ORIENTAL 2012: A SNAPSHOT

ASSETS

Oriental's acquisition of BBVAPR plus organic growth led to a sharp increase in our loan balances in 2012. Assets rose 37% year over year to \$9.2 billion at December 31, 2012, making Oriental one of Puerto Rico's leading banking and financial services companies.

LOAN DIVERSITY

The diversity of our loan portfolio improved significantly. At year-end, commercial loans represented 38% of non-covered gross loans, up from 28% a year ago; residential mortgages were 35% versus 65%; and auto/consumer loans were 27% versus 7%.

CORE RETAIL DEPOSITS

As an especially well-capitalized bank, Oriental continued to attract new customers, expand existing relationships, and benefit from the acquisition. Core retail deposits more than doubled to \$4.2 billion for a 15% market share, third largest in Puerto Rico.

DEPOSIT FUNDING

The increase in loans and deposits transformed Oriental. Deposits as a percentage of interest-bearing liabilities increased to 70% at December 31, 2012, from 41% a year ago; while net loans as a percentage of interest-earning assets increased to 70%, from 30% at December 31, 2011.

DEPOSIT UTILIZATION

The transformation facilitated better utilization of local deposits to fund local loans, thereby helping Puerto Rico's economy. Net loans to total deposits increased to 91% at December 31, 2012, from 68% a year ago.

WEALTH MANAGEMENT ASSETS*

Trust assets under management and broker-dealer assets gathered increased 26% year over year to \$5.2 billion at December 31, 2012. These assets play a major role in growing our wealth management business.

* There is minor overlap between trust assets managed and broker-dealer assets gathered.

TANGIBLE BOOK VALUE

Working diligently to preserve and grow capital, Oriental's tangible book value per share since 2008 has grown an average of 16% per year. It stood at \$13.59 at December 31, 2012, down 11% due solely to the booking of \$61 million in goodwill from the BBVAPR acquisition.

José Rafael Fernández
President, CEO and Vice Chairman of the Board

TOGETHER, WE ARE MORE

Q&A WITH JOSÉ RAFAEL FERNÁNDEZ

PRESIDENT, CEO AND VICE CHAIRMAN OF THE BOARD

Q: Several years ago OFG embarked on a strategic plan to transform the bank. What has been achieved?

JRF: Looking over the last eight years and the path that we decided to take as an institution, our strategic goals have come to fruition systematically.

In the mid-2000s, we began investing in our core banking platform. That set the stage for the purchase of Eurobank in 2010 and the December 2012 acquisition of BBVAPR. Because of the recession in Puerto Rico, we also focused on building a solid balance sheet. This enabled us to develop into one of the healthiest banks on the Island.

We had no legacy credit problems, were well capitalized, and have been able to play a major role in stabilizing and consolidating the local banking market.

Eurobank was a failed institution but it had good people, clients and assets. Some workout was needed, but to date, the acquisition has been a success. It's operations are profitable, increased our presence in commercial banking, and gave us an opportunity to step up our recruitment of key banking talent in Puerto Rico.

The acquisition of BBVAPR has been a truly transformational event. It is well positioned from a market perspective, highly complementary to our core businesses, and has a strong franchise in commercial and retail banking and wealth management business.

The BBVAPR acquisition also dramatically expands our retail footprint, and we gained another excellent local team that shares our vision of customer focus and financial excellence.

So looking back, we have successfully implemented our strategy of transforming Oriental from a bank that relied heavily on income from investment securities that was financed through wholesale borrowings, to one with a predominant, well established banking and wealth management business, and limited exposure to Puerto Rico's difficult credit environment.

.....

Q: Where does this position OFG today?

JRF: Oriental is now one of Puerto Rico's leading banking-financial services companies.

We have the second largest branch network, with 64 financial centers covering all key markets on the Island. Before the acquisition, we were ranked 7th with 28 financial centers.

We have the third largest share of core retail and commercial deposits, with approximately \$5.7 billion in balances, equal to 15% market share. Before, Oriental was ranked 6th with a 5% share.

We are the third largest in Puerto Rico assets, with approximately \$9.2 billion. Previously, Oriental was ranked 5th with \$6 billion. And approximately 70% of interest-earning assets are in loans versus 30% investments, a complete reversal from where we were at the end of 2011.

The BBVAPR acquisition brought new capabilities in auto and corporate commercial lending, which added about \$1 billion each in loan balances. As a result, our loan mix is extremely well diversified, with 27% in auto and consumer loans, 35% in residential mortgages, and 38% in commercial loans.

.....

Q: How has the acquisition impacted OFG's capital position?

JRF: Very favorably. We ended 2012 with a 24% increase in stockholders' equity, to approximately \$864 million, and book value per common share of \$15.31, a little higher than at December 31, 2011.

This benefitted from our capital plan for the acquisition, which involved raising \$161 million in the second half of 2012 through common and preferred stock offerings.

We booked minimal goodwill from the acquisition, around \$61 million, which underscores that the acquisition was well-priced. As a result, tangible book value per share declined only 11% to \$13.59.

At year-end 2012 our regulatory ratios all showed that we are well-capitalized, with a 6.42% leverage capital ratio, 12.94% tier 1 risk based capital ratio, 15.15% total risk based capital ratio, and 6.74% tangible common equity to total assets.

.....

Q: What is next for the BBVAPR acquisition?

JRF: We still have to fully integrate the Oriental and BBVAPR organizations. This is expected to be completed before the end of 2013.

Nonetheless, we have a platform upon which we can now prepare for the future. It is a future we see as offering clients the banking products that they deserve, delivered with high quality service, which is not typical for Puerto Rico.

Ultimately, it is a future where we see Oriental being the leading bank in Puerto Rico and, as such, making a difference to our consumer and commercial clients.

We believe we will have an agile platform providing exemplary service and added value advice that will help our clients grow, progress and achieve their goals, while generating meaningful financial results for our investors.

With our expanded branch network and increased market share, we have a major opportunity ahead of us.

.....

Q: Does OFG have the right people to achieve and manage that kind of growth?

JRF: Most certainly. In addition to the excellent teams we developed at Oriental, we have added a skilled group from BBVAPR. They are true commercial bankers with many years of experience.

Our combined leadership team is comprised of experts in all our banking lines, from retail, to wholesale, commercial, and small business, wealth management, insurance and trust.

In our new marketing program, we proclaim “Together, we are more,” and, in fact, that is the case.

We have organized a team of leaders from both banks that meets on a regular basis. This enables us to stay on top of things, measure our progress, and think about what needs to be done next.

.....

Q: How does the investment world view OFG at this point? Does it fully appreciate what the Company has done and where it is going?

JRF: We believe our management team has a great reputation on Wall Street.

There is widespread support and understanding for what the Company has accomplished. We have managed through the local banking crisis, taken advantage of opportunities presented to us, and carefully watched over our capital.

Having said that, we don't believe investors fully appreciate the potential value that OFG can achieve. But that's okay. You make your reputation on the go, by delivering results and on a consistent basis.

This is one of the biggest benefits of the BBVAPR acquisition. We believe it transforms Oriental into a bank that will provide more recurring, predictable results, while lessening our dependency on variable results from investment securities.

There may be some slight volatility because of the purchase accounting, which we had to use in the acquisition of BBVAPR. But, in general going forward, we believe OFG should have more predictable earnings.

.....

Q: How is the banking industry in Puerto Rico likely to change over the next few years? How would that affect OFG?

JRF: Credit is starting to stabilize and competition is getting stronger. Because the economy is not growing, everybody is going after the same dollar.

Unfortunately, we are already seeing some banks defend their market position by pricing loans irrationally. We view this as short sighted.

We want to remain sound and strong. The way we will differentiate ourselves and attract customers is through offering fair prices and great service. We will demonstrate to clients that they are treated better at Oriental than anywhere else, and that is well worth the difference in price.

.....

Q: What is Oriental's approach to doing business?

JRF: Even before we finalized the acquisition of BBVAPR, we went through a long process to make sure that we are communicating well and correctly with our clients.

We started talking internally to our own people, beginning with a review of all our processes. We recognized early on that we needed to reach out to each client. Our people needed to have a more proactive, dynamic attitude in our branches, at our points of sale, and even how we present ourselves on the telephone. Everything had to be consistent.

Now that we have completed the acquisition, we are integrating these same values throughout our organization. We're not going to be perfect, but we're going to be proactive and forthcoming in resolving issues and communicating transparently.

That is the next chapter for Oriental. As we project a true service culture in Puerto Rico, people will feel the difference and grow in their loyalty towards Oriental.

When we succeed in fully transforming Oriental, we believe it will have a major positive financial impact. Our clients will be pleased. We will have more of their business, and our market share will expand.

.....

Q: As with many other banks, Oriental is benefitting from a low interest rate environment. How would higher rates affect performance?

JRF: First, interest rates going up would mean the US economy is improving. That should be good for Puerto Rico. And it should be good for banking, because margins are very compressed due to lower interest rates. Second, we're well positioned because we now have a large book of variable rate commercial loans. If and when interest rates go up, our profitability should increase.

.....

Q: What is the most important message that OFG wants to communicate to clients, employees and investors in 2013?

JRF: To sum up, 2012 was a transformative year. As managers and employees, we must focus on how we differentiate ourselves through service. For clients, it will mean a bank that is looking out for their well-being. For shareholders, it will mean a bank investment with a more stable, more recurring performance that should be increasingly attractive over the long term.

FORWARD-LOOKING STATEMENTS

The information included in this annual report on Form 10-K contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may relate to the financial condition, results of operations, plans, objectives, future performance and business of Oriental Financial Group Inc. (“we,” “our,” “us” or the “Group”), including, but not limited to, statements with respect to the adequacy of the allowance for loan losses, delinquency trends, market risk and the impact of interest rate changes, capital markets conditions, capital adequacy and liquidity, and the effect of legal proceedings and new accounting standards on the Group’s financial condition and results of operations. All statements contained herein that are not clearly historical in nature are forward-looking, and the words “anticipate,” “believe,” “continues,” “expect,” “estimate,” “intend,” “project” and similar expressions and future or conditional verbs such as “will,” “would,” “should,” “could,” “might,” “can,” “may,” or similar expressions are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates and assumptions by management that are difficult to predict. Various factors, some of which by their nature are beyond the Group’s control, could cause actual results to differ materially from those expressed in, or implied by, such forward-looking statements. Factors that might cause such a difference include, but are not limited to:

- the rate of growth in the economy and employment levels, as well as general business and economic conditions;
- changes in interest rates, as well as the magnitude of such changes;
- the fiscal and monetary policies of the federal government and its agencies;
- a credit default by the U.S. or Puerto Rico governments or a downgrade in the credit ratings of the U.S. or Puerto Rico governments;
- changes in federal bank regulatory and supervisory policies, including required levels of capital;
- the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) on the Group’s businesses, business practices and cost of operations;
- the relative strength or weakness of the consumer and commercial credit sectors and of the real estate market in Puerto Rico;
- the performance of the stock and bond markets;
- competition in the financial services industry;
- additional Federal Deposit Insurance Corporation (“FDIC”) assessments;
- possible legislative, tax or regulatory changes; and
- difficulties in integrating the acquired Puerto Rico operations of Banco Bilbao Vizcaya Argentaria, S. A. (“BBVAPR”) into the Group’s operations.

Other possible events or factors that could cause results or performance to differ materially from those expressed in these forward-looking statements include the following: negative economic conditions that adversely affect the general economy, housing prices, the job market, consumer confidence and spending habits which may affect, among other things, the level of non-performing assets, charge-offs and provision expense; changes in interest rates and market liquidity which may reduce interest margins, impact funding sources and affect the ability to originate and distribute financial products in the primary and secondary markets; adverse movements and volatility in debt and equity capital markets; changes in market rates and prices which may adversely impact the value of financial assets and liabilities; liabilities resulting from litigation and regulatory investigations; changes in accounting standards, rules and interpretations; increased competition; the Group’s ability to grow its core businesses; decisions to downsize, sell or close units or otherwise change the Group’s business mix; and management’s ability to identify and manage these and other risks.

All forward-looking statements included in this annual report on Form 10-K are based upon information available to the Group as of the date of this report, and other than as required by law, including the requirements of applicable securities laws, the Group assumes no obligation to update or revise any such forward-looking statements to reflect occurrences or unanticipated events or circumstances after the date of such statements.

ITEM 1. *BUSINESS*

General

The Group is a publicly-owned financial holding company incorporated on June 14, 1996 under the laws of the Commonwealth of Puerto Rico, providing a full range of banking and financial services through its subsidiaries. The Group is subject to the provisions of the U.S. Bank Holding Company Act of 1956, as amended, (the “BHC Act”) and accordingly, subject to the supervision and regulation of the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”).

The Group provides comprehensive banking and financial services to its clients through a complete range of banking and financial solutions, including commercial, consumer and mortgage lending; leasing; checking and savings accounts; financial planning, insurance, financial service, and investment brokerage; and corporate and individual trust and retirement services. The Group operates through three major business segments: Banking, Financial Services, and Treasury, and distinguishes itself based on quality service and marketing efforts focused on mid and high net worth individuals and families, including professionals and owners of small and mid-sized businesses, primarily in Puerto Rico. The Group provides these services through various subsidiaries including, a commercial bank, Oriental Bank (formerly known as Oriental Bank and Trust), two securities broker-dealers, Oriental Financial Services Corp. (“Oriental Financial Services”) and OFS Securities, Inc. (“OFS Securities”), an insurance agency, Oriental Insurance, Inc. (“Oriental Insurance”) and a retirement plan administrator, Caribbean Pension Consultants, Inc. (“CPC”). All of our subsidiaries are based in San Juan, Puerto Rico, except for CPC which is based in Boca Raton, Florida. The Group has 64 branches in Puerto Rico. The Group’s long-term goal is to strengthen its banking and financial services franchise by expanding its lending businesses, increasing the level of integration in the marketing and delivery of banking and financial services, maintaining effective asset-liability management, growing non-interest revenue from banking and financial services, and improving operating efficiencies.

The Group’s strategy involves:

- Strengthening its banking and financial services franchise by expanding its ability to attract deposits and build relationships with individual customers and professionals and mid-market commercial businesses through aggressive marketing and expansion of its sales force;
- Focusing on greater growth in commercial, consumer and mortgage lending, trust and financial services and insurance products; and increasing the level of integration in the marketing and delivery of banking and financial services;
- Matching its portfolio of investment securities with the related funding to achieve favorable spreads, and primarily investing in U.S. government agency obligations.
- Improving operating efficiencies, and continuing to maintain effective asset-liability management; and
- Implementing a broad ranging effort to instill in employees and make customers aware of the Group’s determination to effectively serve and advise its customer base in a responsive and professional manner.

Together with a highly experienced group of senior and mid level executives and the benefits from the acquisitions of Eurobank and BBVAPR, this strategy has resulted in sustained growth in the Group’s deposit-taking activities, commercial, consumer and mortgage lending and financial service activities, allowing the Group to distinguish itself in a highly competitive industry. The Group is not immune from general and local financial and economic conditions. Past experience is not necessarily indicative of future performance, especially given market uncertainties, but based on a reasonable time horizon of three to five years, the strategy is expected to maintain its steady progress towards the Group’s long-term goal.

The Group’s principal funding sources are branch deposits, securities sold under agreements to repurchase, Federal Home Loan Bank (“FHLB”) advances, Federal Reserve Bank (“FRB”) advances, wholesale deposits, and subordinated capital notes. Through its branch network, Oriental Bank offers personal non-interest and interest-bearing checking accounts, savings accounts, certificates of deposit, individual retirement accounts (“IRAs”) and commercial non-interest bearing checking accounts. The FDIC insures Oriental Bank’s deposit accounts up to applicable limits. Management makes retail deposit pricing decisions periodically, adjusting the rates paid on retail deposits in response to general market conditions and local competition. Pricing decisions take into account the rates being offered by other local banks, the London Interbank Offered Rate (“LIBOR”), and mainland U.S. market interest rates.

Significant Transactions During 2012 – The BBVAPR Acquisition

On December 18, 2012, the Group purchased from Banco Bilbao Vizcaya Argentaria, S. A. (“BBVA”), all of the outstanding common stock of each of (i) BBVAPR Holding Corporation (“BBVAPR Holding”), the sole shareholder of Banco Bilbao Vizcaya Argentaria Puerto Rico (“BBVAPR Bank”), a Puerto Rico chartered commercial bank, and BBVA Seguros, Inc. (“BBVA Seguros”), an insurance agency, and (ii) BBVA Securities of Puerto Rico, Inc. (“BBVA Securities”), a registered broker-dealer. This transaction is referred to as the “BBVAPR Acquisition” and BBVAPR Holding, BBVAPR Bank, BBVA Seguros and BBVA Securities are collectively referred to as “BBVAPR” or the “BBVAPR Companies.”

The Group acquired all of the outstanding common stock of BBVAPR Holding and BBVA Securities for an aggregate purchase price of \$500 million. Since the BBVAPR Acquisition, the Group has pursued the legal integration of the BBVAPR Companies with its various subsidiaries. Immediately following the closing of the BBVAPR Acquisition, the Group merged BBVAPR Bank with and into Oriental Bank, with Oriental Bank continuing as the surviving entity. Shortly thereafter, BBVAPR Holding was merged with and into the Group, with the Group continuing as the surviving entity, in January 2013 BBVA Seguros (now known as Oriental Seguros) was liquidated and its assets were contributed by the Group to Oriental Insurance, and the Group has applied to the Financial Industry Regulatory Authority (“FINRA”) for approval to merge BBVA Securities (now known as OFS Securities) with and into Oriental Financial Services, with Oriental Financial Services to continue as the surviving entity. The audited consolidated financial statements contemplate the effect of the BBVAPR Acquisition.

In connection with the BBVAPR Acquisition, the Group sold:

- (i) 84,000 shares of its 8.750% Non-Cumulative Convertible Perpetual Preferred Stock, Series C (the “Convertible Preferred Stock”), on July, 3, 2012 at a purchase price of \$1,000 per share in a private placement;
- (ii) 4,829,267 shares of its common stock on October 31, 2012 at a per share offering price of \$11.10 in a registered public offering; and
- (iii) 960,000 shares of its 7.125% Non-Cumulative Perpetual Preferred Stock, Series D (the “Series D Preferred Stock”) on November 5, 2012 at a per share offering price of \$25 in a registered public offering.

The Group used the net proceeds of the foregoing issuances together with its own excess capital to fund the purchase price of the BBVAPR Acquisition.

Based on the closing of the BBVAPR Acquisition as of December 18, 2012, the Group (a) acquired (at an estimated fair value) \$3.560 billion in loans, \$561.6 million in investment securities, \$41.6 million in foreclosed or repossessed assets, \$394.6 million in cash and cash equivalents, \$66.5 million in premises and equipment, \$13.5 million in a core deposit and customer relationship intangibles, and \$191.8 million in other assets, and (b) assumed \$3.494 billion in deposits, \$818.1 million in borrowings, and \$79.0 million in other liabilities.

Segment Disclosure

The Group has three reportable segments: Banking, Financial Services, and Treasury. Management established the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Other factors such as the Group’s organizational structure, nature of products, distribution channels and economic characteristics of the products were also considered in the determination of the reportable segments. The Group measures the performance of these reportable segments based on pre-established goals involving different financial parameters such as net income, interest rate spread, loan production, and fees generated. The operations and results of BBVAPR for the period from December 18, 2012 to December 31, 2012 are considered a separate segment from those reportable segments detailed above. During that period, management evaluated the performance of this acquired business as a stand-alone segment rather than allocated to the aforementioned reportable segments. The Group is in the process of assessing the distribution of said operations into existing or new reportable segments as deemed applicable.

For detailed information regarding the performance of the Group’s operating segments, please refer to Note 21 to the Group’s accompanying consolidated financial statements.

Banking Activities

Oriental Bank (“Bank”), the Group’s main subsidiary, is a full-service Puerto Rico commercial bank with its main office located in San Juan, Puerto Rico. The Bank has 64 branches throughout Puerto Rico and was incorporated in October 1964 as a federal mutual savings and loan association. It became a federal mutual savings bank in July 1983 and converted to a federal stock savings bank in

April 1987. Its conversion from a federally-chartered savings bank to a commercial bank chartered under the banking law of the Commonwealth of Puerto Rico, on June 30, 1994, allowed the Bank to more effectively pursue opportunities in its market and obtain more flexibility in its businesses. As a Puerto Rico-chartered commercial bank, it is subject to examination by the Federal Deposit Insurance Corporation (the “FDIC”) and the Office of the Commissioner of Financial Institutions of Puerto Rico (the “OCFI”). The Bank offers banking services such as commercial, leasing and consumer lending, savings and time deposit products, financial planning, and corporate and individual trust services, and capitalizes on its commercial banking network to provide mortgage lending products to its clients. The Bank operates two international banking entities (“IBE”) pursuant to the International Banking Center Regulatory Act of Puerto Rico, as amended (the “IBE Act”), one is a unit operating within the Bank named Oriental Overseas (the “IBE Unit”), and the other is a wholly-owned subsidiary of the Bank, named Oriental International Bank, Inc. (the “IBE Subsidiary”). The IBE Unit and Subsidiary offer the Bank certain Puerto Rico tax advantages, and their services are limited under Puerto Rico law to persons and assets/liabilities located outside of Puerto Rico.

Banking activities include the Bank’s branches and mortgage banking activities with traditional retail banking products such as deposits, commercial, consumer and mortgage loans, and leasing. The Bank’s significant lending activities are with consumers located in Puerto Rico. The Bank’s lending and leasing transactions include a diversified number of industries and activities, all of which are encompassed within four main categories: commercial, consumer, mortgage and auto.

The Group’s mortgage banking activities are conducted through a division of the Bank. The mortgage banking activities include the origination of mortgage loans for the Bank’s own portfolio, and the sale of loans directly into the secondary market or the securitization of conforming loans into mortgage-backed securities. The Bank originates Federal Housing Administration (“FHA”)-insured mortgages, Veterans Administration (“VA”)-guaranteed mortgages, and Rural Housing Service (“RHS”)-guaranteed loans that are primarily securitized for issuance of Government National Mortgage Association (“GNMA”) mortgage-backed securities which can be resold to individual or institutional investors in the secondary market. Conventional loans that meet the underwriting requirements for sale or exchange under standard Federal National Mortgage Association (the “FNMA”) or the Federal Home Loan Mortgage Corporation (the “FHLMC”) programs are referred to as conforming mortgage loans and are also securitized for issuance of FNMA or FHLMC mortgage-backed securities. The Bank is an approved seller of FNMA, as well as FHLMC, mortgage loans for issuance of FNMA and FHLMC mortgage-backed securities. The Bank is also an approved issuer of GNMA mortgage-backed securities. The Group outsources the servicing of the GNMA, FNMA and FHLMC pools that it issues, and its residential mortgage loan portfolio.

Loan Underwriting

Residential mortgage loans: All loan originations, regardless of whether originated through the Group’s retail banking network or purchased from third parties, must be underwritten in accordance with the Group’s underwriting criteria, including loan-to-value ratios, borrower income qualifications, debt ratios and credit history, investor requirements, and title insurance and property appraisal requirements. The Group’s mortgage underwriting standards comply with the relevant guidelines set forth by the Department of Housing and Urban Development (“HUD”), VA, FNMA, FHLMC, federal and Puerto Rico banking regulatory authorities, as applicable. The Group’s underwriting personnel, while operating within the Group’s loan offices, make underwriting decisions independent of the Group’s mortgage loan origination personnel. For the residential mortgage loans originated by the BBVAPR’s operations, in the short period from December 18, 2012 through December 31, 2012, the Group followed similar underwriting standards as the legacy portfolio, as the majority of the loans are conforming that need to comply with relative underwriting standards for the authorities cited above.

Commercial loans: Commercial loans include lines of credit and term facilities to finance business operations and to provide working capital for specific purposes, such as to finance the purchase of assets, equipment or inventory. Since a borrower’s cash flow from operations is generally the primary source of repayment, the Group’s analysis of the credit risk focuses heavily on the borrower’s debt repayment capacity. Commercial term loans are typically made to finance the acquisition of fixed assets, provide permanent working capital or to finance the purchase of businesses. Commercial term loans generally have terms from one to five years, may be collateralized by the asset being acquired or other available assets, and bear interest rates that float with the prime rate, LIBOR or another established index, or are fixed for the term of the loan. Lines of credit are extended to businesses based on an analysis of the financial strength and integrity of the borrowers and are generally secured primarily by real estate, accounts receivable or inventory, and have a maturity of one year or less. Such lines of credit bear an interest rate that floats with a base rate, the prime rate, LIBOR, or another established index. There were no significant commercial loan originations for the short period December 18, 2012 through December 31, 2012 from the BBVAPR’s operations.

Auto loans: The Group provides financing for the purchase of new or used motor vehicles for private or public use. These loans are

granted mainly through dealers authorized and approved by the auto credit department committee of the Group. The auto credit department has the specialized structure and resources to provide the service required for this product according to market demands.

The auto loan credit policy establishes specific guidance and parameters for the underwriting and origination process. Underwriting procedures, lending limits, interest rate approval, insurance coverage, and automobile brand restrictions are some parameters and internal controls implemented to ensure the quality and profitability of the auto loan portfolio. The credit scoring system is a fundamental part of the decision process.

Sale of Loans and Securitization Activities

The Group may engage in the sale or securitization of a portion of the residential mortgage loans that it originates and purchases and utilizes various channels to sell its mortgage products. The Group is an approved issuer of GNMA-guaranteed mortgage-backed securities which involves the packaging of FHA loans, RHS loans or VA loans into pools of mortgage-backed securities for sale primarily to securities broker-dealers and other institutional investors. The Group can also act as issuer in the case of conforming conventional loans in order to group them into pools of FNMA or FHLMC-issued mortgage-backed securities which the Group then sells to securities broker-dealers. The issuance of mortgage-backed securities provides the Group with flexibility in selling the mortgage loans that it originates or purchases and also provides income by increasing the value and marketability of such loans. In the case of conforming conventional loans, the Group also has the option to sell such loans through the FNMA and FHLMC cash window programs. At December 31, 2012, the Group has integrated secondary market activities of BBVAPR into its processes.

Financial Service Activities

Financial Service activities are generated by such businesses as securities brokerage, trust services, retirement planning, insurance, pension administration, and other financial services.

Oriental Financial Services and OFS Securities are Puerto Rico corporations and the Group's subsidiaries engaged in securities brokerage and investment banking activities in accordance with the Group's strategy of providing fully integrated financial solutions to the Group's clients. Oriental Financial Services and OFS Securities, both members of FINRA and the Securities Investor Protection Corporation, are registered securities broker-dealers pursuant to Section 15(b) of the Securities Exchange Act of 1934. Both broker-dealers do not carry customer accounts and are, accordingly, exempt from the Customer Protection Rule (SEC Rule 15c3-3) pursuant to subsection (k)(2)(ii) of such rule. They clear securities transactions through Pershing LLC, a clearing agent that carries the accounts of their customers on a "fully disclosed" basis.

Both broker-dealers offer securities brokerage services covering various investment alternatives such as tax-advantaged fixed income securities, mutual funds, stocks, and bonds to retail and institutional clients. They also offer separately managed accounts and mutual fund asset allocation programs sponsored by unaffiliated professional asset managers. These services are designed to meet each client's specific needs and preferences, including transaction-based pricing and asset-based fee pricing.

Oriental Financial Services also manages and participates in public offerings and private placements of debt and equity securities in Puerto Rico and engages in municipal securities business with the Commonwealth of Puerto Rico and its instrumentalities, municipalities, and public corporations. Investment banking revenue from such activities includes gains, losses, and fees, net of syndicate expenses, arising from securities offerings in which it acts as an underwriter or agent. Investment banking revenue also includes fees earned from providing merger-and-acquisition and financial restructuring advisory services.

As a result of the BBVAPR Acquisition, the Bank acquired a municipal securities division (the "MSD") and succeeded to the registration as a municipal securities dealer of BBVAPR División de Valores Municipales. The MSD is a separately identifiable division of the Bank and is registered with the SEC. The FDIC is the appropriate regulatory agency of the MSD's municipal securities activities.

Oriental Insurance is a Puerto Rico corporation and the Group's subsidiary engaged in insurance agency services. It was established by the Group to take advantage of the cross-marketing opportunities provided by financial modernization legislation. Oriental Insurance currently earns commissions by acting as a licensed insurance agent in connection with the issuance of insurance policies by unaffiliated insurance companies and anticipates continued growth as it expands the products and services it provides and continues to cross market its services to the Group's existing customer base.

CPC, a Florida corporation, is the Group's subsidiary engaged in the administration of retirement plans in the U.S., Puerto Rico, and the Caribbean.

Treasury Activities

Treasury activities encompass all of the Group's treasury-related functions. The Group's investment portfolio consists of mortgage-backed securities, obligations of U.S. Government sponsored agencies, Puerto Rico Government and agency obligations and money market instruments. Agency mortgage-backed securities, the largest component, consist principally of pools of residential mortgage loans that are made to consumers and then resold in the form of pass-through certificates in the secondary market, the payment of interest and principal of which is guaranteed by GNMA, FNMA or FHLMC.

Market Area and Competition

The main geographic business and service area of the Group is in Puerto Rico, where the banking market is highly competitive. Puerto Rico banks are subject to the same federal laws, regulations and supervision that apply to similar institutions in the United States of America. The Group also competes with brokerage firms with retail operations, credit unions, savings and loan cooperatives, small loan companies, insurance agencies, and mortgage banks in Puerto Rico. The Group encounters intense competition in attracting and retaining deposits and in its consumer and commercial lending activities. Management believes that the Group has been able to compete effectively for deposits and loans by offering a variety of transaction account products and loans with competitive terms, by emphasizing the quality of its service, by pricing its products at competitive interest rates, by offering convenient branch locations, and by offering financial planning and financial services at most of its branch locations. Recent consolidations among Puerto Rico banks have created an environment for more rational loan and deposit pricing. The Group's ability to originate loans depends primarily on the service it provides to its borrowers, in making prompt credit decisions, and on the rates and fees that it charges.

Regulation and Supervision

General

The Group is a financial holding company subject to supervision and regulation by the Federal Reserve Board under the BHC Act, as amended by the Gramm-Leach-Bliley Act and the Dodd-Frank Act. The qualification requirements and the process for a bank holding company that elects to be treated as a financial holding company requires that a bank holding company and all of the subsidiary banks controlled by it at the time of election must be and remain at all times "well capitalized" and "well managed."

The Group elected to be treated as a financial holding company as permitted by the Gramm-Leach-Bliley Act. Under the Gramm-Leach-Bliley Act, if the Group fails to meet the requirements for being a financial holding company and is unable to correct such deficiencies within certain prescribed time periods, the Federal Reserve Board could require the Group to divest control of its depository institution subsidiary or alternatively cease conducting activities that are not permissible for bank holding companies that are not financial holding companies.

Financial holding companies may engage, directly or indirectly, in any activity that is determined to be (i) financial in nature, (ii) incidental to such financial activity, or (iii) complementary to a financial activity provided it does not pose a substantial risk to the safety and soundness of depository institutions or the financial system generally. The Gramm-Leach-Bliley Act specifically provides that the following activities have been determined to be "financial in nature": (a) lending, trust and other banking activities; (b) insurance activities; (c) financial, investment or economic advisory services; (d) securitization of assets; (e) securities underwriting and dealing; (f) existing bank holding company domestic activities; (g) existing bank holding company foreign activities; and (h) merchant banking activities. A financial holding company may generally commence any activity, or acquire any company, that is financial in nature without prior approval of the Federal Reserve Board. As provided by the Dodd-Frank Act, a financial holding company may not acquire a company, without prior Federal Reserve Board approval, in a transaction in which the total consolidated assets to be acquired by the financial holding company exceed \$10 billion.

In addition, the Gramm-Leach-Bliley Act specifically gives the Federal Reserve Board the authority, by regulation or order, to expand the list of financial or incidental activities, but requires consultation with the U.S. Treasury Department and gives the Federal Reserve Board authority to allow a financial holding company to engage in any activity that is complementary to a financial activity and does not pose a substantial risk to the safety and soundness of depository institutions or the financial system.

The Group is required to file with the Federal Reserve Board and the SEC periodic reports and other information concerning its own business operations and those of its subsidiaries. In addition, Federal Reserve Board approval must also be obtained before a bank holding company acquires all or substantially all of the assets of another bank or merges or consolidates with another bank holding company. The Federal Reserve Board also has the authority to issue cease and desist orders against bank holding companies and their non-bank subsidiaries.

The Bank is regulated by various agencies in the United States and the Commonwealth of Puerto Rico. Its main regulators are the OCFI and the FDIC. The Bank is subject to extensive regulation and examination by the OCFI and the FDIC, and is subject to the Federal Reserve Board's regulation of transactions between the Bank and its affiliates. The federal and Puerto Rico laws and

regulations which are applicable to the Bank regulate, among other things, the scope of its business, its investments, its reserves against deposits, the timing of the availability of deposited funds, and the nature and amount of and collateral for certain loans. In addition to the impact of such regulations, commercial banks are affected significantly by the actions of the Federal Reserve Board as it attempts to control the money supply and credit availability in order to control inflation in the economy.

The Group's mortgage banking business is subject to the rules and regulations of FHA, VA, RHS, FNMA, FHLMC, HUD and GNMA with respect to the origination, processing and selling of mortgage loans and the sale of mortgage-backed securities. Those rules and regulations, among other things, prohibit discrimination and establish underwriting guidelines which include provisions for inspections and appraisal reports, require credit reports on prospective borrowers and fix maximum loan amounts, and, with respect to VA loans, fix maximum interest rates. Mortgage origination activities are subject to, among others, the Equal Credit Opportunity Act, the Truth-in-Lending Act, the Real Estate Settlement Procedures Act and the regulations promulgated thereunder which, among other things, prohibit discrimination and require the disclosure of certain basic information to mortgagors concerning credit terms and settlement costs. The Group is also subject to regulation by the OCFI with respect to, among other things, licensing requirements and maximum origination fees on certain types of mortgage loan products.

The Group and its subsidiaries are subject to the rules and regulations of certain other regulatory agencies. Oriental Financial Services and OFS Securities, as registered broker-dealers, are subject to the supervision, examination and regulation of FINRA, the SEC, and the OCFI in matters relating to the conduct of their securities business, including record keeping and reporting requirements, supervision and licensing of employees, and obligations to customers.

Oriental Insurance is subject to the supervision, examination and regulation of the Office of the Commissioner of Insurance of Puerto Rico in matters relating to insurance sales, including but not limited to, licensing of employees, sales practices, charging of commissions and reporting requirements.

Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Act implements a variety of far-reaching changes and has been described as the most sweeping reform of the financial services industry since the 1930's. It has a broad impact on the financial services industry, including significant regulatory and compliance changes, such as: (i) enhanced resolution authority of troubled and failing banks and their holding companies; (ii) enhanced lending limits strengthening the existing limits on a depository institution's credit exposure to one borrower; (iii) increased capital and liquidity requirements; (iv) increased regulatory examination fees; (v) changes to assessments to be paid to the FDIC for federal deposit insurance; (vi) prohibiting bank holding companies, such as the Group, from including in regulatory Tier 1 capital future issuances of trust preferred securities or other hybrid debt and equity securities; and (vii) numerous other provisions designed to improve supervision and oversight of, and strengthening safety and soundness for, the financial services sector. Additionally, the Dodd-Frank Act establishes a new framework for systemic risk oversight within the financial system to be distributed among new and existing federal regulatory agencies, including the Financial Stability Oversight Council, the Federal Reserve Board, the Office of the Comptroller of the Currency and the FDIC. Further, the Dodd-Frank Act addresses many corporate governance and executive compensation matters that will affect most U.S. publicly traded companies, including the Group. A few provisions of the Dodd-Frank Act are effective immediately, while various provisions are becoming effective in stages. Many of the requirements called for in the Dodd-Frank Act are being implemented over time and most will be subject to implementing regulations.

The Dodd-Frank Act also created a new consumer financial services regulator, the Bureau of Consumer Financial Protection (the "Bureau"), which assumed most of the consumer financial services regulatory responsibilities previously exercised by federal banking regulators and other agencies. The Bureau's primary functions include the supervision of "covered persons" (broadly defined to include any person offering or providing a consumer financial product or service and any affiliated service provider) for compliance with federal consumer financial laws. It has primary authority to enforce the federal consumer financial laws, as well as exclusive authority to require reports and conduct examinations for compliance with such laws, in the case of any insured depository institution with total assets of more than \$10 billion and any affiliate thereof. The Bureau also has broad powers to prescribe rules applicable to a covered person or service provider identifying as unlawful, unfair, deceptive, or abusive acts or practices in connection with any transaction with a consumer for a consumer financial product or service, or the offering of a consumer financial product or service.

Holding Company Structure

The Bank is subject to restrictions under federal laws that limit the transfer of funds to its affiliates (including the Group), whether in the form of loans, other extensions of credit, investments or asset purchases, among others. Such transfers are limited to 10% of the transferring institution's capital stock and surplus with respect to any affiliate (including the Group), and, with respect to all affiliates, to an aggregate of 20% of the transferring institution's capital stock and surplus. Furthermore, such loans and extensions of credit are

required to be secured in specified amounts, carried out on an arm's length basis, and consistent with safe and sound banking practices.

Under the Dodd-Frank Act, a bank holding company, such as the Group, must serve as a source of financial strength for any subsidiary depository institution. The term "source of financial strength" is defined as the ability of a company to provide financial assistance to its insured depository institution subsidiaries in the event of financial distress at such subsidiaries. This support may be required at times when, absent such requirement, the bank holding company might not otherwise provide such support. In the event of a bank holding company's bankruptcy, any commitment by the bank holding company to a federal bank regulatory agency to maintain capital of a subsidiary bank will be assumed by the bankruptcy trustee and be entitled to a priority of payment. In addition, any capital loans by a bank holding company to any of its subsidiary banks are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. The Bank is currently the only depository institution subsidiary of the Group.

Since the Group is a financial holding company, its right to participate in the assets of any subsidiary upon the latter's liquidation or reorganization will be subject to the prior claims of the subsidiary's creditors (including depositors in the case of the Bank) except to the extent that the Group is a creditor with recognized claims against the subsidiary.

Dividend Restrictions

The principal source of funds for the Group's holding company is the dividends from the Bank. The ability of the Bank to pay dividends on its common stock is restricted by the Puerto Rico Banking Act of 1933, as amended (the Banking Act"), the Federal Deposit Insurance Act, as amended (the "FDIA") and FDIC regulations. In general terms, the Banking Act provides that when the expenditures of a bank are greater than receipts, the excess of expenditures over receipts shall be charged against the undistributed profits of the bank and the balance, if any, shall be charged against the required reserve fund of the bank. If there is no sufficient reserve fund to cover such balance in whole or in part, the outstanding amount shall be charged against the bank's capital account. The Banking Act provides that until said capital has been restored to its original amount and the reserve fund to 20% of the original capital, the bank may not declare any dividends. In general terms, the FDIA and the FDIC regulations restrict the payment of dividends when a bank is undercapitalized, when a bank has failed to pay insurance assessments, or when there are safety and soundness concerns regarding a bank.

