitigates the associated credit risk by performing credit evaluations and monitoring the payment patterns of its customers. The Company has a process in place to collect all receivables within 30 to 60 days of aging. As of December 31, 2020 and 2019, the Company had \$2.7 million, including the increase of \$1.5 million from the adoption of ASU 2016-13, and \$0.7 million in allowance for credit losses, respectively. During 2020, the Company had \$0.5 million of activity related to the current period bad debt expense, net of write-offs. Additionally, the Company had \$2.0 million of recoveries from previously written-off receivables, net of the bad debt expense. During the years ended December 31, 2019 and 2018, the Company recorded bad debt expense of \$0.6 million.

(12) Stock-Based Compensation

Effective as of October 31, 2019, the Company (i) amended and restated the Keane Group, Inc. Equity and Incentive Award Plan under the name NexTier Oilfield Solutions Inc. Equity and Incentive Award Plan ("Equity and Incentive Award Plan"), and (ii) assumed and amended and restated the C&J Energy Services, Inc. 2017 Management Incentive Plan under the name NexTier Oilfield Solutions Inc. (Former C&J Energy) Management Incentive Plan ("Management Incentive Plan", and collectively with the Equity and Incentive Award Plan, the "Equity Award Plans"). As part of the C&J Merger, the Company assumed the award agreements outstanding under the Management Incentive Plan on the terms set forth in the Merger agreement.

As of December 31, 2020, the Company had four types of stock-based compensation under its Equity Award Plans: (i) restricted stock awards issued to independent directors and certain executives and employees, (ii) restricted stock units issued to executive officers and key management employees, (iii) non-qualified stock options issued to executive officers and (iv) performance-based restricted stock units issued to executive officers and key management employees. The Company has approximately 9,098,304 shares of its common stock reserved and available for grant under the Equity and Incentive Award Plan and approximately 6,485,847 shares of its common stock reserved and available for grant under the Management Incentive Plan.

For details on the Company's accounting policies for determining stock-based compensation expense, see Note (2) Summary of Significant Accounting Policies: (k) Stock-based compensation. Non-cash stock compensation expense is generally presented within selling, general and administrative expense in the consolidated statements of operations and comprehensive income (loss) however, for the year ended December 31, 2020 and 2019, the Company presented \$2.7 million and \$9.6 million, respectively, within merger and integration. These amounts primarily relate to the accelerated vesting of certain awards that contained pre-existing change in control provisions.

The following table summarizes stock-based compensation expense for the years ended December 31, 2020, 2019 and 2018 (in thousands of dollars):

	Year Ended December 31,						
		2020	2019	2018			
Deferred stock awards		_	_	4,280			
Restricted stock awards		1,589	1,486	611			
Restricted stock units		19,201	20,426	9,822			
Non-qualified stock options		894	3,498	2,453			
Restricted stock performance-based stock unit awards		4,142	3,567				
Stock-based compensation	\$	25,826	\$ 28,977	\$ 17,166			
Tax benefit	\$	(5,557)	(6,954)	(4,134)			
Stock-based compensation, net of tax		20,269	\$ 22,023	\$ 13,032			

(a) Deferred stock awards

Upon consummation of the IPO, the executive officers of the Company identified in the table below became eligible for retention payments, the first on January 1, 2018 and the second on January 1, 2019, in the bonus amounts set forth in the table below. On March 16, 2017, the compensation committee (the "Compensation Committee") of the Board of Directors approved, and each executive officer agreed, that in lieu of the executive officer's cash retention payments, the executive officer was granted a deferred stock award under the Equity and Incentive Award Plan. Each executive officer's deferred stock award provides that, subject to the executive officer remaining employed through the applicable vesting date and complying with the restrictive covenants imposed on him under his employment agreement with the Company, the executive officer will be entitled to receive payment of a stock bonus equal to the variable number of shares of the Company's common stock having a fair market value on the payment date equal to the bonus amount set forth in the table below:

	 Bonus Amounts (In thousands)			
	First		Second	
James C. Stewart	\$ 1,976	\$	1,976	
Gregory L. Powell	\$ 1,646	\$	1,646	
M. Paul DeBonis Jr.	\$ 659	\$	659	

The Company accounted for these deferred stock awards as liability classified awards and recorded them at fair value based on the fixed monetary value on the date of grant. The Company recognized \$8.6 million as a deferred compensation expense liability and contra-equity during the first quarter of 2017.

The first stock bonuses vested on January 1, 2018 and were paid on February 15, 2018. The second stock bonus vested January 1, 2019, with an original payout date of February 15, 2019, that was amended in February 2019 to a payout date of March 4, 2019. For the year ended December 31, 2018, the Company recognized \$4.3 million of non-cash stock compensation expense into earnings, while no compensation related to these awards was recorded during the years ended December 31, 2020 and 2019. As of December 31, 2020 and 2019 there was no remaining unamortized compensation cost related to unvested deferred stock awards.

(b) Restricted stock awards

For the years ended December 31, 2020, 2019, and 2018 the Company recognized \$1.6 million, \$1.5 million, and \$0.6 million respectively, of non-cash stock compensation expense. As of December 31, 2020, total unamortized compensation cost related to unvested restricted stock awards was \$0.6 million, which the Company expects to recognize over the remaining weighted-average period of 0.44 years.

Rollforward of restricted stock awards as of December 31, 2020 is as follows:

	Number of Restricted Stock Awards (In thousands)	Weighted a grant dat value	e fair
Total non-vested at December 31, 2019	292	\$	4.55
Shares issued	687		2.16
Shares vested	(349)		3.93
Shares forfeited	(7)		4.55
Non-vested balance at December 31, 2020	623	\$	2.27

(c) Restricted stock units

For the years ended December 31, 2020, 2019 and 2018, the Company recognized \$19.2 million, \$20.4 million and \$9.8 million, respectively, of non-cash stock compensation expense. As of December 31, 2020, total unamortized compensation cost related to unvested restricted stock units was \$15.9 million, which the Company expects to recognize over the remaining weighted-average period of 1.79 years.

Rollforward of restricted stock units as of December 31, 2020 is as follows:

	Number of Restricted Stock Units (In thousands)	gran	ted average t date fair value
Total non-vested at December 31, 2019	2,760	\$	10.82
Units issued	4,208		4.77
Units vested	(2,121)		9.88
Units forfeited	(760)		5.19
Non-vested balance at December 31, 2020	4,087	\$	6.12

(d) Non-qualified stock options

For the years ended December 31, 2020, 2019 and 2018, the Company recognized \$0.9 million, 3.5 million and \$2.5 million, respectively, of non-cash stock compensation expense. As of December 31, 2020, total unamortized compensation cost related to unvested stock options was \$0.1 million, which the Company expects to recognize over the remaining weighted-average period of 0.21 years.

Rollforward of stock options as of December 31, 2020 is as follows:

	Number of Stock Options (In thousands)	gran	ted average t date fair value
Total outstanding at December 31, 2019	1,743	\$	4.86
Options granted	_		_
Options exercised	_		_
Actual options forfeited	(2)		7.35
Options expired			_
Total outstanding at December 31, 2020	1,741	\$	4.86

There were 1.7 million stock options exercisable or vested at December 31, 2020.

Assumptions used in calculating the fair value of the stock options granted during the year are summarized below:

		2019 Options Granted		2018 Options Granted		2017 Options Granted
Valuation assumptions:						
Expected dividend yield		0%		0%		0%
Expected equity volatility		49.6%		46.3%		51.5%
Expected term (years)	7	.3 - 8.1		6		6
Risk-free interest rate		1.7%		2.7%		1.6%
Weighted average:						
Exercise price per stock option	\$19.09 -	\$26.41	\$	15.31	\$	19.00
Market price per share	\$	4.55	\$	15.31	\$	14.49
Weighted average fair value per stock option	\$	0.74	\$	7.28	\$	6.16

(e) Performance-based RSU awards

During the first quarter of 2020, the Company issued 1,033,936 of performance-based RSUs to executive officers under its Equity Award Plans, which were fair valued at \$8.5 million using a Monte Carlo simulation method. 50% of the performance-based RSUs vest after two years (the "two-year performance-based RSUs"), while the remaining 50% vest after three years (the "three-year performance-based RSUs"). Each vesting is subject to a payout percentage based on the Company's annualized total stockholder return ranking relative to its total stockholder return peer group achieved during the performance period. The number of shares that may be earned at the end of the vesting period ranges from 50% to 200% of the target award amount, if the threshold performance criteria is met. These performance-based RSUs will be settled in the Company's common stock and are classified as equity awards. The compensation expense associated with these performance-based RSUs will be amortized into earnings on a straight-line basis. As of December 31, 2020, total unamortized compensation cost related to unvested performance-based RSUs was \$4.4 million, which the Company expects to recognize over the weighted-average period of 2.00 years.

During the second quarter of 2020, the Company issued 405,541 of performance-based RSUs to executive officers under its Equity Award Plans, with an estimated value of \$1.2 million, based on a 100% target value. The performance RSUs issued by the Company have service and performance conditions. The number of shares that may be earned at the end of the vesting period ranges from 0% to 150% of the target award amount, if the performance criteria is met. These performance-based RSUs will be settled in the Company's common stock and are classified as equity awards. The compensation expense associated with these performance-based RSUs will be amortized into earnings on a straight-line basis. As of December 31, 2020, total unamortized compensation cost related to unvested performance-based RSUs was \$0.8 million, which the Company expects to recognize over the weighted-average period of 1.00 years.

	Number of Performance-based RSU's (In thousands)	Weighted average grant date fair value
Total outstanding at December 31, 2019	_	\$
Performance-based RSU's issued	1,439	6.75
Performance-based RSU's vested	(123)	1.65
Performance-based RSU's forfeited	(48)	9.25
Total outstanding at December 31, 2020	1,268	\$ 7.15

Assumptions used in calculating the fair value of the first quarter performance-based RSU's granted during the year are summarized below:

	2020 Performance based RSU's Granted
<u>Valuation assumptions:</u>	
Expected dividend yield	0%
Expected equity volatility, including peers	31.7% - 97.4%
Expected term (years)	2 - 3
Risk-free interest rate	0.8% - 1.6%

(13) Stockholders' Equity

(a) Vesting of Stock Awards

During the year ended December 31, 2020, 2,170,659 shares were issued, net of share settlements for payment of payroll taxes, upon the vesting of stock-based compensation awards. Shares withheld during the period were immediately retired by the Company.

(b) Secondary Offerings

On January 17, 2018, the Company's Registration Statement on Form S-1 (File No. 333-222500) was declared effective by the SEC for an offering on behalf of Keane Investor, pursuant to which 15,320,015 shares were sold by the selling stockholder (including 1,998,262 shares sold pursuant to the exercise of the underwriters' overallotment option) at a price to the public of \$18.25 per share. The Company did not sell any common stock in, and did not receive any of the proceeds from, the offering. Upon completion of the offering, Keane Investor controlled 50.8% of the Company's outstanding common stock. During the December 31, 2018, the Company incurred \$13.0 million of transaction costs on behalf of the selling stockholder, which were included within selling, general and administrative expenses in the consolidated statement of operations and comprehensive income (loss).