The payment of dividends by the Bank may also be affected by other regulatory requirements and policies, such as maintenance of adequate capital. If, in the opinion of the regulatory authority, a depository institution under its jurisdiction is engaged in, or is about to engage in, an unsafe or unsound practice (that, depending on the financial condition of the depository institution, could include the payment of dividends), such authority may require, after notice and hearing, that such depository institution cease and desist from such practice. The Federal Reserve Board has a policy statement that provides that an insured bank or bank holding company should not maintain its existing rate of cash dividends on common stock unless (i) the organization's net income available to common shareholders over the past year has been sufficient to fully fund the dividends and (ii) the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality, and overall financial condition. In addition, all insured depository institutions are subject to the capital-based limitations required by the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA").

Federal Home Loan Bank System

The FHLB system, of which the Bank is a member, consists of 12 regional FHLBs governed and regulated by the Federal Housing Finance Agency. The FHLB serves as a credit facility for member institutions within their assigned regions. They are funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB system. They make loans (i.e., advances) to members in accordance with policies and procedures established by the FHLB and the boards of directors of each regional FHLB.

As a system member, the Bank is entitled to borrow from the FHLB of New York (the "FHLB-NY") and is required to invest in FHLB-NY stock in an amount equal to the greater of 1% of the Bank's aggregate unpaid principal of its home mortgage loans, home purchase contracts, and similar obligations, or 5% of the Bank's aggregate amount of outstanding advances by the FHLB-NY. The Bank is in compliance with the stock ownership rules described above with respect to such advances, commitments, home mortgage loans and similar obligations. All loans, advances and other extensions of credit made by the FHLB-NY to the Bank are secured by a portion of the Bank's mortgage loan portfolio, certain other investments, and the capital stock of the FHLB-NY held by the Bank. The Bank is required to maintain a minimum amount of qualifying collateral with a fair value of at least 110% of the outstanding advances.

Federal Deposit Insurance Corporation Improvement Act

Under FDICIA, the federal banking regulators must take prompt corrective action with respect to depository institutions that do not meet minimum capital requirements. FDICIA, and the regulations issued thereunder, established five capital tiers: (i) “well capitalized,” if it has a total risk-based capital ratio of 10.0% or more, has a Tier 1 risk-based capital ratio of 6.0% or more, has a Tier 1 leverage capital ratio of 5.0% or more, and is not subject to any written capital order or directive; (ii) “adequately capitalized,” if it has a total risk-based capital ratio of 8.0% or more, a Tier 1 risk-based capital ratio of 4.0% or more and a Tier 1 leverage capital ratio of 4.0% or more (3.0% under certain circumstances) and does not meet the definition of “well capitalized,” (iii) “undercapitalized,” if it has a total risk-based capital ratio that is less than 8.0%, a Tier 1 risk-based ratio that is less than 4.0% or a Tier 1 leverage capital ratio that is less than 4.0% (3.0% under certain circumstances), (iv) “significantly undercapitalized,” if it has a total risk-based capital ratio that is less than 6.0%, a Tier 1 risk-based capital ratio that is less than 3.0% or a Tier 1 leverage capital ratio that is less than 3.0%, and (v) “critically undercapitalized,” if it has a ratio of tangible equity to total assets that is equal to or less than 2.0%. A depository institution may be deemed to be in a capitalization category that is lower than is indicated by its actual capital position if it receives a less than satisfactory examination rating in any of the following categories: capital, asset quality, management, earnings, liquidity, and sensitivity to market risk. The Bank is a “well capitalized” institution.

FDICIA generally prohibits a depository institution from making any capital distribution (including payment of a dividend) or paying any management fees to its holding company if the depository institution would thereafter be undercapitalized. Undercapitalized depository institutions are subject to restrictions on borrowing from the Federal Reserve System. In addition, undercapitalized depository institutions are subject to growth limitations and are required to submit capital restoration plans. A depository institution’s holding company must guarantee the capital plan, up to an amount equal to the lesser of 5% of the depository institution’s assets at the time it becomes undercapitalized or the amount of the capital deficiency when the institution fails to comply with the plan. The federal banking agencies may not accept a capital plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution’s capital. Significantly undercapitalized depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets, and cessation of receipt of deposits from corresponding banks. Critically undercapitalized depository institutions are subject to the appointment of a receiver or conservator.

FDIC Insurance Assessments

The Bank is subject to FDIC deposit insurance assessments. The Federal Deposit Insurance Reform Act of 2005 (the “Reform Act”) merged the Bank Insurance Fund (“BIF”) and the Savings Association Insurance Fund (“SAIF”) into a single Deposit Insurance Fund, and increased the maximum amount of the insurance coverage for certain retirement accounts, and possible “inflation adjustments” in the maximum amount of coverage available with respect to other insured accounts. In addition, it granted a one-time initial assessment credit (of approximately \$4.7 billion) to recognize institutions’ past contributions to the fund. As a result of the merger of the BIF and the SAIF, all insured institutions are subject to the same assessment rate schedule.

The Dodd-Frank Act contains several important deposit insurance reforms, including the following: (i) the maximum deposit insurance amount was permanently increased to \$250,000; (ii) the deposit insurance assessment is now based on the insured depository institution’s average consolidated assets minus its average tangible equity, rather than on its deposit base; (iii) the minimum reserve ratio for the Deposit Insurance Fund was raised from 1.15% to 1.35% of estimated insured deposits by September 30, 2020; (iv) the FDIC is required to “offset the effect” of increased assessments on insured depository institutions with total consolidated assets of less than \$10 billion; (v) the FDIC is no longer required to pay dividends if the Deposit Insurance Fund’s reserve ratio is greater than the minimum ratio; and (vi) the FDIC temporarily insured the full amount of qualifying “noninterest-bearing transaction accounts” for 2011 and 2012. As defined in the Dodd-Frank Act, a “noninterest-bearing transaction account” is a deposit or account maintained at a depository institution with respect to which interest is neither accrued nor paid, on which the depositor or account holder is permitted to make withdrawals by negotiable or transferrable instrument, payment orders of withdrawals, telephone or other electronic media transfers, or other similar items for the purpose of making payments or transfers to third parties or others, and on which the insured depository institution does not reserve the right to require advance notice of an intended withdrawal.

Effective April 1, 2011, the FDIC amended its regulations under the FDIA, as amended by the Dodd-Frank Act, to modify the definition of a depository institution’s insurance assessment base; to revise the deposit insurance assessment rate schedules in light of the new assessment base and altered adjustments; to implement the dividend provisions of the Dodd-Frank Act; and to revise the large insured depository institution assessment system to better differentiate for risk and better take into account losses from large institution failures that the FDIC may incur. Since the new assessment base under the Dodd-Frank Act is larger than the current assessment base, the new assessment rates adopted by the FDIC are lower than the former rates.

The Temporary Liquidity Guarantee Program (“TLGP”) of the FDIC provided two limited guarantee programs: the Debt Guarantee Program (“DGP”) and the Transaction Account Guarantee Program (“TAGP”). The DGP guaranteed all newly issued senior unsecured debt (e.g., promissory notes, unsubordinated unsecured notes and commercial paper) up to prescribed limits issued by participating entities, including bank holding companies, in the period from October 14, 2008 through October 31, 2009. For eligible debt issued in that period, the FDIC provided the guarantee coverage until the earlier of the maturity date of the debt or December 31, 2012. The TAGP offered a full guarantee for non interest-bearing transaction accounts held at FDIC-insured depository institutions. The unlimited deposit coverage was voluntary for eligible institutions and in addition to the \$250,000 FDIC deposit insurance per depositor that was included as part of the Emergency Economic Stabilization Act of 2008. The TAGP coverage became effective on October 14, 2008 and continued for participating institutions until December 31, 2011. The Group opted to become a participating entity on both of these programs and paid applicable fees for participation. Participants in the DGP program had a fee structure based on a sliding scale, depending on length of maturity. Shorter-term debt had a lower fee structure and longer-term debt had a higher fee. The range was 50 basis points on debt of 180 days or less, and a maximum of 100 basis points for debt with maturities of one year or longer, on an annualized basis. Any eligible entity that did not choose to opt out of the TAGP was assessed, on a quarterly basis, an annualized 10 cents per \$100 fee on balances in non-interest bearing transaction accounts that exceeded the existing deposit insurance limit of \$250,000. In March 2009, the Bank issued \$105 million in notes guaranteed under the TLGP. These notes matured on March 16, 2012.

Brokered Deposits

FDIC regulations adopted under the FDIA govern the receipt of brokered deposits by banks. Well capitalized institutions are not subject to limitations on brokered deposits, while adequately capitalized institutions are able to accept, renew or rollover brokered deposits only with a waiver from the FDIC and subject to certain restrictions on the interest paid on such deposits. Undercapitalized institutions are not permitted to accept brokered deposits. As of December 31, 2012, the Bank was a well capitalized institution and was therefore not subject to these limitations on brokered deposits.

Regulatory Capital Requirements

The Federal Reserve Board has risk-based capital guidelines for bank holding companies. Under the guidelines, the minimum ratio of qualifying total capital to risk-weighted assets is 8%. At least half of the total capital is to be comprised of qualifying common stockholders’ equity, qualifying noncumulative perpetual preferred stock (including related surplus), minority interests related to qualifying common or noncumulative perpetual preferred stock directly issued by a consolidated U.S. depository institution or foreign bank subsidiary, and restricted core capital elements (collectively, “Tier 1 Capital”). Banking organizations are expected to maintain at least 50 percent of their Tier 1 Capital as common equity. Except as otherwise discussed below in light of the Dodd-Frank Act in connection with certain debt or equity instruments issued on or after May 19, 2010, not more than 25% of qualifying Tier 1 Capital may consist of qualifying cumulative perpetual preferred stock, trust preferred securities or other so called restricted core capital elements. “Tier 2 Capital” may consist, subject to certain limitations, of allowance for loan and lease losses; perpetual preferred stock and related surplus; hybrid capital instruments, perpetual debt, and mandatory convertible debt securities; term subordinated debt and intermediate-term preferred stock, including related surplus; and unrealized holding gains on equity securities. “Tier 3 Capital” consists of qualifying unsecured subordinated debt. The sum of Tier 2 and Tier 3 Capital may not exceed the amount of Tier 1 Capital.

The Federal Reserve Board has regulations with respect to risk-based and leverage capital ratios that require most intangibles, including goodwill and core deposit intangibles, to be deducted from Tier 1 Capital. The only types of identifiable intangible assets that may be included in, that is, not deducted from, an organization’s capital are readily marketable mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships.

In addition, the Federal Reserve Board has established minimum leverage ratio (Tier 1 Capital to total assets) guidelines for bank holding companies and member banks. These guidelines provide for a minimum leverage ratio of 3% for bank holding companies and member banks that meet certain specified criteria including that they have the highest regulatory rating. All other bank holding companies and member banks are required to maintain a minimum ratio of Tier 1 Capital to total assets of 4%. The guidelines also provide that banking organizations experiencing internal growth or making acquisitions are expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the guidelines state that the Federal Reserve Board will continue to consider a “tangible Tier 1 leverage ratio” and other indicators of capital strength in evaluating proposals for expansion or new activities.

Under the Dodd-Frank Act, federal banking regulators are required to establish minimum leverage and risk-based capital requirements, on a consolidated basis, for insured institutions, depository institution holding companies, and non-bank financial companies supervised by the Federal Reserve Board. The minimum leverage and risk-based capital requirements are to be determined

based on the minimum ratios established for insured depository institutions under prompt corrective action regulations. In effect, such provision of the Dodd-Frank Act, which is commonly known as the Collins Amendment, applies to bank holding companies the same leverage and risk-based capital requirements that will apply to insured depository institutions. Because the capital requirements must be the same for insured depository institutions and their holding companies, the Collins Amendment generally excludes certain debt or equity instruments, such as cumulative perpetual preferred stock and trust preferred securities, from Tier 1 Capital, subject to a three-year phase-out from Tier 1 qualification for such instruments issued before May 19, 2010, with the phase-out commencing on January 1, 2013. However, such instruments issued before May 19, 2010, by a bank holding company, such as the Group, with total consolidated assets of less than \$15 billion as of December 31, 2009, are not affected by the Collins Amendment and may continue to be included in Tier 1 Capital as a restricted core capital element. Although the Dodd-Frank Act required federal banking regulators to implement the Collins Amendment by January 2012, the Federal Reserve Board, on June 7, 2012, issued three notices of proposed rulemaking addressing the implementation of Basel III regulatory capital reforms as well as the capital requirements under the Dodd-Frank Act, including the Collins Amendment.

Failure to meet the capital guidelines could subject an institution to a variety of enforcement actions including the termination of deposit insurance by the FDIC and to certain restrictions on its business. At December 31, 2012, the Group was in compliance with all capital requirements. For more information, please refer to the accompanying consolidated financial statements.

Safety and Soundness Standards

Section 39 of the FDIA, as amended by FDICIA, requires each federal banking agency to prescribe for all insured depository institutions standards relating to internal control, information systems, and internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, compensation, fees and benefits, and such other operational and managerial standards as the agency deems appropriate. In addition, each federal banking agency also is required to adopt for all insured depository institutions standards relating to asset quality, earnings and stock valuation that the agency determines to be appropriate. Finally, each federal banking agency is required to prescribe standards for the employment contracts and other compensation arrangements of executive officers, employees, directors and principal stockholders of insured depository institutions that would prohibit compensation, benefits and other arrangements that are excessive or that could lead to a material financial loss for the institution. If an institution fails to meet any of the standards described above, it will be required to submit to the appropriate federal banking agency a plan specifying the steps that will be taken to cure the deficiency. If the institution fails to submit an acceptable plan or fails to implement the plan, the appropriate federal banking agency will require the institution to correct the deficiency and, until it is corrected, may impose other restrictions on the institution, including any of the restrictions applicable under the prompt corrective action provisions of FDICIA.

The FDIC and the other federal banking agencies have adopted Interagency Guidelines Establishing Standards for Safety and Soundness that, among other things, set forth standards relating to internal controls, information systems and internal audit systems, loan documentation, credit, underwriting, interest rate exposure, asset growth and employee compensation.

Activities and Investments of Insured State-Chartered Banks

Section 24 of the FDIA, as amended by FDICIA, generally limits the activities and equity investments of FDIC-insured, state-chartered banks to those that are permissible for national banks. Under FDIC regulations of equity investments, an insured state bank generally may not directly or indirectly acquire or retain any equity investment of a type, or in an amount, that is not permissible for a national bank. An insured state bank, such as the Bank, is not prohibited from, among other things, (i) acquiring or retaining a majority interest in a subsidiary engaged in permissible activities, (ii) investing as a limited partner in a partnership, or as a non-controlling interest holder of a limited liability company, the sole purpose of which is direct or indirect investment in the acquisition, rehabilitation or new construction of a qualified housing project, provided that such investments may not exceed 2% of the bank's total assets, (iii) acquiring up to 10% of the voting stock of a company that solely provides or reinsures directors', trustees' and officers' liability insurance coverage or bankers' blanket bond group insurance coverage for insured depository institutions, and (iv) acquiring or retaining the voting stock of an insured depository institution if certain requirements are met, including that it is owned exclusively by other banks.

Under the FDIC regulations governing the activities and investments of insured state banks which further implemented Section 24 of the FDIA, as amended by FDICIA, an insured state-chartered bank may not, directly, or indirectly through a subsidiary, engage as "principal" in any activity that is not permissible for a national bank unless the FDIC has determined that such activities would pose no risk to the Deposit Insurance Fund and the bank is in compliance with applicable regulatory capital requirements. Any insured state-chartered bank directly or indirectly engaged in any activity that is not permitted for a national bank must cease the impermissible activity.

Transactions with Affiliates and Related Parties

Transactions between the Bank and any of its affiliates are governed by sections 23A and 23B of the Federal Reserve Act. These sections are important statutory provisions designed to protect a depository institution from transferring to its affiliates the subsidy arising from the institution's access to the Federal safety net. An affiliate of a bank is any company or entity that controls, is controlled by, or is under common control with the bank, including investment funds for which the bank or any of its affiliates is an investment advisor. Generally, sections 23A and 23B (i) limit the extent to which a bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of the bank's capital stock and surplus, and limit such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus, and (ii) require that all such transactions be on terms that are consistent with safe and sound banking practices. The term "covered transactions" includes the making of loans, purchase of or investment in securities issued by the affiliate, purchase of assets, acceptance of securities issued by the affiliate as collateral for a loan or extension of credit, issuance of guarantees and other similar types of transactions. The Dodd-Frank Act expanded the scope of transactions treated as "covered transactions" to include credit exposure to an affiliate on derivatives transactions, credit exposure resulting from a securities borrowing or lending transaction, or derivative transaction, and acceptances of affiliate-issued debt obligations as collateral for a loan or extension of credit. Most loans by a bank to any of its affiliates must be secured by collateral in amounts ranging from 100 to 130 percent of the loan amount, depending on the nature of the collateral. In addition, any covered transaction by a bank with an affiliate and any sale of assets or provision of services to an affiliate must be on terms that are substantially the same, or at least as favorable to the bank, as those prevailing at the time for comparable transactions with nonaffiliated companies. Regulation W of the Federal Reserve Board comprehensively implements sections 23A and 23B. The regulation unified and updated staff interpretations issued over the years prior to its adoption, incorporated several interpretative proposals (such as to clarify when transactions with an unrelated third party will be attributed to an affiliate), and addressed issues arising as a result of the expanded scope of non-banking activities engaged in by banks and bank holding companies and authorized for financial holding companies under the Gramm-Leach-Bliley Act.

Sections 22(g) and 22(h) of the Federal Reserve Act place restrictions on loans by a bank to executive officers, directors, and principal shareholders. Regulation O of the Federal Reserve Board implements these provisions. Under Section 22(h) and Regulation O, loans to a director, an executive officer and to greater-than-10% shareholders of a bank and certain of their related interests ("insiders"), and insiders of its affiliates, may not exceed, together with all other outstanding loans to such person and his related interests, the bank's single borrower limit (generally equal to 15% of the institution's unimpaired capital and surplus). Section 22(h) and Regulation O also require that loans to insiders and to insiders of affiliates be made on terms substantially the same as offered in comparable transactions to other persons, unless the loans are made pursuant to a benefit or compensation program that (i) is widely available to employees of the bank and (ii) does not give preference to insiders over other employees of the bank. Section 22(h) and Regulation O also require prior board of directors' approval for certain loans, and the aggregate amount of extensions of credit by a bank to all insiders cannot exceed the institution's unimpaired capital and surplus. Furthermore, Section 22(g) and Regulation O place additional restrictions on loans to executive officers.

Community Reinvestment Act

Under the Community Reinvestment Act ("CRA"), a financial institution has a continuing and affirmative obligation, consistent with its safe and sound operation, to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. The CRA requires federal examiners, in connection with the examination of a financial institution, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution. The CRA also requires all institutions to make public disclosure of their CRA ratings. The Group has a Compliance Department that oversees the planning of products and services offered to the community, especially those aimed to serve low and moderate income communities.

USA Patriot Act

Under Title III of the USA Patriot Act, also known as the International Money Laundering Abatement and Anti-Terrorism Financing Act of 2001, all financial institutions, including the Group, Oriental Financial Services, OFS Securities and the Bank, are required in general to identify their customers, adopt formal and comprehensive anti-money laundering programs, scrutinize or prohibit altogether certain transactions of special concern, and be prepared to respond to inquiries from U.S. law enforcement agencies concerning their customers and their transactions.

The U.S. Treasury Department (the "US Treasury") has issued a number of regulations implementing the USA Patriot Act that apply certain of its requirements to financial institutions. The regulations impose obligations on financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing.

Failure of a financial institution to comply with the USA Patriot Act's requirements could have serious legal consequences for the institution. The Group and its subsidiaries, including the Bank, have adopted policies, procedures and controls to address compliance with the USA Patriot Act under existing regulations, and will continue to revise and update their policies, procedures and controls to reflect changes required by the USA Patriot Act and the US Treasury's regulations.

Privacy Policies

Under the Gramm-Leach-Bliley Act, all financial institutions are required to adopt privacy policies, restrict the sharing of nonpublic customer data with nonaffiliated parties at the customer's request, and establish procedures and practices to protect customer data from unauthorized access. The Group and its subsidiaries have established policies and procedures to assure the Group's compliance with all privacy provisions of the Gramm-Leach-Bliley Act.

Sarbanes-Oxley Act

The Sarbanes-Oxley Act of 2002 ("SOX") implemented a range of corporate governance and accounting measures to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies, and to protect investors by improving the accuracy and reliability of disclosures under federal securities laws. In addition, SOX established membership requirements and responsibilities for the audit committee, imposed restrictions on the relationship between the Group and external auditors, imposed additional responsibilities for the external financial statements on the chief executive officer and the chief financial officer, expanded the disclosure requirements for corporate insiders, required management to evaluate its disclosure controls and procedures and its internal control over financial reporting, and required the auditors to issue a report on the internal control over financial reporting.

The Group has included in this annual report on Form 10-K management's assessment regarding the effectiveness of the Group's internal control over financial reporting. The internal control report includes a statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting for the Group; management's assessment as to the effectiveness of the Group's internal control over financial reporting based on management's evaluation as of year-end; and the framework used by management as criteria for evaluating the effectiveness of the Group's internal control over financial reporting. As of December 31, 2012, the Group's management concluded that its internal control over financial reporting was effective.

As allowed by SEC guidance, management excluded from its assessment of the effectiveness of the Group's internal control over financial reporting as of December 31, 2012, the recently acquired BBVAPR Companies, which included total assets of \$4.472 billion, total liabilities of \$3.969 billion and net interest income of \$7.8 million in the Group's consolidated financial statements as of and for the year ended December 31, 2012.

Puerto Rico Banking Act

As a Puerto Rico-chartered commercial bank, the Bank is subject to regulation and supervision by the OCFI under the Banking Act, which contains provisions governing the incorporation and organization, rights and responsibilities of directors, officers and stockholders, as well as the corporate powers, savings, lending, capital and investment requirements and other aspects of the Bank and its affairs. In addition, the OCFI is given extensive rulemaking power and administrative discretion under the Banking Act. The OCFI generally examines the Bank at least once every year.

The Banking Act requires that a minimum of 10% of the Bank's net income for the year be transferred to a reserve fund until such fund (legal surplus) equals the total paid-in capital on common and preferred stock. At December 31, 2012, legal surplus amounted to \$52.1 million (December 31, 2011 — \$50.2 million). The amount transferred to the legal surplus account is not available for the payment of dividends to shareholders.

The Banking Act also provides that when the expenditures of a bank are greater than the receipts, the excess of the former over the latter must be charged against the undistributed profits of the bank, and the balance, if any, must be charged against the reserve fund. If there is no reserve fund sufficient to cover such balance in whole or in part, the outstanding amount must be charged against the capital account and no dividend may be declared until said capital has been restored to its original amount and the reserve fund to 20% of the original capital.

The Banking Act further requires every bank to maintain a legal reserve which cannot be less than 20% of its demand liabilities, except government deposits (federal, commonwealth and municipal), which are secured by actual collateral.

The Banking Act also requires change of control filings. When any person or entity will own, directly or indirectly, upon consummation of a transfer, 5% or more of the outstanding voting capital stock of a bank, the acquiring parties must inform the OCFI of the details not less than 60 days prior to the date said transfer is to be consummated. The transfer will require the approval of the

OCFI if it results in a change of control of the bank. Under the Banking Act, a change of control is presumed if an acquirer who did not own more than 5% of the voting capital stock before the transfer exceeds such percentage after the transfer.

The Banking Act permits Puerto Rico commercial banks to make loans to any one person, firm, partnership or corporation, up to an aggregate amount of 15% of the sum of: (i) the bank's paid-in capital; (ii) the bank's reserve fund; (iii) 50% of the bank's retained earnings, subject to certain limitations; and (iv) any other components that the OCFI may determine from time to time. If such loans are secured by collateral worth at least 25% more than the amount of the loan, the aggregate maximum amount will include 33.33% of 50% of the bank's retained earnings. There are no restrictions under the Banking Act on the amount of loans that are wholly secured by bonds, securities and other evidence of indebtedness of the Government of the United States or of the Commonwealth of Puerto Rico, or by bonds, not in default, of municipalities or instrumentalities of the Commonwealth of Puerto Rico.

The Puerto Rico Finance Board is composed of the Commissioner of Financial Institutions of Puerto Rico; the Presidents of the Government Development Bank for Puerto Rico, the Economic Development Bank for Puerto Rico and the Planning Board; the Puerto Rico Secretaries of Commerce and Economic Development, Treasury and Consumer Affairs; the Commissioner of Insurance; and the President of the Public Corporation for Insurance and Supervision of Puerto Rico Cooperatives. It has the authority to regulate the maximum interest rates and finance charges that may be charged on loans to individuals and unincorporated businesses in the Commonwealth.

The current regulations of the Puerto Rico Finance Board provide that the applicable interest rate on loans to individuals and unincorporated businesses is to be determined by free competition. The Puerto Rico Finance Board also has the authority to regulate maximum finance charges on retail installment sales contracts and for credit card purchases. There is presently no maximum rate for retail installment sales contracts and for credit card purchases.

Puerto Rico Internal Revenue Code

On January 31, 2011, the Governor of Puerto Rico signed into law the second and last phase of the Administration's tax reform bill. It creates the Internal Revenue Code for a New Puerto Rico, which has been subsequently amended several times (the "2011 Code"). The 2011 Code provides for the gradual repeal of the Puerto Rico Internal Revenue Code of 1994 (the "1994 Code"), as its provisions started to take effect, with some exceptions, as of January 1, 2011. For corporate taxpayers, the 2011 Code retains the 20% flat rate on "normal-tax net income" but establishes significantly lower rates applicable to "surtax net income" which is the "normal-tax net income" less the allowed surtax deduction. The 2011 Code provides a surtax rate from 5% to 10% for the 2011, 2012 and 2013 taxable years. As of the 2014 taxable year, the surtax rate may be reduced to 5% if certain economic and budgetary control tests are met by the Government of Puerto Rico. If such economic tests are not met, the reduction of the surtax rate will be postponed until the year when such economic tests are met. In the case of a controlled group of corporations, the determination of which surtax rate applies will be made by adding the "normal-tax net income" of each of the entities that are members of the controlled group reduced by the surtax deduction. The 2011 Code also increased the surtax deduction to \$750,000. In the case of a controlled group of corporations, the surtax deduction should be distributed among the members of the controlled group. The 2011 Code reduces the alternative minimum tax ("AMT") from 22% to 20%. It also eliminates the 5% additional surtax which was established by Act No. 7 of March 9, 2009, and the 5% recapture of the benefit of the income tax tables, except for the income earned by international banking entities, which is currently fully exempt, but was subject to a 5% income tax for the 2009, 2010 and 2011 taxable years. Under the 2011 Code, a corporate taxpayer had a one-time option of determining its income tax liability and filing its income tax return pursuant to the 1994 Code. This election was required with the filing of the 2011 income tax return and, once made, was irrevocable for such taxable year and for each of the next four taxable years. The Group elected to implement and file its income tax returns pursuant to the 2011 Code. Under the 2011 Code, all companies are treated as separate taxable entities and are not entitled to file consolidated returns. The Group and its subsidiaries are subject to Puerto Rico regular income tax or AMT on income earned from all sources. The AMT is payable if it exceeds regular income tax. The excess of AMT over regular income tax paid in any one year may be used to offset regular income tax in future years, subject to certain limitations.

International Banking Center Regulatory Act of Puerto Rico

The business and operations of the Bank's IBE Unit and Subsidiary are subject to supervision and regulation by the OCFI. Under the IBE Act, no sale, encumbrance, assignment, merger, exchange or transfer of shares, interest or participation in the capital of an IBE may be initiated without the prior approval of the OCFI, if by such transaction a person would acquire, directly or indirectly, control of 10% or more of any class of stock, interest or participation in the capital of the IBE. The IBE Act and the regulations issued thereunder by the OCFI (the "IBE Regulations") limit the business activities that may be carried out by an IBE. Such activities are limited in part to persons and assets/liabilities located outside of Puerto Rico. The IBE Act provides further that every IBE must have not less than \$300 thousand of unencumbered assets or acceptable financial guarantees.

Pursuant to the IBE Act and the IBE Regulations, the Bank's IBE Unit and Subsidiary have to maintain books and records of all their transactions in the ordinary course of business. They are also required to submit quarterly and annual reports of their financial condition and results of operations to the OCFI, including annual audited financial statements.

The IBE Act empowers the OCFI to revoke or suspend, after notice and hearing, a license issued thereunder if, among other things, the IBE fails to comply with the IBE Act, the IBE Regulations or the terms of its license, or if the OCFI finds that the business or affairs of the IBE are conducted in a manner that is not consistent with the public interest.

In 2012, the IBE Act was amended to prohibit new license applications to organize and operate an IBE. Any newly organized entity (now called an "international financial entity") must be licensed under a new law, and such entity (as opposed to existing IBEs organized under the IBE Act, including the Bank's IBE Unit and Subsidiary, which are "grandfathered") will generally be subject to a 4% Puerto Rico income tax rate.

Employees

At December 31, 2012, the Group had 1,654 employees. None of its employees is represented by a collective bargaining group. The Group considers its employee relations to be good.

Internet Access to Reports

The Group's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any and all amendments to such reports, filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, are available free of charge on or through the "Investor Relations" link of the Group's internet website at www.orientalbank.com, as soon as reasonably practicable after the Group electronically files such material with, or furnishes it to, the SEC.

The Group's corporate governance principles and guidelines, code of business conduct and ethics, and the charters of its audit and compliance committee, compensation committee, and corporate governance and nominating committee are available free of charge on the Group's website at www.orientalfg.com in the investor relations section under the corporate governance link. The Group's code of business conduct and ethics applies to its directors, officers, employees and agents, including its principal executive, financial and accounting officers.

ITEM 1A. RISK FACTORS

In addition to other information set forth in this report, you should carefully consider the following risk factors, as updated by other filings the Group makes with the SEC under the Exchange Act. Additional risks and uncertainties not presently known to us at this time or that the Group currently deems immaterial may also adversely affect the Group's business, financial condition or results of operations.

Most of our business is conducted in Puerto Rico, which in recent years has experienced a downturn in the economy and in the real estate market.

Because most of our business activities are conducted in Puerto Rico and a significant portion of our credit exposure on our loan portfolio, which is the largest component of our interest-earning assets, is concentrated in Puerto Rico, our profitability and financial condition may be adversely affected by an extended economic slowdown, adverse political or economic developments in Puerto Rico or the effects of a natural disaster, all of which could result in a reduction in loan originations, an increase in non-performing assets, an increase in foreclosure losses on mortgage loans, and a reduction in the value of our loans and loan servicing portfolio.

The economy of Puerto Rico entered into a recession in the fourth quarter of the government's fiscal year ended June 30, 2006. For fiscal years 2007, 2008, 2009, 2010 and 2011, Puerto Rico's real gross national product decreased by 1.2%, 2.9%, 3.8%, 3.4% and 1.5%, respectively.

On March 13, 2013, Standard & Poor's Rating Services ("S&P") downgraded Puerto Rico's general obligation debt ratings from "BBB" to "BBB-" with a negative outlook. In taking such action, S&P stated that the downgrade reflects a significantly larger estimated budget deficit in 2013 than was originally expected, which will make it difficult for Puerto Rico to achieve a structurally balanced budget within the next two years.

On February, 21, 2013, Fitch Ratings (“Fitch”) placed the Puerto Rico general obligation bonds and other debt rated BBB-plus on a negative watch. Fitch stated that the negative rating watch is based on the economic and revenue underperformance which Fitch believes has meaningfully increased the size of the Commonwealth’s operating budget imbalance for the current fiscal year and the gap the Commonwealth will need to address as it develops a balanced budget for 2014. Fitch does not believe that a balanced budget will be achieved in fiscal 2014, and meeting this goal will remain challenging thereafter.

On December 13, 2012, Moody’s Investors Service (“Moody’s”) downgraded the rating of Puerto Rico’s general obligation debt to Baa3 from Baa1 and assigned a negative outlook. In taking such action, Moody’s stated, in part, that economic growth prospects remain weak after six years of recession and could be further dampened by the Commonwealth’s efforts to control spending and reform its retirement system, both of which are needed to stabilize the Commonwealth’s financial results. It also stated that the lack of significant economic growth drivers and the Commonwealth’s declining population have also reduced prospects for a strong economic recovery, and that debt levels are very high and continue to grow, while financial performance has been weak, including lackluster revenue growth and large structural budget gaps that have led to a persistent reliance on deficit financings and serial debt restructurings to support operations in recent years. It further said that reform of the Commonwealth’s severely underfunded retirement systems is needed to avoid asset depletion and future budget pressure.

A period of reduced economic growth or a recession has historically resulted in a reduction in lending activity and an increase in the rate of default in commercial loans, consumer loans and residential mortgages. A recession may have a significant adverse impact on our net interest income and fee income. We may also experience significant losses on the loan portfolio due to a higher level of defaults on commercial loans, consumer loans and residential mortgages. For a discussion of the impact of the economy on our loan portfolios, see “—A prolonged economic downturn or recession or a continuing decline in the real estate market would likely result in an increase in delinquencies, defaults and foreclosures and in a reduction in loan origination activity, which would adversely affect our financial results.”

The prolonged recessionary economic environment accelerated the devaluation of properties and increased portfolio delinquency when compared with previous periods. Additional economic weakness in Puerto Rico and the U.S. mainland could further pressure residential property values, loan delinquencies, foreclosures and the cost of repossessing and disposing of real estate collateral.

The business activities of the BBVAPR Companies are similarly concentrated in the Puerto Rico market. Moreover, as a result of the BBVAPR Acquisition and the deleveraging of our balance sheet in the last quarter of 2012, our loan portfolio has become the largest component of our interest-earning assets. Consequently, the BBVAPR Acquisition has increased the risk we face in the event of a continued downturn in the Puerto Rico economy.

Our decisions regarding credit risk and the allowance for loan and lease losses may materially and adversely affect our business and results of operations.

Making loans is an essential element of our business, and there is a risk that the loans will not be repaid. This default risk is affected by a number of factors, including:

- the duration of the loan;
- credit risks of a particular borrower;
- changes in economic or industry conditions; and
- in the case of a collateralized loan, risks resulting from uncertainties about the future value of the collateral.

We strive to maintain an appropriate allowance for loan and lease losses to provide for probable losses inherent in the loan portfolio. We periodically determine the amount of the allowance based on consideration of several factors such as default frequency, internal risk ratings, expected future cash collections, loss recovery rates and general economic factors, among others. Our methodology for measuring the adequacy of the allowance relies on several key elements, which include a specific allowance for identified problem loans, a general systematic allowance, and an unallocated allowance.

We believe our allowance for loan and lease losses is currently sufficient given the constant monitoring of the risk inherent in the loan portfolio. However, there is no precise method of predicting loan losses and therefore we always face the risk that charge-offs in future periods will exceed the allowance for loan and lease losses and that additional increases in the allowance for loan and lease losses will be required. In addition, the FDIC as well as the OCFI may require us to establish additional reserves. Additions to the allowance for loan and lease losses would result in a decrease of net earnings and capital and could hinder our ability to pay dividends.

As a result of the BBVAPR Acquisition, we acquired a significant portfolio of commercial and auto loans. If we are unable to accurately predict loan losses with respect to these loan categories, we may have to increase the allowance for loan and lease losses. See “—Loans that we acquired in the BBVAPR Acquisition may be subject to greater than anticipated impairment.”

We are subject to default and other risks in connection with mortgage loan originations.

From the time that we fund the mortgage loans originated to the time that they are sold, we are generally at risk for any mortgage loan defaults. Once we sell the mortgage loans, the risk of loss from mortgage loan defaults and foreclosures passes to the purchaser or insurer of the mortgage loans. However, in the ordinary course of business, we make representations and warranties to the purchasers and insurers of mortgage loans relating to the validity of such loans. If there is a breach of any of these representations or warranties, we may be required to repurchase the mortgage loan and bear any subsequent loss on the mortgage loan. We also may be required to repurchase mortgage loans in the event that there was improper underwriting or fraud or in the event that the loans become delinquent shortly after they are originated. For the year ended December 31, 2012, we repurchased \$12.5 million of loans from GNMA. Any such repurchases in the future may negatively impact our liquidity and operating results. Termination of our ability to sell mortgage products to the government-sponsored entities would have a material adverse effect on our results of operations and financial condition. In addition, we may be required to indemnify certain purchasers and others against losses they incur in the event of breaches of representations and warranties and in various other circumstances, including securities fraud claims, and the amount of such losses could exceed the purchase amount of the related loans. Consequently, we may be exposed to credit risk associated with sold loans. In addition, we incur higher liquidity risk with respect to mortgage loans not eligible to be insured by FNMA, GNMA or FHLMC, due to a lack of secondary market in which to sell these loans.

We have established reserves in our consolidated financial statements for potential losses that are considered to be both probable and reasonably estimable related to the mortgage loans sold by us. The adequacy of the reserve and the ultimate amount of losses incurred will depend on, among other things, the actual future mortgage loan performance, the actual level of future repurchase and indemnification requests, the actual success rate of claimants, developments in litigation related to us and the industry, actual recoveries on the collateral and macroeconomic conditions (including unemployment levels and housing prices). Due to uncertainties relating to these factors, there can be no assurance that our reserves will be adequate or that the total amount of losses incurred will not have a material adverse effect upon our financial condition or results of operations. For additional information related to our allowance for loan and lease losses, see “Note 6—Allowance for Loan and Lease Losses” to our audited consolidated financial statements included in this annual report on Form 10-K for the year ended December 31, 2012.

Our earnings could decrease due to increases to the provision for credit losses

Our customers might not repay their loans according to the original terms, and the collateral securing the payment of those loans might be insufficient to pay any remaining loan balance. Hence, we may experience significant loan losses, which could have a materially adverse effect on our operating results. We make various assumptions and judgments about the collectability of our loan portfolio, including the creditworthiness of our borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. In determining the amount of the allowance for loan losses, we rely on loan quality reviews, past loss experience, and an evaluation of economic conditions, among other factors. If our assumptions prove to be incorrect, our allowance for loan losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to the allowance. Material additions to the allowance would materially decrease our net income.

Our emphasis on the origination of commercial real estate and business loans is one of the more significant factors in evaluating our allowance for loan losses. As we continue to increase the amount of these loans, additional or increased provisions for credit losses may be necessary and as a result would decrease our earnings.

Bank regulators periodically review our allowance for loan losses and may require us to increase our provision for credit losses or loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities could have a materially adverse effect on our results of operations and/or financial condition.

Our intangible assets could be determined to be impaired in the future and could decrease the Group’s earnings

In future periods, as a result of the BBVAPR Acquisition, we will be required to test our goodwill, core deposit and customer relationship intangible assets for impairment on a periodic basis. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities, and information concerning the terminal

valuation of similarly situated insured depository institutions. If an impairment determination is made in a future reporting period, our earnings and the book value of these intangible assets will be reduced by the amount of the impairment. If an impairment loss is recorded, it will have little or no impact on the tangible book value of our common shares or our regulatory capital levels, but such an impairment loss could significantly restrict the Group's ability to make dividend payments to us without prior regulatory approval.

We may not be able to realize the anticipated benefits of the BBVAPR Acquisition.

Our future growth and profitability depend, in part, on the ability to successfully manage the combined operations. The success of the BBVAPR Acquisition will depend on, among other things, our ability to assess the quality of assets acquired, to realize anticipated cost savings and to integrate the acquired companies in a manner that permits growth opportunities and does not materially disrupt our or BBVAPR's existing customer relationships or result in decreased revenue resulting from any loss of customers. If we are not able to successfully achieve these objectives, the anticipated benefits of the BBVAPR Acquisition may not be realized fully or at all or may take longer to realize than expected.