In February 2018, the Company filed a Registration Statement on Form S-3 (File No. 333-222831) that was effective upon its filing. In December 2018, a selling stockholder sold 5,251,249 of the Company's common stock at a price to the public of \$11.02 per share. In conjunction with this offering, the Company repurchased 520,000 shares. The Company did not sell any common stock in, and did not receive any of the proceeds from, this offering. As a result of this offering, Keane Investor owned approximately 49.6% of the Company's outstanding common stock, and the Company ceased being a "controlled company" within the meaning of the NYSE rules.

(c) C&J Merger

As described in Note (3) Mergers and Acquisitions, the Company completed the C&J Merger on October 31, 2019 for total consideration of approximately \$485.1 million, consisting of (i) equity consideration in the form of 105.9 million shares of Keane common stock issued to C&J stockholders with a value of \$481.9 million and (ii) replacement share based compensation awards attributable to pre-Merger services with a value of \$3.2 million.

(d) Stock Repurchase

During the year ended December 31, 2018, the Company settled \$105.0 million of total share repurchases of its common stock at an average price of \$12.93 per share, representing a total of 8,111,764 common shares of the Company. Of the total amount of shares repurchased in 2018, 1,248,440 shares and 520,000 shares were repurchased from White Deer Energy (as defined herein) and Keane Investor, respectively. The shares repurchased from Keane Investor were not repurchased under the Company's existing stock repurchase program. For further details of these related-party transactions, see Note (19) Related Party Transactions.

On December 11, 2019, the Company announced the board of directors approved a new share repurchase program for up to \$50.0 million through December 2020. No share repurchases were made under the share repurchase program in the years ended December 31, 2020 or 2019.

(14) Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss in the equity section of the consolidated balance sheets includes the following:

	(Thousands of Dollars)						
Fo		Foreign currency items		nterest rate contract		AOCI	
December 31, 2019	\$	(116)	\$	(8,665)	\$	(8,781)	
Net income (loss)				2,334		2,334	
Other comprehensive loss		(241)		(6,422)		(6,663)	
December 31, 2020	\$	(357)	\$	(12,753)	\$	(13,110)	

The following table summarizes reclassifications out of accumulated other comprehensive loss into earnings during years ended December 31, 2020, 2019 and 2018 (in thousands of dollars):

	Ye	Affected line item in the consolidated statements of operations and comprehensive income (loss)		
	2020	2019	2018	
Interest rate derivatives, hedging	\$ (2,334)	\$ 239	\$ 697	Interest expense
Foreign currency items ⁽¹⁾		 _	(2,621)	Other income
Total reclassifications	\$ (2,334)	\$ 239	\$ (1,924)	

During the fourth quarter of 2018, the Company liquidated its Canadian subsidiary, upon which it recognized a loss of \$2.6 million from AOCI into earnings in the consolidated statement of operations and comprehensive income for the year ended December 31, 2018.

(15) Earnings per Share

Basic income or (loss) per share is based on the weighted average number of common shares outstanding during the period. Restricted stock awards and RSUs are not considered issued and outstanding for purposes of earnings per share calculations until vested.

Diluted income or (loss) per share includes additional common shares that would have been outstanding if potential common shares with a dilutive effect, such as stock awards from the Company's Equity and Incentive Award Plan, had been issued. Anti-dilutive securities represent potentially dilutive securities that are excluded from the computation of diluted income or (loss) per share as their impact would be anti-dilutive.

A reconciliation of the numerators and denominators used for the basic and diluted net loss per share computations is as follows (in thousands):

	Year Ended December 31,						
		2020		2019		2018	
Numerator:							
Net income (loss)	\$	(346,883)	\$	(106,157)	\$	59,331	
Denominator:							
Basic weighted-average common shares outstanding ⁽¹⁾		213,795		122,977		109,335	
Dilutive effect of restricted stock awards		199		43		17	
Dilutive effect of deferred stock award granted to NEOs		_		_		214

⁽¹⁾ As a result of the net loss incurred by the Company for the years ended December 31, 2020 and 2019, the calculation of diluted net loss per share gives no consideration to the potentially anti-dilutive securities shown in the above reconciliation, and as such is the same as basic net loss per share.

(16) Leases

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)," which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a purchase financed by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight-line basis over the term of the lease. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term greater than 12 months, regardless of their classification. Leases with a term of 12 months or less may be accounted for similarly to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. In December 2018, the FASB issued ASU 2019-20, "Leases (Topic 842): Narrow-Scope Improvements for Lessors," which allows lessors to make a policy election to exclude sales taxes and other similar taxes from determining the consideration in the contract and variable payments not included in the consideration in the contract, requires lessors to exclude from variable payments lessor costs paid by lessees directly to third parties and clarified the accounting for variable payments for contracts with lease and nonlease components. The Company adopted these standards effective January 1, 2019, using the modified retrospective transition method. The Company recognized a lease right-of-use asset and lease liability of approximately \$61.0 million on its consolidated balance sheet on January 1, 2019, for its operating leases that existed upon the effective date, with no additional impact to its consolidated statements of operations and comprehensive loss or statements of cash flows. The Company also determined that while its hydraulic fracturing fleets represent lease components in its customer contracts, these lease components do not represent the predominant components in its customer contracts. As such the Company has elected to account for the combined components of its customer contracts under ASC 606. In connection with the adoption of these standards, the Company implemented internal controls to ensure that the Company's contracts are properly evaluated to determine applicability under ASU 2016-02 and that the Company properly applies ASU 2016-02 in accounting for and reporting on all its qualifying leases.

The Company has operating leases for certain of its corporate offices, field shops, apartments, warehouses, rail cars, frac pumps, trailers, tractors and certain other equipment. The Company also has both operating and finance leases for its light duty vehicles.

The Company's leases have variable payments with annual escalations that are based on the proportion by which the consumer price index ("CPI") for all urban consumers increased over the CPI index for the prior comparative year. The Company's leases have remaining lease terms of less than 1 to 14 years, some of which include extension and termination option. None of these extension and termination options were used to determine the Company's right-of-use assets and lease liabilities, as the Company has not determined it is probable that it will exercise any of these options. None of the Company's leases have residual value guarantees.

The components of the Company's lease costs are as follows:

	(Thousa	ands of Dollars)		
		ear ended nber 31, 2020		Year ended December 31, 2019
Operating lease cost	\$	15,702	\$	26,948
Finance lease cost:				
Amortization of right-of-use assets		2,027		3,356
Interest on lease liabilities		269		625
Total finance lease cost	•	2,296		3,981
Short-term and Variable lease cost ⁽¹⁾		7,469		16,838
Sublease income		_		(116)
Total lease cost	\$	25,467	\$	47,651

⁽¹⁾ Cost from variable amounts excluded from determination of lease liability.

Supplemental cash flows related to leases are as follows:

	(Thousands of Dollars)	
	 Year ended December 31, 2020	 ar ended iber 31, 2019
Cash paid for amounts included in the measurements of lease liabilities		
Operating cash flows from operating leases	\$ 21,049	\$ 25,318
Operating cash flows from finance leases	240	565
Financing cash flows from finance leases	3,752	6,035

Weighted average remaining lease terms are as follows:

	Year ended December 31, 2020	Year ended December 31, 2019				
Operating leases	4.72 years	4.74 years				
Finance leases	1.88 years	2.28 years				

Weighted average discount rate on the Company's lease liabilities are as follows:

	Year ended December 31, 2020	Year ended December 31, 2019
Operating leases	8.65%	5.73%
Finance leases	5 79%	5.53%

Maturities of the Company's lease liabilities as of December 31, 2020, per ASU 2016-02, were as follows:

	(Thousands of Dollars)						
Year ending December 31,		Operating leases	Finance leases				
2021	\$	20,856	\$	653			
2022		9,751		422			
2023		6,888		97			
2024		2,324		_			
2025		1,866		_			
Thereafter		9,161		_			
Total undiscounted remaining minimum lease payments		50,846		1,172			
Less imputed interest		(8,063)		(62)			
Total discounted remaining minimum lease payments	\$	42,783	\$	1,110			

The Company did not make any lease reassessments or modifications nor did it recognize any gains or losses on sale-leaseback transactions during the year ended December 31, 2020.

As of December 31, 2020, the Company does not have additional operating and finance leases that have not yet commenced, nor did the Company have any lease transactions with any of its related parties.

(17) Income Taxes

The following table summarizes the income (loss) from continuing operations before income taxes in the following jurisdictions:

	(Thousands of Dollars)						
	Year Ended December 31,						
		2020		2019		2018	
Domestic	\$	(357,250)	\$	(106,879)	\$	66,260	
Foreign		11,837		1,727		(2,659)	
	\$	(345,413)	\$	(105,152)	\$	63,601	

The components of the Company's income tax provision are as follows:

		(Thousands of Dollars)					
	_	Year Ended December 31,					
		2020		2019	2018		
Current:							
State	\$	(297)	\$	709	\$	5,387

Total deferred income tax provision		(91)		(331)		(1,148)	
	\$	1,470	\$	1,005	\$	4,270	

The following table presents the reconciliation of the Company's income taxes calculated at the statutory federal tax rate, currently 21%, to the income tax provision in its consolidated statements of operations and comprehensive (loss). The Company's effective tax rate for 2020 of (0.43)% differs from the statutory rate, primarily due to state taxes, foreign withholding taxes, and a change in the valuation allowance. The Company's effective tax rate for 2019 was (0.96)%.

	(Thousands of Dollars)						
	Dec	cember 31, 2020	December 31, 2019			December 31, 2018

As of December 31, 2020, NexTier had total U.S. federal tax net operating loss ("NOL") carryforwards of \$1.2 billion, of which, \$380.2 million, if not utilized, will begin to expire in the year 2031. The remaining federal NOLS can be carried forward indefinitely. The total deferred tax asset for net operating loss and other carryforwards also includes approximately \$42.1 million of interest expense carryovers with indefinite life. Of the federal NOLs that can be carried forward indefinitely, \$352.2 million is related to the Company's current year federal tax loss. The Company has state NOLS of \$480.1 million, which if not utilized, will expire in various years between 2025 and 2038. Additionally, the Company has \$20.3 million of NOLs in foreign jurisdictions that, if not utilized, will begin to expire in the year 2035.