Loans that we acquired in the BBVAPR Acquisition may be subject to greater than anticipated impairment.

We have made fair value estimates of certain assets and liabilities in recording the BBVAPR Acquisition. Actual values of these assets and liabilities could differ from our estimates, which could result in us not achieving the anticipated benefits of the BBVAPR Acquisition. In addition, BBVAPR's loan scoring system is different than ours, and as we evaluate their loan portfolio using our systems, we may have to make additional adjustments.

Given the economic conditions in Puerto Rico, we may continue to experience increased credit costs or need to take greater than anticipated markdowns and make greater than anticipated provisions to increase the allowances for loan losses on the loans acquired that could adversely affect our financial condition and results of operations in the future.

We may not be able to integrate BBVAPR's business into our operations.

The successful integration of BBVAPR's banking operations and our future growth and profitability depend in part on our ability to successfully manage the combined operations. Integration of an acquired business can be complex and costly, sometimes including combining relevant accounting and data processing systems and management controls and policies, as well as managing relevant relationships with employees, clients, suppliers and other business partners. Integration efforts could divert management attention and resources, which could adversely affect our operations or results. The loss of key employees in connection with this acquisition could adversely affect our ability to successfully conduct the combined operations. There can be no assurance that any of these executives will choose to continue working with us, or if they do, that we will be able to successfully integrate these executives as part of our management team in the combined business.

The BBVAPR Acquisition may also result in business disruptions that cause us to lose customers or cause customers to move their accounts or business to competing financial institutions. It is possible that the integration process related to the acquisition could disrupt our ongoing business or result in inconsistencies in customer service that could adversely affect our ability to maintain relationships with clients, customers, depositors and employees. Our inability to overcome these risks could have a material adverse effect on our business or financial condition, results of operations and future prospects. There is no assurance that our integration efforts will not result in other unanticipated costs.

We will incur in significant costs related to the BBVAPR Acquisition.

We expect to incur certain one-time restructuring charges of approximately \$35 million in connection with the BBVAPR acquisition. The substantial majority of non-recurring expenses resulting from the BBVAPR Acquisition will be comprised of transaction costs related to the BBVAPR Acquisition, financing arrangements and employment-related costs. We also will incur transaction fees and costs related to formulating and implementing integration plans. We continue to assess the magnitude of these costs, and additional unanticipated costs may be incurred in the business integration of the two groups of companies. Although we expect that the elimination of duplicative costs, as well as the realization of other efficiencies or synergies related to the integration of the businesses should allow us to offset incremental transaction and acquisition-related costs over time, this net benefit may not be achieved in the near term, or at all.

Our financial results are constantly exposed to market risk, in particular to changes in interest rates.

Market risk refers to the probability of variations in the net interest income or the fair value of assets and liabilities due to changes in interest rates, currency exchange rates or equity prices.

Changes in interest rates are one of the principal market risks affecting us. Our income and cash flows depend to a great extent on the difference between the interest rates earned on interest-earning assets such as loans and investment securities and the interest rates paid on interest-bearing liabilities such as deposits and borrowings. Net interest income is the difference between the revenue generated on interest-earning assets and the interest cost of funding those assets. Depending on the duration and repricing characteristics of the assets, liabilities and off-balance sheet items, changes in interest rates could either increase or decrease the level of net interest income. For any given period, the pricing structure of the assets and liabilities is matched when an equal amount of such assets and liabilities mature or reprice in that period.

We use an asset-liability management software program to project future movements in the balance sheet and income statement. The starting point of the projections generally corresponds to the actual values of the balance sheet on the date of the simulations. These simulations are highly complex and use many simplifying assumptions. In addition, the interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and the policies of various governmental and regulatory agencies, in particular, the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, will influence the origination of loans, the prepayment speed of loans, the value of loans and investment securities, the purchase of investments, the generation of deposits and the rates received on loans and investment securities and paid on deposits or other sources of funding.

We are subject to interest rate risk because of the following factors:

- Assets and liabilities may mature or reprice at different times. For example, if assets reprice slower than liabilities and interest rates are generally rising, earnings may initially decline.
- Assets and liabilities may reprice at the same time but by different amounts. For example, when the general level of interest rates is rising, we may increase rates charged on loans by an amount that is less than the general increase in market interest rates because of intense pricing competition. Also, basis risk occurs when assets and liabilities have similar repricing frequencies but are tied to different market interest rate indices that may not move in tandem.
- Short-term and long-term market interest rates may change by different amounts, *i.e.*, the shape of the yield curve may affect new loan yields and funding costs differently.
- The remaining maturity of various assets and liabilities may shorten or lengthen as interest rates change. For example, if long-term mortgage interest rates decline sharply, our mortgage-backed securities portfolios may prepay significantly earlier than anticipated, which could reduce portfolio income. If prepayment rates increase, we would be required to amortize net premiums into income over a shorter period of time, thereby reducing the corresponding asset yield and net interest income. Prepayment risk also has a significant impact on mortgage-backed securities and collateralized mortgage obligations since prepayments could shorten the weighted average life of these portfolios.
- Interest rates may have an indirect impact on loan demand, credit losses, loan origination volume, the value of financial assets and financial liabilities, gains and losses on sales of securities and loans, the value of mortgage servicing rights and other sources of earnings.

In limiting interest rate risk to an acceptable level, management may alter the mix of floating and fixed rate assets and liabilities, change pricing schedules, adjust maturities through sales and purchases of investment securities, and enter into derivative contracts, among other alternatives. We may suffer losses or experience lower spreads than anticipated in initial projections as management implements strategies to reduce future interest rate exposure.

The hedging transactions that we enter into may not be effective in managing our exposure to market risk, including interest rate risk.

We use derivatives, such as interest rate swaps and options on interest rate swaps, to manage part of our exposure to market risk caused by changes in interest rates. We have also offered certificates of deposit with an option tied to the performance of the Standard & Poor 500 stock market index and use derivatives, such as option agreements with major broker-dealer companies, to manage our exposure to changes in the value of the index. The derivative instruments that we may utilize also have their own risks, which include: (i) basis risk, which is the risk of loss associated with variations in the spread between the asset yield and the funding and/or hedge cost; (ii) credit or default risk, which is the risk of insolvency or other inability of the counterparty to a particular

transaction to perform its obligations thereunder; and (iii) legal risk, which is the risk that we are unable to enforce certain terms of such instruments. All or any of such risks could expose us to losses.

If the counterparty to a derivative contract fails to perform, our credit risk is equal to the net fair value of the contract. We deal with counterparties that have high quality credit ratings at the time we enter into the counterparty relationships. However, there can be no assurances that the counterparties will have the ability to perform under their contracts. If the counterparty fails to perform, including as a result of the bankruptcy or insolvency of such counterparty, we would incur losses as a result.

We may incur a significant impairment charge in connection with a decline in the market value of our investment securities portfolio.

A substantial part of our earnings come from the treasury business segment, which encompasses the investment securities portfolio. The determination of fair value for investment securities involves significant judgment due to the complexity of factors contributing to the valuation, many of which are not readily observable in the market. In addition, we utilize and review information obtained from third-party sources to measure fair values. Third-party sources also use assumptions, judgments and estimates in determining securities values, and different third parties may provide different prices for securities. Moreover, depending upon, among other things, the measurement date of the security, the subsequent sale price of the security may be different from its recorded fair value. These differences may be significant, especially if the security is sold during a period of illiquidity or market disruption.

When the fair value of a security declines, management must assess whether the decline is “other-than-temporary.” When the decline in fair value is deemed “other-than-temporary,” the amortized cost basis of the investment security is reduced to its then current fair value. The term “other-than-temporary impairment” is not intended to indicate that the decline is permanent, but indicates that the prospect for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Any portion of a decline in value associated with credit loss is recognized in income with the remaining noncredit-related component being recognized in other comprehensive income. A credit loss is determined by assessing whether the amortized cost basis of the security will be recovered, by comparing the present value of cash flows expected to be collected from the security, computed using original yield as the discount rate, to the amortized cost basis of the security. The shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis is considered to be the “credit loss.” Such impairment charges reflect non-cash losses at the time of recognition. Subsequent disposition or sale of such assets could further affect our future results of operations, as they are based on the difference between the sale prices received and the adjusted amortized cost of such assets at the time of sale. We consider numerous factors in our review of whether a decline in fair value is other-than-temporary, many of which involve complex judgment.

A decline in the market value of our investment securities portfolio could adversely impact our regulatory capital ratios.

In June 2012, the Federal Reserve Board, together with other federal banking regulatory agencies, recently issued proposed capital rules to implement the so-called “Basel III” capital framework in the United States. Among other things, the proposed rules would require banking organizations such as ourselves to include gains and losses on our securities holdings classified as available-for-sale (“AFS”) in our common equity tier 1 capital (“CET1”). This aspect of the rules would be phased in over six years with full gain and loss flow-through to capital starting in 2018. Currently, unrealized losses on AFS equity securities are counted against Tier 1 capital, unrealized gains on AFS equity securities are partially included in Tier 2 capital and unrealized gains and losses on AFS debt securities are excluded from regulatory capital. However, these unrealized gains and losses are reflected in stockholders’ equity under accounting principles generally accepted in the United States (“GAAP”). The agencies’ proposals introduce the concept of CET1—which is comprised of qualifying common stock instruments, retained earnings, accumulated other comprehensive income (“AOCI”), certain qualifying minority interests in consolidated subsidiaries and other adjustments, and establish a new minimum ratio of CET1 to total risk-weighted assets of 4.5% and a capital conservation buffer of 2.5% to be phased in over several years. Because of the inclusion of AOCI, unlike the current general risk-based capital rules, unrealized gains and losses on all AFS-classified securities would flow through to CET1 capital, after the transition period, if the proposals are adopted in their current form. Our CET1 levels are likely to be significantly more volatile under the agencies’ proposals than previously because unrealized gains and losses on AFS classified securities recognized in stockholders’ equity on the balance sheet for accounting purposes would also be incorporated for regulatory capital purposes. Accordingly, a decline in the market value of our investment securities portfolio could adversely impact our regulatory capital ratios.

Market conditions and actions by governmental authorities may upset the historical relationship between interest rate changes and prepayment trends, which would make it more difficult for us to analyze our investment portfolio.

Our success depends in part on our ability to analyze the relationship of changing interest rates on prepayments of the mortgage loans that underlie our mortgage-backed securities (“MBS”) portfolio. Changes in interest rates and prepayments affect the market price of MBS that we may purchase and any MBS that we may hold at a given time. As part of our overall portfolio risk management, we analyze interest rate changes and prepayment trends separately and collectively to assess their effects on our investment portfolio. In conducting this analysis, we depend on certain assumptions based upon historical trends with respect to the relationship between interest rates and prepayments under normal market conditions. U.S. government programs aimed at assisting homeowners, including the Homeowner Affordability and Stability Plan announced by the US Treasury in February 2009, the “Operation Twist” program announced by the Federal Reserve Board on September 21, 2011, the expansion of the Home Affordable Refinancing Program (“HARP”) announced by the Federal Housing Finance Agency (“FHFA”), FNMA and the FHLMC on October 24, 2011, and other expansions to the US Treasury’s Home Affordable Modification Program (“HAMP”), including proposals to allow FNMA and FHLMC to use principal reductions when modifying loans under HAMP, could cause an increase in prepayment rates. Bills to implement these proposals, which were opposed by the FHFA, are currently under consideration in both chambers of Congress. On February 1, 2012, President Obama proposed legislation to expand HARP in order to allow a greater number of homeowners to refinance their mortgages at historically low interest rates. If the dislocations in the residential mortgage market, recent or future government actions, or other developments change the way that prepayment trends have historically responded to interest rate changes, it would significantly affect our ability to (i) assess the market value of our investment portfolio, (ii) implement our hedging strategies, and (iii) adopt techniques to reduce our prepayment rate volatility. This could adversely affect our results of operations, financial position or perception of financial health.

A prolonged economic downturn or recession or a continuing decline in the real estate market would likely result in an increase in delinquencies, defaults and foreclosures and in a reduction in loan origination activity, which would adversely affect our financial results.

The residential mortgage loan origination business has historically been cyclical, enjoying periods of strong growth and profitability followed by periods of lower volumes and industry-wide losses. The market for residential mortgage loan originations is currently in decline, and this trend could also reduce the level of mortgage loans that we may originate in the future and may adversely impact our business. During periods of rising interest rates, refinancing originations for many mortgage products tend to decrease as the economic incentives for borrowers to refinance their existing mortgage loans are reduced. In addition, the residential mortgage loan origination business is impacted by home values. A significant trend of decreasing values in certain housing segments in Puerto Rico has also been noted. There is a risk that a reduction in housing values could negatively impact our loss levels on the mortgage portfolio because the value of the homes underlying the loans is a primary source of repayment in the event of foreclosure.

The decline in Puerto Rico’s economy has had an adverse effect in the credit quality of our loan portfolios. Among other things, during the recession, we experienced an increase in the level of non-performing assets and loan loss provision, which adversely affected our profitability. Although the delinquency rates have decreased in the short term, they may increase if the economy falls back into a recession. If there is another decline in economic activity, additional increases in the allowance for loan and lease losses could be necessary with further adverse effects on our profitability.

Any sustained period of increased delinquencies, foreclosures or losses could harm our ability to sell loans, the price received on the sale of such loans, and the value of the mortgage loan portfolio, all of which could have a negative impact on our results of operations and financial condition. In addition, any material decline in real estate values would weaken our collateral loan-to-value ratios and increase the possibility of loss if a borrower defaults. For a discussion of the impact of the Puerto Rico economy on our business operations, see “—Most of our business is conducted in Puerto Rico, which in recent years has experienced a downturn in the economy and in the real estate market.”

A continuing decline in the real estate market in the U.S. mainland and ongoing disruptions in the capital markets may harm our investment securities and wholesale funding portfolios.

The housing market in the U.S. is undergoing a correction of historic proportions. After a period of several years of booming housing markets, fueled by liberal credit conditions and rapidly rising property values, the sector has been in the midst of a substantial correction since early 2007. The general level of property values in the U.S., as measured by several indices widely followed by the market, has declined. These declines are the result of ongoing market adjustments that are aligning property values with income levels and home inventories. The U.S. residential real estate market has most recently shown signs of recovery driven by lower interest rates, fewer foreclosures, high affordability of home ownership, and satisfying demand that has built up during a period of economic uncertainty. However, we cannot predict whether the recovery will continue or if and when the market and related economic forces will return the U.S. residential real estate industry to a period of sustained growth. Diverse macroeconomic developments could also

slow or impair a housing recovery and if the real estate market or the economy as a whole does not improve, we may experience material adverse effects on our business or financial condition and liquidity, including our investment securities and wholesale funding portfolios. Furthermore, any concern regarding the long-term sovereign credit rating of the United States, including due to concerns related to U.S. federal fiscal policy or difficulties in addressing federal debt levels, could stress the capital markets in the United States and globally and could have a negative impact on our investment securities and wholesale funding portfolios.

Significant concern regarding the creditworthiness of some of the governments in Europe has also contributed to volatility in the financial markets and led to greater economic uncertainty worldwide. Sovereign debt concerns in Europe could diminish economic recovery and lead to further stress in the capital markets, both globally and in the United States, which could also have a negative impact on our investment securities and wholesale funding portfolios.

Our business could be adversely affected if we cannot maintain access to stable funding sources.

Our business requires continuous access to various funding sources. We are able to fund our operations through deposits as well as through advances from the FHLB-NY and other alternative sources; however, our business is significantly dependent upon other wholesale funding sources, such as repurchase agreements and brokered deposits, which consisted of approximately 32% of our total interest-bearing liabilities as of December 31, 2012. While most of our repurchase agreements have been structured with initial terms to maturity of between three and ten years, most of the counterparties have the right to exercise put options before the contractual maturities.

Brokered deposits are typically sold through an intermediary to small retail investors. Our ability to continue to attract brokered deposits is subject to variability based upon a number of factors, including volume and volatility in the global securities markets, our credit rating and the relative interest rates that we are prepared to pay for these liabilities. Brokered deposits are generally considered a less stable source of funding than core deposits obtained through retail bank branches. Investors in brokered deposits are generally more sensitive to interest rates and will generally move funds from one depository institution to another based on small differences in interest rates offered on deposits.

We expect to have continued access to credit from the foregoing sources of funds. However, there can be no assurance that such financing sources will continue to be available or will be available on favorable terms. In a period of financial disruption, or if negative developments occur with respect to us, the availability and cost of funding sources could be adversely affected. In that event, our cost of funds may increase, thereby reducing the net interest income, or we may need to dispose of a portion of the investment portfolio, which, depending upon market conditions, could result in realizing a loss or experiencing other adverse accounting consequences upon the dispositions. The interest rates that we pay on our securities are also influenced by, among other things, applicable credit ratings from recognized rating agencies. A downgrade to any of these credit ratings could affect our ability to access the capital markets, increase our borrowing costs and have a negative impact on our results of operations. Our efforts to monitor and manage liquidity risk may not be successful to deal with dramatic or unanticipated changes in the global securities markets or other reductions in liquidity driven by us or market related events. In the event that such sources of funds are reduced or eliminated and we are not able to replace them on a cost-effective basis, we may be forced to curtail or cease our loan origination business and treasury activities, which would have a material adverse effect on our operations and financial condition.

Our risk management policies, procedures and systems may be inadequate to mitigate all risks inherent in our various businesses.

A comprehensive risk management function is essential to the financial and operational success of our business. The types of risk we monitor and seek to manage include, but are not limited to, operational risk, technological and organizational risk, market risk, fiduciary risk, legal and compliance risk, liquidity risk and credit risk. We have adopted various policies, procedures and systems to monitor and manage these risks. There can be no assurance that those policies, procedures and systems are adequate to identify and mitigate all risks inherent in our various businesses. Our businesses and the markets in which we operate are also continuously evolving. If we fail to fully understand the implications of changes in our business or the financial markets and to adequately or timely enhance the risk framework to address those changes, we could incur losses. In addition, in a difficult or less liquid market environment, our risk management strategies may not be effective because other market participants may be attempting to use the same or similar strategies to deal with the challenging market conditions. In such circumstances, it may be difficult for us to reduce our risk positions due to the activity of such other market participants.

Competition with other financial institutions could adversely affect our profitability.

We face substantial competition in originating loans and in attracting deposits and assets to manage. The competition in originating loans and attracting assets comes principally from other U.S., Puerto Rico and foreign banks, investment advisors, broker-dealers, mortgage banking companies, consumer finance companies, credit unions, insurance companies, and other institutional lenders and purchasers of loans. We will encounter greater competition as we expand our operations. Increased competition may require us to increase the rates paid on deposits or lower the rates charged on loans which could adversely affect our profitability.

Our ability to receive dividends from our subsidiaries could affect our liquidity and ability to pay dividends.

We are a separate and distinct legal entity from our subsidiaries. Dividends to us from our subsidiaries have represented a major source of funds for us to pay dividends on our common and preferred stock, make payments on corporate debt securities and meet other obligations. There are various U.S. federal and Puerto Rico law limitations on the extent to which Oriental Bank, our main subsidiary, can finance or otherwise supply funds to us through dividends and loans. These limitations include minimum regulatory capital requirements, U.S. federal and Puerto Rico banking law requirements concerning the payment of dividends out of net profits or surplus, Sections 23A and 23B of the Federal Reserve Act of 1913 and Regulation W of the Federal Reserve Board governing transactions between an insured depository institution and its affiliates, as well as general federal regulatory oversight to prevent unsafe or unsound practices.

If our subsidiaries' earnings are not sufficient to make dividend payments while maintaining adequate capital levels, our liquidity may be affected, and we may not be able to make dividend payments to our holders of common and preferred stock or payments on outstanding corporate debt securities or meet other obligations, each of which could have a material adverse impact on our results of operations, financial position or perception of financial health.

In addition, our right to participate in a distribution of assets upon a subsidiary's liquidation or reorganization is subject to the prior claims of the subsidiary's creditors.

Loans that we acquired in the FDIC-assisted acquisition of Eurobank may not be covered by the shared-loss agreements if the FDIC determines that we have not adequately performed under these agreements or if the shared-loss agreements have ended.

Although the FDIC has agreed to reimburse us for 80% of qualifying losses on covered loans, we are not protected from all losses resulting from charge-offs with respect to such loans. Also, the FDIC has the right to refuse or delay payment for loan and lease losses if the shared-loss agreements are not performed by us in accordance with their terms. Additionally, the shared-loss agreements have limited terms, and therefore, any charge-offs that we experience after the terms of the shared-loss agreements have ended would not be recoverable from the FDIC.

Certain provisions of the shared-loss agreements entered into with the FDIC may have anti-takeover effects and could limit our ability to engage in certain strategic transactions that our board of directors believes would be in the best interests of shareholders.

The FDIC's agreement to bear 80% of qualifying losses on single family residential loans for ten years and commercial loans for five years is one of our significant assets and a feature of the FDIC-assisted acquisition without which we would not have entered into such transaction. Our agreement with the FDIC requires that we receive prior FDIC consent, which may be withheld by the FDIC in its sole discretion, prior to us or our shareholders engaging in certain transactions. If any such transaction is completed without prior FDIC consent, the FDIC would have the right to discontinue the loss-sharing arrangement.

Among other things, prior FDIC consent is required for: (i) a merger or consolidation of us with or into another company if our shareholders will own less than 2/3 of the combined company and (ii) a sale of shares by one or more of our shareholders that will effect a change in control of Oriental Bank, as determined by the FDIC with reference to the standards set forth in the Change in Bank Control Act of 1978 (generally, the acquisition of between 10% and 25% of our voting securities where the presumption of control is not rebutted, or the acquisition of more than 25% of our voting securities). Such a sale by shareholders may occur beyond our control. If we or any shareholder desires to enter into any such transaction, there can be no assurances that the FDIC would grant its consent in a timely manner, without conditions, or at all. If one of these transactions were to occur without prior FDIC consent and the FDIC withdrew its loss-share protection, there could be a material adverse impact on us.

Loans that we acquired in the FDIC-assisted acquisition may be subject to impairment.

Although the loan portfolios acquired by us were initially accounted for at fair value, certain of such loans have become impaired and we have recorded \$54.1 million in allowance for loan losses related to this portfolio. There is no assurance that loans in this portfolio

will not become impaired or further impaired, which may result in additional provision for loan and lease losses related to these portfolios. The fluctuations in economic conditions, including those related to the Puerto Rico residential and commercial real estate and construction markets, may increase the level of provision for credit losses that we make to our loan portfolio and portfolios acquired in the FDIC-assisted acquisition, and consequently, reduce our net income. These fluctuations are not predictable, cannot be controlled, and may have a material adverse impact on our operations and financial condition even if other favorable events occur.

We operate in a highly regulated environment and may be adversely affected by changes in federal and local laws and regulations.

Our operations are subject to extensive regulation by federal, state and local governmental authorities and are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of our operations. Because our business is highly regulated, the laws, rules and regulations applicable to us are subject to regular modification and change. For example, the Dodd-Frank Act has a broad impact on the financial services industry, including significant regulatory and compliance changes, such as: (i) enhanced resolution authority of troubled and failing banks and their holding companies; (ii) enhanced lending limits strengthening the existing limits on a depository institution's credit exposure to one borrower and to affiliates; (iii) increased capital and liquidity requirements; (iv) increased regulatory examination fees; (v) changes to assessments to be paid to the FDIC for federal deposit insurance; (vi) prohibiting bank holding companies, such as us, from including in regulatory Tier 1 capital future issuances of trust preferred securities or other hybrid debt and equity securities; (vii) caps on the interchange fees that banks are able to charge merchants for debit card transactions pursuant to the "Durbin Amendment"; and (viii) numerous other provisions designed to improve supervision and oversight of the financial services industry. Additionally, the Dodd-Frank Act established a new framework for systemic risk oversight within the financial system to be distributed among new and existing federal regulatory agencies, including the Financial Stability Oversight Council, the Federal Reserve Board, the Office of the Comptroller of the Currency, and the FDIC. It also creates a new consumer financial protection regulator, the Consumer Financial Protection Bureau, which assumed most of the consumer financial protection regulatory responsibilities that were exercised by federal banking regulators and other agencies. Further, the Dodd-Frank Act addresses many corporate governance and executive compensation matters that affect most U.S. publicly-traded companies, including us.

Certain recent regulatory changes under the Dodd-Frank Act and otherwise apply only to depository institutions with more than \$10 billion in total assets, including requirements to undergo regular "stress testing" of capital under hypothetical adverse economic scenarios, "large bank" adjustments to assessments paid to the FDIC for deposit insurance, supervision and examination by the Bureau, and requirements to establish a risk committee on a company's board of directors. In addition, financial institutions with more than \$10 billion in assets will not be eligible for the "commercial end user" exemption to Dodd-Frank Act's mandatory clearing requirements for swaps and security-based swaps transactions used to hedge commercial risk. Although we have less than \$10 billion in assets as of December 31, 2012, we may still be treated for certain regulatory and supervisory purposes as an institution with more than \$10 billion in assets based on the combined total assets of the Group and BBVAPR prior to the merger until such time as the Bank (or the Group, as applicable) has closed four consecutive quarters with \$10 billion or less in total assets. If we grow to have more than \$10 billion in assets through additional acquisitions or organic growth, our costs of doing business would be likely to increase permanently as a result of these requirements.

Given that many of the provisions of the Dodd-Frank Act are being implemented over time and are subject to implementing regulations, the full extent of the impact that such requirements, and other legislative and regulatory developments, will have on our operations is unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business. In particular, the potential impact of the Dodd-Frank Act on our operations and activities, both currently and prospectively, include, among others:

- a reduction in our ability to generate or originate revenue-producing assets as a result of compliance with heightened capital standards;
- increased cost of operations due to greater regulatory oversight, supervision and examination of banks and bank holding companies, and higher deposit insurance premiums;
- the limitation on our ability to raise capital through the use of trust preferred securities as these securities will no longer be included as Tier 1 capital going forward; and
- the limitation on our ability to expand consumer product and service offerings due to anticipated stricter consumer protection laws and regulations.

Further, we may be required to invest significant management attention and resources to evaluate and make necessary changes in order to comply with new statutory and regulatory requirements. Failure to comply with the new requirements may negatively impact our results of operations and financial condition. While we cannot predict what effect any presently contemplated or future changes in the laws or regulations or their interpretations would have on us, these changes could be materially adverse to our investors.

Legislative and other measures that may be taken by Puerto Rico governmental authorities could materially increase our tax burden or otherwise adversely affect our financial condition, results of operations or cash flows.

We operate the IBE Unit and Subsidiary pursuant to the IBE Act that provide us with significant tax advantages. An IBE has the benefits of exemptions from Puerto Rico income taxes on interest earned on, or gain realized from the sale of, non-Puerto Rico assets, including U.S. government obligations and certain mortgage-backed securities. This exemption has allowed us to have effective tax rates significantly below the maximum statutory tax rates. In the past, the Legislature of Puerto Rico has considered proposals to curb the tax benefits afforded to IBEs. In 2012, a new Puerto Rico law was enacted in this area. Although it did not repeal the IBE Act, the new law does not allow new license applications under the IBE Act to organize and operate an IBE. Any newly organized entity (now called an “international financial entity”) must be licensed under the new law and such entity (as opposed to existing IBEs organized under the IBE Act, including the Bank’s IBE Unit and Subsidiary, which are “grandfathered”) will generally be subject to a 4% Puerto Rico income tax rate. In the event other legislation is passed in Puerto Rico to eliminate or modify the tax exemption enjoyed by IBEs, the consequences could have a materially adverse impact on us, including increasing the tax burden or otherwise adversely affecting our financial condition, results of operations or cash flows.

Changes in accounting standards issued by the Financial Accounting Standards Board (“FASB”) or other standard-setting bodies may adversely affect our financial statements.

Our financial statements are subject to the application of GAAP, which are periodically revised and/or expanded. Accordingly, from time to time we are required to adopt new or revised accounting standards issued by FASB. Market conditions have prompted accounting standard setters to promulgate new guidance which further interprets or seeks to revise accounting pronouncements related to financial instruments, structures or transactions as well as to issue new standards expanding disclosures. See “Note 1—Summary of Significant Accounting Policies” to our consolidated financial statements included herein for a discussion of any accounting developments that have been issued but not yet implemented. An assessment of proposed standards is not provided as such proposals are subject to change through the exposure process and, therefore, the effects on our financial statements cannot be meaningfully assessed. It is possible that future accounting standards that we are required to adopt could change the current accounting treatment that applies to the consolidated financial statements and that such changes could have a material effect on our financial condition and results of operations.

Competition in attracting talented people could adversely affect our operations.

We depend on our ability to attract and retain key personnel and we rely heavily on our management team. The inability to recruit and retain key personnel or the unexpected loss of key managers may adversely affect our operations. Our success to date has been influenced strongly by the ability to attract and retain senior management experienced in banking and financial services. Retention of senior managers and appropriate succession planning will continue to be critical to the successful implementation of our strategies. For a discussion of retention risk with respect to former BBVAPR employees, see “—We may not be able to integrate BBVAPR’s assets into our operations.”

Reputational risk and social factors may impact our results.

Our ability to originate loans and to attract deposits and assets is highly dependent upon the perceptions of consumer, commercial and funding markets of our business practices and our financial health. Negative public opinion could result from actual or alleged conduct in any number of activities or circumstances, including lending practices, regulatory compliance, inadequate protection of customer information, or sales and marketing, and from actions taken by regulators in response to such conduct. Adverse perceptions regarding us could lead to difficulties in originating loans and generating and maintaining accounts as well as in financing them.

In addition, a variety of social factors may cause changes in borrowing activity, including credit card use, payment patterns and the rate of defaults by account holders and borrowers. If consumers develop or maintain negative attitudes about incurring debt, or if consumption trends decline, our business and financial results will be negatively affected.

We could incur increased costs or reductions in revenue or suffer reputational damage in the event of misuse of information.

Our operations rely on the secure processing, transmission and storage of confidential information in our computer systems and networks regarding our customers and their accounts. To provide these products and services, we use information systems and infrastructure that we and third party service providers operate. As a financial institution, we also are subject to and examined for compliance with an array of data protection laws, regulations and guidance, as well as to our own internal privacy and information security policies and programs.

Information security risks for financial institutions like us have generally increased in recent years in part because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to conduct financial transactions and the increased sophistication and activities of organized crime, hackers and other external parties. Our technologies and systems may become the target of cyber-attacks or other attacks that could result in the misuse or destruction of our or our customers' confidential, proprietary or other information or that could result in disruptions to the business operations of us or our customers or other third parties. Further, a breach or attack affecting one of our third-party service providers or partners could impact us through no fault of our own. In addition, because the methods and techniques employed by perpetrators of fraud and others to attack systems and applications change frequently and often are not fully recognized or understood until after they have been launched, we and our third-party service providers and partners may be unable to anticipate certain attack methods in order to implement effective preventative measures.

While we have policies and procedures designated to prevent or limit the effect of the possible security breach of our information systems, if unauthorized persons were somehow to get access to confidential or proprietary information in our possession or to our proprietary information, it could result in significant legal and financial exposure, damage to our reputation or a loss of confidence in the security of our systems that could adversely affect our business. Though we have insurance against some cyber-risks and attacks, it may not be sufficient to offset the impact of a material loss event.

ITEM 1B. *UNRESOLVED STAFF COMMENTS*

None.

ITEM 2. *PROPERTIES*

The Group owns the property located at 254 Muñoz Rivera Avenue, San Juan Puerto Rico, known as Oriental Center, where its executive offices are located since the BBVAPR Acquisition. The Group also leases offices at 997 San Roberto Street, Professional Offices Park, San Juan, Puerto Rico, known as Oriental Tower. The Group is currently consolidating its operations at both properties.

The Bank owns eleven branch premises and leases fifty three branch commercial offices throughout Puerto Rico. The Bank's management believes that each of its facilities is well maintained and suitable for its purpose and can readily obtain appropriate additional space as may be required at competitive rates by extending expiring leases or finding alternative space.

At December 31, 2012, the aggregate future rental commitments under the terms of the leases, exclusive of taxes, insurance and maintenance expenses payable by the Group was \$66.1 million.

The Group's investment in premises and equipment, exclusive of leasehold improvements at December 31, 2012, was \$71.0 million, gross of accumulated depreciation.

As part of the BBVAPR Acquisition on December 18, 2012, the Group acquired four branch premises and the Oriental Center, which is the principal property owned by the Group for banking operations and other services.

The Oriental Center is a fifteen-story office building located at 254 Muñoz Rivera Avenue, San Juan, Puerto Rico that was previously BBVAPR's headquarters. The Group operates a full service branch at the plaza level and our centralized units and subsidiaries occupy approximately 54% of the office floor space. Approximately 34% of the office space is leased to outside tenants and 12% is available for leasing.

ITEM 3. *LEGAL PROCEEDINGS*

The Group and its subsidiaries are defendants in a number of legal proceedings incidental to their business. The Group is vigorously contesting such claims. Based upon a review by legal counsel and the development of these matters to date, management is of the

opinion that the ultimate aggregate liability, if any, resulting from these claims will not have a material adverse effect on the Group's financial condition or results of operations.

PART II

ITEM 5. *MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES*

The Group's common stock is traded on the New York Stock Exchange ("NYSE") under the symbol "OFG". Information concerning the range of high and low sales prices for the Group's common stock for each quarter in the years ended December 31, 2012 and 2011, as well as cash dividends declared for such periods are set forth under the "Stockholders' Equity" caption in the Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A").

Information concerning legal or regulatory restrictions on the payment of dividends by the Group and the Bank is contained under the caption "Dividend Restrictions" in Item 1 of this report.

As of December 31, 2012, the Group had approximately 3,104 holders of record of its common stock, including all directors and officers of the Group, and beneficial owners whose shares are held in "street" name by securities broker-dealers or other nominees.

Stock Performance Graph

The graph below compares the percentage change in the Group's cumulative total stockholder return during the measurement period with the cumulative total return, assuming reinvestment of dividends, of the Russell 2000 Index and the SNL Bank Index.

The cumulative total stockholder return was obtained by dividing (i) the cumulative amount of dividends per share, assuming dividend reinvestment, for the measurement period beginning December 31, 2007, plus (ii) the difference between the share price at the beginning and the end of the measurement period, by the share price at the beginning of the measurement period.

*Comparison of 5 Year Cumulative Total Return
Assumes Initial Investment of \$100*

The ratios shown below demonstrate the Group's ability to generate sufficient earnings to pay the fixed charges or expenses of its debt and preferred stock dividends. The Group's consolidated ratios of earnings to combined fixed charges and preferred stock dividends were computed by dividing earnings by combined fixed charges and preferred stock dividends, as specified below, using two different assumptions, one excluding interest on deposits and the second including interest on deposits:

	Year Ended December 31,				
	2012	2011	2010	2009	2008
Consolidated Ratios of Earnings to Combined Fixed Charges and Preferred Stock Dividends					
Excluding Interests on Deposits	1.21x	1.26x	(A)	1.18x	1.07x
Including Interests on Deposits	1.15x	1.19x	(A)	1.13x	1.05x

(A) In 2010, earnings were not sufficient to cover preferred stock dividends, and the ratio was less than 1:1. The Group would have had to generate additional earnings of \$22.0 million to achieve a ratio of 1:1 in 2010.

For purposes of computing these consolidated ratios, earnings represent income before income taxes plus fixed charges and amortization of capitalized interest, less interest capitalized. Fixed charges consist of interest expensed and capitalized, amortization of debt issuance costs, and the Group's estimate of the interest component of rental expense. The term "preferred stock dividends" is the amount of pre-tax earnings that is required to pay dividends on the Group's outstanding preferred stock. As of the dates presented above, the Group had noncumulative perpetual preferred stock issued and outstanding amounting to \$176.0 million, as follows: (i) Series A amounting to \$33.5 million or 1,340,000 shares at a \$25 liquidation value; (ii) Series B amounting to \$34.5 million or 1,380,000 shares at a \$25 liquidation value; (iii) Series C amounting to \$84.0 million or 84,000 shares at a \$1,000 liquidation value; and (iv) Series D amounting to \$24.0 million or 960,000 shares at a \$25 liquidation value.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

**MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE YEAR ENDED DECEMBER 31, 2012**

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The accounting and reporting policies followed by the Group conform with generally accepted accounting principles ("GAAP") in the United States of America and general practices within the financial services industry. The Group's significant accounting policies are described in detail in Note 1 to the audited consolidated financial statements and should be read in conjunction with this section.

Critical accounting policies require management to make estimates and assumptions, which involve significant judgment about the effect of matters that are inherently uncertain and that involve a high degree of subjectivity. These estimates are made under facts and circumstances at a point in time and changes in those facts and circumstances could produce actual results that differ from those estimates. The following MD&A section is a summary of what management considers the Group's critical accounting policies.

Business Combinations

The Group accounted for the BBVAPR Acquisition and the FDIC-assisted acquisition of Eurobank under the accounting guidance of ASC Topic No. 805, Business Combinations, which requires the use of the purchase method of accounting. All identifiable assets and liabilities acquired were initially recorded at fair value. No allowance for loan losses related to the acquired loans was recorded on the acquisition date. Loans acquired were recorded at fair value in accordance with the fair value methodology prescribed in ASC Topic 820, exclusive of the shared-loss agreements with the FDIC applicable to the FDIC-assisted acquisition. These fair value estimates associated with the loans included estimates related to expected prepayments and the amount and timing of expected principal, interest and other cash flows. Because the FDIC has agreed to reimburse the Group for losses related to the acquired loans in the FDIC-assisted acquisition, subject to certain provisions specified in the agreements, an indemnification asset was recorded at fair value at the acquisition date. The indemnification asset was recognized at the same time as the loans covered under FDIC shared-loss agreements, and is measured on the same basis, subject to collectability or contractual limitations. The loss share indemnification asset on the acquisition date reflected the reimbursements expected to be received from the FDIC, using an appropriate discount rate, which reflected counterparty credit risk and other uncertainties. The initial valuation of these loans and related indemnification asset required management to make subjective judgments concerning estimates about how the acquired loans would perform in the future using valuation methods, including discounted cash flow analyses and independent third-party appraisals. Factors that may significantly affect the initial valuation include, among others, market-based and industry data related to expected changes in interest rates, assumptions related to probability and severity of credit losses, estimated timing of credit losses including the timing of foreclosure and liquidation of collateral, expected prepayment rates, the specific terms and provisions of any shared-loss agreements, and specific industry and market conditions that may impact independent third-party appraisals. The Group applied the guidance of ASC Subtopic 310-30 – "Loans and Debt Securities Acquired with Deteriorated Credit Quality" ("ASC 310-30") to most of the loans acquired in the FDIC-assisted acquisition (including applying 310-30 by analogy to loans that do not meet the scope of ASC 310-30 but meet certain other criteria as outlined below), except for credit cards. Also, the Group applied the guidance of ASC 310-30 to most of the loans from the BBVAPR Acquisition, except for credit cards, retail and commercial lines of credits, floor plans and performing auto loans with Fair Isaac Corporation ("FICO") scores over 660 which were acquired at a premium.