As a result of the C&J Merger on October 31, 2019, NexTier had a change in ownership for purposes of Section 382 of the Internal Revenue Code ("IRC"). As a result, the amount of pre-change NOLs and other tax attributes that are available to offset future taxable income are subject to an annual limitation. The annual limitation

is based on the value of the Company as of the effective date of the C&J Merger. The Company's Section 382 annual limitation is \$8.5 million. In addition, this annual limitation is subject to adjustments from the realization of net unrealized built-in gain ("NUBIG") during a five-year recognition period ending October 31, 2024. As of December 31, 2020, it is expected that all of the Company's pre-change NOLs of \$398.8 million incurred prior to the C&J Merger will be available for use during the applicable carryforward period without becoming permanently lost by the Company due to expiration. The Company's pre-change NOLs subject to expiration comprise \$275.8 million out of the total \$398.8 million.

C&J Energy Services, Inc. had Pre-change NOLs carry forward prior to the C&J Merger. As a result of the C&J Merger, such NOLs were carried over to the Company. These NOLs are also subject to an annual limitation under IRC Section 382. The Company's annual limitation with respect to the C&J Energy NOLs is \$8.6 million and is subject to adjustments from the realization of net unrealized built-in loss ("NUBIL") during a five-year recognition period ending October 31, 2024. Due to this IRC Section 382 annual limitation, some of the NOLs carried over to the Company from C&J Energy Services, Inc. are expected to become permanently lost by the Company due to the expiration and will not be available for use by the Company during the applicable carryforward period. The Company has not reflected the NOLs expected to expire as a result of this limitation in its summary of deferred tax assets or in the NOLs disclosed within this paragraph. The pre-change NOLs carried over from C&J Energy Services, Inc. including built-in loss through December 31, 2020, total \$405.8 million of which \$104.4 million are subject to expiration, but not expected to expire as a result of the IRC Section 382 limitation.

ASC 740, "Income Taxes," requires the Company to reduce its deferred tax assets by a valuation allowance if, based on the weight of the available evidence, it is more likely than not that all or a portion of a deferred tax asset will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences are deductible. As a result of the Company's evaluation of both the positive and negative evidence, the Company determined it does not believe it is more likely than not that its deferred tax assets will be utilized in the foreseeable future and has recorded a valuation allowance. The valuation allowance as of December 31, 2020 fully offsets the net deferred tax assets, excluding deferred tax liabilities related to certain indefinite-lived assets. The valuation allowance as of December 31, 2017 fully offsets the impact of the initial benefit recorded related to the formation of NexTier Oilfield Solutions Inc., excluding deferred tax liabilities related to certain indefinite lived assets. This initial deferred impact was recorded as an adjustment to equity due to a transaction between entities under common control. The valuation allowances as of December 31, 2020, 2019, and 2018 were \$294.1 million, \$223.4 million and \$41.8 million, respectively.

Changes in the valuation allowance for deferred tax assets were as follows:

	(Thousands of Dollars)		
Valuation allowance as of the beginning of January 1, 2020	\$ 223,419		
Divestiture	(13,450)		
Charge as (benefit) expense to income tax provision for current activities	82,557		
Changes to other comprehensive income (loss)	 1,575		
Valuation allowance as of December 31, 2020	\$ 294,101		

On December 22, 2017, the U.S. government enacted the Tax Act. The Tax Act makes broad and complex changes to the U.S. tax code, including but not limited to, (1) the requirement to pay a one-time transition tax on all undistributed earnings of foreign subsidiaries; (2) reducing the U.S. federal corporate income tax rate from 35% to 21%; (3) eliminating the alternative minimum tax; (4) creating a new limitation on deductible interest expense; and (5) changing rules related to use and limitations of net operating loss carryforwards created in tax years beginning after December 31, 2017.

The Company evaluated the provisions of the Tax Act and determined only the reduced corporate tax rate from 35% to 21% would have an impact on its consolidated financial statements as of December 31, 2017. Accordingly, the Company recorded a provision to income taxes for the Company's assessment of the tax impact of the Tax Act on ending deferred tax assets and liabilities and the corresponding valuation allowance. The effects of other provisions of the Tax Act are not expected to have an adverse impact on the Company's consolidated financial

statements. The Company finalized its analysis of the Tax Act in 2018 and will continue to monitor guidance on provisions of the Tax Act to be issued by taxing authorities to assess the impact on the Company's consolidated financial statements.

There were no unrecognized tax benefits nor any accrued interest or penalties associated with unrecognized tax benefits during the years ended December 31, 2020, 2019 and 2018. The Company believes it has appropriate support for the income tax positions taken and to be taken on the Company's tax returns, and its accruals for tax liabilities are adequate for all open years based on our assessment of many factors including past experience and interpretations of tax law applied to the facts of each matter. The Company classifies interest and penalties within the provision for income taxes. The Company's tax returns are open to audit under the statute of limitations for the years ended December 31, 2017 through December 31, 2019 for federal tax purposes and for the years ended December 31, 2016 through December 31, 2019 for state tax purposes.

(18) Commitments and Contingencies

As of December 31, 2020, and 2019, the Company had \$4.9 million and \$9.0 million of deposits on equipment, respectively. Outstanding purchase commitments on equipment were \$23.4 million and \$64.0 million, as of December 31, 2020, and 2019, respectively.

As of December 31, 2020, the Company has a letter of credit of \$28.5 million under the 2019 ABL Facility.

In the normal course of operations, the Company enters into certain long-term raw material supply agreements for the supply of proppant to be used in hydraulic fracturing. As part of some of these agreements, the Company is subject to minimum tonnage purchase requirements and may pay penalties in the event of any shortfall. The Company purchased \$77.6 million, \$160.0 million and \$107.4 million amounts of proppant under its take-or-pay agreements during the years ended December 31, 2020, 2019 and 2018.