ASC 310-30 provides two specific criteria that have to be met in order for a loan to be within its scope: (1) credit deterioration on the loan from its inception until the acquisition date and (2) that it is probable that not all of the contractual cash flows will be collected on the loan. Once in the scope of ASC 310-30, the credit portion of the fair value discount on an acquired loan cannot be accreted into income until the acquirer has assessed that it expects to receive more cash flows on the loan than initially anticipated. Acquired loans that meet the definition of nonaccrual status fall within the Group's definition of impaired loans under ASC 310-30. Performing loans would generally not meet either criteria and therefore not fall within the scope of ASC 310-30. Many of the acquired loans that did not meet the Group's definition of non-accrual status also resulted in the recognition of a discount attributable to credit quality. The Group elected to analogize to ASC 310-30 and only accrete the portion of the fair value discount unrelated to credit pursuant to the

provisions of the AICPA letter dated December 18, 2009, where the AICPA summarized the SEC Staff's view regarding the accounting in subsequent periods for discount accretion associated with loan receivables acquired in a business combination or asset purchase. The Group adopted an accounting policy coincident with the Eurobank acquisition to consistently apply by analogy the expected cash flow approach under 310-30 to acquired loan portfolios.

The fair values initially assigned to assets acquired and liabilities assumed are preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values becomes available, for example there may be changes in loans pooling under ASC 310-30 and the reserve for unfunded commitments.

Allowance for Loan and Lease Losses for Non-covered Loans and Leases

Originated loans

The Group determined the allowance for loan and lease losses by portfolio segment, which consist of mortgage loans, commercial loans, consumer loans and leasing, as follows:

Mortgage Loans: These loans are further divided into four classes: traditional mortgages, non-traditional mortgages, loans in loan modification programs and home equity secured personal loans. Traditional mortgage loans include loans secured by a dwelling, fixed coupons and regular amortization schedules. Non-traditional mortgages include loans with interest-first amortization schedules and loans with balloon considerations as part of their terms. Mortgages in loan modification programs are loans that are being serviced under such programs. Home equity loans are mainly equity lines of credit. The allowance factor on these loans is impacted by the historical loss factors on the sub-segments, vintages, the environmental risk factors described above and by delinquency buckets. During the second quarter of 2012, the traditional mortgage loan portfolio was further segregated by vintages.

Commercial loans: These loans are further divided into two classes: commercial loans secured by existing commercial real estate properties and other commercial loans. The allowance factor assigned to these loans is impacted by historical loss factors, by the environmental risk factors described above and by the credit risk ratings assigned to the loans. These credit risk ratings are based on relevant information about the ability of borrowers to service their debt, such as economic conditions, portfolio risk characteristics, prior loss experience, and the results of periodic credit reviews of individual loans.

Consumer loans: These consist of smaller retail loans such as retail credit cards, overdrafts, unsecured personal lines of credit, and personal unsecured loans. The allowance factor on these loans is impacted by the historical loss factors on the segment, the environmental risk factors described above and by delinquency buckets.

Leasing: This segment consists of personal loans guaranteed by vehicles in the form of lease financing. The allowance factor on these loans is impacted by the historical losses on the segment, the environmental risk factors described above and by delinquency buckets.

The Group establishes its allowance for loan losses through a provision for credit losses based on our evaluation of the credit quality of the loan portfolio. This evaluation, which includes a review of loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, and other factors that warrant recognition in determining our allowance for loan losses. The Group continues to monitor and modify the level of the allowance for loan losses to ensure it is adequate to cover losses inherent in our loan portfolio.

For our originated loans, our allowance for loan losses consists of the following elements: (i) specific valuation allowances based on probable losses on specifically identified impaired loans; and (ii) valuation allowances based on net historical loan loss experience for similar loans with similar inherent risk characteristics and performance trends, adjusted, as appropriate, for qualitative risk factors specific to respective loan types.

For our originated loans, when current information and events indicate that it is probable that we will be unable to collect all amounts of principal and interest due under the original terms of a business or commercial real estate loan greater than \$250 thousand, such loan will be classified as impaired. Additionally, all loans modified in a TDR are considered impaired. The need for specific valuation allowances are determined for impaired loans and recorded as necessary. For impaired loans, we consider the fair value of the underlying collateral, less estimated costs to sell, if the loan is collateral dependent, or we use the present value of estimated future cash flows in determining the estimates of impairment and any related allowance for loan losses for these loans. Confirmed losses are charged off immediately. Prior to a loan becoming impaired, we typically would obtain an appraisal through our internal loan grading process to use as the basis for the fair value of the underlying collateral.

Loan loss ratios and credit risk categories are updated at least quarterly and are applied in the context of GAAP as prescribed by ASC and the importance of depository institutions having prudent, conservative, but not excessive loan allowances that fall within an acceptable range of estimated losses. While management uses current available information in estimating possible loan and lease losses, factors beyond the Group's control, such as those affecting general economic conditions, may require future changes to the allowance.

Acquired Loans Accounted under ASC 310-20 (Loans with revolving feature and/or acquired at a premium)

We establish our allowance for loan losses through a provision for credit losses based upon an evaluation process that is similar to our evaluation process used for originated loans. This evaluation, which includes a review of loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, carrying value of the loans, which includes the remaining net purchase discount or premium, and other factors that warrant recognition in determining our allowance for loan losses. These loans were recorded on acquisition date at their fair value. Such fair value includes a credit discount which accounts for expected loan losses over the estimated life of these loans. Management will take into consideration this credit discount when determining the necessary allowance for acquired loans that are accounted for under the provisions of ASC 310-20. These loans are divided in the following four segments:

Commercial and Industrial Loans ("C&I") – C&I loans include commercial credit lines, overdrafts, revolving unsecured commercial loans, and revolving commercial loans secured by real estate and by other types of collateral. These loans are granted mainly to corporate clients, to automobile dealers to finance their inventory, to the government and to small and medium size enterprises. In the underwriting process of C&I loans, the overall economic and financing situation and the repayment capacity of the borrower are taken into consideration. Lending limits, term, required documentation, interest rate approval, collateral, and guarantees are also considered. C&I loans are composed of different markets.

As part of the monitoring system, an alert system has been adopted for C&I loans to ensure an early identification of problem loans. This system is a tool for credit classification and mitigation of credit losses. Monitoring reports are prepared to follow up on delinquent, nonperforming loans, and classified loans.

Construction and Commercial Real Estate Loans ("CRE") — The main products of CRE loans are interim construction, land, and permanent loans (rental properties). The repayment of an interim financing construction loan generally depends on success of the project. Therefore, its viability is the main consideration during the evaluation process. Additional considerations are also evaluated, such as technical and financial capacity of the developer and the contractor. The parameters for land loans are based primarily on the loan to value and debt service coverage ratio. The main parameters for permanent loans are the occupancy and the debt-service coverage ratio.

Monitoring system and reports explained in the C&I loans section are also part of the CRE loans monitoring process. In addition, new appraisal reports are requested periodically for CRE loans.

Consumer Loans — Consists of revolving retail products, such as credit cards, and lines of credit, among others. The credit scoring system is used for personal loans and credit card loan originations. The Bank determines from time to time maximum amounts of credit limits, monthly payments, charges and fees, and interest rates. Also, lending limits and underwriting procedures are part of the structure and controls.

Auto loans — The financing for the purchase of new or used motor vehicles for private or public use. These loans are granted mainly through dealers authorized and approved by the auto department credit committee of the Bank. The auto credit department has the specialized structure and resources to provide the service required for this product according to market demands.

The portfolio segments and classes will continue to change as the BBVAPR integration takes place during 2013, and the Group re-assesses its allowance methodology.

Acquired Loans Accounted Under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

For our acquired loans accounted for under ASC 310-30, our allowance for loan losses is estimated based upon our expected cash flows for these loans. To the extent that we experience a deterioration in borrower credit quality resulting in a decrease in our expected cash flows (which are used as a proxy to identify probable incurred losses) subsequent to the acquisition of the loans, an allowance for loan losses is established based on our estimate of future credit losses over the remaining life of the loans.

Acquired loans accounted for under ASC Subtopic 310-30 are not considered non-performing and continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. Also, loans charged-off against the non-accretable difference established in purchase accounting are not reported as charge-offs. Charge-offs on loans accounted under ASC Subtopic 310-30 are recorded only to the extent that losses exceed the non-accretable difference established with purchase accounting.

Allowance for Loan and Lease Losses for Covered Loans and Leases

Cover loans are accounted for under ASC Subtopic 310-30. For covered loans, the portion of the loss on covered loans reimbursable from the FDIC is recorded as an offset to the provision for credit losses and increases the FDIC shared-loss indemnification asset.

Financial Instruments

Certain financial instruments, including derivatives, trading securities and investment securities available-for-sale, are recorded at fair value and unrealized gains and losses are recorded in other comprehensive income or as part of non-interest income, as appropriate. Fair values are based on listed market prices, if available. If listed market prices are not available, fair value is determined based on other relevant factors, including price quotations for similar instruments. The fair values of certain derivative contracts are derived from pricing models that consider current market and contractual prices for the underlying financial instruments as well as time value and yield curve or volatility factors underlying the positions.

The Group determines the fair value of its financial instruments based on the fair value measurement framework, which establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 — Level 1 assets and liabilities include equity securities that are traded in an active exchange market, as well as certain U.S. Treasury and other U.S. government agency securities that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 — Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include (i) mortgage-backed securities for which the fair value is estimated based on valuations obtained from third-party pricing services for identical or comparable assets, (ii) debt securities with quoted prices that are traded less frequently than exchange-traded instruments and (iii) derivative contracts and financial liabilities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models for which the determination of fair value requires significant management judgment or estimation.

OVERVIEW OF FINANCIAL PERFORMANCE

The following discussion of the Group's financial condition and results of operations should be read in conjunction with the foregoing "Selected Financial Data" and the Group's consolidated financial statements and related notes. This discussion and analysis contains forward-looking statements. Please see "Forward-Looking Statements" and "Risk Factors" for discussion of the uncertainties, risks and assumptions associated with these statements.

The Group is a publicly-owned financial holding company that provides a full range of banking and financial services through its subsidiaries. It provides comprehensive banking and financial services through a complete range of banking and financial solutions, including mortgage, commercial and consumer lending; financing leases; checking and savings accounts; financial planning, insurance, financial service, and investment brokerage; and corporate and individual trust and retirement services. The Group operates through three major business segments: Banking, Financial Services, and Treasury, and distinguishes itself based on quality service and marketing efforts focused on mid and high net worth individuals and families, including professionals and owners of small and mid-sized businesses, primarily in Puerto Rico. The Group has 64 branches in Puerto Rico and a subsidiary in Boca Raton, Florida. The Group's long-term goal is to strengthen its banking and financial services franchise by expanding its lending businesses, increasing the level of integration in the marketing and delivery of banking and financial services, maintaining effective asset-liability management, growing non-interest revenue from banking and financial services, and improving operating efficiencies.

The Group's diversified mix of businesses and products generates both the interest income traditionally associated with a banking institution and non-interest income traditionally associated with a financial services institution (generated by such businesses as securities brokerage, fiduciary services, investment banking, insurance agency, and retirement plan administration). Although all of these businesses, to varying degrees, are affected by interest rate and financial market fluctuations and other external factors, the Group's commitment is to continue producing a balanced and growing revenue stream.

In December 18, 2012, the Group completed the BBVAPR Acquisition. By acquiring the BBVAPR Companies, we accelerated our longstanding goal of creating a more stable balance sheet, with a larger and more diversified loan portfolio, a greater retail deposit funding base, and a smaller investment securities portfolio, improving earnings stability. Furthermore, in connection with the BBVAPR Acquisition, we completed the sale of approximately \$1.403 billion of the Group's investment securities and used the proceeds from such sales, together with available cash, to repay approximately \$1.698 billion of wholesale funding. In addition to reducing the sensitivity of our balance sheet to interest rates, the deleveraging has improved our capital ratios by reducing the size of our balance sheet.

To finance in part the BBVAPR Acquisition, the Group raised in 2012 an aggregate amount of approximately \$158.5 million (before expenses) through the private placement of \$84 million in Convertible Preferred Stock, which closed on July 3, 2012, the underwritten public offering of approximately \$51.5 million in common stock, which closed on October 31, 2012, and the underwritten public offering of approximately \$23 million in Series D Preferred Stock, which closed on November 5, 2012.

During 2012, we focused on two main initiatives: continuing to grow our banking operations, and achieving the milestones necessary to successfully close the BBVAPR Acquisition before the end of the year. Operating revenue for 2012 increased 4.5%, or \$7.7 million, to \$179.3 million when compared to the same period in 2011.

The table below presents the Group's operating revenue for the years ended December 31, 2012, 2011 and 2010:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
<u>OPERATING REVENUE</u>			
Net interest income	\$ 155,309	\$ 141,506	\$ 135,200
Non-interest income, net	24,006	30,131	4,061
Total operating revenue	\$ 179,315	\$ 171,637	\$ 139,261

Interest Income

Total interest income for 2012 decreased 12.2% to \$260.8 million, as compared to the same period in 2011. Such decrease primarily reflects a 40.8% decrease on interest income from investments for 2012, primarily related to lower yields and a lower balance in the investment securities portfolio as a result of the sale of \$1.510 billion in mortgage-backed securities. Also, there was an increase in premium amortization due to increased prepayment speeds. The yield on investments decreased from 3.41% for 2011 to 2.34% for 2012.

The decrease in interest income on investments was mitigated by an increase in interest income from covered loans from \$67.7 million for 2011 to \$85.4 million in 2012. The yield on covered loans increased from 12.12% in 2011 to 19.0% in 2012. This increase in yield is the result of higher projected cash flows on certain pools of covered loans, as credit losses have been lower than initially estimated for these loan pools. The accretable yield amounted to \$188.0 million at December 31, 2012 compared to \$188.8 million at December 31, 2011. In addition, interest income from non-covered loans increased from \$68.3 million for 2011 to \$80.0 million for 2012.

Interest Expense

Total interest expense for 2012 decreased 32.2% to \$105.5 million as compared to 2011. This reflects the lower cost of both, securities sold under agreements to repurchase (2.10% vs. 2.74%) and deposits (1.33% vs. 1.80%) for 2012 as compared to 2011, which reflects continuing progress in the repricing of the Group's core retail deposits and further reductions in its cost of funds.

In December 2011, \$600 million in repurchase agreements, with an average cost of 4.23%, matured. The Group paid off \$300 million of these repurchase agreements. The remaining balance of \$300 million was renewed for an average period of approximately 3.5 years at an effective fixed rate of 2.36%. To further reduce its cost of borrowings, in May 2012, the Group renewed \$350 million in repurchase agreements, with an average cost of 4.26%, at a new effective rate of approximately 1.90%. During the second half of 2012, the Group terminated repurchase agreements amounting to \$1.357 billion with an average cost of 1.31%. As a result of the aforementioned transactions, total interest expense on securities sold under agreements to repurchase declined 35.1% in 2012 as compared to 2011.

Net Interest Income

Net interest income for 2012 was \$155.3 million, an increase of 9.8% when compared with 2011. The increase for 2012 was mostly due to the net effect of a 26.2% increase in interest income from covered loans as a result of higher yields and a 32.2% decrease in interest expense due to lower cost of funds, partially offset by a decrease of 40.8% on interest income from investments, related to lower yields and a lower balance in the investment securities portfolio.

Net interest margin of 2.65% for 2012 increased 46 basis points when compared to 2011.

Provision for Loan and Lease Losses

Provision for non-covered loans and lease losses for 2012 decreased \$1.3 million when compared to 2011, reflecting improvement in credit quality. Provision for covered loans and lease losses for 2012 was \$9.8 million, reflecting the Group's revision to the expected cash flows in the covered loan portfolio considering actual experiences and changes in the Group's expectations for the remaining terms of the loan pools. During the first quarter of 2012, some covered construction and development and commercial real estate loan pools underperformed, which required a provision amounting to \$7.2 million, net of the estimated reimbursement from the FDIC. Additional net provisions of \$1.5 million, \$221 thousand and \$982 thousand were recorded for the second, third and fourth quarters of 2012, respectively, as quarterly reviews of credit assumptions for covered loans are reflecting some delays in the expected cash flows, mainly in pools of real estate collateralized loans. Significant judgement is made in timing the collection of nonperforming loans that are being actively worked out.

Non-Interest Income

In 2012, core banking and financial services revenue increased 12.7% to \$48.9 million as compared to 2011, primarily reflecting \$4.8 million increase in financial services revenue to \$25.4 million, attributed to an increase of 26.4% in assets under management.

Net amortization of the FDIC shared-loss indemnification asset of \$28.0 million for 2012 compared to a \$3.4 million for 2011 resulted from the ongoing evaluation of expected cash flows of the loan portfolio acquired in the FDIC-assisted acquisition. As a result of such evaluation, the Group expects a decrease in losses to be collected from the FDIC and the improved re-yielding of the accretable yield on the covered loans. This reduction in claimable losses amortizes the shared-loss indemnification asset through the life of the shared-loss agreements. This amortization is net of the accretion of the discount recorded to reflect the expected claimable loss at its net present value.

In 2012, the Group had a gain on the sale of investment securities of \$74.2 million, as the Group took advantage of market opportunities and executed a balance sheet deleverage following the BBVAPR Acquisition. The purpose of the deleverage plan was to reduce the Group's capital needs for the BBVAPR Acquisition; to enhance its returns going forward; and to have a more traditional bank balance sheet after the BBVAPR Acquisition. As part of this deleverage, in 2012, the Group sold \$1.403 billion of investment securities. At the same time, the Group terminated prior to maturity \$1.357 billion of repurchase agreements. In accordance with the terms of the repurchase agreements the Group had to pay cancellation fees amounting to \$26.1 million.

Non-Interest Expense

Non-interest expense increased to \$127.8 million for 2012 compared to \$122.5 million in 2011 as a result of approximately \$7.1 million in expenses related to the BBVAPR Acquisition.

The efficiency ratio for 2012 was 62.58% compared to 66.26% for 2011.

Income Tax Expense

Income tax expense was \$3.3 million for 2012 compared to \$866 thousand for 2011.

At December 31, 2012 and 2011, the IBE Subsidiary had \$504 thousand and \$2.9 million, respectively, in income tax effect of unrecognized gain on available-for-sale securities included in other comprehensive income. Following the change in its applicable tax rate from 5% to 0% as a result of a Puerto Rico law adopted in 2011, this remaining tax balance will flow through income as these securities are repaid or sold in future period. During 2012, income tax expense included \$2.4 million related to this residual tax effect from the IBE Subsidiary. It had no effect during 2011.

Income Available to Common Shareholders

For 2012, the Group's income available to common shareholders amounted to \$14.6 million compared to \$29.6 million for 2011. Income per basic common share and fully diluted common share was \$0.35 for 2012 compared to income per basic and fully diluted common share of \$0.67 for 2011. Dividends declared on preferred stock for 2012 amounted to \$9.9 million as compared to \$4.8 million for 2011.

Interest Earning Assets

The loan portfolio increased 211.0% to \$5.182 billion at December 31, 2012 compared to \$1.666 billion at December 31, 2011. The increase in the loan portfolio is mostly due to the acquisition of BBVAPR's loan portfolio amounting to \$3.574 billion at December 31, 2012. The investment portfolio amounted to \$2.233 billion at December 31, 2012, a 42.3% decrease compared to \$3.868 billion at December 31, 2011. The decrease in the investment portfolio reflects a reduction of 25.9%, or \$765.6 million, in the available-for-sale portfolio, due to the sale of approximately \$1.403 billion in investment securities due to the aforementioned balance sheet deleverage in connection with the BBVAPR Acquisition. The change in portfolio composition resulted in the transfer of all the securities in the held-to-maturity portfolio to the available-for-sale portfolio at a fair value of \$797.5 million with net combined unrealized gains of \$35.1 million in 2012.

Interest Bearing Liabilities

Total deposits amounted to \$5.690 billion at December 31, 2012, an increase of 133.5% compared to \$2.436 billion at December 31, 2011, as a result of the deposits assumed as part of the BBVAPR Acquisition. Core deposits, which exclude brokered deposits, increased \$2.582 billion, or 118.5%, compared to December 31, 2011, while brokered deposits increased \$671.6 million or 261.7% when compared to December 31, 2011. Non-interest bearing deposits, interest-bearing deposits, individual retirement accounts, retail certificates of deposit and institutional deposits increased \$598.4 million, \$1.204 billion, \$15.2 million, \$324.1 and \$441.5 million, respectively.

Using available cash, in March 2012, the Bank repaid at maturity \$105.0 million in senior unsecured notes issued in March 2009 under the FDIC's Temporary Liquidity Guarantee Program ("TLGP") with an all-in cost of 3.75%.

In December 2011, \$600 million in repurchase agreements, with an average cost of 4.23%, matured. The Group paid off \$300 million of these repurchase agreements. The remaining balance of \$300 million was renewed for an average period of approximately 3.5 years at an effective fixed rate of 2.36%. To further reduce its cost of borrowings, in May 2012, the Group renewed \$350 million in repurchase agreements, with an average cost of 4.26%, at a new effective rate of approximately 1.90%. During the second half of 2012, the Group terminated repurchase agreements amounting to \$1.36 billion. Due to the repayment of the TLGP notes and the termination of the repurchase agreements, total borrowings decreased 28.6% to \$2.488 billion at December 31, 2012, compared to \$3.486 billion at December 31, 2011. This increase was partially offset by borrowings assumed as part of the BBVAPR Acquisition, which amounted to \$315.1 million at December 31, 2012.

Stockholders' Equity

Stockholders' equity at December 31, 2012 was \$863.6 million compared to \$695.6 million at December 31, 2011, an increase of 24.2%. This increase is mainly due to the \$160 million capital raise from the issuance of preferred stock and common stock during 2012 in connection with the BBVAPR Acquisition.

Book value per share was \$15.31 at December 31, 2012 compared to \$15.28 at December 31, 2011.

The Group maintains capital ratios in excess of regulatory requirements. At December 31, 2012, Tier 1 Leverage Capital Ratio was 6.42% (1.61 times the requirement of 4.00%), Tier 1 Risk-Based Capital Ratio was 12.94% (3.24 times the requirement of 4.00%), and Total Risk-Based Capital Ratio was 15.15% (1.89 times the requirement of 8.00%).

Return on Average Assets and Common Equity

Return on average common equity ("ROE") for 2012 was 2.27%, down from 4.50% for 2011. The decrease in ROE is mainly due to the 28.7% decrease in net income combined with a 107.0% increase in dividends on preferred stock during 2012 when compared to 2011. Return on average assets ("ROA") for 2012 decreased to 0.38% from 0.48% for the same period in 2011, mainly due to the 28.7% decrease in net income during 2012 when compared to 2011.

Assets under Management

Assets managed by the Group's trust division, the retirement plan administration subsidiary (CPC), and broker-dealer subsidiaries increased from \$4.142 billion as of December 31, 2011 to \$5.237 billion as of December 31, 2012. The trust division offers various types of individual retirement accounts ("IRA") and manages 401(k) and Keogh retirement plans and custodian and corporate trust accounts, while CPC manages the administration of private retirement plans. At December 31, 2012, total assets managed by the Group's trust division and CPC increased to \$2.514 billion, compared to \$2.216 billion at December 31, 2011, mainly related to account contributions and capital market appreciation. At December 31, 2012, total assets managed by the Group's broker-dealer subsidiaries from its customer investment accounts increased to \$2.722 billion, compared to \$1.926 billion at December 31, 2011, mainly because of the addition of \$504.8 million in assets managed at December 31, 2012 by the broker-dealer subsidiary acquired as part of the BBVAPR Acquisition.

Lending

Total loan production of \$460.8 million for 2012 increased 16.4% year over year. Total commercial loan production of \$191.0 million for 2012 increased 36.7% from the year ago.

The Group sells most of its conforming mortgages in the secondary market and retains servicing rights. As a result, mortgage banking activities reflect originations as well as a growing servicing portfolio which is a source of recurring revenue.

Mortgage loan production and purchases of \$202.7 million for 2012 decreased 4.7% from 2011. Auto and consumer loans production for 2012 totalled \$67.1 million, up 54.6% from 2011.

Credit Quality on Non-Covered Loans

Net credit losses increased \$1.3 million to \$10.9 million in 2012, representing 0.91% of average non-covered loans originated, versus 0.82% in 2011. Our allowance coverage however, remained stable compared to prior year. The allowance for loan and lease losses on non-covered loans increased to \$39.9 million (3.17% of total non-covered originated loans) at December 31, 2012 compared to \$37.0 million (3.12% of total non-covered loans) at December 31, 2011.

Non-performing loans (“NPLs”), which excludes loans covered under shared-loss agreements with the FDIC and loans acquired from BBVAPR Acquisition accounted under ASC 310-30, remained stable in 2012 compared to 2011. The Group does not expect NPLs to result in significantly higher losses as most are well-collateralized with adequate loan-to-value ratios.

Non-GAAP Measures

The Group uses certain non-GAAP measures of financial performance to supplement the financial statements presented in accordance with GAAP. The Group presents non-GAAP measures that management believes are useful and meaningful to investors. Non-GAAP measures do not have any standardized meaning, are not required to be uniformly applied, and are not audited. Therefore, they are unlikely to be comparable to similar measures presented by other companies. The presentation of non-GAAP measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP.

The Group’s management has reported and discussed the results of operations herein both on a GAAP basis and on a pre-tax pre-provision operating income basis (defined as net interest income, plus banking and financial services revenue, less non-interest expenses, as calculated on the table below). The Group’s management believes that, given the nature of the items excluded from the definition of pre-tax pre-provision operating income, it is useful to state what the results of operations would have been without them so that investors can see the financial trends from the Group’s continuing business.

During the year ended December 31, 2012, the Group’s pre-tax pre-provision operating income was approximately \$76.4 million, an increase of 22.5% from \$62.4 million in the last year. Pre-tax pre-provision operating income is calculated as follows:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
<u>PRE-TAX PRE-PROVISION OPERATING INCOME</u>			
Net interest income	\$ 155,309	\$ 141,506	\$ 135,200
Core non-interest income:			
Financial service revenue	25,350	20,571	17,967
Banking service revenue	13,824	12,930	10,662
Mortgage banking activities	9,705	9,876	9,554
Total core non-interest income	48,879	43,377	38,183
Less non interest expenses	(127,778)	(122,508)	(111,529)
Total pre-tax pre-provision operating income	\$ 76,410	\$ 62,375	\$ 61,854

Tangible common equity consists of common equity less goodwill and core deposit intangibles. Tier 1 common equity consists of common equity less goodwill, core deposit intangibles, net unrealized gains on available for sale securities, net unrealized losses on cash flow hedges, and disallowed deferred tax asset and servicing assets. Ratios of tangible common equity to total assets, tangible common equity to risk-weighted assets, total equity to risk-weighted assets and Tier 1 common equity to risk-weighted assets are non-GAAP measures.

Ratios calculated based upon Tier 1 common equity have become a focus of regulators and investors, and management believes ratios based on Tier 1 common equity assist investors in analyzing the Group’s capital position. Furthermore, management and many stock analysts use tangible common equity in conjunction with more traditional bank capital ratios to compare the capital adequacy of banking organizations. Neither Tier 1 common equity nor tangible common equity or related measures should be considered in isolation or as a substitute for stockholders’ equity, total assets or any other measure calculated in accordance with GAAP.

At December 31, 2012, tangible common equity to total assets and tangible common equity to risk-weighted assets increased to 6.74% and 11.82%, respectively, from 9.36% and 30.14% at December 31, 2011. Total equity to risk-weighted assets and Tier 1 common equity to risk-weighted assets at December 31, 2012 decreased to 16.48% and 9.11%, respectively, from 33.48% and 27.01% at December 31, 2011.

Comparison of the years ended December 31, 2011 and 2010

Operating revenue for 2011 increased 23.2% or \$32.4 million to \$171.6 million from 2010. Following is a tabular presentation of the Group's operating revenue for the years ended December 31, 2011 and 2010.

	<u>2011</u>	<u>2010</u>
<u>OPERATING REVENUE</u>		
Net interest income.....	\$ 141,506	\$ 135,200
Non-interest income, net.....	<u>30,131</u>	<u>4,061</u>
Total operating revenue.....	<u>\$ 171,637</u>	<u>\$ 139,261</u>

Interest Income

Total interest income for 2011 decreased 2.2% to \$297.0 million as compared to 2010. Such decrease from 2010 primarily reflects a 14.5% decrease on interest income from investments related to an increase in premium amortization due to the decline in interest rates that caused an increase in prepayment speeds and a lower balance in the investment securities portfolio. Excluding a \$1.8 million negative adjustment to interest income from non-covered residential mortgage loans as certain interest receivable accrued in prior years was deemed to be uncollectible during the second quarter of 2011, interest income from non-covered loans remained level.

Interest income from covered loans increased from \$44.2 million for 2010 to \$67.7 million for 2011 partially due to a full year of ownership of covered loans in 2011. Also, the yield on covered loans increased from 8.93% for 2010 to 12.12% in 2011. Covered loans are accounted for under the provisions of ASC 310-30. This increase in yield is the result of the Group's assessment of higher projected cash flows on certain pools of covered loans as credit losses are expected to be lower than initially estimated and the Group will benefit from a full year impact of interest income from covered loans (which were acquired on April 30, 2010). The accretible yield amounted to \$188.8 million at December 31, 2011 compared to \$148.6 million at December 31, 2010.

Interest Expense

Total interest expense for 2011 fell 7.8% to \$155.5 million as compared 2010. This reflects both lower cost of deposits (1.80% vs. 2.12%) and of securities sold under agreements to repurchase (2.74% vs. 2.84%).

Net Interest Income

Net interest income for 2011 was \$141.5 million, up 4.7% from 2010. Such increase from 2010 primarily reflects a 17.8% increase in interest income from loans, mainly as a result of the continued improved performance of covered loans and growth of the Group's non-covered commercial, auto leasing and consumer loan portfolio.

Net interest margin of 2.19% for 2011 increased 8 basis points when compared with 2010.

Provision for Loan and Lease Losses

Provision for non-covered loans for 2011 decreased 4.5% as compared to 2010. Recapture for covered loans for 2011 was \$1.4 million. This recapture is mainly due to an improvement in expected cash flows on the loan portfolio acquired in the FDIC-assisted acquisition.

Non-Interest Income

The Group's niche market approach to the integrated delivery of services to mid and high net worth clients performed well as the Group expanded market share in light of the FDIC-assisted acquisition and the Group's service proposition and capital strength, as opposed to using rates to attract loans or deposits. During 2011, core banking and financial services revenue increased 13.6% to \$43.4 million as compared to 2010, primarily reflecting a \$2.9 million increase in financial services revenue to \$20.6 million and a \$2.3 million increase in banking service revenue to \$12.9 million.

The Group recorded an other than temporary impairment of \$15.0 million on a \$26.0 million collateralized debt obligation. This security was later sold in January 2012 at its recorded value, and therefore no additional gain or loss was realized on the sale.

The net amortization of the FDIC loss-share indemnification asset of \$3.4 million for 2011, compared to net accretion of \$4.3 million for 2010, resulted from the ongoing evaluation of expected cash flows of the loan portfolio acquired in the FDIC-assisted acquisition, which resulted in reduced losses expected to be collected from the FDIC and the improved re-yielding of the accretable yield on the covered loans. This reduction in claimable losses amortized the loss-share indemnification asset at a rate that mirrored the aforementioned re-yielding on the covered loans. This amortization was net of the accretion of the discount recorded to reflect the expected claimable loss at its net present value.

Results for the year also include a \$28.0 million gain on the sale of investment securities with a book value of \$592.3 million as the Group took advantage of market opportunities. This was partially offset by losses of \$13.2 million in derivative activities and a \$4.8 million loss on the early extinguishment of a \$100 million repurchase agreement.

During 2011, losses of \$13.2 million were recognized and reflected as “Derivative Activities” in the consolidated statements of operations. These losses were mainly due to realized losses of \$4.3 million from terminations of forward-settlement swaps with a notional amount of \$1.25 billion, and to realized losses of \$2.2 million from terminations of options to enter into interest rate swaps that were purchased in November 2010 with a notional amount of \$250 million. These terminations allowed the Group to enter into new forward-settlement swap contracts with a notional amount of \$1.2 billion, all of which were designated as hedging instruments. In May 2011, the Group entered into forward-settlement swap contracts with a notional amount of \$475 million, all of which were also designated as hedging instruments. Prior to the acquisition of the new forward-settlement swap contracts, these derivatives were not being designated for hedge accounting. In December 2011, \$600 million in repurchase agreement funding with an average cost of 4.23% matured. Utilizing cash on hand and proceeds from the sale of approximately \$77 million of mortgage backed securities, the Group paid off \$300 million of these repurchase agreements. The remaining balance of \$300 million was renewed for an average period of approximately three and a half years at an effective fixed rate of 2.36%. These transactions enabled the Group to eliminate \$300 million in wholesale funding, reduce cost of funds on an additional \$300 million of borrowings, and deploy cash at higher return in net interest income on an annualized basis. During 2010, losses of \$36.8 million were recognized and reflected as “Derivative Activities” in the consolidated statements of operations. These losses included realized losses of \$42.0 million due to the terminations of forward settlement swaps with a notional amount of \$900.0 million. These terminations allowed the Group to enter into new forward-settlement swap contracts with the same notional amount and maturity, and effectively reduce the interest rate of the pay-fixed side of such deals.

Non-Interest Expenses

Non-interest expenses increased 9.8% to \$122.5 million for 2011, compared to \$111.5 million in the previous year, largely due to the integration of Eurobank operations which contained a full year of operations in 2011 as opposed to eight months in 2010, resulting in an efficiency ratio of 66.26% for 2011 (compared to 64.54% for 2010).

Income Tax Expense (Benefit)

Income tax expense was \$866 thousand for 2011, compared to an income tax benefit of \$4.3 million for 2010. This increase was mainly due to an increase in taxable income of \$29.8 million and the effect in deferred taxes of a reduction in tax rates which amounted to \$5.2 million, partially offset by an increase in the tax effect of exempt income of \$4.9 million and a decrease of \$2.8 million on the income tax contingencies provision.

Income Available (Loss) to Common Shareholders

For 2011, the Group’s income available to common shareholders totaled \$29.6 million, compared to a loss to common shareholders of \$18.2 million a year-ago. Earnings per basic and fully diluted common share were \$0.67 for 2011 compared to loss per basic and fully diluted common share of \$0.50 for 2010.

Interest Earning Assets

The investment portfolio amounted to \$3.868 billion at December 31, 2011, a 12.4% decrease compared to \$4.414 billion at December 31, 2010, while the loan portfolio decreased 5.9% to \$1.666 billion at December 31, 2011, compared to \$1.773 billion at December 31, 2010. The decrease in the investment portfolio reflected a reduction of 20.0%, or \$740.2 million, in the available-for-sale portfolio, due to the sale of approximately \$592.3 million in investment securities and the maturity of FNMA and FHLMC certificates, which was partially offset by an increase of 28.1%, or \$194.1 million, in the held-to-maturity portfolio. The decrease in the loan portfolio was due to a decrease in covered loans of 20.0% as they continued to pay down, which was partially offset by an increase of 1.9% in non-covered loans.

Interest Bearing Liabilities

Total deposits amounted to \$2.436 billion at December 31, 2011, a decrease of 7.3% compared to \$2.630 billion at December 31, 2010. Core retail deposits, which exclude institutional and brokered deposits, remained approximately level compared to December 31, 2010, while wholesale deposits decreased 40.4% as higher cost deposits matured during the year. Interest-bearing savings and demand deposits increased 1.8%, while retail deposits decreased 20.8%.

In December 2011, \$600 million in repurchase agreement funding, with an average cost of 4.23%, matured. Utilizing cash on hand and proceeds from the sale of approximately \$77 million of mortgage backed securities, the Group paid off \$300 million of these repurchase agreements. The remaining balance of \$300 million was renewed for an average period of approximately three and a half years at an effective fixed rate of 2.36%. These transactions enabled the Group to eliminate \$300 million in wholesale funding, reduce cost of funds on an additional \$300 million of borrowings, and deploy cash at a significantly higher return, all of which is expected to generate approximately \$13 million more in net interest income during the year 2012. Mainly as a result of the aforementioned transactions and the early extinguishment of a \$100 million repurchase agreement during the third quarter of 2011, total borrowings declined 10.3% as compared to December 31, 2010.

Stockholders' Equity

Stockholders' equity at December 31, 2011 was \$695.6 million compared to \$732.3 million at December 31, 2010, a decrease of 5.0%. This decrease reflects stock repurchases under the aforementioned stock repurchase programs, partially offset by the net income for the year.

There were 41.2 million common shares outstanding at December 31, 2011, a decrease of 11.0% from December 31, 2010 due to the Group's stock repurchase programs. Under the \$30 million program, initiated in February 2011, the Group purchased a total of 2,406,303 shares at an average price of \$12.10 per share. On June 29, 2011, the Group announced completion of its \$30 million common stock repurchase program and the adoption of a new program to purchase an additional \$70 million in shares in the open market. The Group purchased approximately 2,783,000 shares under the \$70 million program for a total of \$29.4 million as of December 31, 2011, at an average price of \$10.57 per share.

Book value per share was \$15.28 at December 31, 2011 compared to \$14.39 at December 31, 2010.

The Group has maintained capital ratios in excess of regulatory requirements. At December 31, 2011, Tier 1 Leverage Capital Ratio was 9.65% (2.41 times the requirement of 4.00%), Tier 1 Risk-Based Capital Ratio was 31.84% (7.96 times the requirement of 4.00%), and Total Risk-Based Capital Ratio was 33.12% (4.14 times the requirement of 8.00%).

Return on Average Assets and Common Equity

Return on average common equity (ROE) for the year ended December 31, 2011 was 4.50%, up from a loss of 3.63% for 2010. Return on average assets (ROA) for 2011 was 0.48%, up from 0.14% for 2010. The increase was mostly due to a 250.4% increase in net income from \$9.8 million in the year ended December 31, 2010 to \$34.5 million in 2011.

Assets Under Management

Assets managed by the trust division, the pension plan administration subsidiary, and the broker-dealer subsidiary increased from \$3.871 billion as of December 31, 2010 to \$4.142 billion as of December 31, 2011. At December 31, 2011, total assets managed by the Group's trust division and CPC amounted to \$2.216 billion, compared to \$2.175 billion at December 31, 2010. At December 31, 2011, total assets managed by the broker-dealer from its customer investment accounts increased to \$1.926 billion, compared to \$1.696 billion at December 31, 2010.

Lending

Total loan production and purchases of \$396.0 million for 2011 remained strong compared to \$371.6 million in the previous year, as the Group's capital levels and low credit losses enabled it to continue prudent lending.

Mortgage loan production for 2011 of \$212.8 million decreased 13.2% from 2010. Commercial loan production for 2011 of \$139.8 million increased 38.3% from 2010. Leasing and consumer loans production for 2011 totaled \$43.4 million, up 70.9% from 2010.

Credit Quality on Non-Covered Loans Accounted for Under ASC 310-20

Net credit losses increased \$1.9 million to \$9.6 million, representing 0.81% of average non-covered loans outstanding, versus 0.67% in 2010. The allowance for loan and lease losses on non-covered loans increased to \$37.0 million (3.06% of total non-covered loans) at December 31, 2011, compared to \$31.4 million (2.66% of total non-covered loans) at December 31, 2010. NPLs increased 9.7%, or \$12.0 million, in 2011. The Group's NPLs generally reflected the recessionary economic environment in Puerto Rico.

ANALYSIS OF RESULTS OF OPERATIONS

Net Interest Income

Comparison of the years ended December 31, 2012 and 2011

Net interest income is a function of the difference between rates earned on the Group's interest-earning assets and rates paid on its interest-bearing liabilities (interest rate spread) and the relative amounts of its interest earning assets and interest-bearing liabilities (interest rate margin). The Group constantly monitors the composition and re-pricing of its assets and liabilities to maintain its net interest income at adequate levels. Tables 1 and 1A above show the major categories of interest-earning assets and interest-bearing liabilities, their respective interest income, expenses, yields and costs, and their impact on net interest income due to changes in volume and rates for 2012 and 2011.

Net interest income amounted to \$155.3 million for 2012, a 9.8% increase from \$141.5 million in 2011. These changes reflect a decrease of 32.2% in interest expense and an increase of 21.6% in interest income from loans, partially offset by a 40.8% decrease in interest income from investments for 2012 compared to 2011.

Interest rate spread for 2012 increased 43 basis points from 2.15% in 2011 to 2.58% in 2012. This increase is mainly due to the net effect of a 59 basis points decrease in the average cost of funds from 2.46% to 1.87%, and a 14 basis points decrease in the average yield of interest-earning assets from 4.60% to 4.46%.

The decrease in interest income was primarily the result of a decrease of \$26.5 million in interest-earning assets volume variance, and a \$9.7 million decrease in interest rate variance. Interest income on investments decreased 40.8% to \$95.4 million in 2012, compared to 2011, reflecting a lower balance in the investment securities portfolio, a lower yield on investment securities and an increase in premium amortization due to increased prepayment speeds. Interest income from loans increased 21.6% to \$165.4 million for 2012. In 2012, interest income from covered loans increased 26.2% to \$85.4 million, compared to 2011, mainly due to the re-yielding of various pools of covered loans during the second half of 2011.

Interest expense decreased 32.2% to \$105.5 million for 2012. This decrease was primarily the result of a \$30.3 million decrease in interest rate variance, and a \$19.8 million decrease in interest-bearing liabilities volume variance. These decreases are due to a reduction in the balance of interest bearing liabilities and the cost of funds. Interest-bearing liabilities interest rate spread decreased 59 basis points to 1.87% for 2012, compared to 2011. The cost of deposits decreased 47 basis points to 1.33% for 2012, compared to 1.80% for 2011, primarily due to continuing progress in repricing core deposits and to the maturity of higher cost wholesale deposits during the period. The cost of borrowings decreased by 62 basis points to 2.27% in 2012, compared to 2.89% for 2011. The decrease in the cost of borrowings is attributable to the fact that in December 2011, as previously reported, \$600 million in repurchase agreements, with an average cost of 4.23%, matured. The Group paid off \$300 million of these repurchase agreements, and the remaining balance of \$300 million was renewed for an average period of approximately three and a half years at an effective fixed rate of 2.36%. To further reduce cost of borrowings, in May 2012, the Group renewed \$350 million in repurchase agreements, with an average cost of 4.26%, at a new effective rate of approximately 1.90%. In addition, during the second half of 2012, the Group terminated repurchase agreements amounting to \$1.357 billion with an average cost of 1.31%. Also, interest bearing liabilities decreased due to the repayment in March 2012 of the TLGP notes at maturity.

For 2012, the average balance of total interest-earning assets was \$5.851 billion, a decrease of 9.4% from 2011. The decrease in average balance of interest-earning assets was mainly attributable to a 13.8% decrease for 2012, in average investments, in addition to a 2.6% decrease in average loans compared to 2011 resulting from normal pay downs of covered loans and to the re-yielding of various pools of covered loans mainly during the second half of 2011. The decrease in the investment portfolio reflects a reduction in the available-for-sale portfolio, due to the sale of approximately \$1.403 billion in investment securities during 2012 as part of the deleverage plan in connection with the BBVAPR Acquisition. As of December 31, 2012, the Group had \$868.7 million in cash and cash equivalents and \$80.0 million in securities purchased under agreements to resell, compared to \$591.5 million in cash and cash equivalents and no securities purchased under agreements to resell as of December 31, 2011.

For 2012, the average yield on interest-earning assets was 4.46% compared to 4.60% for 2011. This was mainly due to a decrease in the investment portfolio yield from 3.41% to 2.34% for 2012. However, such decrease was partially offset by the higher average yields in the loan portfolio, mainly due to the covered loans that had an average yield of 19.02% for 2012, compared to 12.12% for 2011.

Comparison of the years ended December 31, 2011 and 2010

Table 1A shows the major categories of interest-earning assets and interest-bearing liabilities, their respective interest income, expenses, yields and costs, and their impact on net interest income due to changes in volume and rates for 2011 and 2010.

Net interest income amounted to \$141.5 million for 2011, an increase of 4.7% from \$135.2 million for 2010. These changes reflected an increase of 17.8% in interest income from loans for 2011, as compared to 2010.

Interest rate spread increased 15 basis points to 2.15% for 2011 from 2.00% in 2010. This increase reflected a 3 basis point increase in the average yield of interest earning assets to 4.60% in 2011 from 4.57% for 2010, and a 11 basis point decrease in the average cost of funds to 2.46% in 2011 from 2.57% for 2010, as further explained below.

The decrease in interest income for 2011 was primarily the result of a decrease of \$3.2 million in interest rate variance, and a \$3.6 million decrease in interest-earning assets volume variance. Interest income from loans increased 17.8% to \$136.0 million for 2011, mainly due to the continued improved performance of covered loans. Interest income on investments decreased 14.5% to \$161.0 million for 2011, compared to \$188.3 million for 2010, reflecting an increase in premium amortization due to the decline in interest rates that caused an increase in prepayment speeds, and lower balance in the investment securities portfolio.

Interest expense decreased 7.8% reaching \$155.5 million for 2011. This decrease was primarily the result of a \$5.2 million decrease in interest rate variance, and a \$7.9 million decrease in interest-earning liabilities volume variance. These decreases were due to a reduction in the cost of funds, which decreased 11 basis points to 2.46% from 2010. The cost of deposits decreased by 28 basis points to 1.80% compared to 2.08% for 2010.

For 2011, the average balance of total interest-earning assets was \$6.457 billion, a 2.9% decrease from 2010. This decrease in average balance of interest-earning assets was mainly attributable to a 5.5% decrease in average investments, partially offset by a 5.0% increase in average loans. As of December 31, 2011, the Group had \$591.5 million in cash and cash equivalents versus \$440.4 million as of December 31, 2010.

For 2011, the average yield on interest-earning assets was 4.60% compared to 4.57% for 2010. This was mainly due to a decrease in the investment portfolio yield to 3.41% versus 3.77% for 2010. However, this was offset by the higher average yields in the loan portfolio, mainly due to the covered loans acquired in the FDIC-assisted acquisition with an average yield of 12.12% for 2011 compared to 8.93% for 2010.

TABLE 2 - NON-INTEREST INCOME SUMMARY

	Year Ended December 31,			
	2012	2011	Variance	2010
Financial service revenue	\$ 25,350	\$ 20,571	23.2%	\$ 17,967

Non-Interest Income

Comparison of the years ended December 31, 2012 and 2011

Non-interest income is affected by the amount of securities, derivatives and trading transactions, the level of trust assets under management, transactions generated by clients' financial assets serviced by the securities broker-dealer and insurance subsidiaries, the level of mortgage banking activities, and the fees generated from loans and deposit accounts. It is also affected by the net amortization of the FDIC shared-loss indemnification asset, which varies depending on the results of the on-going evaluation of expected cash flows of the loan portfolio acquired in the FDIC-assisted acquisition.

As shown in Table 2 above, the Group recorded non-interest income in the amount of \$24.0 million for 2012, compared to \$30.1 million for 2011, a decrease of \$6.1 million.

In 2012, the Group had a \$74.2 million gain on the sale of \$1.828 billion in investment securities, partially offset by losses of \$41.1 million on derivative activities and \$26.1 million from early extinguishment costs of repurchase agreements. As part of our deleverage plan related to the BBVAPR Acquisition, the Group sold \$1.403 billion in investment securities resulting in realized gains of \$70.6 million, and the Group extinguished \$1.698 billion of securities repurchase agreements prior to their contractual maturities resulting in realized losses of \$26.1 million. During 2012, the Group also terminated forward settlement swaps with an aggregate notional amount of \$900 million resulting in realized losses of \$37.5 million. In 2011, the Group had a \$28.0 million gain on the sale of \$620.3 million in investment securities, partially offset by losses of \$13.2 million on derivative activities and \$4.8 million from early extinguishment costs of repurchase agreements.

The increase in the net amortization of the FDIC shared-loss indemnification asset to \$28.0 million for 2012, compared to \$3.4 million for 2011, resulted from the ongoing evaluation of expected cash flows of the covered loan portfolio, which resulted in reduced losses expected to be collected from the FDIC and the improved re-yielding of the accretible yield on the covered loans. The reduction in claimable losses amortizes the loss-share indemnification asset through the life of the shared loss agreement. This amortization is net of the accretion of the discount recorded to reflect the expected claimable loss at its net present value.

During 2012 there were no losses on other-than-temporary impairment of securities, compared to \$15.0 million in 2011.

Financial service revenue, which consists of commissions and fees from fiduciary activities, and securities brokerage and insurance activities, increased 23.2% to \$25.4 million in 2012, from \$20.6 million for 2011, due to increased brokerage, trust and insurance business and transactions.

Banking service revenue, which consists primarily of fees generated by deposit accounts, electronic banking services, and customer services, increased 6.9% to \$13.8 million in 2012, from \$12.9 million in 2011. This increase for 2012 is attributable to an increase in transaction volume.

Income generated from mortgage banking activities decreased 1.7% to \$9.7 million in 2012, compared to 2011. Such decrease is mainly a result of decrease activity of mortgages sold into the secondary market.

Comparison of the years ended December 31, 2011 and 2010

As shown in Table 2, the Group recorded non-interest income in the amount of \$30.1 million for 2011, compared to \$4.1 million during 2010, an increase of \$26.1 million. This increase was mainly related to the effect of a decrease of \$23.6 million in losses on derivatives activities and an increase of \$13.0 million in gain on sale of securities. During 2011, the Group recorded \$13.2 million in derivative losses, primarily as a result of the strategic decision to sell its remaining swap options. Following the sale, the Group entered into new swaps to manage interest rate risk with an aggregate notional amount of \$1.425 billion designated as cash flow hedges. In December 2011, the Group cancelled \$300 million of these cash flow hedges as the forecasted transaction was not deemed probable of occurring. This transaction resulted in a loss which was included in the previously mentioned loss on derivatives activities. An unrealized loss of \$47.4 million was recognized in accumulated other comprehensive income related to the valuation of the remaining swaps which were deemed to be in effect at December 31, 2011.

Financial service revenue increased 14.5% to \$20.6 million in 2011, from \$18.0 million in 2010. Banking service revenue increased 21.3% to \$12.9 million in 2011, from \$10.7 million in 2010. These increases were attributable to an increase in electronic banking service fees.

Income generated from mortgage banking activities increased 3.4% to \$9.9 million in 2011 from \$9.6 million in 2010, mainly as a result of favorable pricing of mortgages sold into the secondary market.

During the 2011 and 2010, the Group recorded other-than-temporary impairment losses of \$15.0 million and \$17.2 million, respectively. The other-than-temporary impairment losses during 2011 were all recorded on a CDO that was sold in January 2012 at a loss of \$15.0 million. No additional gain or loss was realized on the sale in January 2012, since this asset was sold at the same value reflected at December 31, 2011. During 2010, other-than-temporary impairment losses were recorded on the BALTA private label non-agency CMO that was sold in December 2010 at a loss of \$22.8 million.

**TABLE 3 - NON-INTEREST EXPENSES
SUMMARY**

	Year Ended December 31,			
	2012	2011	Variance %	2010
	(Dollars in thousands)			
Compensation and employee benefits	\$ 45,778	\$ 45,552	0.5%	\$ 41,723

Assets owned per average employee	\$ 11,771	\$ 9,246		\$ 10,084

Non-Interest Expense

Comparison of the years ended December 31, 2012 and 2011

Non-interest expense for 2012 reached \$127.8 million, representing an increase of 4.3% compared to \$122.5 million for 2011. During 2012, the Group incurred \$7.1 million in expenses related to the BBVAPR Acquisition. Merger and restructuring charges amounted to \$5.0 million and other integration expenses amounted to \$2.1 million. These charges represent costs associated with these one-time activities and do not represent ongoing costs of the fully integrated combined organization.

Foreclosure, repossession and other real estate expenses for 2012 increased 72.8% to \$3.6 million as compared to 2011, principally due to increase in foreclosures during 2012 as compared to 2011.

Electronic banking charges increased 12.6% to \$6.4 million in 2012 from \$5.7 million in 2011, mostly as a result in volume increase of POS transactions. Communication increased 8.5% to \$1.6 million in 2012 compared to 2011 driven by increase in credit information systems. Advertising, business promotion, and strategic initiatives increased 4.6% to \$6.3 million in 2012 compared to 2011 as a result in marketing initiatives during 2012 for identity refresh and rebranding in connection with the BBVAPR Acquisition.

Taxes, other than payroll and income taxes, for 2012 decreased 25.8% to \$3.5 million as compared to 2011, principally due to a municipal license benefit of \$1.4 million attributed to a settlement reached with the municipality of San Juan during the second quarter of 2012 in which the Group paid \$60 thousand in full and final satisfaction of any and all claims for municipal license taxes for all fiscal years prior to and including 2011.

Directors and investor relations expenses decreased 20.4% to \$1.0 million in 2012 compared to 2011, due to the departure of two directors during 2012.

Loan servicing and clearing expenses decreased by 16.8% in 2012 as a result of conversion expenses of the securities broker dealer clearing agent platform of approximately \$250 thousand in 2011 and overall expenses savings related to these new clearing services.

The increase in the Group's net-interest income resulted in a decrease in the efficiency ratio to 62.58% for 2012 from 66.26% in the prior year. The efficiency ratio measures how much of a company's revenue is used to pay operating expenses. The Group computes its efficiency ratio by dividing non-interest expenses by the sum of its net interest income and non-interest income, but excluding gains on sale of investments securities, derivatives gains or losses, credit-related other-than-temporary impairment losses, net accretion or amortization of FDIC shared-loss indemnification assets, losses on early extinguishment of repurchase agreements, and other income that may be considered volatile in nature. Management believes that the exclusion of those items permits greater comparability. Amounts presented as part of non-interest income that are excluded from the efficiency ratio computation amounted to losses of \$24.9 million for 2012 compared to losses of \$28.3 million for 2011. Revenue for purposes of the efficiency ratio for 2012 amounted to \$204.2 million compared to \$184.9 million for 2011.

Comparison of the years ended December 31, 2011 and 2010

Non-interest expenses for 2011 increased 8.6% to \$122.3 million compared to \$112.6 million for 2010. The increase in non-interest expenses for 2011 is primarily driven by the integration of former Eurobank employees after the FDIC-assisted acquisition on April 30, 2010 and, therefore, had only a partial impact on 2010.

Compensation and employee benefits increased 9.2% to \$45.6 million from \$41.7 million for 2010. Average employees remained at 725 for 2011 and 2010.

Professional and service fees for 2011 increased 31.8% to \$21.7 million compared to \$16.5 million for 2010. The increase for 2011 is mainly due to expenses for servicing the loans acquired in the FDIC-assisted acquisition, which commenced in late June 2010.

Occupancy and equipment expense decreased 6.2% to \$17.4 million for 2011 compared to 2010. This decrease is mainly attributed to fewer branches when compared to 2010.

The decrease in insurance expenses for 2011 as compared to 2010 is principally due to the change in FDIC assessment rates and the change in the methodology applied to the Bank. This current methodology is based on average consolidated total assets less average tangible equity, instead of total deposits.

The increase in electronic banking charges for 2011 compared to 2010 is mainly due to increases in the volume of transactions as the result of new customers from the FDIC-assisted acquisition.

The decrease in taxes, other than payroll and income taxes, for 2011 as compared to 2010 is principally due to the effect of the Eurobank integration, which for 2010 contemplated property taxes for all of Eurobank's former facilities.

Advertising, business promotion, and strategic initiatives for 2011 increased 20.0% as compared to the same period in 2010, primarily to support the expansion of commercial banking and the Group's rebranding.

Loan servicing and clearing expenses increased 30.4%, foreclosure and repossession expenses increased 3.7%, printing, postage, stationery and supplies expenses increased 6.4%, and other operating expenses increased 9.7%, and communication expenses and director and investor relations expenses decreased 36.6% and 10.8%, respectively, for 2011 when compared to 2010.

The non-interest expense results reflected an efficiency ratio of 66.2% for 2011 compared to 64.5% for 2010. The efficiency ratio measures how much of a company's revenue is used to pay operating expenses. Amounts presented as part of non-interest income that are excluded from the efficiency ratio computation amounted to a loss of \$13.2 million for 2011 compared to a loss of \$34.1 million for 2010.

Provision for Loan and Lease Losses

Comparison of the years ended December 31, 2012 and 2011

The provision for non-covered loan and lease losses for 2012 totaled \$13.9 million, a decrease of 8.8% from the \$15.2 million reported in 2011. Based on an analysis of the credit quality and the composition of the Group's loan portfolio, management determined that the provision for 2012 was adequate in order to maintain the allowance for loan and lease losses at an adequate level to provide for probable losses based upon an evaluation of known and inherent risks. The decrease in the provision for loan and lease losses for 2012 is supported by the following observed trends:

- Loans that are 90 days past due to total gross loans decreased from 11.7% at December 31, 2011 to 6.6% at December 31, 2012.
- Non-accruing loans decreased from \$167.7 million at December 31, 2011 to \$147.4 million at December 31, 2012.

During 2012, net credit losses amounted to \$10.9 million, an increase of 13.8% when compared \$9.6 million in 2011. The increase for 2012 was primarily due to an increase in net credit losses for commercial loans of \$1.6 million when compared to 2011. Total charge-offs increased 13.1% to \$11.5 million in 2012 as compared to 2011, and total recoveries slightly increased from \$506 thousand in 2011 to \$508 thousand in 2012. As a result, the recoveries to charge-offs ratio decreased from 5.00% in 2011 to 4.44% in 2012.

The loans covered by the FDIC shared-loss agreement were recognized at fair value as of April 30, 2010, which included the impact of expected credit losses. To the extent credit deterioration occurs in covered loans after the date of acquisition, the Group records an allowance for loan and lease losses. Also, the Group records an increase in the FDIC share-loss indemnification asset for the expected reimbursement from the FDIC under the shared-loss agreements. Provision for covered loans and lease losses for 2012 was \$9.8 million, reflecting the Group's revision to the expected cash flows in the covered loan portfolio considering actual experiences and changes in the Group's expectations for the remaining terms of the loan pools. During the first quarter of 2012, some covered construction and development and commercial real estate loan pools underperformed, which required a provision amounting to \$7.2 million, net of the estimated reimbursement from the FDIC. Additional net provisions of \$1.5 million, \$221 thousand and \$982 thousand were recorded for the second, third and fourth quarters of 2012, respectively, as quarterly reviews of credit assumptions for covered loans are reflecting some delays in the expected cash flows, mainly in pools of real estate collateralized loans. Significant judgement is made in timing the collection of nonperforming loans that are being actively worked out.

Please refer to the "Allowance for Loan and Lease Losses and Non-Performing Assets" section in this MD&A and Table 8 through Table 13 below for more detailed information concerning the allowances for loan and lease losses, net credit losses and credit quality statistics.

Comparison of the years ended December 31, 2011 and 2010

The provision for non-covered loan and lease losses for 2011 totaled \$15.2 million, a 4.5% decrease from the \$15.9 million reported for 2010. Based on an analysis of the credit quality and the composition of the Group's loan portfolio, management determined that the provision for 2011 was adequate in order to maintain the allowance for loan and lease losses at an adequate level.

Net credit losses increased \$1.9 million to \$9.6 million, representing 0.81% of average non-covered loans outstanding, versus 0.67% in 2010. The allowance for non-covered loan and lease losses increased to \$37.0 million (3.06% of non-covered loans) at December 31, 2011, compared to \$31.4 million (2.66% of non-covered loans) at December 31, 2010.

For the commercial loans portfolio, all loans over \$250 thousand that are either over 90 days past due or adversely classified are evaluated for impairment, or when deemed necessary by management. At December 31, 2011, the total investment in impaired commercial loans was \$46.4 million, compared to \$25.9 million at December 31, 2010. Impaired commercial loans increased principally as a result of an increase of \$10.9 million in commercial loans classified as troubled debt restructurings and \$5.4 million in current loans adversely classified by management during its impairment analysis. Most of the impaired commercial loans were measured based on the fair value of collateral method, since most impaired loans during the period were collateral dependant, all other loans were measured using the present value of cash flows method. The valuation allowance for impaired commercial loans amounted to approximately \$3.5 million and \$823 thousand at December 31, 2011 and 2010, respectively. At December 31, 2011, the total investment in impaired mortgage loans was \$51.5 million (December 31, 2010 — \$36.1 million). Impairment on mortgage loans assessed as troubled debt restructuring was measured using the present value of cash flows. The valuation allowance for impaired mortgage loans amounted to approximately \$3.4 million and \$2.4 million at December 31, 2011 and 2010, respectively.

The loans covered by the FDIC shared-loss agreement were recognized at fair value as of April 30, 2010, which included the impact of expected credit losses. As part of the Group's assessment of actual versus expected cash flows on covered loans, higher cash flows are expected for various pools of loans for which impairment has been previously recorded as an allowance for covered loan and lease losses. The resulting higher expected cash flows are recorded as a reduction in such previously recorded allowance and a recapture of covered loan and lease losses of \$1.4 million for 2011, net of the effect from the FDIC shared-loss indemnification asset. A provision for covered loan and lease losses of \$6.2 million was recorded in 2010, net of the effect from the FDIC shared-loss indemnification asset.

Income Taxes

Comparison of the years ended December 31, 2012 and 2011

Income tax expense was \$3.3 million for 2012 compared to \$886 thousand for 2011. The increase during 2012 was mainly due to a \$2.4 million tax expense from the IBE Subsidiary. Following a change in its applicable tax rate from 5% to 0% as a result of a Puerto Rico law adopted in 2011, the remaining tax balance of the IBE Subsidiary's unrealized gain on securities recorded other comprehensive income will flow through income as these securities are repaid or sold in future periods. This change in law had no effect during 2011. The tax benefit of the exempt interest income was reduced from \$10.5 million to \$3.5 million as a result of the reduced investment portfolio and the reduction in the IBE Subsidiary's income from \$9.2 million in 2011 to \$4.6 million in 2012.

Comparison of the years ended December 31, 2011 and 2010

For 2011, the Group recorded an income tax expense of \$866 thousand, as compared to income tax benefit of \$4.3 million for 2010. This increase reflected a \$5.2 million expense related to the re-measurement of the net deferred tax assets due to a reduction in the marginal corporate income tax rate from 40.95% to 30% as a result of the 2011 Code, partially reduced by the various contingencies settled with the Puerto Rico Treasury Department during the second quarter of 2011 in which the Group paid \$2.0 million, approximately \$3.0 million less than what the Group had reserved for this purpose. As part of the settlement reached, all taxable years prior to 2010 are closed for purposes of any assessments of additional income taxes by the Puerto Rico Treasury Department. Also, mortgage tax credits amounting to \$2.6 million became available for the years 2011 and 2012, \$1.3 million of which were used during 2011 to offset any taxable income. The Group expects to obtain benefits from this reduction in tax rates on future corporate tax filings. For 2011, the effective tax rate of the Group reached 2.45% compared to an effective tax benefit of 77.64% for 2010. Included in the aforementioned effective tax rate is the net effect of the change in the enacted tax rate of 14.66%; the decrease in the tax liability rate of the IBE Subsidiary of 1.41%, which reduced its statutory tax rate from 5.00% to 0.00%; and a decrease in the income tax contingencies credit of 7.95%, which includes the benefits recorded from the settlement of contingencies with the Puerto Rico Treasury Department.

ANALYSIS OF FINANCIAL CONDITION

TABLE 4 - ASSETS SUMMARY AND COMPOSITION

	December 31,			
	2012	2011	Variance %	2010

Assets Owned

At December 31, 2012, the Group's total assets amounted to \$9.193 billion, an increase of 37.3% when compared to \$6.694 billion at December 31, 2011, and interest-earning assets increase 35.4% from \$5.534 billion at December 31, 2011 to \$7.495 billion at December 31, 2012. This increase is the result of the BBVAPR Acquisition on December 18, 2012, partially offset by the deleverage plan executed in the second half of 2012 in connection with such acquisition.

As set forth in Table 4 above, as a result of the BBVAPR Acquisition in December 2012 and related deleverage plan, the Group accelerated its longstanding goal of creating a more stable balance sheet, with a larger and more diversified loan portfolio, and a smaller investment securities portfolio, improving earnings stability. Furthermore, in connection with the BBVAPR Acquisition, we completed the sale of approximately \$1.4 billion of our and BBVAPR Bank's investment securities and used the proceeds from such sales, together with available cash, to repay approximately \$1.7 billion of wholesale funding. The BBVAPR Acquisition and the change in portfolio composition as a result of the deleverage prompted management to consider the adequacy of maintaining securities classified as held-to-maturity in connection with the assessment of the overall asset-liability management process. In doing so, and in compliance with the applicable accounting guidance under ASC 320-10-25, management's considerations focused primarily on its ability and intent to hold the securities until maturity, as well as its asset-liability management strategy with its goal of maximizing net interest income and managing risk under the new consolidated balance sheet structure. As a result of such analysis, on December 31, 2012, the securities in the held-to-maturity portfolio were transferred to the available-for-sale portfolio at a fair value of \$797.5 million with net combined unrealized gains of \$35.1 million.

At December 31, 2012, investments represented 30.1% of total interest earning assets while loans represented 69.9%, compared to 69.9% and 30.1%, respectively, at December 31, 2011.

Investments principally consist of U.S. treasury securities, U.S. government and agency bonds, mortgage-backed securities and Puerto Rico government and agency bonds. At December 31, 2012, the investment portfolio decreased 42.3% to \$2.233 billion from \$3.868 billion at December 31, 2011. This decrease is mostly due to the effect of a decrease of \$1.867 billion in FNMA and FHLMC certificates. During 2012, the Group had net realized gains of \$74.2 million, mainly due to sales of mortgage-backed securities and CMOs of \$1.509 billion with a book value at sale of \$1.433 billion and investment securities of \$319.3 million with a book value at sale of \$322.2 million. During 2011, the Group had gross realized gains of \$28.0 million, mainly due to sales of mortgage-backed securities of \$606.2 million with a book value at sale of \$578.2 million.

The Group's loan portfolio is comprised of residential loans, home equity loans, commercial loans collateralized by mortgages on real estate located in Puerto Rico, other commercial and industrial loans, consumer loans, leases, and auto loans, the latter were added as part of the recent BBVAPR Acquisition. At December 31, 2012, the Group's loan portfolio, the largest category of the Group's interest-earning assets increased 211.0% to \$5.182 billion compared to the loan portfolio of \$1.666 billion at December 31, 2011. The loan portfolio increase was mainly attributable to the \$3.560 billion in loans acquired in the BBVAPR Acquisition. The fair values initially assigned to the assets acquired and liabilities assumed are preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values became available. The covered loan portfolio decreased \$101.0 million, or 20.3%, mainly due to an increase of \$16.9 million in the allowance for loan and lease losses on covered loans, and as a net effect of the repayment of loans and the portion of the accretable yield recognized as interest income. The non-covered loan portfolio increased \$3.617 billion, or 309.2%.

At December 31, 2012, the Group's non-covered loan portfolio composition and trends were as follows:

- Mortgage loan portfolio amounted to \$808.3 million (38.0% of the gross non-covered loan portfolio) compared to \$821.1 million (69.3% of the gross non-covered loan portfolio) at December 31, 2011. Mortgage loan production totaled \$202.7 million for 2012, a decrease of 4.7% from \$212.8 million in 2011.
- Commercial loan portfolio amounted to \$690.1 million (32.5% of the gross non-covered loan portfolio) compared to \$301.6 million (25.5% of the gross non-covered loan portfolio) at December 31, 2011. Commercial loan production increased 36.7% to \$191.0 million for 2012 from \$139.8 million for 2011.
- Consumer loan portfolio amounted to \$118.8 million (5.6% of the gross non-covered loan portfolio) compared to \$36.1 million (3.1% of the gross non-covered loan portfolio) at December 31, 2011. Consumer loan production increased 46.4% to \$31.8 million for 2012 from \$21.7 million in 2011.

- Leasing portfolio amounted to \$37.6 million (1.8% of the gross non-covered loan portfolio) compared to \$25.8 million (2.2% of the gross non-covered loan portfolio) at December 31, 2011. Leasing production increased 2.3% to \$22.1 million for 2012 from \$21.6 million in 2011.
- Auto loan portfolio amounted to \$471.1 million (22.2% of the gross non-covered loan portfolio). This business line was added as part of the BBVAPR Acquisition on December 18, 2012. Auto loan production was \$13.1 million in 2012 since acquisition.

The FDIC shared-loss indemnification asset amounted to \$286.8 million as of December 31, 2012 and \$392.4 million as of December 31, 2011. The FDIC shared-loss indemnification asset is reduced as claims over losses recognized on covered loans are collected from the FDIC. Realized credit losses in excess of previously forecasted estimates result in an increase in the FDIC shared-loss indemnification asset. Conversely, if realized credit losses are less than previously forecasted estimates, the FDIC shared-loss indemnification asset is amortized through the term of the shared-loss agreements. The decrease in the FDIC shared-loss indemnification asset is mainly related to reimbursements received from the FDIC during 2012 of \$96.7 million and net amortization of \$28.0 million, which was partially offset by an increase of \$7.0 million in expected net credit impairment losses to be covered under shared-loss agreements and \$12.1 million in incurred expenses to be reimbursed under the shared-loss agreements.

Under the terms of the shared-loss agreements, the FDIC absorbs 80% of losses and shares in 80% of loss recoveries on covered assets. The term for loss share on single family residential mortgage loans is ten years with respect to losses and loss recoveries, while the term for loss share on commercial loans is five years with respect to losses and eight years with respect to loss recoveries, from the April 30, 2010 acquisition date. The shared-loss agreements also provide for certain costs directly related to the collection and preservation of covered assets to be reimbursed at an 80% level.

Liabilities and Funding Sources

As shown in Table 6 above, at December 31, 2012, the Group's total liabilities were \$8.330 billion, 37.8% higher than the \$6.005 billion reported at December 31, 2011. This increase is the result of the BBVAPR Acquisition on December 18, 2012, partially offset by the deleverage plan executed in the second half of 2012. Deposits and borrowings, the Group's funding sources, amounted to \$8.178 billion at December 31, 2012 versus \$5.922 billion at December 31, 2011, a 38.1% increase.

At December 31, 2012, deposits represented 69.6% and borrowings represented 30.4% of interest-bearing liabilities, compared to 41.1% and 58.9%, respectively, at December 31, 2011. At December 31, 2012, deposits and accrued interest payable, the largest category of the Group's interest-bearing liabilities, were \$5.690 billion, up 133.5% from \$2.436 billion at December 31, 2011. The deposit increase was mainly attributable to the \$3.494 billion in BBVAPR deposits assumed on December 18, 2012. The fair values initially assigned to the assets acquired and liabilities assumed are preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values becomes available. Core deposits increased 118.5% to \$4.761 billion at December 31, 2012 from \$2.180 billion at December 31, 2011, and brokered deposits increased 261.7% to \$928.2 million as of December 31, 2012 from \$256.6 million at December 31, 2011.

Borrowings consist mainly of funding sources through the use of repurchase agreements, FHLB advances, subordinated capital notes, and short-term borrowings. At December 31, 2012, borrowings amounted to \$2.488 billion, 28.6% lower than the \$3.486 billion reported at December 31, 2011. The TLGP notes totaling \$105 million were repaid in full at maturity in March 2012. Repurchase agreements as of December 31, 2012 decreased approximately \$1.361 billion to \$1.695 billion from \$3.056 billion at December 31, 2012, due to the early termination of repurchase agreements in connection with the deleverage plan executed in the second half of 2012.

As a member of the FHLB, the Bank can obtain advances from the FHLB, secured by the FHLB stock owned by the Bank, as well as by certain of the Bank's mortgage loans and investment securities. Advances from FHLB amounted to \$536.5 million and \$281.8 million as of December 31, 2012 and December 31, 2011, respectively. These advances mature from January 2013 through April 2017.

Stockholders' Equity

At December 31, 2012, the Group's total stockholders' equity was \$863.6 million, a 24.2% increase when compared to \$695.6 million at December 31, 2011. The increase reflects the issuance of common and preferred stock during 2012 amounting to \$149.8 million, net of stock issuance costs, in connection with the BBVAPR Acquisition, an increase of 129.2% or \$18.7 million in other comprehensive income, and the net income for 2012, partially offset by cash dividends declared on common and preferred stock amounting to \$20.0 million.

Regulatory capital ratios for 2012 decreased mainly as a result of the BBVAPR Acquisition, as risk-weighted assets increased 152.6%, or \$3.163 billion, partially offset by the increase of 24.2%, or \$168.1 million, in total capital in 2012, compared to 2011. Tangible common equity to risk-weighted assets and total equity to risk-weighted assets at December 31, 2012 decreased to 11.82% from 30.14% and 16.48% from 33.48%, respectively, at December 31, 2011.

The Group maintains capital ratios in excess of regulatory requirements. At December 31, 2012, Tier 1 Leverage Capital Ratio was 6.42% (1.61 times the requirement of 4.00%), Tier 1 Risk-Based Capital Ratio was 12.94% (3.24 times the requirement of 4.00%), and Total Risk-Based Capital Ratio was 15.15% (1.89 times the requirement of 8.00%).

Taking into consideration our strong capital position, we increased the quarterly cash dividend per common share by 20% to \$0.06 per share on November 30, 2011. This represents an annual increase from \$0.20 to \$0.24 per share.

The following are the consolidated capital ratios of the Group at December 31, 2012 and December 31, 2011:

Tangible book value per common share	\$ 13.59	\$ 15.19	\$ 14.25

The tangible common equity ratio and tangible book value per common share are non-GAAP measures. Management and many stock analysts use the tangible common equity ratio and tangible book value per common share in conjunction with more traditional bank capital ratios to compare the capital adequacy of banking organizations. Neither tangible common equity nor tangible assets or related measures should be considered in isolation or as a substitute for stockholders' equity, total assets or any other measure calculated in accordance with GAAP. Moreover, the manner in which the Group calculates its tangible common equity, tangible assets and any other related measures may differ from that of other companies reporting measures with similar names.

The Tier 1 common equity to risk-weighted assets ratio is another non-GAAP measure. Ratios calculated based upon Tier 1 common equity have become a focus of regulators and investors, and management believes ratios based on Tier 1 common equity assist investors in analyzing the Group's capital position. In connection with the Supervisory Capital Assessment Program, the Federal Reserve Board began supplementing its assessment of the capital adequacy of a large bank holding company based on a variation of Tier 1 capital, known as Tier 1 common equity.

Because Tier 1 common equity is not formally defined by GAAP or, unlike Tier 1 capital, codified in the federal banking regulations, this measure is considered to be a non-GAAP financial measure. Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. To mitigate these limitations, the Group has procedures in place to calculate these measures using the appropriate GAAP or regulatory components. Although these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

The table below presents a reconciliation of the Group's total common equity (GAAP) at December 31, 2012 and December 31, 2011 to Tier 1 common equity (non-GAAP):

	December 31,		
	2012	2011	2010
	(In thousands)		
Common stockholders' equity	\$ 697,721	\$ 630,217	\$ 664,331
Unrealized gains on available-for-sale securities, net of income tax	(68,245)	(79,244)	(36,988)
Unrealized losses on cash flow hedges, net of income tax	12,365	42,113	-
Disallowed deferred tax assets	(85,009)	(26,879)	(25,930)

Intangible assets:			
Goodwill	(64,021)	(2,701)	(2,701)
Other disallowed intangibles	(14,490)	(1,185)	(1,328)
Total Tier 1 common equity	\$ 477,242	\$ 561,276	\$ 596,415
Tier 1 common equity to risk-weighted assets	9.11%	27.01%	28.02%

The following table presents the Group's capital adequacy information at December 31, 2012 and December 31, 2011:

	December 31,		
	2012	2011	2010
	(In thousands)		
Risk-based capital:			
Tier 1 capital	\$ 678,127	\$ 661,614	\$ 699,415
Supplementary (Tier 2) capital	116,068	26,574	28,826
Total risk-based capital	\$ 794,195	\$ 688,188	\$ 728,241
Risk-weighted assets:			
Balance sheet items	\$ 4,927,919	\$ 2,032,982	\$ 2,216,120
Off-balance sheet items	312,942	44,760	37,367
Total risk-weighted assets	\$ 5,240,861	\$ 2,077,742	\$ 2,253,487
Ratios:			
Tier 1 capital (minimum required - 4%)	12.94%	31.84%	31.04%
Total capital (minimum required - 8%)	15.15%	33.12%	32.32%
Leverage ratio	6.42%	9.65%	9.50%
Equity to assets	9.39%	10.39%	10.02%
Tangible common equity to assets	6.74%	9.36%	9.03%

The Federal Reserve Board has risk-based capital guidelines for bank holding companies. Under the guidelines, the minimum ratio of qualifying total capital to risk-weighted assets is 8%. At least half of the total capital is to be comprised of qualifying common stockholders' equity, qualifying noncumulative perpetual preferred stock (including related surplus), minority interests related to qualifying common or noncumulative perpetual preferred stock directly issued by a consolidated U.S. depository institution or foreign bank subsidiary, and restricted core capital elements (collectively, "Tier 1 Capital"). Banking organizations are expected to maintain at least 50% of their Tier 1 Capital as common equity. Except as otherwise discussed below in light of the Dodd-Frank Act in connection with certain debt or equity instruments issued on or after May 19, 2010, not more than 25% of qualifying Tier 1 Capital may consist of qualifying cumulative perpetual preferred stock, trust preferred securities or other so-called restricted core capital elements. "Tier 2 Capital" may consist, subject to certain limitations, of allowance for loan and lease losses; perpetual preferred stock and related surplus; hybrid capital instruments, perpetual debt, and mandatory convertible debt securities; term subordinated debt and intermediate-term preferred stock, including related surplus; and unrealized holding gains on equity securities. "Tier 3 Capital" consists of qualifying unsecured subordinated debt.

The sum of Tier 2 and Tier 3 Capital may not exceed the amount of Tier 1 Capital. At December 31, 2012 and December 31, 2011, the Group was a "well capitalized" institution for regulatory purposes.

The Federal Reserve Board has regulations with respect to risk-based and leverage capital ratios that require most intangibles, including goodwill and core deposit intangibles, to be deducted from Tier 1 Capital. The only types of identifiable intangible assets that may be included in, that is, not deducted from, an organization's capital are readily marketable mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships.

In addition, the Federal Reserve Board has established minimum leverage ratio (Tier 1 Capital to total assets) guidelines for bank holding companies and member banks. These guidelines provide for a minimum leverage ratio of 3% for bank holding companies and member banks that meet certain specified criteria, including that they have the highest regulatory rating. All other bank holding companies and member banks are required to maintain a minimum ratio of Tier 1 Capital to total assets of 4%. The guidelines also provide that banking organizations experiencing internal growth or making acquisitions are expected to maintain strong capital positions substantially above the minimum supervisory levels without significant reliance on intangible assets. Furthermore, the guidelines state that the Federal Reserve Board will continue to consider a "tangible Tier 1 leverage ratio" and other indicators of capital strength in evaluating proposals for expansion or new activities.