Aggregate minimum commitments under long-term raw material supply agreements with payment penalties for minimum tonnage purchases for the next five years as of December 31, 2020 are listed below:

	(Thous	ands of Dollars)
Year-end December 31,		
2021	\$	23,418
2022		17,430
2023		7,500
2024		1,190
2025		_
	\$	49,538

Litigation

From time to time, the Company is subject to legal and administrative proceedings, settlements, investigations, claims and actions, as is typical of the industry. These claims include, but are not limited to, contract claims, environmental claims, employment related claims, claims alleging injury or claims related to operational issues and motor vehicle accidents. The Company's assessment of the likely outcome of litigation matters is based on its judgment of a number of factors, including experience with similar matters, past history, precedents, relevant financial information and other evidence and facts specific to the matter. The Company may increase or decrease its legal accruals in the future, on a matter-by-matter basis, to account for developments in such matters. Notwithstanding the uncertainty as to the final outcome and based upon the information currently available to it, the Company does not currently believe these matters in aggregate will have a material adverse effect on its consolidated financial position, results of operations or liquidity.

Environmental

The Company is subject to various federal, state and local environmental laws and regulations that establish standards and requirements for protection of the environment. The Company cannot predict the future impact of such standards and requirements, which are subject to change and can have retroactive effectiveness. The Company continues to monitor the status of these laws and regulations. Currently, the Company has not been fined, cited or notified of any environmental violations that would have a material adverse effect upon its financial position, liquidity or capital resources. However, management does recognize that by the very nature of the Company's business, material costs could be incurred in the near term to maintain compliance. The amount of such future expenditures is not determinable due to several factors, including the unknown magnitude of possible regulation or liabilities, the unknown timing and extent of the corrective actions which may be required, the determination of the Company's liability in proportion to other responsible parties and the extent to which such expenditures are recoverable from insurance or indemnification.

Regulatory Audits

Prior to the consummation of the C&J Merger, the Company and C&J had been notified by certain state taxing authorities that these taxing authorities would be conducting routine sales and use tax audits of certain wholly owned operating subsidiaries of the Company for tax periods ranging from January 2011 through December 2019. The Company has recorded estimates of potential assessments for each audit totaling in the aggregate approximately \$33.0 million. For one audit, in particular, the Company disagrees with many aspects of the state's preliminary report and intends to contest the state's position through litigation, if necessary. In addition, this reserve does not take into account the potential for refund claims in which the Company has not recorded.

(19) Related Party Transactions

Cerberus Operations and Advisory Company, Cerberus Capital Management, L.P. and Cerberus Technology Solutions LLC, affiliates of the Company's principal equity holder, provide certain consulting services to the Company. The Company paid \$2.2 million, \$4.1 million and \$0.3 million during the years ended December 31, 2020, 2019 and 2018, respectively.

In connection with the Organization Transaction, the Company engaged in transactions with affiliates. See Note (1) Basis of Presentation and Nature of Operations and Note (13) Stockholders' Equity for a description of these transactions.

In connection with the Company's research and development initiatives, the Company engaged in transactions with its equity-method investee. As of December 31, 2020, the Company had purchased \$1.7 million of shares in its equity-method investee. In the first quarter of 2020, the Company had enough evidence to believe that it would not be able to recover its \$1.7 million investment in its equity-method investee and completely impaired it. The impairment is recorded in impairment expense in the consolidated statement of operations and comprehensive income (loss). For additional information, see Note (2) Summary of Significant Accounting Policies

(20) Retirement Benefits and Nonretirement Postemployment Benefits

Defined Contribution Plan

The Company sponsors two different 401(k) defined contribution retirement plans covering eligible employees. The Company makes matching contributions of up to 3.5% of eligible compensation, but suspended the Company matching contribution to the 401(k) plans as of May 1, 2020. Eligible employees can make annual contributions to one of the two plans for which they are eligible up to the maximum amount allowed by current federal regulations, as noted in the plan documents. Contributions made by the Company related to the years ended December 31, 2020, 2019, and 2018 were \$4.5 million, \$8.1 million and \$6.7 million, respectively.

Severance

The Company provides severance benefits to certain of its employees in connection with the termination of their employment. Severance benefits offered by the Company were \$27.0 million, \$16.7 million and \$0.6 million for the years ended December 31, 2020, 2019 and 2018, respectively.

(21) Business Segments

In accordance with Accounting Standard Codification ("ASC") No. 280, Segment Reporting ("ASC 280"), the Company routinely evaluates whether its separate segments have changed. This determination is made based on the following factors: (1) the Company's chief operating decision maker ("CODM") is currently managing each operating segment as a separate business and evaluating the performance of each segment and making resource allocation decisions distinctly and expects to do so for the foreseeable future, and (2) discrete financial information for each operating segment is available.

In 2019, due to the transformative nature of the C&J Merger, the CODM changed the way in which the Company is managed, including the level at which to make performance evaluation and resource allocation decisions. Discrete financial information was created to provide the segment information necessary for the CODM to manage the Company under the revised operating segment structure. On March 9, 2020 the Company announced it had completed the divestiture of its Well Support Services ("WSS") segment. As a result of the changes to operating segments, the Company revised its reportable segments subsequent to the completion of the C&J Merger and prior to the WSS divestiture, the Company's revised reportable segments were: (i) Completion Services and (ii) Well Construction and Intervention ("WC&I") and (iii) Well Support Services. Subsequent to the WSS divestiture, the Company's reportable segments were (i) Completion Services, and (ii) Well Construction and Intervention Services. This segment structure reflects the financial information and reports used by the Company's management, specifically including its CODM, to make decisions regarding the Company's business, including performance evaluation and resource allocation decisions. As a result of the revised reportable segment structure subsequent to the C&J merger, the Company has restated the corresponding items of segment information for all periods presented.