Under the Dodd-Frank Act, federal banking regulators are required to establish minimum leverage and risk-based capital requirements on a consolidated basis for insured institutions, depository institution holding companies, and non-bank financial companies supervised by the Federal Reserve Board. The minimum leverage and risk-based capital requirements are to be determined based on the minimum ratios established for insured depository institutions under prompt corrective action regulations. In effect, such provision of the Dodd-Frank Act (i.e., Section 171), which is commonly known as the Collins Amendment, applies to bank holding companies the same leverage and risk based capital requirements that apply to insured depository institutions. Because the capital requirements must be the same for insured depository institutions and their holding companies, the Collins Amendment generally excludes certain debt or equity instruments, such as cumulative perpetual preferred stock and trust preferred securities, from Tier 1 Capital, subject to a three-year phase-out from Tier 1 qualification for such instruments issued before May 19, 2010, with the phase-out commencing on January 1, 2013. However, such instruments issued before May 19, 2010 by a bank holding company, such as the Group, with total consolidated assets of less than \$15 billion as of December 31, 2009, are not affected by the Collins Amendment and may continue to be included in Tier 1 Capital as a restricted core capital element.

On June 12, 2012, the Office of the Comptroller of the Currency (the "OCC"), the Federal Reserve Board, and the FDIC issued three notices of proposed rulemaking ("NPRs") that would revise and replace the agencies' current capital rules. The agencies also announced the finalization of the market risk capital rule that was proposed in 2011.

In the first Basel III NPR, "Regulatory Capital Rules: Regulatory Capital, Implementation of Basel III, Minimum Regulatory Capital Ratios, Capital Adequacy, and Transition Provisions" (the "Basel III NPR"), the agencies are proposing to revise their risk-based and leverage capital requirements consistent with agreements reached by the Basel Committee on Banking Supervision ("Basel III"). The Basel III NPR would apply to all insured banks and savings associations, top-tier bank holding companies domiciled in the United States with more than \$500 million in assets, and savings and loan holding companies that are domiciled in the United States. Provisions of the Basel III NPR that would apply to such banking organizations include implementation of a new common equity Tier 1 minimum capital requirement, a higher minimum Tier 1 capital requirement, and, for banking organizations subject to the advanced approaches capital rules, a supplementary leverage ratio that incorporates a broader set of exposures. Additionally, consistent with Basel III, the agencies propose to apply limits on a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a specified "buffer" of common equity Tier 1 capital in addition to the minimum risk-based capital requirements. The revisions set forth in the Basel III NPR are consistent with Section 171 of the Dodd-Frank Act, which requires the agencies to establish minimum risk-based and leverage capital requirements.

The Basel III NPR also would revise the agencies' prompt corrective action framework by incorporating the new regulatory capital minimums and updating the definition of tangible common equity. Prompt corrective action is an enforcement framework that constrains the activities of insured depository institutions based on their level of regulatory capital.

The second Basel III NPR, "Regulatory Capital Rules: Advanced Approaches Risk-based Capital Rules; Market Risk Capital Rule" (the "Advanced Approaches and Market Risk NPR"), would revise the advanced approaches risk-based capital rules consistent with Basel III and other changes to the Basel Committee's capital standards. The agencies also propose revising the advanced approaches risk-based capital rules to be consistent with Section 939A and Section 171 of the Dodd-Frank Act. Additionally in the Advanced Approaches and Market Risk NPR, the OCC and the FDIC propose that the market risk capital rules apply to federal and state savings associations, and the Federal Reserve Board proposes that the advanced approaches and market risk capital rules apply to top-tier savings and loan holding companies domiciled in the United States, if stated thresholds for trading activity are met. Generally, the

advanced approaches rules would apply to such institutions with \$250 billion or more in consolidated assets or \$10 billion or more in foreign exposure, and the market risk rule would apply to savings and loan holding companies with significant trading activity.

In the third capital NPR, “Regulatory Capital Rules: Standardized Approach for Risk-weighted Assets; Market Discipline and Disclosure Requirements” (the “Standardized Approach NPR”), the agencies propose to revise and harmonize rules for calculating risk-weighted assets to enhance risk sensitivity and address weaknesses identified over recent years, including by incorporating aspects of the Basel II standardized framework, and alternatives to credit ratings, consistent with Section 939A of the Dodd-Frank Act. The revisions include methods for determining risk-weighted assets for residential mortgages, securitization exposures, and counterparty credit risk. The Standardized Approach NPR also would introduce disclosure requirements that would apply to U.S. banking organizations with \$50 billion or more in total assets. The Standardized Approach NPR would apply to the same set of institutions as the Basel III NPR.

The Group’s common stock is traded on the New York Stock Exchange (“NYSE”) under the symbol “OFG.” At December 31, 2012 and December 31, 2011, the Group’s market capitalization for its outstanding common stock was \$608.5 million (\$13.35 per share) and \$499.5 million (\$12.11 per share), respectively.

The following table provides the high and low prices and dividends per share of the Group’s common stock for each quarter of the last three calendar years:

	Price		Cash
	High	Low	Dividend Per share
2012			
December 31, 2012	\$ 13.35	\$ 9.98	\$ 0.06
September 30, 2012	\$ 11.49	\$ 10.02	\$ 0.06

Group’s Financial Assets Managed

The Group’s financial assets managed include those managed by the Group’s trust division, retirement plan administration subsidiary, and its broker-dealer subsidiaries. Assets managed by the trust division and the broker-dealer subsidiaries increased from \$4.142 billion as of December 31, 2011 to \$5.237 billion as of December 31, 2012, mainly as a result of assets managed by the broker-dealer subsidiary acquired in the BBVAPR Acquisition amounting to \$504.8 million at December 31, 2012, and an increase in account contributions and capital market appreciation.

The Group’s trust division offers various types of IRAs and manages 401(k) and Keogh retirement plans and custodian and corporate trust accounts, while the retirement plan administration subsidiary, CPC, manages private retirement plans. At December 31, 2012, total assets managed by the Group’s trust division and CPC amounted to \$2.514 billion, compared to \$2.216 billion at December 31, 2011. Oriental Financial Services and OFS Securities offer a wide array of investment alternatives to their client base, such as tax-advantaged fixed income securities, mutual funds, stocks, bonds and money management wrap-fee programs. At December 31, 2012, total assets gathered by Oriental Financial Services and OFS Securities from their customer investment accounts increased to \$2.722 billion, compared to \$1.926 billion in assets gathered only by Oriental Financial Services at December 31, 2011.

Allowance for Loan and Lease Losses and Non-Performing Assets

The Group maintains an allowance for loan and lease losses at a level that management considers adequate to provide for probable losses based upon an evaluation of known and inherent risks. The Group’s allowance for loan and lease losses policy provides for a detailed quarterly analysis of probable losses. Tables 8 through 13 set forth an analysis of activity in the allowance for loan and lease losses and present selected loan loss statistics. In addition, refer to Table 5 for the composition of the loan portfolio.

Non-covered Loans

Loans acquired in a business acquisition are recorded at their fair value at the acquisition date. Credit discounts are included in the determination of fair value; therefore, an allowance for loan losses is not recorded at the acquisition date. Credit cards, floor plans, revolving lines of credit, and certain auto loans acquired as part of the BBVAPR Acquisition will be accounted for under the guidance of ASC 310-20, which requires that any differences between contractually required loan payment receivable in excess of the Group’s initial investment in the loans be accreted into interest income on a level-yield basis over the life of the loan. Considering the short period elapsed between the date of the BBVAPR acquisition and the end of the Group’s fiscal year, these loans did not have an allowance for loan and lease losses at December 31, 2012. The remaining loans acquired in the BBVAPR Acquisition are accounted

for under ASC-310-30 and were recognized at fair value as of December 18, 2012, which included the impact of expected credit losses and therefore, no allowance for credit losses was recorded at acquisition date. To the extent credit deterioration occurs after the date of acquisition, the Group would record an allowance for loan and lease losses. Management determined that there was no need to record an allowance for loan and lease losses on loans acquired in the BBVAPR Acquisition accounted for under ASC-310-30 as of December 31, 2012. Considering the short period elapsed from the acquisition date, the Group does not believe that the difference between cash flows expected to be collected on the loans acquired in the BBVAPR Acquisition accounted for under ASC-310-30 and those anticipated at December 18, 2012 need further assessment.

At December 31, 2012, the Group's allowance for non-covered loan and lease losses amounted to \$39.9 million, corresponding to originated loans, or 3.17% of total gross originated loans at December 31, 2012 versus \$37.0 million or 3.11% of total gross originated loans at December 31, 2011. The allowance for residential mortgage loans, consumer loans, and leases decreased by 2.6% (or \$560 thousand), 39.8% (or \$567 thousand), and 68.0% (or \$575 thousand), respectively, when compared with balances recorded at December 31, 2011. The allowance for commercial loans increased by 36.1%, or \$4.5 million, when compared with balances recorded at December 31, 2011. During 2012, the Group recorded an allowance of \$263 thousand for originated auto loans, a new segment resulting from the BBVAPR Acquisition on December 18, 2012. The unallocated allowance decreased by 32.1%, or \$174 thousand, when compared with balances recorded at December 31, 2011.

Please refer to the "Provision for Loan and Lease Losses" section in this MD&A for a more detailed analysis of provisions for loan and lease losses.

The Group follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan and lease losses to provide for inherent losses in the loan portfolio. This methodology includes the consideration of factors such as economic conditions, portfolio risk characteristics, prior loss experience, and results of periodic credit reviews of individual loans. The provision for loan losses charged to current operations is based on such methodology. Loan losses are charged and recoveries are credited to the allowance for loan and lease losses.

Larger commercial loans that exhibit potential or observed credit weaknesses are subject to individual review and grading. Where appropriate, allowances are allocated to individual loans based on management's estimate of the borrower's ability to repay the loan given the availability of collateral and other sources of cash flow and legal options available to the Group.

Included in the review of individual loans are those that are impaired. A loan is considered impaired when, based on current information and events, it is probable that the Group will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient, at the observable market price of the loan or the fair value of the collateral, if the loan is collateral dependent. Loans are individually evaluated for impairment, except large groups of small balance homogeneous loans that are collectively evaluated for impairment and loans that are recorded at fair value or at the lower of cost or market value. The portfolios of mortgage loans, leases and consumer loans are considered homogeneous, and are evaluated collectively for impairment. For the commercial loans portfolio, all loans over \$250 thousand that are either over 90 days past due or adversely classified, or when deemed necessary by management, are evaluated for impairment. At December 31, 2012, the total investment in impaired commercial loans was \$46.2 million, compared to \$46.4 million at December 31, 2011. Most of the impaired commercial loans are measured based on the fair value of collateral method, since most impaired loans during the period were collateral dependent, all other loans are measured using the present value of cash flows method. The valuation allowance for impaired commercial loans amounted to approximately \$4.1 million and \$3.5 million at December 31, 2012 and December 31, 2011, respectively. At December 31, 2012, the total investment in impaired mortgage loans was \$74.8 million, compared to \$51.5 million at December 31, 2011. Impairment on mortgage loans assessed as troubled-debt restructuring was measured using the present value of cash flows. The valuation allowance for impaired mortgage loans amounted to approximately \$5.3 million and \$3.4 million at December 31, 2012 and December 31, 2011, respectively.

The Group, using a rating system, applies an overall allowance percentage to each non-covered loan portfolio segment based on historical credit losses adjusted for current conditions and trends. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Group over the most recent twelve months. The actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards, and other changes in lending policies, procedures and practices; experience, ability, and depth of lending management and other relevant staff, including the bank's loan review system as graded by regulatory agencies in their last examination; local economic trends and industry

conditions; effects of external factors such as competition and regulatory requirements on the level of estimated credit losses in the current portfolio; and effects of changes in credit concentrations and collateral value. The following portfolio segments have been identified: mortgage loans; commercial loans; consumer loans; and leasing.

Loan loss ratios and credit risk categories are updated quarterly and are applied in the context of GAAP and the 2006 Interagency Policy Statement on the Allowance for Loan and Lease Losses, which requires that depository institutions have prudent, conservative, but not excessive loan loss allowances that fall within an acceptable range of estimated losses. While management uses available information in estimating probable loan losses, future changes to the allowance may be necessary, based on factors beyond the Group's control, such as factors affecting general economic conditions.

There have been no material changes in criteria or estimation techniques as compared to prior periods that impacted the determination of the current period allowance for loan and lease losses, except for the further segregation of the traditional residential mortgage portfolio by origination vintages made since the June 30, 2012 quarter. The new segregation allows management to perform more efficient assessment of the traditional mortgage portfolio historical losses and risk. Also, since the quarter ended June 30, 2012, the following changes were made to the current environmental factors considered for the determination of the allowance for loan and lease losses:

- consolidation of national and local economic trends and industry conditions as one factor;
- the addition of the quality of the Bank's loan review system as graded in the last FDIC report of examination to the factor dealing with management's experience, ability, and depth of lending management and other relevant staff; and
- the addition of the changes in the value of underlying collateral for collateral dependant loans.

The Group's non-performing assets include non-performing loans and foreclosed real estate (see Tables 11 and 12). At December 31, 2012 and December 31, 2011, the Group had \$147.2 million and \$147.1 million, respectively, of non-accrual non-covered loans including acquired loans accounted under ASC 310-20 (loans with revolving feature and/or acquired at a premium). Covered loans and loans purchased from BBVAPR with credit deterioration are considered to be performing due to the application of the accretion method under ASC 310-30. At December 31, 2012 and December 31, 2011, loans whose terms have been extended and which are classified as troubled-debt restructuring that are not included in non-performing assets amounted to \$52.0 million and \$41.3 million, respectively.

At December 31, 2012, the Group's non-performing assets increased 27.2% to \$206.6 million (3.37% of total assets, excluding covered assets and acquired loans with deteriorated credit quality) from \$162.4 million (2.63% of total assets, excluding covered loans) at December 31, 2011. The increase is mostly due to foreclosed real estate and other repossessed assets acquired in the BBVAPR Acquisition amounting to \$35.8 million and \$5.9 million, respectively, at December 31, 2012. The Group does not expect non-performing loans to result in significantly higher losses as most are well-collateralized with adequate loan-to-value ratios. At December 31, 2012, the allowance for non-covered loans and lease losses to non-performing loans coverage ratio was 27.13% (22.15% at December 31, 2011).

The Group follows a conservative residential mortgage lending policy, with more than 90% of its residential mortgage portfolio consisting of fixed-rate, fully amortizing, fully documented loans that do not have the level of risk associated with subprime loans offered by certain major U.S. mortgage loan originators. Furthermore, the Group has never been active in negative amortization loans or adjustable rate mortgage loans, including those with teaser rates, and does not originate construction and development loans.

The following items comprise non-performing assets:

1. Originated loans:

- Mortgage loans — are placed on non-accrual status when they become 90 days or more past due and are written-down, if necessary, based on the specific evaluation of the collateral underlying the loan. At December 31, 2012, the Group's originated non-performing mortgage loans totaled \$115.0 million (78.1% of the Group's non-performing loans), a 4.8% increase from \$109.7 million (74.6% of the Group's non-performing loans) at December 31, 2011. Non-performing loans in this category are primarily residential mortgage loans. On April 1, 2011, the Bank changed on a prospective basis its policy to place on non-accrual status residential mortgage loans well collateralized and in process of collection when reaching 90 days past due. All loans that were between 90 and 365 days past due when the policy was changed were also placed on non-accrual status. The interest receivable on such loans is evaluated on a periodic basis against the collateral underlying the loans, and written-down, if necessary. On December 31, 2011, the Bank further revised its policy to reverse against income all interest recorded on residential mortgage loans reaching 90 days past due, including

the remaining interest on loans that were between 90 and 365 days past due as of April 1, 2011. On December 31, 2011, the Bank also charged-off this remaining accrued interest on residential mortgage loans over 90 days past due. This change in estimate was considered necessary to comply with guidance received from the Group's regulators.

- Commercial loans — are placed on non-accrual status when they become 90 days or more past due and are written-down, if necessary, based on the specific evaluation of the underlying collateral, if any. At December 31, 2012, the Group's originated non-performing commercial loans amounted to \$29.5 million (20.0% of the Group's non-performing loans), a 20.2% decrease when compared to non-performing commercial loans of \$37.0 million at December 31, 2011 (25.1% of the Group's non-performing loans). Most of this portfolio is collateralized by commercial real estate properties.
- Consumer loans — are placed on non-accrual status when they become 90 days past due and written-off when payments are delinquent 120 days in personal loans and 180 days in credit cards and personal lines of credit. At December 31, 2012, the Group's originated non-performing consumer loans amounted to \$442 thousand (0.3% of the Group's total non-performing loans), a 28.1% increase from \$345 thousand at December 31, 2011 (0.2% of total non-performing loans).
- Leases — are placed on non-accrual status when they become 90 days past due and partially written-off to collateral value when payments are delinquent 120 days, and fully written-off when payments are delinquent 180 days. At December 31, 2012, the Group's originated non-performing leases amounted to \$131 thousand (0.1% of the Group's total non-performing loans), an increase of 28.4% from \$102 thousand at December 31, 2011 (0.1% of total non-performing loans).

2. Acquired loans accounted for under ASC 310-20 (loans with revolving features and/or acquired at premium):

- Commercial lines of credit - are placed on non-accrual status when they become 90 days or more past due and are written-down, if necessary, based on the specific evaluation of the underlying collateral, if any. At December 31, 2012, the Group's acquired non-performing commercial lines of credit accounted for under ASC 310-20 amounted to \$193 thousand (0.1% of the Group's non-performing loans)
- Mortgage - are placed on non-accrual status when they become 90 days or more past due and are written-down, if necessary, based on the specific evaluation of the collateral underlying the loan. At December 31, 2012, the Group's acquired non-performing mortgage loans accounted for under ASC 310-20 totaled \$520 thousand (0.4% of the Group's non-performing loans)
- Auto loans - are placed on non-accrual status when they become 90 days past due and written-off when payments are delinquent 120 days. At December 31, 2012, the Group's acquired non-performing auto loans accounted for under ASC 310-20 totaled \$275 thousand (0.2% of the Group's non-performing loans)
- Consumer lines of credit and credit cards — are placed on non-accrual status when they become 90 days past due and written-off when payments are delinquent 180 days. At December 31, 2012, the Group's acquired non-performing consumer lines of credit and credit cards accounted for under ASC 310-20 totaled \$1.1 million (0.7% of the Group's non-performing loans)

3. Acquired loans accounted for under ASC 310-30: are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analyses.

4. Foreclosed real estate: is initially recorded at the lower of the related loan balance or fair value less cost to sell as of the date of foreclosure. Any excess of the loan balance over the fair value of the property is charged against the allowance for loan and lease losses. Subsequently, any excess of the carrying value over the estimated fair value less disposition cost is charged to operations. Net losses on the sale of foreclosed real estate for 2012 amounted to \$4.4 million, compared to \$1.7 million in 2011.

The Group has two mortgage loan modification programs. These are the Loss Mitigation Program and the Non-traditional Mortgage Loan Program. Both programs are intended to help responsible homeowners to remain in their homes and avoid foreclosure, while also reducing the Group's losses on non-performing mortgage loans.

The Loss Mitigation Program helps mortgage borrowers who are or will become financially unable to meet the current or scheduled mortgage payments. Loans that qualify under this program are those guaranteed by FHA, VA, RHS, “Banco de la Vivienda de Puerto Rico,” conventional loans guaranteed by Mortgage Guaranty Insurance Corporation (MGIC), conventional loans sold to the FNMA and FHLMC, and conventional loans retained by the Group. The program offers diversified alternatives such as regular or reduced payment plans, payment moratorium, mortgage loan modification, partial claims (only FHA), short sale, and payment in lieu of foreclosure.

The Non-traditional Mortgage Loan Program is for non-traditional mortgages, including balloon payment, interest only/interest first, variable interest rate, adjustable interest rate and other qualified loans. Non-traditional mortgage loan portfolios are segregated into the following categories: performing loans that meet secondary market requirement and are refinanced by the credit underwriting guidelines of FHA/VA/FNMA/FMAC, and performing loans not meeting secondary market guidelines, processed by the Group’s current credit and underwriting guidelines. The Group achieved an affordable and sustainable monthly payment by taking specific, sequential, and necessary steps such as reducing the interest rate, extending the loan term, capitalizing arrearages, deferring the payment of principal or, if the borrower qualifies, refinancing the loan.

There may not be a foreclosure sale scheduled within 60 days prior to a loan modification under any such programs. This requirement does not apply to loans where the foreclosure process has been stopped by the Group. In order to apply for any of the loan modification programs, the borrower may not be in active bankruptcy or have been discharged from Chapter 7 bankruptcy since the loan was originated. Loans in these programs will be evaluated by management for troubled debt restructuring classification if the Group grants a concession for legal or economic reasons due to the debtor’s financial difficulties.

Covered Loans

The allowance for loan and lease losses on covered loans acquired in the FDIC-assisted acquisition of Eurobank is accounted under the provisions of ASC 310-30. Under this accounting guidance, the allowance for loan and lease losses on covered loans is evaluated at each financial reporting period, based on forecasted cash flows. Credit related decreases in expected cash flows, compared to those previously forecasted, are recognized by recording a provision for credit losses on covered loans when it is probable that all cash flows expected at acquisition will not be collected. The portion of the loss on covered loans reimbursable from the FDIC is recorded as an offset to the provision for credit losses and increases the FDIC shared-loss indemnification asset.

As part of the evaluation of actual versus expected cash flows, the Group assesses on a quarterly basis the credit quality of these loans based on delinquency, severity factors and risk ratings, among other assumptions. The credit quality assumptions for certain pools were updated to reflect an increase in default rates, severities and extension of recovery lags resulting in an increase in the provision for covered loan and lease losses of \$9.8 million for 2012. Such increase in provision was net of the effect of the increase in the FDIC shared-loss indemnification asset. As a result, the allowance for covered loans increased from \$37.3 million at December 31, 2011 to \$54.1 million at December 31, 2012.

For loans acquired in the BBVAPR Acquisition accounted for under ASC 310-20 (loans with revolving feature and/or acquired at a premium), we establish our allowance for loan losses through a provision for credit losses based upon an evaluation process that is similar to our evaluation process used for originated loans. This evaluation, which includes a review of loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, carrying value of the loans, which includes the remaining net purchase discount or premium, and other factors that warrant recognition in determining our allowance for loan losses. These loans were recorded on acquisition date at their fair value. Such fair value includes a credit discount which accounts for expected loan losses over the estimated life of these loans. Management will take into consideration this credit discount when determining the necessary

allowance for acquired loans that are accounted for under the provisions of ASC 310-20. Considering the short period elapsed from acquisition date, at December 31, 2012 there was no allowance for loan and lease losses recorded for these loans.

Loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 were recognized at fair value as of December 18, 2012, which included the impact of expected credit losses, and therefore, no allowance for credit losses was recorded at acquisition date. To the extent credit deterioration occurs after the date of acquisition, the Group would record an allowance for loan and lease losses. Management determined that there was no need to record an allowance for loan and lease losses on loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 as of December 31, 2012. Considering the short period elapsed from the acquisition date, the Group does not believe that the difference between cash flows expected to be collected on the loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 and those anticipated at December 18, 2012 need further assessment.

* Loans may be included in more than one higher-risk loan category and excludes acquired residential mortgage loans.

Contractual Obligations and Commercial Commitments

As disclosed in the notes to the Group's consolidated financial statements, the Group has certain obligations and commitments to make future payments under contracts. At December 31, 2012, the aggregate contractual obligations and commercial commitments, excluding accrued interests and unamortized premiums (discounts), are as follows:

	Payments Due by Period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	After 5 years
	(In thousands)				
CONTRACTUAL OBLIGATIONS:					
Short term borrowings	\$ 92,210	\$ 92,210	\$ -	\$ -	\$ -
Securities sold under agreements to repurchase	1,692,931	427,931	765,000	500,000	-
Federal funds purchased	9,901	9,901	-	-	-
Advances from FHLB	534,957	475,000	55,000	4,957	-
Subordinated capital notes	153,083	-	50,000	67,000	36,083
Other term notes	7,734	5,000	1,000	-	1,734
Annual rental commitments under noncancelable operating leases	66,065	9,481	17,094	15,439	24,051
Total	<u>\$ 2,556,881</u>	<u>\$ 1,019,523</u>	<u>\$ 888,094</u>	<u>\$ 587,396</u>	<u>\$ 61,868</u>

Loan commitments, which represent unused lines of credit and letters of credit provided to customers, increased from \$92.8 million from the previous year to \$591.7 million, mostly as a result of the commitments assumed as part of the BBVAPR Acquisition, which amounted to \$461.6 million at December 31, 2012. Commitments to extend credit are agreements to lend to customers as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates, bear variable interest and may require payment of a fee. Since the commitments may expire unexercised, the total commitment amounts do not necessarily represent future cash requirements. The Group evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Group upon extension of credit, is based on management's credit evaluation of the customer. Commitments for loans covered under the FDIC shared-loss agreements amounted to \$17.0 million at December 31, 2012.

Impact of Inflation and Changing Prices

The financial statements and related data presented herein (except for certain non-GAAP measures as previously indicated) have been prepared in accordance with GAAP which require the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation.

Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or with the same magnitude as the prices of goods and services since such prices are affected by inflation.

Contractual Obligations and Commercial Commitments

As disclosed in the notes to the Group's consolidated financial statements, the Group has certain obligations and commitments to make future payments under contracts. At December 31, 2012, the aggregate contractual obligations and commercial commitments, excluding accrued interests and unamortized premiums (discounts), are as follows:

ITEM 7A. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

Background

The Group's risk management policies are established by its Board of Directors (the "Board") and implemented by management through the adoption of a risk management program, which is overseen and monitored by the Chief Risk Officer and the Risk Management and Compliance Committee. The Group has continued to refine and enhance its risk management program by strengthening policies, processes and procedures necessary to maintain effective risk management.

All aspects of the Group's business activities are susceptible to risk. Consequently, risk identification and monitoring are essential to risk management. As more fully discussed below, the Group's primary risk exposures include, market, interest rate, credit, liquidity, operational and concentration risks.

Market Risk

Market risk is the risk to earnings or capital arising from adverse movements in market rates or prices, such as interest rates or prices. The Group evaluates market risk together with interest rate risk. The Group's financial results and capital levels are constantly exposed to market risk. The Board and management are primarily responsible for ensuring that the market risk assumed by the Group complies with the guidelines established by policies approved by the Board. The Board has delegated the management of this risk to the Asset and Liability Management Committee ("ALCO") which is composed of certain executive officers from the business, treasury and finance areas. One of ALCO's primary goals is to ensure that the market risk assumed by the Group is within the parameters established in such policies.

Interest Rate Risk

Interest rate risk is the exposure of the Group's earnings or capital to adverse movements in interest rates. It is a predominant market risk in terms of its potential impact on earnings. The Group manages its asset/liability position in order to limit the effects of changes in interest rates on net interest income. ALCO oversees interest rate risk, liquidity management and other related matters.

In discharging its responsibilities, ALCO examines current and expected conditions in global financial markets, competition and prevailing rates in the local deposit market, liquidity, unrealized gains and losses in securities, recent or proposed changes to the investment portfolio, alternative funding sources and their costs, hedging and the possible purchase of derivatives such as swaps, and any tax or regulatory issues which may be pertinent to these areas.

On a monthly basis, the Group performs a net interest income simulation analysis on a consolidated basis to estimate the potential change in future earnings from projected changes in interest rates. These simulations are carried out over a one-year time horizon, assuming certain gradual upward and downward interest rate movements, achieved during a twelve-month period. Simulations are carried out in two ways:

- (i) using a static balance sheet as the Group had on the simulation date, and
- (ii) using a dynamic balance sheet based on recent growth patterns and business strategies.

The balance sheet is divided into groups of assets and liabilities detailed by maturity or re-pricing and their corresponding interest yields and costs. As interest rates rise or fall, these simulations incorporate expected future lending rates, current and expected future funding sources and costs, the possible exercise of options, changes in prepayment rates, deposits decay and other factors which may be important in projecting the future growth of net interest income.

The Group uses a software application to project future movements in the Group's balance sheet and income statement. The starting point of the projections generally corresponds to the actual values of the balance sheet on the date of the simulations.

These simulations are highly complex, and use many simplifying assumptions that are intended to reflect the general behavior of the Group over the period in question. There can be no assurance that actual events will match these assumptions in all cases. For this reason, the results of these simulations are only approximations of the true sensitivity of net interest income to changes in market interest rates. The following table presents the results of the simulations at December 31, 2012 for the most likely scenario, assuming a one-year time horizon:

	Net Interest Income Risk (one year projection)			
	Static Balance Sheet		Growing Simulation	
	Amount	Percent	Amount	Percent
	Change	Change	Change	Change
(Dollars in thousands)				
Change in interest rate				
+ 200 Basis points	\$ 7,424	2.24%	\$ 10,590	3.21%
+ 100 Basis points	\$ 4,304	1.30%	\$ 6,002	1.82%
- 50 Basis points	\$ (3,706)	-1.12%	\$ (4,111)	-1.25%

The impact of -100 and -200 basis point reductions in interest rates is not presented in view of current level of the federal funds rate and other short-term interest rates.

Future net interest income could be affected by the Group's investments in callable securities, prepayment risk related to mortgage loans and mortgage-backed securities, and its structured repurchase agreements and advances from the FHLB. As part of the strategy to limit the interest rate risk and reduce the re-pricing gaps of the Group's assets and liabilities, the maturity and the re-pricing frequency of the liabilities has been extended to longer terms and the amounts of its structured repurchase agreements and advances from the FHLB has been reduced.

The Group maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. The Group's goal is to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that the net interest margin is not, on a material basis, adversely affected by movements in interest rates. As a result of interest rate fluctuations, hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. Also, for some fixed-rate assets or liabilities, the effect of this variability in earnings is expected to be substantially offset by the Group's gains and losses on the derivative instruments that are linked to the forecasted cash flows of these hedged assets and liabilities. The Group considers its strategic use of derivatives to be a prudent method of managing interest-rate sensitivity as it reduces the exposure of earnings and the market value of its equity to undue risk posed by changes in interest rates. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by the Group's gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. Another result of interest rate fluctuations is that the contractual interest income and interest expense of hedged variable-rate assets and liabilities, respectively, will increase or decrease.

Derivative instruments that are used as part of the Group's interest risk management strategy include interest rate swaps, forward-settlement swaps, futures contracts, and option contracts that have indices related to the pricing of specific balance sheet assets and liabilities. Interest rate swaps generally involve the exchange of fixed and variable-rate interest payments between two parties based on a common notional principal amount and maturity date. Interest rate futures generally involve exchanged-traded contracts to buy or sell U.S. Treasury bonds and notes in the future at specified prices. Interest rate options represent contracts that allow the holder of the option to (i) receive cash or (ii) purchase, sell, or enter into a financial instrument at a specified price within a specified period. Some purchased option contracts give the Group the right to enter into interest rate swaps and cap and floor agreements with the writer of the option. In addition, the Group enters into certain transactions that contain embedded derivatives. When the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, it is bifurcated and carried at fair value. Please refer to Note 10 to the accompanying consolidated financial statements for further information concerning the Group's derivative activities.

Following is a summary of certain strategies, including derivative activities, currently used by the Group to manage interest rate risk:

Interest rate swaps — The Group entered into hedge-designated forward-settlement swaps to hedge the variability of future interest cash flows of forecasted wholesale borrowings, attributable to changes in the one-month LIBOR rate. Once the forecasted wholesale borrowings transactions occurred, the interest rate swap effectively fix the Group's interest payments on an amount of forecasted interest expense attributable to the one-month LIBOR rate corresponding to the swap notional stated rate. A derivative liability of

\$17.7 million was recognized at December 31, 2012, related to the valuation of these swaps. Refer to Note 10 of the audited consolidated financial statements for a description of these swaps.

As part of the BBVAPR Acquisition, the Group assumed certain derivative contracts from BBVAPR, including interest rate swaps not designated as hedging instruments which are utilized to convert certain fixed-rate loans to variable rates, and the mirror-images of these interest rate swaps in which BBVAPR entered into to minimize its interest rate risk exposure that results from offering the derivatives to clients. These interest rate swaps are marked to market through earnings. At December 31, 2012, interest rate swaps offered to clients not designated as hedging instruments represented a derivative asset of \$8.4 million, and the mirror-image interest rate swaps in which BBVAPR entered into represented a derivative liability of \$8.4 million. Refer to Note 10 of the audited consolidated financial statements for a description of these swaps.

Swap options — In July 2012, the Group purchased options to enter into interest rate swaps, not designated as cash flow hedges, with an aggregate notional amount of \$200 million. As part of the deleveraging strategy in connection with the BBVAPR Acquisition in December 2012, the Group sold all of these purchased options.

S&P options — The Group has offered its customers certificates of deposit with an option tied to the performance of the S&P 500 Index. At the end of five years, the depositor receives a minimum return or a specified percentage of the average increase of the month-end value of the S&P 500 Index. The Group uses option agreements with major money center banks and major broker-dealer companies to manage its exposure to changes in that index. Under the terms of the option agreements, the Group receives the average increase in the month-end value of S&P 500 Index in exchange for a fixed premium. The changes in fair value of the options purchased and the options embedded in the certificates of deposit are recorded in earnings.

At December 31, 2012 and 2011, the fair value of the purchased options used to manage the exposure to the S&P 500 Index on stock-indexed certificates of deposit represented an asset of \$13.2 million and \$9.3 million, respectively, and the options sold to customers embedded in the certificates of deposit represented a liability of \$12.7 million and \$9.4 million, respectively.

Wholesale borrowings — The Group uses interest rate swaps to hedge the variability of interest cash flows of certain advances from FHLB that are tied to a variable rate index. The interest rate swaps effectively fix the Group's interest payments on these borrowings. As of December 31, 2012, the Group had \$225 million in interest rate swaps at an average rate of 2.63% designated as cash flow hedges for \$225 million in advances from FHLB that reprice or are being rolled over on a monthly basis.

In addition, the Group has outstanding structured repurchase agreements and advances from FHLB in which the counterparty has the right to put back the borrowing to the Group before their stated maturity under certain conditions.

Credit Risk

Credit risk is the possibility of loss arising from a borrower or counterparty in a credit-related contract failing to perform in accordance with its terms. The principal source of credit risk for the Group is its lending activities. In Puerto Rico, the Group's principal market, according to government data, the economic recession ended in calendar year 2012, and the economy is expected to grow slightly in 2013. However, economic growth remains a challenge due to the lack of significant employment growth and a housing sector that remains under pressure in spite of progress made by the Puerto Rico government in reducing its fiscal deficit.

The Group manages its credit risk through a comprehensive credit policy which establishes sound underwriting standards by monitoring and evaluating loan portfolio quality, and by the constant assessment of reserves and loan concentrations. The Group also employs proactive collection and loss mitigation practices.

The Group may also encounter risk of default in relation to its securities portfolio. The securities held by the Group are principally agency mortgage-backed securities. Thus, a substantial portion of these instruments are guaranteed by mortgages, a U.S. government-sponsored entity, or the full faith and credit of the U.S. government.

Management's Executive Credit Committee, composed of the Group's Chief Executive Officer, Chief Credit Risk Officer and other senior executives, has primary responsibility for setting strategies to achieve the Group's credit risk goals and objectives. Those goals and objectives are set forth in the Group's Credit Policy as approved by the Board.

Liquidity Risk

Liquidity risk is the risk of the Group not being able to generate sufficient cash from either assets or liabilities to meet obligations as they become due without incurring substantial losses. The Board has established a policy to manage this risk. The Group's cash requirements principally consist of deposit withdrawals, contractual loan funding, repayment of borrowings as these mature, and funding of new and existing investments as required.

The Group's business requires continuous access to various funding sources. While the Group is able to fund its operations through deposits as well as through advances from the FHLB of New York and other alternative sources, the Group's business is dependent upon other wholesale funding sources. Although the Group has selectively reduced its use of wholesale funding sources, such as repurchase agreements and brokered deposits, it is still significantly dependent on repurchase agreements. The Group's repurchase agreements have been structured with initial terms that mature from one month to two years for twelve repurchase agreements amounting to \$1.2 billion, and a \$500 million repurchase agreement that matures on March 2, 2017 in which the counterparty has the right to exercise at par on a quarterly basis its put option before the contractual maturity. Such repurchase agreement also provides for an optional early termination by either party upon no less than two business days' prior written notice to the other party. In the event of any such optional early termination, the amounts owed by or to the terminating party by the other party on the optional early termination date must take account of the termination value of the transaction, as determined by the calculation agent in the manner described in the repurchase agreement.

Brokered deposits are typically offered through an intermediary to small retail investors. The Group's ability to continue to attract brokered deposits is subject to variability based upon a number of factors, including volume and volatility in the global securities markets, the Group's credit rating, and the relative interest rates that it is prepared to pay for these liabilities. Brokered deposits are generally considered a less stable source of funding than core deposits obtained through retail bank branches. Investors in brokered deposits are generally more sensitive to interest rates and will generally move funds from one depository institution to another based on small differences in interest rates offered on deposits.

Although the Group expects to have continued access to credit from the foregoing sources of funds, there can be no assurance that such financing sources will continue to be available or will be available on favorable terms. In a period of financial disruption or if negative developments occur with respect to the Group, the availability and cost of the Group's funding sources could be adversely affected. In that event, the Group's cost of funds may increase, thereby reducing its net interest income, or the Group may need to dispose of a portion of its investment portfolio, which depending upon market conditions, could result in realizing a loss or experiencing other adverse accounting consequences upon the dispositions. The Group's efforts to monitor and manage liquidity risk may not be successful to deal with dramatic or unanticipated changes in the global securities markets or other reductions in liquidity driven by the Group or market-related events. In the event that such sources of funds are reduced or eliminated and the Group is not able to replace these on a cost-effective basis, the Group may be forced to curtail or cease its loan origination business and treasury activities, which would have a material adverse effect on its operations and financial condition.

As of December 31, 2012, the Group had approximately \$868.7 million in cash and cash equivalents, \$80.0 million in securities purchased under agreements to resell, \$80.4 million in investment securities, \$1.347 billion in commercial loans, \$568.7 million in mortgage loans, \$249.2 million in consumer loans, and \$204.3 million in leases and auto loans available to cover liquidity needs.

Operational Risk

Operational risk is the risk of loss from inadequate or failed internal processes, personnel and systems or from external events. All functions, products and services of the Group are susceptible to operational risk.

The Group faces ongoing and emerging risk and regulatory pressure related to the activities that surround the delivery of banking and financial products. Coupled with external influences such as market conditions, security risks, and legal risk, the potential for operational and reputational loss has increased. In order to mitigate and control operational risk, the Group has developed, and continues to enhance, specific internal controls, policies and procedures that are designed to identify and manage operational risk at appropriate levels throughout the organization. The purpose of these policies and procedures is to provide reasonable assurance that the Group's business operations are functioning within established limits.

The Group classifies operational risk into two major categories: business specific and corporate-wide affecting all business lines. For business specific risks, a risk assessment group works with the various business units to ensure consistency in policies, processes and assessments. With respect to corporate-wide risks, such as information security, business recovery, legal and compliance, the Group has specialized groups, such as Information Security, Enterprise Risk Management, Corporate Compliance, Information Technology and Operations. These groups assist the lines of business in the development and implementation of risk management practices specific to the needs of the business groups. All these matters are reviewed and discussed in the Information Technology Steering Committee, and the Risk Management and Compliance Committee.