The following is a description of each reportable segment:

Completion Services

The Company's Completion Services segment consists of the following businesses and service lines: (1) fracturing services; (2) wireline and pumpdown services; and (3) completion support services, which includes the Company's research and technology department.

Well Construction and Intervention Services

The Company's WC&I Services segment consists of the following businesses and service lines: (1) cementing services and (2) coiled tubing services.

Historical Segment: Well Support Services

The Company's Well Support Services segment consisted of the following businesses and service lines: (1) rig services; (2) fluids management services; and (3) other specialty well site services. On March 9, 2020, the Company completed the divestiture of its Well Support Services segment for \$93.7 million of total proceeds, including \$59.4 million in cash, before transaction costs, escrowed amounts, and subject to customary working capital adjustments, for a net of \$53.3 million received at close, and \$34.4 million of par value Senior Secured Notes, with 10.75% coupon rate, ("WSS Notes") previously issued by Basic. This resulted in a gain on divestiture of \$8.7 million. The gain is recorded within (Gain) Loss on Disposal of Assets on the Consolidated Statements of Operations and Comprehensive (Loss) Income. Income per share for the three months ended March 31, 2020 attributable to the divested Well Support Services segment was less than \$0.01. On July 29, 2020, the Company received the escrowed cash amount in final settlement for working capital reconciliation.

The following tables present financial information with respect to the Company's segments. Corporate and Other represents costs not directly associated with a segment, such as interest expense, income taxes and corporate overhead. Corporate assets include cash, deferred financing costs, derivatives and entity-level machinery equipment.

	Year Ended December 31,

(22) Selected Quarterly Financial Data

The following table sets forth certain unaudited financial and operating information for each quarter of the years ended December 31, 2020 and 2019. The unaudited quarterly information includes all adjustments that, in the opinion of management, are necessary for the fair presentation of the information presented. Operating results for interim periods are not necessarily indicative of the results that may be expected for a full fiscal year.

(23) New Accounting Pronouncements

(a) Recently Adopted Accounting Standards

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," which introduces a new impairment model for financial instruments that is based on expected credit losses rather than incurred credit losses. The new impairment model applies to most financial assets, including trade accounts receivable and lease receivables. In November 2018, the FASB issued ASU No. 2018-19, "Codification Improvements to Topic 326, Financial Instruments-Credit Losses," which clarified that receivables arising from operating leases are not within the scope of ASC 326-20, "Financial Instruments-Credit Losses-Measured at Amortized Cost," and should be accounted for in accordance with ASC 842. In April 2019, the FASB issued ASU No. 2019-04, "Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments," which clarified certain amendments related to ASU 2016-13. In May 2019, the FASB issued ASU No. 2019-05, "Financial Instruments-Credit Losses (Topic 326): Targeted Transition Relief," which clarifies certain aspects of the amendments in ASU 2016-13. In November 2019, the FASB issued ASU No. 2019-10, "Financial Instruments - Credit Losses (Topic 326), Derivatives and Hedging (Topic 815), and Leases (Topic 842) and ASU 2019-11 Codification Improvements to Topic 326, Financial Instruments—Credit Losses."

The Company adopted these new standards effective January 1, 2020 and analyzed its trade accounts receivable based on a risk assessed portfolio approach, incorporating current and forecasted economic conditions as of January 1, 2020 which resulted in the increase of \$1.5 million of allowances for expected credit losses related to our accounts receivable through a cumulative effect offset to retained earnings.

In August 2018, the FASB issued ASU 2018-13, "Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement." This standard removed, modified and added disclosure requirements from ASC 820. ASU 2018-13 is effective for annual periods beginning after December 15, 2019. The Company adopted this standard on January 1, 2020 and there was no impact to its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, "Intangibles - Goodwill and Other - Internal-Use Software: Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract." The amendments in this standard aligned the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The Company adopted this standard on January 1, 2020 and there was no impact on its consolidated financial statements.

In November 2018, the FASB issued ASU 2018-18, "Collaborative Arrangements (Topic 808): Clarifying the Interaction between Topic 808 and Topic 606." The amendments in this standard clarified that certain transactions should be accounted for under ASC 606 if one of the collaborative arrangement participants meets the definition of a customer and that transactions between collaborative participants not directly related to sales to third parties should not be recognized as revenue under Topic 606, if one of the collaborative arrangement participants is not a customer. The Company adopted this standard on January 1, 2020 and there was no impact on its consolidated financial statements.

In July 2019, the FASB issued ASU 2019-07, "Codification Updates to SEC Sections—Amendments to SEC Paragraphs Pursuant to SEC Final Rule Releases No. 33-10532, Disclosure Update and Simplification, and Nos. 33-10231 and 33-10442, Investment Company Reporting Modernization, and Miscellaneous Updates (SEC Update)". The Company adopted this standard on January 1, 2020 and there was no impact on its consolidated financial statements.

In August 2019, the FASB issued ASU 2019-08, "Compensation - Stock Compensation (Topic 718) and Revenue from Contracts with Customers (Topic 606): Codification Improvements - Share-Based Consideration Payable to a Customer". ASU 2019-08 expands the scope of ASC Topic 718 to provide guidance for share-based payment awards granted to a customer in conjunction with selling goods or services accounted for under Topic 606. The Company adopted this standard on January 1, 2020 and there was no impact on its consolidated financial statements, as the Company has only issued shares to employees or nonemployee directors and has previously recognized its nonemployee directors share-based payments in line with its recognition of share-based payments to employees, using the grant-date fair value of the equity instruments issued, amortized over the requisite service period.