The Group is subject to extensive United States federal and Puerto Rico regulation, and this regulatory scrutiny has been significantly increasing over the last several years. The Group has established and continues to enhance procedures based on legal and regulatory requirements that are reasonably designed to ensure compliance with all applicable statutory and regulatory requirements. The Group has a corporate compliance function headed by a Compliance Director who reports to the Chief Risk Officer and is responsible for the oversight of regulatory compliance and implementation of a company-wide compliance program.

Concentration Risk

Substantially all of the Group's business activities and a significant portion of its credit exposure are concentrated in Puerto Rico. As a consequence, the Group's profitability and financial condition may be adversely affected by an extended economic slowdown, adverse political or economic developments in Puerto Rico or the effects of a natural disaster, all of which could result in a reduction in loan originations, an increase in non-performing assets, an increase in foreclosure losses on mortgage loans, and a reduction in the value of its loans and loan servicing portfolio.

SUPPLEMENTARY INFORMATION (See Tables 13A and 13B under Item 7 of this report)

ORIENTAL FINANCIAL GROUP INC.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and stockholders of Oriental Financial Group Inc.:

The management of Oriental Financial Group Inc. (the "Group") is responsible for establishing and maintaining effective internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, and for the assessment of internal control over financial reporting. The Group's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

The Group's internal control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the Group are being made only in accordance with authorization of management and directors of the Group; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Group's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As called for by Section 404 of the Sarbanes-Oxley Act of 2002, management has assessed the effectiveness of the Group's internal control over financial reporting as of December 31, 2012. Management made its assessment using the criteria set forth in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO Criteria").

On December 18, 2012, the Group purchased from Banco Bilbao Vizcaya Argentaria, S. A., all of the outstanding common stock of each of (i) BBVAPR Holding Corporation, the sole shareholder of Banco Bilbao Vizcaya Argentaria Puerto Rico, and BBVA Seguros, Inc., and (ii) BBVA Securities of Puerto Rico, Inc., all collectively referred to as the "BBVAPR Companies". As allowed by guidance of the Securities and Exchange Commission, management excluded from its assessment of the effectiveness of the Group's internal control over financial reporting as of December 31, 2012, the BBVAPR Companies with total assets of \$4.5 billion, total liabilities of \$4.0 billion and total net interest income of \$7.8 million included in the Group's consolidated financial statements as of and for the year ended December 31, 2012.

Based on its assessment, management has concluded that the Group maintained effective internal control over financial reporting as of December 31, 2012 based on the COSO Criteria.

The effectiveness of the Group's internal control over financial reporting as of December 31, 2012, has been audited by KPMG LLP, the Group's independent registered public accounting firm, as stated in their report dated March 14, 2013.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Oriental Financial Group Inc.:

We have audited the accompanying consolidated statements of financial condition of Oriental Financial Group Inc. and subsidiaries (the “Group”) as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income, changes in stockholders’ equity and cash flows for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Group’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Oriental Financial Group Inc. and its subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Oriental Financial Group Inc. and its subsidiaries’ internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 14, 2013 expressed an unqualified opinion on the effectiveness of the Group’s internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
Oriental Financial Group Inc.:

We have audited Oriental Financial Group Inc. and Subsidiaries' (the "Group") internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). The Group's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Group; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Oriental Financial Group Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

On December 18, 2012, the Group purchased from Banco Bilbao Vizcaya Argentaria, S. A., all of the outstanding common stock of each of (i) BBVAPR Holding Corporation, the sole shareholder of Banco Bilbao Vizcaya Argentaria Puerto Rico, and BBVA Seguros, Inc., and (ii) BBVA Securities of Puerto Rico, Inc., all collectively referred to as the "BBVAPR Companies". Management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2012, the assets and liabilities acquired of BBVAPR Companies internal control over financial reporting associated with total assets of \$4.5 billion, total liabilities of \$4.0 billion and total net interest income of \$7.8 million included in the consolidated financial statements of Oriental Financial Group as of and for the year ended December 31, 2012. Our audit of internal control over financial reporting of the Group also excluded an evaluation of the internal control over financial reporting of BBVAPR Companies.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of Oriental Financial Group Inc. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of operations, changes in comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2012, and our report dated March 14, 2013, expressed an unqualified opinion on those consolidated financial statements.

For the year ended December 31, 2012, the changes in operating assets and liabilities included in the reconciliation of net income to net cash provided by operating activities, as well as the changes in assets and liabilities presented in the investing and financing sections are net of the effect of the assets acquired and liabilities assumed from the BBVAPR Acquisition. Refer to Note 2 to the consolidated financial statements for the composition and balances of the assets and liabilities recorded at fair value by the Group on December 18, 2012. The cash received in the transaction, which amounted to \$394.6 million, is presented in the investing activities section of the Consolidated Statements of Cash Flows as “Cash and cash equivalents received in BBVAPR Acquisition”.

The accompanying notes are an integral part of these consolidated financial statements

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of Oriental Financial Group Inc. (the “Group” or “Oriental”) conform with U.S. generally accepted accounting principles (“GAAP”) and to banking industry practices. The following is a description of the Group’s most significant accounting policies:

Nature of Operations

The Group is a publicly-owned financial holding company incorporated under the laws of the Commonwealth of Puerto Rico. The Group is subject to the provisions of the U.S. Bank Holding Company Act of 1956, as amended, (the “BHC Act”) and accordingly, subject to the supervision and regulation of the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”). The Group operates through various subsidiaries including, a commercial bank, Oriental Bank, two broker-dealers, Oriental Financial Services Corp. (“Oriental Financial Services”) and OFS Securities, Inc. (“OFS Securities”), an insurance agency, Oriental Insurance, Inc. (“Oriental Insurance”) and a retirement plan administrator, Caribbean Pension Consultants, Inc. (“CPC”). All of our subsidiaries are based in San Juan, Puerto Rico, except for CPC which is based in Boca Raton, Florida. The Group also has a special purpose entity, Oriental Financial (PR) Statutory Trust II (the “Statutory Trust II”). Through these subsidiaries and their respective divisions, the Group provides a wide range of banking and financial services such as commercial, consumer and mortgage lending, leasing, auto loans, financial planning, insurance sales, money management and investment banking and brokerage services, as well as corporate and individual trust services.

The main offices of the Group and its subsidiaries are located in San Juan, Puerto Rico, except for CPC, which is located in Boca Raton, Florida. The Group is subject to supervision and regulation by the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”) under the U.S. Bank Holding Company Act of 1956, as amended, and the Dodd-Frank Act.

The Bank is subject to the supervision, examination and regulation of the Office of the Commissioner of Financial Institutions of Puerto Rico (the “OCFI”) and the Federal Deposit Insurance Corporation (the “FDIC”). The Bank offers banking services such as commercial and consumer lending, leasing, savings and time deposit products, financial planning, and corporate and individual trust services, and capitalizes on its commercial banking network to provide mortgage lending products to its clients. Oriental International Bank Inc. (“OIB”), a wholly-owned subsidiary of the Bank, and Oriental Overseas, a unit of the Bank, are international banking entities licensed pursuant to International Banking Center Regulatory Act of Puerto Rico, as amended. OIB and Oriental Overseas offer the Bank certain Puerto Rico tax advantages. Their activities are limited under Puerto Rico law to persons and assets/liabilities located outside of Puerto Rico.

Oriental Financial Services and OFS Securities are securities broker-dealers and are subject to the supervision, examination and regulation of the Financial Industry Regulatory Authority (the “FINRA”), the SEC, and the OCFI. Oriental Financial Services and OFS Securities are also members of the Securities Investor Protection Corporation. Oriental Insurance is an insurance agency and is subject to the supervision, examination and regulation of the Office of the Commissioner of Insurance of Puerto Rico.

The Group’s mortgage banking activities are conducted through a division of the Bank. The mortgage banking activities include the origination of mortgage loans for the Bank’s own portfolio, and the sale of loans directly in the secondary market or the securitization of conforming loans into mortgage-backed securities. The Bank originates Federal Housing Administration (“FHA”) insured and Veterans Administration (“VA”) guaranteed mortgages that are primarily securitized for issuance of Government National Mortgage Association (“GNMA”) mortgage-backed securities which can be resold to individual or institutional investors in the secondary market. Conventional loans that meet the underwriting requirements for sale or exchange under certain Federal National Mortgage Association (“FNMA”) or Federal Home Loan Mortgage Corporation (“FHLMC”) programs are referred to as conforming mortgage loans and are also securitized for issuance of FNMA or FHLMC mortgage-backed securities. The Bank is an approved seller of FNMA, as well as FHLMC, mortgage loans for issuance of FNMA and FHLMC mortgage-backed securities. The Bank is also an approved issuer of GNMA mortgage-backed securities. The Bank is the master servicer of the GNMA, FNMA and FHLMC pools that it issues and of its mortgage loan portfolio, and has a subservicing arrangement with a third party.

On December 18, 2012, the Group purchased from Banco Bilbao Vizcaya Argentaria, S. A. (“BBVA”), all of the outstanding common stock of each of (i) BBVAPR Holding Corporation (“BBVAPR Holding”), the sole shareholder of Banco Bilbao Vizcaya Argentaria Puerto Rico (“BBVAPR Bank”), a Puerto Rico chartered commercial bank, and BBVA Seguros, Inc. (“BBVA Seguros”), a subsidiary offering insurance services, and (ii) BBVA Securities of Puerto Rico, Inc. (“BBVA Securities” or “OFS Securities”), a registered broker-dealer. This transaction is referred to as the “BBVAPR Acquisition” and BBVAPR Holding, BBVAPR Bank, BBVA Seguros and BBVA Securities are collectively referred to as the “BBVAPR Companies” or “BBVAPR.”

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Business Combinations

The Group accounted for the BBVAPR Acquisition and the FDIC-assisted acquisition of Eurobank under the accounting guidance of ASC Topic No. 805, Business Combinations, which requires the use of the purchase method of accounting. All identifiable assets and liabilities acquired were initially recorded at fair value. No allowance for loan losses related to the acquired loans was recorded on the acquisition date. Loans acquired were recorded at fair value in accordance with the fair value methodology prescribed in ASC Topic 820, exclusive of the shared-loss agreements with the FDIC applicable to the FDIC-assisted acquisition. These fair value estimates associated with the loans included estimates related to expected prepayments and the amount and timing of expected principal, interest and other cash flows. Because the FDIC has agreed to reimburse the Group for losses related to the acquired loans in the FDIC-assisted acquisition, subject to certain provisions specified in the agreements, an indemnification asset was recorded at fair value at the acquisition date. The indemnification asset was recognized at the same time as the loans covered under FDIC shared-loss agreements, and is measured on the same basis, subject to collectability or contractual limitations. The loss share indemnification asset on the acquisition date reflected the reimbursements expected to be received from the FDIC, using an appropriate discount rate, which reflected counterparty credit risk and other uncertainties. The initial valuation of these loans and related indemnification asset required management to make subjective judgments concerning estimates about how the acquired loans would perform in the future using valuation methods, including discounted cash flow analyses and independent third-party appraisals. Factors that may significantly affect the initial valuation include, among others, market-based and industry data related to expected changes in interest rates, assumptions related to probability and severity of credit losses, estimated timing of credit losses including the timing of foreclosure and liquidation of collateral, expected prepayment rates, the specific terms and provisions of any shared-loss agreements, and specific industry and market conditions that may impact independent third-party appraisals. The Group applied the guidance of ASC 310-30 to most of the loans acquired in the FDIC-assisted acquisition (including applying 310-30 by analogy to loans that do not meet the scope of ASC 310-30 but meet certain other criteria as outlined below), except for credit cards. Also, the Group applied the guidance of ASC 310-30 to most of the loans from the BBVAPR Acquisition, except for credit cards, retail and commercial lines of credits, floor plans and performing auto loans with Fair Isaac Corporation (“FICO”) scores over 660 which were acquired at a premium.

ASC 310-30 provides two specific criteria that have to be met in order for a loan to be within its scope: (i) credit deterioration on the loan from its inception until the acquisition date and (ii) that it is probable that not all of the contractual cash flows will be collected on the loan. Once in the scope of ASC 310-30, the credit portion of the fair value discount on an acquired loan cannot be accreted into income until the acquirer has assessed that it expects to receive more cash flows on the loan than initially anticipated. Acquired loans that meet the definition of nonaccrual status fall within the Group’s definition of impaired loans under ASC 310-30. Performing loans would generally not meet either criteria and therefore not fall within the scope of ASC 310-30. Many of the acquired loans that did not meet the Group’s definition of non-accrual status also resulted in the recognition of a discount attributable to credit quality. The Group elected to analogize to ASC 310-30 and only accrete the portion of the fair value discount unrelated to credit pursuant to the provisions of the AICPA letter dated December 18, 2009, where the AICPA summarized the SEC Staff’s view regarding the accounting in subsequent periods for discount accretion associated with loan receivables acquired in a business combination or asset purchase. The Group adopted an accounting policy consistent with accounting of the Eurobank acquisition to consistently apply by analogy the expected cash flow approach under 310-30 to acquired loan portfolios.

The fair values initially assigned to assets acquired and liabilities assumed are preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values becomes available, for example there may be changes in loans pooling under ASC 310-30 and the reserve for unfunded commitments.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the reported amount of revenue and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate mainly to the determination of the allowance for loan and lease losses, fair value of assets acquired and liabilities assumed, the valuation of securities and derivative instruments, revisions to expected cashflows in covered loans, accounting of indemnification asset, and the determination of income taxes and other-than-temporary impairment of securities.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Group and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. The Statutory Trust II is exempt from the consolidation requirements of GAAP.

Cash Equivalents

The Group considers as cash equivalents all money market instruments that are not pledged and that have maturities of three months or less at the date of acquisition.

Earnings per Common Share

Basic earnings per share is calculated by dividing income available to common shareholders (net income reduced by dividends on preferred stock) by the weighted average of outstanding common shares. Diluted earnings per share is similar to the computation of basic earnings per share except that the weighted average of common shares is increased to include the number of additional common shares that would have been outstanding if the dilutive potential common shares underlying stock options and restricted units had been issued, assuming that proceeds from exercise are used to repurchase shares in the market (treasury stock method). Any stock splits and dividends are retroactively recognized in all periods presented in the consolidated financial statements.

Securities Purchased/Sold Under Agreements to Resell/Repurchase

The Group purchases securities under agreements to resell the same or similar securities. Amounts advanced under these agreements represent short-term loans and are reflected as assets in the consolidated statements of financial condition. It is the Group's policy to take possession of securities purchased under resale agreements while the counterparty retains effective control over the securities. The Group monitors the fair value of the underlying securities as compared to the related receivable, including accrued interest, and requests additional collateral when deemed appropriate. The Group also sells securities under agreements to repurchase the same or similar securities. The Group retains effective control over the securities sold under these agreements. Accordingly, such agreements are treated as financing arrangements, and the obligations to repurchase the securities sold are reflected as liabilities. The securities underlying the financing agreements remain included in the asset accounts. The counterparty to repurchase agreements generally has the right to repledge the securities received as collateral.

Investment Securities

Securities are classified as held-to-maturity, available-for-sale or trading. Securities for which the Group has the intent and ability to hold until maturity are classified as held-to-maturity and are carried at amortized cost. Securities that might be sold prior to maturity because of interest rate changes to meet liquidity needs or to better match the repricing characteristics of funding sources are classified as available-for-sale. These securities are reported at fair value, with unrealized gains and losses excluded from earnings and reported net of tax in other comprehensive income.

The BBVAPR Acquisition necessitated the reclassification of all the securities classified as held-to-maturity to available-for-sale in order to maintain the desired interest rate and credit risk profiles over the investment portfolio. As a result, in December 2012, the securities in the held-to-maturity portfolio were transferred to the available-for-sale portfolio at a fair value of \$797.5 million with net unrealized gains of \$35.1 million.

The Group classifies as trading those securities that are acquired and held principally for the purpose of selling them in the near future. These securities are carried at fair value with realized and unrealized changes in fair value included in earnings in the period in which the changes occur.

The Group's investment in the Federal Home Loan Bank ("FHLB") of New York stock, a restricted security, has no readily determinable fair value and can only be sold back to the FHLB at cost. Therefore, these stocks are deemed to be nonmarketable equity securities and are carried at cost.

Premiums and discounts are amortized to interest income over the life of the related securities using the interest method. Net realized gains or losses on sales of investment securities and unrealized gains and losses valuation adjustments considered other than temporary, if any, on securities classified as either available-for-sale or held-to-maturity are reported separately in the statements of operations. The cost of securities sold is determined by the specific identification method. During the third quarter of 2012, the Group made a change in one of the estimates applied in the calculation of the amortization of premiums/discounts in the mortgage-backed securities portfolio. The estimate involves the period used in measuring the repayment experience of each security and the change

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

consists of using a 12-month look-back period instead of a 3-month period for these purposes. The Group believes that this extended period better reflects the portfolio behavior, especially considering the seasonal cycle of the U.S. housing market, and also reduces the volatility that affects interest income recognition when using a more limited prepayment history experience in periods of greater market volatility. The impact of this change during the third quarter of 2012 was an increase of \$3.3 million in interest income from mortgage-backed securities.

Financial Instruments

Certain financial instruments, including derivatives, trading securities and investment securities available-for-sale, are recorded at fair value and unrealized gains and losses are recorded in other comprehensive income or as part of non-interest income, as appropriate. Fair values are based on listed market prices, if available. If listed market prices are not available, fair value is determined based on other relevant factors, including price quotations for similar instruments. The fair values of certain derivative contracts are derived from pricing models that consider current market and contractual prices for the underlying financial instruments as well as time value and yield curve or volatility factors underlying the positions.

The Group determines the fair value of its financial instruments based on the fair value measurement framework, which establishes a fair value hierarchy that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 — Level 1 assets and liabilities include equity securities that are traded in an active exchange market, as well as certain U.S. Treasury and other U.S. government agency securities that are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 — Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include (i) mortgage-backed securities for which the fair value is estimated based on valuations obtained from third-party pricing services for identical or comparable assets, (ii) debt securities with quoted prices that are traded less frequently than exchange-traded instruments and (iii) derivative contracts and financial liabilities whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models for which the determination of fair value requires significant management judgment or estimation.

Impairment of Investment Securities

The Group conducts periodic reviews to identify and evaluate each investment in an unrealized loss position for other-than-temporary impairments. The Group separates the amount of total impairment into credit and noncredit-related amounts. The term “other-than-temporary impairment” is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Any portion of a decline in value associated with a credit loss is recognized in income, while the remaining noncredit-related component is recognized in other comprehensive income. A credit loss is determined by assessing whether the amortized cost basis of the security will be recovered by comparing it to the present value of cash flows expected to be collected from the security discounted at the rate equal to the yield used to accrete current and prospective beneficial interest for the security. The shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis is considered to be the “credit loss.”

The Group’s review for impairment generally entails, but is not limited to:

- the identification and evaluation of investments that have indications of possible other-than-temporary impairment;
- the analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position, and the expected recovery period;
- the financial condition of the issuer or issuers;
- the creditworthiness of the obligor of the security;

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

- actual collateral attributes;
- any rating changes by a rating agency;
- current analysts' evaluations;
- the payment structure of the debt security and the likelihood of the issuer being able to make payments;
- current market conditions;
- adverse conditions specifically related to the security, industry, or a geographic area;
- the Group's intent to sell the debt security;
- whether it is more-likely-than-not that the Group will be required to sell the debt security before its anticipated recovery; and
- other qualitative factors that could support or not an other-than-temporary impairment.

Derivative Instruments and Hedging Activities

The Group's overall interest rate risk-management strategy incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. The Group's goal is to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that the net interest margin is not, on a material basis, adversely affected by movements in interest rates. As a result of interest rate fluctuations, hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. Also, for some fixed-rate assets or liabilities, the effect of this variability in earnings is expected to be substantially offset by the Group's gains and losses on the derivative instruments that are linked to the forecasted cash flows of these hedged assets and liabilities. The Group considers its strategic use of derivatives to be a prudent method of managing interest-rate sensitivity as it reduces the exposure of earnings and the market value of its equity to undue risk posed by changes in interest rates. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by the Group's gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. Another result of interest rate fluctuations is that the contractual interest income and interest expense of hedged variable-rate assets and liabilities, respectively, will increase or decrease.

Derivative instruments that are used as part of the Group's interest rate risk-management strategy include interest rate swaps, caps, forward-settlement swaps, futures contracts, and option contracts that have indices related to the pricing of specific balance sheet assets and liabilities. Interest rate swaps generally involve the exchange of fixed and variable-rate interest payments between two parties based on a common notional principal amount and maturity date. Interest rate futures generally involve exchange-traded contracts to buy or sell U.S. Treasury bonds and notes in the future at specified prices. Interest rate options represent contracts that allow the holder of the option to (i) receive cash or (ii) purchase, sell, or enter into a financial instrument at a specified price within a specified period. Some purchased option contracts give the Group the right to enter into interest rate swaps and cap and floor agreements with the writer of the option. In addition, the Group enters into certain transactions that contain embedded derivatives. When the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, it is bifurcated and carried at fair value.

The Group has offered its customers certificates of deposit with an option tied to the performance of the Standard & Poor's 500 stock market index ("S&P 500 Index"). The Group has purchased options from major financial entities to manage its exposure to changes in this index. Under the terms of the option agreements, the Group receives a certain percentage of the increase, if any, in the initial month-end value of the S&P 500 Index over the average of the monthly index observations in a five-year period in exchange for a fixed premium. The changes in fair value of the option agreements used to manage the exposure in the stock market in the certificates of deposit are recorded in earnings. The embedded option in the certificates of deposit is bifurcated, and the changes in the value of that option are also recorded in earnings.

When using derivative instruments, the Group exposes itself to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract due to insolvency or any other event of default, the Group's credit risk will equal the fair value gain in a derivative plus any cash or securities that may have been delivered to the counterparty as part of the transaction terms. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes the Group, thus creating a repayment risk for the Group. This risk is generally mitigated by requesting cash or securities from the counterparty to cover the positive fair value. When the fair value of a derivative contract is negative, the Group owes the counterparty and, therefore, assumes no credit risk other than to the extent that the cash or value of the collateral delivered as part of the transactions exceeds the fair value of the derivative. The Group minimizes the credit (or repayment) risk in derivative instruments by entering into transactions with high-quality counterparties.

The Group uses forward-settlement swaps to hedge the variability of future interest cash flows of forecasted wholesale borrowings attributable to changes in LIBOR. Once the forecasted wholesale borrowing transactions occur, the interest rate swap will effectively

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

lock-in the Group's interest rate payments on an amount of forecasted interest expense attributable to the one-month LIBOR corresponding to the swap notional amount. By employing this strategy, the Group minimizes its exposure to volatility in LIBOR.

As part of this hedging strategy, the Group formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking various hedging transactions. This process includes linking all derivatives that are designated as cash flow hedges to (i) specific assets and liabilities on the balance sheet or (ii) specific firm commitments or forecasted transactions. The Group also formally assesses (both at the hedge's inception and on an ongoing basis) whether the derivatives that are used in hedging transactions have been highly effective in offsetting changes in the fair value or cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. The changes in fair value of the forward-settlement swaps are recorded in accumulated other comprehensive income to the extent there is no significant ineffectiveness.

The Group discontinues hedge accounting prospectively when (i) it determines that the derivative is no longer effective in offsetting changes in the cash flows of a hedged item (including hedged items such as firm commitments or forecasted transactions); (ii) the derivative expires or is sold, terminated, or exercised; (iii) it is no longer probable that the forecasted transaction will occur; (iv) a hedged firm commitment no longer meets the definition of a firm commitment; or (v) management determines that designating the derivative as a hedging instrument is no longer appropriate or desired.

The Group's derivative activities are monitored by its Asset/Liability Management Committee which is also responsible for approving hedging strategies that are developed through its analysis of data derived from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into the Group's overall interest rate risk-management.

Off-Balance Sheet Instruments

In the ordinary course of business, the Group enters into off-balance sheet instruments consisting of commitments to extend credit, further discussed in Note 18 hereto. Such financial instruments are recorded in the financial statements when these are funded or related fees are incurred or received. The Group periodically evaluates the credit risks inherent in these commitments and establishes accruals for such risks if and when these are deemed necessary.

Mortgage Banking Activities and Loans Held-For-Sale

The residential mortgage loans reported as held-for-sale are stated at the lower of cost or fair value, cost being determined on the outstanding loan balance less unearned income, and fair value determined in the aggregate. Net unrealized losses are recognized through a valuation allowance by charges to income. Realized gains or losses on these loans are determined using the specific identification method. Loans held-for-sale include all conforming mortgage loans originated and purchased, which from time to time the Group sells to other financial institutions or securitizes conforming mortgage loans into GNMA, FNMA and FHLMC pass-through certificates.

Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities

The Group recognizes the financial and servicing assets it controls and the liabilities it has incurred, derecognizes financial assets when control has been surrendered, and derecognizes liabilities when extinguished.

The Group is not engaged in sales of mortgage loans and mortgage-backed securities subject to recourse provisions except for those provisions that allow for the repurchase of loans as a result of a breach of certain representations and warranties other than those related to the credit quality of the loans included in the sale transactions.

The transfer of an entire financial asset, a group of entire financial assets, or a participating interest in an entire financial asset in which the Group surrenders control over the assets is accounted for as a sale if all of the following conditions set forth in ASC Topic 860 are met: (i) the assets must be isolated from creditors of the transferor, (ii) the transferee must obtain the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (iii) the transferor cannot maintain effective control over the transferred assets through an agreement to repurchase them before their maturity. When the Group transfers financial assets and the transfer fails any one of these criteria, the Group is prevented from derecognizing the transferred financial assets and the transaction is accounted for as a secured borrowing. For federal and Puerto Rico income tax purposes, the Group treats the transfers of loans which do not qualify as "true sales" under the applicable accounting guidance, as sales, recognizing a deferred tax asset or liability on the transaction. For transfers of financial assets that satisfy the conditions to be accounted for as sales, the Group derecognizes all assets sold; recognizes all assets obtained and liabilities incurred in consideration as proceeds of the sale, including servicing assets and servicing liabilities, if applicable; initially measures at fair value assets obtained and liabilities

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

incurred in a sale; and recognizes in earnings any gain or loss on the sale. The guidance on transfer of financial assets requires a true sale analysis of the treatment of the transfer under state law as if the Group was a debtor under the bankruptcy code. A true sale legal analysis includes several legally relevant factors, such as the nature and level of recourse to the transferor, and the nature of retained interests in the loans sold. The analytical conclusion as to a true sale is never absolute and unconditional, but contains qualifications based on the inherent equitable powers of a bankruptcy court, as well as the unsettled state of the common law. Once the legal isolation test has been met, other factors concerning the nature and extent of the transferor's control over the transferred assets are taken into account in order to determine whether derecognition of assets is warranted.

When the Group sells or securitizes mortgage loans, it generally makes customary representations and warranties regarding the characteristics of the loans sold. Conforming conventional mortgage loans are combined into pools which are exchanged for FNMA and GNMA mortgage-backed securities, which are generally sold to private investors, or may sell the loans directly to FNMA or other private investors for cash. To the extent the loans do not meet the specified characteristics, investors are generally entitled to require the Group to repurchase such loans or indemnify the investor against losses if the assets do not meet certain guidelines. GNMA programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the Group provides servicing. At the Group's option and without GNMA prior authorization, the Group may repurchase such delinquent loans for an amount equal to 100% of the loan's remaining principal balance. This buy-back option is considered a conditional option until the delinquency criteria is met, at which time the option becomes unconditional. When the loans backing a GNMA security are initially securitized, the Group treats the transaction as a sale for accounting purposes because the conditional nature of the buy-back option means that the Group does not maintain effective control over the loans, and therefore these are derecognized from the balance sheet. When individual loans later meet GNMA's specified delinquency criteria and are eligible for repurchase, the Group is deemed to have regained effective control over these loans, and these must be brought back onto the Group's books as assets at fair value, regardless of whether the Group intends to exercise the buy-back option. Quality review procedures are performed by the Group as required under the government agency programs to ensure that asset guideline qualifications are met. The Group has not recorded any specific contingent liability in the consolidated financial statements for these customary representation and warranties related to loans sold by the Group, and management believes that, based on historical data, the probability of payments and expected losses under these representation and warranty arrangements is not significant.

Servicing Assets

The Group periodically sells or securitizes mortgage loans while retaining the obligation to perform the servicing of such loans. In addition, the Group may purchase or assume the right to service mortgage loans originated by others. Whenever the Group undertakes an obligation to service a loan, management assesses whether a servicing asset and/or liability should be recognized. A servicing asset is recognized whenever the compensation for servicing is expected to more than adequately compensate the Group for servicing the loans. Likewise, a servicing liability would be recognized in the event that servicing fees to be received are not expected to adequately compensate the Group for its expected cost.

All separately recognized servicing assets are recognized at fair value using the fair value measurement method. Under the fair value measurement method, the Group measures servicing rights at fair value at each reporting date and reports changes in fair value of servicing asset in earnings in the period in which the changes occur, and includes these changes, if any, with mortgage banking activities in the consolidated statement of operations. The fair value of servicing rights is subject to fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

The fair value of servicing rights is estimated by using a cash flow valuation model which calculates the present value of estimated future net servicing cash flows, taking into consideration actual and expected loan prepayment rates, discount rates, servicing costs, and other economic factors, which are determined based on current market conditions.

Non-covered Loans and Leases

Originated Loans and Leases

Loans the Group originates and intends to hold in portfolio are stated at the principal amount outstanding, adjusted for unamortized deferred fees and costs which we amortize to interest income over the expected life of the loan using the interest method. The Group discontinues accrual of interest on originated loans after payments become more than 90 days past due, or earlier if we do not expect the full collection of principal or interest. The delinquency status is based upon the contractual terms of the loans. On April 1, 2011, the Bank changed, on a prospective basis, its policy to place on non-accrual status residential mortgage loans well collateralized and in process of collection when reaching 90 days past due. All loans that were between 90 and 365 days past due when the policy was changed were also placed on non-accrual status, and the interest receivable on such loans was evaluated on a periodic basis against the

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

collateral underlying the loans and, if necessary, written-down. On December 31, 2011, the Bank further revised its policy to reverse against income all interest recorded on residential mortgage loans reaching 90 days past due, including the remaining interest on loans that were between 90 and 365 days past due as of April 1, 2011. On December 31, 2011, the Bank also charged-off this remaining accrued interest on residential mortgage loans over 90 days past due. This change in estimate was considered necessary to comply with guidance received from the Group's regulators.

For all other loans, interest recognition is discontinued when loans are 90 days or more in arrears on principal and/or interest based on contractual terms. Loans for which the recognition of interest income has been discontinued are designated as non-accruing. Collections are accounted for on the cash method thereafter, until qualifying to return to accrual status. Such loans are not reinstated to accrual status until interest is received on a current basis and other factors indicative of doubtful collection cease to exist. The determination as to the ultimate collectability of the loan's balance may involve management's judgment in the evaluation of the borrower's financial condition and prospects for repayment.

The Group follows a systematic methodology to establish and evaluate the adequacy of the allowance for loan and lease losses to provide for inherent losses in the non-covered loan portfolio. This methodology includes the consideration of factors such as economic conditions, portfolio risk characteristics, prior loss experience, and results of periodic credit reviews of individual loans. The provision for loan and lease losses charged to current operations is based on such methodology. Loan and lease losses are charged and recoveries are credited to the allowance for loan and lease losses on non-covered loans.

Larger commercial loans that exhibit potential or observed credit weaknesses are subject to individual review and grading. Where appropriate, allowances are allocated to individual loans based on management's estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flow, and legal options available to the Group.

Included in the review of individual loans are those that are impaired. A loan is considered impaired when, based on current information and events, it is probable that the Group will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, or as a practical expedient, at the observable market price of the loan or the fair value of the collateral, if the loan is collateral dependent. Loans are individually evaluated for impairment, except large groups of small balance homogeneous loans that are collectively evaluated for impairment and loans that are recorded at fair value or at the lower of cost or fair value. The Group measures for impairment all commercial loans over \$250 thousand (i) that are either over 90 days past due or adversely classified, or (ii) when deemed necessary by management. The portfolios of mortgage, leases and consumer loans are considered homogeneous and are evaluated collectively for impairment.

The Group uses a rating system to apply an overall allowance percentage to each non-covered loan portfolio segment based on historical credit losses adjusted for current conditions and trends. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Group over the most recent twelve months. The actual loss experience is supplemented with other economic factors based on the risks present for each portfolio segment. These economic factors include consideration of the following: the credit grading assigned to commercial loans; levels of and trends in delinquencies and impaired loans; levels of and trends in charge-offs and recoveries; trends in volume and terms of loans; effects of any changes in risk selection and underwriting standards; other changes in lending policies, procedures, and practices; experience, ability, and depth of lending management and other relevant staff, including the bank's loan review system as graded by regulatory agencies in their last examination; local economic trends and conditions; industry conditions; effects of external factors such as competition and regulatory requirements on the level of estimated credit losses in the current portfolio; and effects of changes in credit concentrations and collateral value. Additional impact from the historical loss experience is applied based on levels of delinquency and loan classification. During 2012, the Group revised this severity impact applied to historical loss factors based on delinquency buckets and loan classifications to further segregate these impacts between loans secured by real estate and unsecured loans. The following portfolio segments have been identified: mortgage loans, commercial loans, consumer loans, and leasing.

At origination, a determination is made whether a loan will be held in our portfolio or is intended for sale in the secondary market. Loans that will be held in the Group's portfolio are carried at amortized cost. Residential mortgage loans held for sale are recorded at the lower of the aggregate cost or market value ("LOCOM").

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Acquired Loans and Leases

Loans that we acquire in acquisitions are recorded at fair value with no carryover of the related allowance for loan losses. Determining the fair value of the loans involves estimating the amount and timing of principal and interest cash flows expected to be collected on the loans and discounting those cash flows at a market rate of interest

We have acquired loans in two separate acquisitions, the BBVAPR Acquisition in December 2012 and Eurobank's FDIC-assisted acquisition in April 2010. For each acquisition, we considered the following factors as indicators that such an acquired loan had evidence of deterioration in credit quality and was therefore in the scope of Accounting Standards Codification ("ASC") 310-30:

- Loans that were 90 days or more past due,
- Loans that had an internal risk rating of substandard or worse. Substandard is consistent with regulatory definitions and is defined as having a well defined weakness that jeopardizes liquidation of the loan,
- Loans that were classified as nonaccrual by the acquired bank at the time of acquisition, or
- Loans that had been previously modified in a trouble debt restructuring.

Any acquired loans that were not individually in the scope of ASC 310-30 because they did not meet the criteria above were either (i) pooled into groups of similar loans based on the borrower type, loan purpose, and collateral type and accounted for under ASC 310-30 by analogy or (ii) accounted for under ASC 310-20 (Nonrefundable fees and other costs.)

Acquired Loans Accounted under ASC 310-20 (loans with revolving feature and/or acquired at a premium)

Revolving credit facilities such as credit cards, retail and commercial lines of credits and floor plans which are specifically scoped out of the ASC 310-30 are accounted for under the provisions of ASC 310-20. Also, performing auto loans with Fair Isaac Corporation ("FICO") scores over 660 acquired at a premium in the BBVAPR Acquisition are accounted for under this guidance. Auto loans with FICO scores below 660 were acquired at a discount and are accounted for under the provisions of ASC 310-30. The provisions of ASC 310-20 require that any differences between the contractually required loan payments in excess of the Group's initial investment in the loans be accreted into interest income on a level-yield basis over the life of the loan. Loans accounted for under ASC 310-20 are placed on non-accrual status when past due in accordance with the Group's non-accruing policy and any accretion of discount is discontinued. These assets were recorded at estimated fair value on their acquisition date, incorporating an estimate of future expected cash flows. Acquired loans from BBVAPR accounted for under the guidance of ASC 310-20 have different characteristics from originated loans of the Bank, based on the underwriting processed followed.

Acquired Loans Accounted under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

We performed a fair valuation of each of the pools and each pool was recorded at a discount. We determined that at least part of the discount on the acquired pools of loans was attributable to credit quality by reference to the valuation model used to estimate the fair value of these pools of loans. The valuation model incorporated lifetime expected credit losses into the loans' fair valuation in consideration of factors such as evidence of credit deterioration since origination and the amounts of contractually required principal and interest that we did not expect to collect as of the acquisition date. Based on the guidance included in the December 18, 2009 letter from the AICPA Depository Institutions Panel to the Office of the Chief Accountant of the Securities and Exchange Commission ("SEC"), we have made an accounting policy election to apply ASC 310-30 by analogy to all of these acquired pools of loans as they all i) were acquired in a business combination or asset purchase, ii) resulted in recognition of a discount attributable, at least in part, to credit quality; and iii) were not subsequently accounted for at fair value.

The excess of expected cash flows from acquired loans over the estimated fair value of acquired loans at acquisition is referred to as the accretable discount and is recognized into interest income over the remaining life of the acquired loans using the interest method. The difference between contractually required payments at acquisition and the cash flows expected to be collected at acquisition is referred to as the nonaccretable discount. The nonaccretable discount represents estimated future credit losses expected to be incurred over the life of the acquired loans. Subsequent decreases to the expected cash flows require us to evaluate the need for an addition to the allowance for loan losses. Subsequent improvements in expected cash flows result in the reversal of a corresponding amount of the nonaccretable discount which we then reclassify as accretable discount that is recognized into interest income over the remaining life of the loan using the interest method. Our evaluation of the amount of future cash flows that we expect to collect takes into account actual credit performance of the acquired loans to date and our best estimates for the expected lifetime credit performance of the loans using currently available information. Charge-offs of the principal amount on acquired loans would be first applied to the nonaccretable discount portion of the fair value adjustment. To the extent that we experience a deterioration in credit quality in our

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

expected cash flows subsequent to the acquisition of the loans, an allowance for loan losses would be established based on our estimate of future credit losses over the remaining life of the loans.

In accordance with ASC 310-30, recognition of income is dependent on having a reasonable expectation about the timing and amount of cash flows expected to be collected. We perform such an evaluation on a quarterly basis on both our acquired loans individually accounted for under ASC 310-30 and those in pools accounted for under ASC 310-30 by analogy.

Cash flows for acquired loans individually accounted for under ASC 310-30 are estimated on a quarterly basis. Based on this evaluation, a determination is made as to whether or not we have a reasonable expectation about the timing and amount of cash flows. Such an expectation includes cash flows from normal customer repayment, foreclosure or other collection efforts. Cash flows for acquired loans accounted for on a pooled basis under ASC 310-30 by analogy are also estimated on a quarterly basis. For residential real estate, home equity and other consumer loans, cash flow loss estimates are calculated by a vintage and FICO based model which incorporates a projected forward loss curve. For commercial loans, lifetime loss rates are assigned to each pool with consideration given for pool make-up, including risk rating profile. Lifetime loss rates are developed from internally generated loss data and are applied to each pool.

To the extent that we cannot reasonably estimate cash flows, interest income recognition is discontinued. The unit of account for loans in pools accounted for under ASC 310-30 by analogy is the pool of loans. Accordingly, as long as we can reasonably estimate cash flows for the pool as a whole, accretable yield on the pool is recognized and all individual loans within the pool - even those more than 90 days past due - would be considered to be accruing interest in our financial statement disclosures, regardless of whether or not we expected to collect any principal or interest cash flows on an individual loan 90 days or more past due.

Covered loans

Because of the loss protection provided by the FDIC, the risks of the loans acquired in the FDIC-assisted acquisition that are covered under the FDIC shared-loss agreements are significantly different from those loans not covered under the FDIC shared-loss agreements. Accordingly, the Group presents loans subject to the shared-loss agreements as “covered loans.”