In March 2020, the FASB issued ASU 2020-03, "Codification Improvements to Financial Instruments," which improves and clarifies various financial instruments topics, including the current expected credit losses (CECL) standard issued in 2016. The ASU includes seven different issues that describe the areas of improvement and the related amendments to GAAP, intended to make the standards easier to understand and apply by eliminating inconsistencies and providing clarifications. The amendments have different effective dates. The Company early adopted this new accounting guidance, and there was no additional impact on its consolidated financial statements.

(b) Recently Issued Accounting Standards

In January 2021, the FASB issued ASU 2021-01 "Reference Rate Reform (Topic 848)". ASU 2021-10 expands on the US GAAP guidance on contract modifications and hedge accounting related to the expected market transition from the London Interbank Offered Rate (LIBOR) and other interbank offered rates to alternative reference rates. This standard is effective beginning on March 12, 2020, and the Company may elect to apply the amendments prospectively through December 31, 2022. The Company is currently evaluating the impact of this standard on its consolidated financial statements and related disclosures.

In October 2020, the FASB issued ASU 2020-10 'Codification Improvements'. ASU 2020-10 improves the clarity and consistency of various provisions in the Codification. The Company does not expect ASU 2020-10 to have any impact on the its consolidated financial statements.

In August 2020, the FASB issued ASU 2020-06 "Debt—Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging—Contracts in Entity's Own Equity (Subtopic 815-40) ("ASU 2020-06"). ASU 2020-06 simplifies the guidance on the issuer's accounting for convertible debt instruments and convertible preferred stock. The Company does not expect ASU 2020-06 to have any impact on the Company's consolidated financial statements.

In June 2020, the FASB issued ASU 2020-05, "Revenue from Contracts with Customers (Topic 606) and Leases (Topic 842): Effective Dates for Certain Entities," which provides a limited deferral of the effective dates of "Revenue from Contracts with Customers (ASC 606)" and "Leases (ASC 842)" to provide immediate, near-term relief for certain entities for whom these updates are either currently effective or imminently effective. The Company does not expect ASU 2020-05 to have any impact on the Company's consolidated financial statements.

In March 2020, the FASB issued ASU 2020-04, "Reference Rate Reform (Topic 848)," which is intended to provide temporary optional expedients and exceptions to the US GAAP guidance on contract modifications and hedge accounting to ease the financial reporting burdens related to the expected market transition from the London Interbank Offered Rate (LIBOR) and other interbank offered rates to alternative reference rates. This standard is effective beginning on March 12, 2020, and the Company may elect to apply the amendments prospectively through December 31, 2022. The Company is currently evaluating the impact of this standard on its consolidated financial statements and related disclosures.

In January 2020, the FASB issued ASU 2020-01, "Investments—Equity Securities (Topic 321), Investments—Equity Method and Joint Ventures (Topic 323), and Derivatives and Hedging (Topic 815)," which clarifies the interaction between the accounting for investments in equity securities, investment in equity method and certain derivatives instruments. This standard is expected to reduce diversity in practice and increase comparability of the accounting for these interactions. This standard is effective for fiscal years beginning after December 15, 2021 and the adoption is not expected to have any impact on the Company's consolidated financial statements.

In December 2019, the Financial Accounting Standards Board issued ASU No 2019-12, "Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes" ("ASU 2019-12"). ASU 2019-12 removes certain exceptions to the general principles in Topic 740 in Generally Accepted Accounting Principles. ASU 2019-12 is effective for public entities for fiscal years beginning after December 15, 2020, with early adoption permitted. The Company does not expect ASU 2019-12 to have a material effect on the Company's current financial position, results of operations or financial statement disclosures.

Item 9. Changes in and Disagreements With Accountant on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of such date. Our disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act).

Internal control over financial reporting, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to our financial statement preparation and presentation. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation to assess the effectiveness of our internal control over financial reporting as of December 31, 2020, based upon criteria set forth in the "Internal Control - Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment, we believe that as of December 31, 2020, our internal control over financial reporting is effective.

The effectiveness of our internal control over financial reporting as of December 31, 2020 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report that is included herein.

Changes in Internal Control Over Financial Reporting

Effective January 1, 2020, we adopted ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments," which resulted in the increase of \$1.5 million of allowances for expected credit losses related to our accounts receivable through a cumulative effect offset to retained earnings. In connection with the adoption of this standard, we implemented internal controls to ensure we properly evaluate our financial assets for applicability.

On October 31, 2019, we completed the C&J Merger, which resulted in changes to internal controls over the consolidation and reporting of our financial results. In the second quarter of 2020, the Company completed the implementation of a single ERP system. We also continue to further simplify, harmonize and automate processes and migrate data, including from ancillary systems. In connection with the implementation, harmonization, and migrations and the resulting business process changes, we have reviewed and continue to execute, where appropriate, the re-design and documentation of our internal control over financial reporting processes to maintain effective controls over our financial reporting. These transitions have not materially affected, and we do not expect them to materially affect, our internal controls over financial reporting. The consolidated financial statements

presented in this Annual Report on Form 10-K were prepared using information obtained from these separate accounting systems.

Except as described above, there were no changes to our internal control over financial reporting that occurred during the quarter ended December 31, 2020 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