Loans acquired in the FDIC-assisted acquisition were accounted for under ASC 310-30, except for credit card balances which were subsequently cancelled. To the extent credit deterioration occurs in covered loans after the date of acquisition, the Group will record an allowance for loan and lease losses and an increase in the FDIC shared-loss indemnification asset for the expected reimbursement from the FDIC under the shared-loss agreements.

Allowance for Loan and Lease Losses for Non-covered Loans and Leases

Originated loans

The Group determined the allowance for loan and lease losses by portfolio segment, which consist of mortgage loans, commercial loans, consumer loans and leasing, as follows:

Mortgage Loans: These loans are further divided into four classes: traditional mortgages, non-traditional mortgages, loans in loan modification programs and home equity secured personal loans. Traditional mortgage loans include loans secured by a dwelling, fixed coupons and regular amortization schedules. Non-traditional mortgages include loans with interest-first amortization schedules and loans with balloon considerations as part of their terms. Mortgages in loan modification programs are loans that are being serviced under such programs. Home equity loans are mainly equity lines of credit. The allowance factor on these loans is impacted by the historical loss factors on the sub-segments, vintages, the environmental risk factors described above and by delinquency buckets. During the second quarter of 2012, the traditional mortgage loan portfolio was further segregated by vintages.

Commercial loans: These loans are further divided into two classes: commercial loans secured by existing commercial real estate properties and other commercial loans. The allowance factor assigned to these loans is impacted by historical loss factors, by the environmental risk factors described above and by the credit risk ratings assigned to the loans. These credit risk ratings are based on relevant information about the ability of borrowers to service their debt, such as economic conditions, portfolio risk characteristics, prior loss experience, and the results of periodic credit reviews of individual loans.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Consumer loans: These consist of smaller retail loans such as retail credit cards, overdrafts, unsecured personal lines of credit, and personal unsecured loans. The allowance factor on these loans is impacted by the historical loss factors on the segment, the environmental risk factors described above and by delinquency buckets.

Leasing: This segment consists of personal loans guaranteed by vehicles in the form of lease financing. The allowance factor on these loans is impacted by the historical losses on the segment, the environmental risk factors described above and by delinquency buckets.

The Group establishes its allowance for loan losses through a provision for credit losses based on our evaluation of the credit quality of the loan portfolio. This evaluation, which includes a review of loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, and other factors that warrant recognition in determining our allowance for loan losses. The Group continues to monitor and modify the level of the allowance for loan losses to ensure it is adequate to cover losses inherent in our loan portfolio.

For our originated loans, our allowance for loan losses consists of the following elements: (i) specific valuation allowances based on probable losses on specifically identified impaired loans; and (ii) valuation allowances based on net historical loan loss experience for similar loans with similar inherent risk characteristics and performance trends, adjusted, as appropriate, for qualitative risk factors specific to respective loan types.

For our originated loans, when current information and events indicate that it is probable that we will be unable to collect all amounts of principal and interest due under the original terms of a business or commercial real estate loan greater than \$250 thousand, such loan will be classified as impaired. Additionally, all loans modified in a TDR are considered impaired. The need for specific valuation allowances are determined for impaired loans and recorded as necessary. For impaired loans, we consider the fair value of the underlying collateral, less estimated costs to sell, if the loan is collateral dependent, or we use the present value of estimated future cash flows in determining the estimates of impairment and any related allowance for loan losses for these loans. Confirmed losses are charged off immediately. Prior to a loan becoming impaired, we typically would obtain an appraisal through our internal loan grading process to use as the basis for the fair value of the underlying collateral.

Loan loss ratios and credit risk categories are updated at least quarterly and are applied in the context of GAAP as prescribed by ASC and the importance of depository institutions having prudent, conservative, but not excessive loan allowances that fall within an acceptable range of estimated losses. While management uses current available information in estimating possible loan and lease losses, factors beyond the Group's control, such as those affecting general economic conditions, may require future changes to the allowance.

Acquired Loans Accounted under ASC 310-20 (Loans with revolving feature and/or acquired at a premium)

We establish our allowance for loan losses through a provision for credit losses based upon an evaluation process that is similar to our evaluation process used for originated loans. This evaluation, which includes a review of loans on which full collectability may not be reasonably assured, considers, among other matters, the estimated fair value of the underlying collateral, economic conditions, historical net loan loss experience, carrying value of the loans, which includes the remaining net purchase discount or premium, and other factors that warrant recognition in determining our allowance for loan losses. These loans were recorded on acquisition date at their fair value. Such fair value includes a credit discount which accounts for expected loan losses over the estimated life of these loans. Management will take into consideration this credit discount when determining the necessary allowance for acquired loans that are accounted for under the provisions of ASC 310-20. These loans are divided in the following four segments:

Commercial and Industrial Loans ("C&I") – C&I loans include commercial credit lines, overdrafts, revolving unsecured commercial loans, and revolving commercial loans secured by real estate and by other types of collateral. These loans are granted mainly to corporate clients, to automobile dealers to finance their inventory, to the government and to small and medium size enterprises. In the underwriting process of C&I loans, the overall economic and financing situation and the repayment capacity of the borrower are taken into consideration. Lending limits, term, required documentation, interest rate approval, collateral, and guarantees are also considered. C&I loans are composed of different markets.

As part of the monitoring system, an alert system has been adopted for C&I loans to ensure an early identification of problem loans. This system is a tool for credit classification and mitigation of credit losses. Monitoring reports are prepared to follow up on delinquent, nonperforming loans, and classified loans.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Construction and Commercial Real Estate Loans (“CRE”)— The main products of CRE loans are interim construction, land, and permanent loans (rental properties). The repayment of an interim financing construction loan generally depends on success of the project. Therefore, its viability is the main consideration during the evaluation process. Additional considerations are also evaluated, such as technical and financial capacity of the developer and the contractor. The parameters for land loans are based primarily on the loan to value and debt service coverage ratio. The main parameters for permanent loans are the occupancy and the debt-service coverage ratio.

Monitoring system and reports explained in the C&I loans section are also part of the CRE loans monitoring process. In addition, new appraisal reports are requested periodically for CRE loans.

Consumer Loans — Consists of revolving retail products, such as credit cards, and lines of credit, among others. The credit scoring system is used for personal loans and credit card loan originations. The Bank determines from time to time maximum amounts of credit limits, monthly payments, charges and fees, and interest rates. Also, lending limits and underwriting procedures are part of the structure and controls.

Auto loans — The financing for the purchase of new or used motor vehicles for private or public use. These loans are granted mainly through dealers authorized and approved by the auto department credit committee of the Bank. The auto credit department has the specialized structure and resources to provide the service required for this product according to market demands.

The portfolio segments and classes will continue to change as the BBVAPR integration takes place during 2013, and the Group re-assesses its allowance methodology.

Acquired Loans Accounted Under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

For our acquired loans accounted for under ASC 310-30, our allowance for loan losses is estimated based upon our expected cash flows for these loans. To the extent that we experience a deterioration in borrower credit quality resulting in a decrease in our expected cash flows (which are used as a proxy to identify probable incurred losses) subsequent to the acquisition of the loans, an allowance for loan losses is established based on our estimate of future credit losses over the remaining life of the loans.

Acquired loans accounted for under ASC Subtopic 310-30 are not considered non-performing and continue to have an accretable yield as long as there is a reasonable expectation about the timing and amount of cash flows expected to be collected. Also, loans charged-off against the non-accretable difference established in purchase accounting are not reported as charge-offs. Charge-offs on loans accounted under ASC Subtopic 310-30 are recorded only to the extent that losses exceed the non-accretable difference established with purchase accounting.

Allowance for Loan and Lease Losses for Covered Loans and Leases

Covered loans are accounted for under ASC Subtopic 310-30. For covered loans, the portion of the loss on covered loans reimbursable from the FDIC is recorded as an offset to the provision for credit losses and increases the FDIC shared-loss indemnification asset.

Lease Financing

The Group leases vehicles for personal and commercial use to individual and corporate customers. The direct finance lease method of accounting is used to recognize revenue on leasing contracts that meet the criteria specified in the guidance for leases in ASC Topic 840. Aggregate rentals due over the term of the leases less unearned income are included in lease financing contracts receivable. Unearned income is amortized using a method over the average life of the leases as an adjustment to the interest yield.

Troubled Debt Restructuring

A troubled debt restructuring (“TDR”) is the restructuring of a receivable in which the Group, as creditor, grants a concession for legal or economic reasons due to the debtor’s financial difficulties. A concession is granted when, as a result of the restructuring, the Group does not expect to collect all amounts due, including interest accrued at the original contract rate. These concessions may include a reduction of the interest rate, principal or accrued interest, extension of the maturity date or other actions intended to minimize potential losses.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

To assess whether the debtor is having financial difficulties, the Group evaluates whether it is probable that the debtor will default on any of its debt in the foreseeable future.

Receivables that are restructured in a TDR are presumed to be impaired and are subject to a specific impairment-measurement method. If the payment of principal at original maturity is primarily dependent on the value of collateral, the Group considers the current value of that collateral in determining whether the principal will be paid. For non-collateral dependent loans, the specific reserve is calculated based on the present value of expected cash flows discounted at the loan's effective interest rate. Loans modified in TDRs are placed on non-accrual status until the Group determines that future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrate performance according to the restructured terms for a period of at least six months.

Reserve for Unfunded Commitments

The reserve for unfunded commitments is maintained at a level believed by management to be sufficient to absorb estimated probable losses related to unfunded credit facilities and is included in other liabilities in the consolidated statements of condition. The determination of the adequacy of the reserve is based upon an evaluation of the unfunded credit facilities. Net adjustments to the reserve for unfunded commitments are included in other operating expenses in the consolidated statements of operations.

FDIC Shared-Loss Indemnification Asset

The FDIC shared-loss indemnification asset is accounted for and measured separately from the covered loans acquired in the FDIC-assisted acquisition as it is not contractually embedded in any of the covered loans. The shared-loss indemnification asset related to estimated future loan and lease losses is not transferable should the Group sell a loan prior to foreclosure or maturity. The shared-loss indemnification asset was recorded at fair value at the acquisition date and represents the present value of the estimated cash payments expected to be received from the FDIC for future losses on covered assets based on the credit adjustment estimated for each covered asset and the shared-loss percentages. This balance also includes incurred expenses under the shared-loss agreements. This asset is presented net of any clawback liability due to the FDIC under the Purchase and Assumption Agreement. These cash flows are then discounted at a market-based rate to reflect the uncertainty of the timing and receipt of the shared-loss reimbursements from the FDIC. The amount ultimately collected for this asset is dependent upon the performance of the underlying covered assets, the passage of time, the proper submission of claims to the FDIC and compliance with the obligations set forth in the FDIC shared-loss agreements. The time value of money incorporated into the present value computation is accreted into earnings over the shorter of the life of the shared-loss agreements or the holding period of the covered assets.

The FDIC shared-loss indemnification asset is reduced as losses are recognized on covered loans and shared-loss payments are received from the FDIC. Realized credit losses in excess of acquisition-date estimates result in an increase in the FDIC shared-loss indemnification asset. Conversely, if realized credit losses are less than acquisition-date estimates, the FDIC shared-loss indemnification asset is amortized through the term of the shared-loss agreements.

Goodwill and Intangible Assets

The Group records the excess of the cost of acquired entities over the fair value of identifiable tangible and intangible assets acquired less the fair value of liabilities assumed as goodwill. The Group amortizes the acquired identifiable intangible assets with definite useful economic lives over their useful economic life utilizing an accelerated amortization method. On a periodic basis, the Group assesses whether events or changes in circumstances indicate that the carrying amounts of the Group's core deposit and other intangible assets may be impaired. The Group does not amortize goodwill or any acquired identifiable intangible assets with an indefinite useful economic life, but we review them for impairment at our reporting unit level on an annual basis, or when events or changes in circumstances indicate that the carrying amounts may be impaired. The Group defines a reporting unit as a distinct, separately identifiable component of one of our operating segments for which complete, discrete financial information is available and reviewed regularly by that segment's management.

The Group has the option to first assess qualitative factors to determine whether there are events or circumstances that exist that make it more likely than not that the fair value of the reporting unit is less than its carrying amount (Step 0). If it is more likely than not that the fair value of the reporting unit is less than its carrying amount, or if we choose to bypass the qualitative assessment, we proceed to compare each reporting unit's fair value to carrying value to identify potential impairment (Step 1). If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not considered impaired. However, if the carrying amount of the reporting unit were to exceed its estimated fair value, a second step (Step 2) would be performed that would compare the

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

implied fair value of the reporting unit's goodwill with the carrying amount of the goodwill for the reporting unit. The implied fair value of goodwill is determined in the same manner as goodwill that is recognized in a business combination. Significant judgment and estimates are involved in estimating the fair value of the assets and liabilities of the reporting units. We performed our annual impairment review of goodwill utilizing valuation methods we believe appropriate, given the availability and applicability of market-based inputs for those methods.

Foreclosed Real Estate and Other Repossessed Property

Non-Covered Foreclosed Real Estate

Foreclosed real estate is initially recorded at the lower of the related loan balance or the fair value of the real estate less the cost of selling it at the date of foreclosure. At the time properties are acquired in full or partial satisfaction of loans, any excess of the loan balance over the estimated fair value of the property is charged against the allowance for loan and lease losses on non-covered loans. After foreclosure, these properties are carried at the lower of cost or fair value less estimated cost to sell, based on recent appraised values or options to purchase the foreclosed property. Any excess of the carrying value over the estimated fair value, less estimated costs to sell, is charged to non-interest expense. The costs and expenses associated to holding these properties in portfolio are expensed as incurred.

Covered Foreclosed Real Estate and Other Repossessed Property

Covered foreclosed real estate and other repossessed property is initially recorded at their estimated fair value on the acquisition date, based on appraisal value less estimated selling costs. Any subsequent write-downs due to declines in fair value and costs and expenses associated with holding these properties in portfolio are charged as incurred to non-interest expense with a partially offsetting non-interest income for the loss reimbursement under the FDIC shared-loss agreement. Any recoveries of previous write-downs are credited to non-interest expense with a corresponding charge to non-interest income for the portion of the recovery that is due to the FDIC.

Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful life of each type of asset. Amortization of leasehold improvements is computed using the straight-line method over the terms of the leases or estimated useful lives of the improvements, whichever is shorter.

Impairment of Long-Lived Assets

The Group periodically reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In performing the review for recoverability, an estimate of the future cash flows expected to result from the use of the asset and its eventual disposition is made. If the sum of the future cash flows (undiscounted and without interest charges) is less than the carrying amount of the assets, an impairment loss is recognized. The amount of the impairment is the excess of the carrying amount over the fair value of the asset. As of December 31, 2012, there was no indication of impairment as a result of such review.

Income Taxes

In preparing the consolidated financial statements, the Group is required to estimate income taxes. This involves an estimate of current income tax expense together with an assessment of temporary differences resulting from differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The determination of current income tax expense involves estimates and assumptions that require the Group to assume certain positions based on its interpretation of current tax laws and regulations. Changes in assumptions affecting estimates may be required in the future, and estimated tax assets or liabilities may need to be increased or decreased accordingly. The accrual for tax contingencies is adjusted in light of changing facts and circumstances, such as the progress of tax audits, case law and emerging legislation. When particular matters arise, a number of years may elapse before such matters are audited and finally resolved. Favorable resolution of such matters could be recognized as a reduction to the Group's effective tax rate in the year of resolution. Unfavorable settlement of any particular issue could increase the effective tax rate and may require the use of cash in the year of resolution.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The determination of deferred tax expense or benefit is based on changes in the carrying amounts of assets and liabilities that generate temporary differences. The carrying value of the Group's net deferred tax assets assumes that the Group will be able to generate sufficient future taxable income based on estimates and assumptions. If these estimates and related assumptions change in the future, the Group may be required to record valuation allowances against its deferred tax assets resulting in additional income tax expense in the consolidated statements of operations.

Management evaluates on a regular basis whether the deferred tax assets can be realized and assesses the need for a valuation allowance. A valuation allowance is established when management believes that it is more likely than not that some portion of its deferred tax assets will not be realized. Changes in valuation allowance from period to period are included in the Group's tax provision in the period of change.

In addition to valuation allowances, the Group establishes accruals for uncertain tax positions when, despite the belief that the Group's tax return positions are fully supported, the Group believes that certain positions are likely to be challenged. The accruals for uncertain tax positions are adjusted in light of changing facts and circumstances, such as the progress of tax audits, case law, and emerging legislation. The accruals for the Group's uncertain tax positions are reflected as income tax payable as a component of accrued expenses and other liabilities. These accruals are reduced upon expiration of the applicable statute of limitations.

The Group follows a two-step approach for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement.

The Group's policy is to include interest and penalties related to unrecognized income tax benefits within the provision for income taxes on the consolidated statements of operations.

On January 31, 2011, the Governor of Puerto Rico signed into law the Internal Revenue Code for a New Puerto Rico, which has been subsequently amended several times (the "2011 Code"). The 2011 Code provides for the gradual repeal of the Puerto Rico Internal Revenue Code of 1994 (the "1994 Code"), as its provisions started to take effect, with some exceptions, as of January 1, 2011. For corporate taxpayers, the 2011 Code retains the 20% flat rate on "normal-tax net income" but establishes significantly lower rates applicable to "surtax net income" which is the "normal-tax net income" less the allowed surtax deduction. The 2011 Code provides a surtax rate from 5% to 10% for the 2011, 2012 and 2013 taxable years. As of the 2014 taxable year, the surtax rate may be reduced to 5% if certain economic and budgetary control tests are met by the Government of Puerto Rico. If such economic tests are not met, the reduction of the surtax rate will be postponed until the year when such economic tests are met. In the case of a controlled group of corporations, the determination of which surtax rate applies will be made by adding the "normal-tax net income" of each of the entities that are members of the controlled group reduced by the surtax deduction. The 2011 Code also increased the surtax deduction to \$750,000. In the case of a controlled group of corporations, the surtax deduction should be distributed among the members of the controlled group. The 2011 Code reduces the alternative minimum tax ("AMT") from 22% to 20%. It also eliminates the 5% additional surtax which was established by Act No. 7 of March 9, 2009, and the 5% recapture of the benefit of the income tax tables, except for income earned by international banking entities, which is currently fully exempt, but was subject to a 5% income tax for the 2009, 2010 and 2011 taxable years. Under the 2011 Code, a corporate taxpayer had a one-time option of determining its income tax liability and filing its income tax return pursuant to the 1994 Code. This election was required with the filing of the 2011 income tax return and, once made, was irrevocable for such taxable year and for each of the next four taxable years. The Group elected to implement and file its income tax returns pursuant to the 2011 Code. Under the 2011 Code, all companies are treated as separate taxable entities and are not entitled to file consolidated returns. The Group and its subsidiaries are subject to Puerto Rico regular income tax or AMT on income earned from all sources. The AMT is payable if it exceeds regular income tax. The excess of AMT over regular income tax paid in any one year may be used to offset regular income tax in future years, subject to certain limitations.

Equity-Based Compensation Plan

The Group's 2007 Omnibus Performance Incentive Plan, as amended and restated (the "Omnibus Plan"), provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted units and dividend equivalents, as well as equity-based performance awards. The Omnibus Plan was adopted in 2007, amended and restated in 2008, and further amended in 2010.

The purpose of the Omnibus Plan is to provide flexibility to the Group to attract, retain and motivate directors, officers, and key employees through the grant of awards based on performance and to adjust its compensation practices to the best compensation

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

practice and corporate governance trends as they develop from time to time. The Omnibus Plan is further intended to motivate high levels of individual performance coupled with increased shareholder returns. Therefore, awards under the Omnibus Plan (each, an “Award”) are intended to be based upon the recipient’s individual performance, level of responsibility and potential to make significant contributions to the Group. Generally, the Omnibus Plan will terminate as of (a) the date when no more of the Group’s shares of common stock are available for issuance under the Omnibus Plan or, (b) if earlier, the date the Omnibus Plan is terminated by the Group’s Board of Directors.

The Board’s Compensation Committee (the “Committee”), or such other committee as the Board may designate, has full authority to interpret and administer the Omnibus Plan in order to carry out its provisions and purposes. The Committee has the authority to determine those persons eligible to receive an Award and to establish the terms and conditions of any Award. The Committee may delegate, subject to such terms or conditions or guidelines as it shall determine, to any employee or group of employees any portion of its authority and powers under the Omnibus Plan with respect to participants who are not directors or executive officers subject to the reporting requirements under Section 16(a) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Only the Committee may exercise authority in respect of Awards granted to such participants.

The Omnibus Plan replaced and superseded the Group’s 1996, 1998 and 2000 Incentive Stock Option Plans (the “Stock Option Plans”). All outstanding stock options under the Stock Option Plans continue in full force and effect, subject to their original terms and conditions.

The expected term of stock options granted represents the period of time that such options are expected to be outstanding. Expected volatilities are based on historical volatility of the Group’s shares of common stock over the most recent period equal to the expected term of the stock options. For stock options issued during 2012, the expected volatilities are based on both historical and implied volatility of the Group’s shares of common stock.

The Group follows the fair value method of recording stock-based compensation. The Group uses the modified prospective transition method, which requires measurement of the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award with the cost to be recognized over the service period. It applies to all awards unvested and granted after this effective date and awards modified, repurchased, or cancelled after that date.

Comprehensive Income

Comprehensive income is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances, except for those resulting from investments by owners and distributions to owners. GAAP requires that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities and on derivative activities that qualify and are designated for cash flows hedge accounting, net of taxes, are reported as a separate component of the stockholders’ equity section of the consolidated statements of financial condition, such items, along with net income, are components of comprehensive income.

Commitments and Contingencies

Liabilities for loss contingencies, arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

Subsequent Events

The Group has evaluated other events subsequent to the balance sheet date and prior to the filing of this annual report on Form 10-K for the year ended December 31, 2012, and has adjusted and disclosed those events that have occurred that would require adjustment or disclosure in the audited consolidated financial statements.

Reclassifications

When necessary, certain reclassifications have been made to prior year amounts to conform to the current year presentation.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Recent Accounting Developments

Comprehensive Income — FASB Accounting Standards Update (“ASU”) 2011-05 “Presentation of Comprehensive Income” (Topic 220) was issued in June 2011. This update provides the option to present total comprehensive income, the components of net income, and the components of other comprehensive income in a single continuous statement or two separate but consecutive statements. The amendments in this update do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The amendments do not change the option for an entity to present components of other comprehensive income either net of related tax effects or before related tax effects, with one amount shown for the aggregate income tax expense or benefit related to the total of other comprehensive income items. The guidance in this update is effective for fiscal years, and interim periods beginning after December 15, 2011 and should be applied retrospectively. The Group adopted this guidance presenting the changes in comprehensive income in two separate, but consecutive statements.

Fair Value Measurement — FASB ASU 2011-04, “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs” (Topic 820) was issued in May 2011. This update establishes common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. Among the changes, additional information about the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs and any interrelationships between those unobservable inputs will be required. Also, entities now will be required to categorize by level of the fair value hierarchy items that are not measured at fair value in the statement of financial position, but for which the fair value of such items is required to be disclosed. The amendments in this update are effective during interim and annual periods beginning after December 15, 2011, are to be applied prospectively. The Group adopted this guidance for fair value measurements.

Repurchase Agreements — FASB ASU 2011-03, “Reconsideration of Effective Control for Repurchase Agreements” (Topic 860) was issued in April 2011. This update removes from the assessment of effective control the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and the collateral maintenance implementation guidance related to that criterion. Other criteria applicable to the assessment of effective control are not changed by the amendments in this update. The amendments in this update are effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption was not permitted. The Group adopted this guidance for the repurchase agreements.

Accounting Standards Not Yet Required to be Adopted as of December 31, 2012

Offsetting Assets and Liabilities – FASB ASU 2011-11. In December 2011, the FASB issued ASU No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 requires an entity to disclose information about offsetting and related arrangements to enable users of financial statements to understand the effect of those arrangements on its financial position, and to allow investors to better compare financial statements prepared under U.S. GAAP with financial statements prepared under IFRS. The new standards are effective for annual periods beginning January 1, 2013, and interim periods within those annual periods. Retrospective application is required. The Company will implement the provisions of ASU 2011-11 as of January 1, 2013. The adoption of this guidance is not expected to have a material effect on the Group’s consolidated financial statements.

Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution— FASB ASU 2012-06, “Business Combinations” (Topic 805) was issued in October 2012. This update addresses the diversity in practice about how to interpret the terms “on the same basis” and “contractual limitations” when subsequently measuring an indemnification asset recognized in a government-assisted (Federal Deposit Insurance Corporation) acquisition of a financial institution that includes a loss-sharing agreement (indemnification agreement). When a reporting entity recognizes an indemnification asset as a result of a government-assisted acquisition of a financial institution and subsequently the cash flows expected to be collected on the indemnification asset changes, as a result of a change in cash flows expected to be collected on the assets subject to indemnification, the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement, that is, the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets. The amendments in this update are effective for fiscal years and interim periods within those years, beginning on or after December 15, 2012. Early adoption is permitted. The adoption of this guidance is not

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

expected to have a material effect on the Group's consolidated financial statements, since the Group already follows the same basis approach.

Comprehensive Income — FASB ASU 2013-02 “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income “. The amendments in this update do not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. The amendments of this update are effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this guidance is not expected to have a material effect on the Group’s consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 2 – BUSINESS COMBINATIONS

BBVAPR Acquisition

On December 18, 2012, the Group purchased from BBVA, all of the outstanding common stock of each of BBVAPR Holding and BBVA Securities for an aggregate purchase price of \$500 million. Immediately following the closing of the BBVAPR Acquisition, the Group merged BBVAPR Bank with and into Oriental Bank, with Oriental Bank continuing as the surviving entity. The audited consolidated financial statements contemplate the effect of the BBVAPR Acquisition.

The Group has determined that the BBVAPR Acquisition constitutes a business acquisition as defined by the FASB ASC Topic 805 (“Business Combinations”). Accordingly, the assets acquired and liabilities assumed as of December 18, 2012 are presented at their relative fair values in the table below as required by that Topic. In many cases, the determination of these fair values required management to make estimates about discount rates, expected cash flows, market conditions and other future events that are highly subjective in nature and subject to change. These fair value estimates may be subject to change for up to one year after the closing date of the BBVAPR Acquisition as additional information relative to closing date fair values becomes available. The amount that the Group realizes on these assets could differ materially from the carrying value included in the audited consolidated statements of financial condition primarily as a result of changes in the timing and amount of collections on the acquired loans in future periods. The application of the acquisition method of accounting resulted in a goodwill of \$61.3 million.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table presents the goodwill recorded in connection with the BBVAPR Acquisition:

	December 18, 2012
	(In thousands)
Cash consideration	\$ 500,000
BBVAPR stockholder's equity	650,617
BBVAPR legacy goodwill	(116,353)
BBVAPR legacy deferred tax asset	(35,327)
Adjustments to reflect assets acquired and liabilities assumed at fair value:	
Loans, net	(118,913)
Deferred tax asset, net	85,332
Foreclosed real estate	(8,896)
Premises and equipment, net	29,067
Core deposit and customer relationship intangibles	13,533
Other assets	(25,915)
Deposits	(21,489)
Repurchase agreements, subordinated capital notes and other borrowings	(14,414)
Accrued expenses and other liabilities	1,438
Fair value of net assets acquired	438,680
Goodwill resulting from the BBVAPR Acquisition	\$ 61,320

Goodwill represents the future economic benefits arising from net assets acquired that are not individually identified and separately recognized. None of the goodwill resulting from the BBVAPR acquisition is expected to be deductible for income tax purposes.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The acquisition date estimated fair values of the assets acquired and liabilities assumed are summarized as follows:

Net assets acquired	\$ 650,617	\$ (211,937)	\$ 438,680

Fair Value of Assets Acquired and Liabilities Assumed

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date reflecting assumptions that a market participant would use when pricing an asset or liability. In some cases, the estimation of fair values requires management to make estimates about discount rates, future expected cash flows, market conditions and other future events that are highly subjective in nature and subject to change. The methods used to determine the fair values of the significant assets acquired and liabilities assumed are described below.

Cash and cash equivalents - Cash and cash equivalents include cash and due from banks, and interest-earning deposits with banks and the Federal Reserve System. The fair value of financial instruments that are short-term or re-price frequently and that have little or no risk were considered to have a fair value that approximates to carrying value.

Investment securities – The fair value of securities, including trading securities, were based on quoted market prices, when available, or market prices provided by recognized broker-dealers. If listed prices or quotes were not available, fair value was based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument.

Federal Home Loan Bank stock - The fair value of acquired FHLB stock was estimated to be its redemption value.

Loans – The fair values of loans acquired in the BBVAPR Acquisition were estimated by discounting the expected cash flows

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

from the portfolio. In estimating such fair value and expected cash flows, management made several assumptions regarding prepayments, collateral cash flows, the timing of defaults, and the loss severity of defaults. Other factors expected by market participants were considered in determining the fair value of acquired loans, including loan pool level estimated cash flows, type of loan and related collateral, risk classification status (i.e., performing or nonperforming), term of loan, whether or not the loan was amortizing, and current discount rates.

The methods used to estimate fair value are extremely sensitive to the assumptions and estimates used. While management attempted to use assumptions and estimates that best reflected the acquired loan portfolios and current market conditions, a greater degree of subjectivity is inherent in these values than in those determined in active markets. Accordingly, there can be no assurance that this information is useful for purposes of evaluating the financial condition and/or value of the Group in and of itself or in comparison with any other company.

Foreclosed real estate - Foreclosed real estate and other repossessed properties (primarily vehicles) are presented at their estimated fair value. The fair values were determined using their expected selling price, less selling and carrying costs, discounted to present value.

Deferred taxes - Deferred income taxes relate to the differences between the book and tax bases of assets acquired and liabilities assumed in this transaction. The deferred tax asset, net assumes a tax-free merger through a stock acquisition. In a tax-free merger, BBVAPR would not recognize taxable gain or loss on the BBVAPR Acquisition date. Therefore, the tax basis of assets acquired and liabilities assumed will carry over to Oriental without consideration of fair value adjustments. The Group's effective tax rate used in measuring deferred taxes resulting from the BBVAPR Acquisition is 30%.

Premises and equipment - The fair value of premises, including land, buildings and improvements, was determined based upon appraisals by licensed appraisers. These appraisals were based upon the best and highest use of the property with final values determined based upon an analysis of the cost, sales comparison, and income capitalization approaches for each property appraised. This fair value of owned real estate resulted in an estimated premium of \$29.1 million, to be amortized over the weighted average remaining useful life of the properties, estimated to be 25 years.

Derivative assets and liabilities - Interest rate contracts, which include interest rate swaps and other option agreements are used to modify interest characteristics of various financial instruments and are traded in OTC active markets. The fair value is based on observable market parameters, which include discounting the instruments' cash flows using the U.S. dollar LIBOR-based discount rates, and also applying yield curves that account for the industry sector and the credit rating of the counterparty and/or the Group. The fair value is obtained from an independent nationally recognized third-party model.

Core deposit intangible ("CDI") - CDI is a measure of the value of non-interest checking, savings, and NOW and money market deposits that are acquired in business combinations. The fair value of the CDI stemming from the business combination is based on the present value of the expected cost savings attributable to the core deposit funding, relative to an alternative source of funding.

Customer relationship intangible ("CRI") - CRI is a measure of the value of broker-dealer and insurance client relationships that were acquired in the business combination. The fair value was computed using a multiperiod cash flow model, a form of the income approach and discounted using an appropriate risk-adjusted discount rate. This measure of fair value requires considerable judgments about future events, including customer retention and attrition estimates.

Deposit liabilities - The fair values used for demand and savings deposits are, by definition, equal to the amount payable on demand at the reporting date. The fair values for time deposits were estimated using a discounted cash flow method that applies interest rates currently being offered on time deposits to a schedule of aggregated contractual maturities of such time deposits.

Securities sold under agreements to repurchase - The value of these instruments was calculated based on their contractual cash flows and discounted to present value using a market participant rate of interest.

Other borrowings - The value of these instruments was calculated based on their contractual cash flows and discounted to present value using a market participant rate of interest.

Subordinated capital notes - The value of these instruments was calculated based on their contractual cash flows and discounted to present value using a rate of interest for comparable issues.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Other assets and other liabilities - Given the short-term nature of these financial instruments, the carrying amounts reflected in the statement of assets acquired and liabilities assumed approximated fair value. In accordance with the Acquisition Agreement, the Group could not hold ownership of the core banking system assets recorded in the legacy BBVAPR balance sheet because it is a proprietary system from BBVA. Accordingly, other assets were adjusted considering this contracted provision. The Group however contracted separately the hosting of the core banking system and a monthly fee has been assessed for the usage of BBVA's proprietary core banking system.

Financial Information — BBVAPR Acquisition

The Group's consolidated results of operations for 2012 include \$7.8 million of net interest income and \$3.7 million of net income from the results of the BBVAPR Companies from the acquisition date. Expenses relating to the BBVAPR Acquisition amounted to \$7.1 million and were included in the December 31, 2012 statement of operations.

The following summarizes the unaudited pro forma results of operations as if the Group had acquired BBVAPR on January 1, 2011.

	Year ended December 31,	
	2012	2011
	(In thousands)	
Net interest income	\$ 261,885	\$ 243,765
Net income	76,211	32,568
Earnings per share:		
Basic	1.27	0.38
Diluted	1.32	0.46

Merger and Restructuring Charges

Merger and restructuring charges are recorded in the consolidated statement of operations and include incremental costs to integrate the operations of the Group and its most recent acquisition. These charges represent costs associated with these one-time activities and do not represent ongoing costs of the fully integrated combined organization.

The following table presents severance and employee-related charges, systems integrations and related charges, and other merger-related charges, related to the BBVAPR Acquisition, for 2012:

	Year ended December 31, 2012
	(In thousands)
Severance and employee-related charges	\$ 2,250
Systems integrations and related charges	1,186
Other	1,554
Total merger and restructuring charges	\$ 4,990

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Restructuring Reserve

Restructuring reserves are established by a charge to merger and restructuring charges, and the restructuring charges are included in the merger and restructuring charges table.

The following table presents the changes in restructuring reserves for 2012:

	Year ended December 31, 2012 (In thousands)
Balance at the beginning of the year	\$ -
Merger and restructuring charges	4,990
Cash payments and other	(788)
Balance at the end of the year	\$ 4,202

Payments under merger and restructuring reserves associated with the BBVAPR Acquisition are expected to continue into 2013 and will be accounted under applicable accounting guidance to the cost being incurred.

Eurobank FDIC-Assisted Acquisition and FDIC Shared-Loss Indemnification Asset

On April 30, 2010, the Bank acquired certain assets and assumed certain deposits and other liabilities in the FDIC-assisted acquisition of Eurobank. As part of the Purchase and Assumption Agreement between the Bank and the FDIC (the “Purchase and Assumption Agreement”), the Bank and the FDIC entered into shared-loss agreements, whereby the FDIC covers a substantial portion of any losses on loans (and related unfunded loan commitments), foreclosed real estate and other repossessed properties.

The acquired loans, foreclosed real estate, and other repossessed property subject to the shared-loss agreements are collectively referred to as “covered assets.” Under the terms of the shared-loss agreements, the FDIC absorbs 80% of losses and shares in 80% of loss recoveries on covered assets. The term of the shared-loss agreement covering single family residential mortgage loans is ten years with respect to losses and loss recoveries, while the term of the shared-loss agreement covering commercial loans is five years with respect to losses and eight years with respect to loss recoveries, from the April 30, 2010 acquisition date. The shared-loss agreements also provide for certain costs directly related to the collection and preservation of covered assets to be reimbursed at an 80% level.

The assets acquired and liabilities assumed as of April 30, 2010 were presented at their fair value. In many cases, the determination of these fair values required management to make estimates about discount rates, expected cash flows, market conditions and other future events that are highly subjective in nature and were subject to change. The fair values initially assigned to the assets acquired and liabilities assumed were preliminary and subject to refinement for up to one year after the closing date of the acquisition as new information relative to closing date fair values became available. The process was completed on April 29, 2011.

The Bank agreed to make a true-up payment, also known as clawback liability, to the FDIC on the date that is 45 days following the last day (such day, the “True-Up Measurement Date”) of the final shared-loss month, or upon the final disposition of all covered assets under the shared-loss agreements in the event losses thereunder fail to reach expected levels. Under the shared-loss agreements, the Bank will pay to the FDIC 50% of the excess, if any, of: (i) 20% of the Intrinsic Loss Estimate of \$906.0 million (or \$181.2 million) (as determined by the FDIC) less (ii) the sum of: (A) 25% of the asset discount (per bid) (or \$227.5 million); plus (B) 25% of the cumulative shared-loss payments (defined as the aggregate of all of the payments made or payable to the Bank minus the aggregate of all of the payments made or payable to the FDIC); plus (C) the sum of the period servicing amounts for every consecutive twelve-month period prior to and ending on the True-Up Measurement Date in respect of each of the shared-loss agreements during which the shared-loss provisions of the applicable shared-loss agreement is in effect (defined as the product of the simple average of the principal amount of shared-loss loans and shared-loss assets at the beginning and end of such period times 1%). The true-up payment represents an estimated liability of \$15.5 million and \$13.3 million, net of discount, as of December 31, 2012 and 2011, respectively.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

This estimated liability is accounted for as a reduction of the indemnification asset. The indemnification asset represents the portion of estimated losses covered by the shared-loss agreements between the Bank and the FDIC.

The operating results of the Group for 2012, 2011 and 2010 include the operating results produced by the acquired assets and assumed liabilities in the FDIC-assisted acquisition.

The FDIC shared-loss indemnification asset activity for 2012, 2011 and 2010 is as follows:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Balance at beginning of period	\$ 392,367	\$ 473,629	\$ 545,213
Shared-loss agreements reimbursements from the FDIC	(96,664)	(75,474)	(120,675)
Increase (decrease) in expected credit losses to be covered under shared-loss agreements, net	7,041	(10,643)	43,004
(Amortization) Accretion of FDIC shared-loss indemnification asset, net	(28,022)	(3,379)	4,330
Incurred expenses to be reimbursed under shared-loss agreements	12,077	8,234	1,757
Balance at end of period	\$ 286,799	\$ 392,367	\$ 473,629

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 3 - INVESTMENTS

Money Market Investments

The Group considers as cash equivalents all money market instruments that are not pledged and that have maturities of three months or less at the date of acquisition. At December 31, 2012 and 2011, money market instruments included as part of cash and cash equivalents amounted to \$13.2 million and \$3.9 million, respectively.

Securities Purchased Under Agreements to Resell

Securities purchased under agreements to resell consist of short-term investments and are carried at the amounts at which the assets will be subsequently resold as specified in the respective agreements. At December 31, 2012, securities purchased under agreements to resell amounted to \$80.0 million. At December 31, 2011, there were no securities purchased under agreements to resell.

The amounts advanced under those agreements are reflected as assets in the consolidated statements of financial condition. It is the Group's policy to take possession of securities purchased under agreements to resell. Agreements with third parties specify the Group's right to request additional collateral based on its monitoring of the fair value of the underlying securities on a daily basis. The fair value of the collateral securities held by the Group on these transactions as of December 31, 2012 was approximately \$82.1 million.

Investment Securities

The amortized cost, gross unrealized gains and losses, fair value, and weighted average yield of the securities owned by the Group at December 31, 2012 and 2011 were as follows:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The amortized cost and fair value of the Group's investment securities at December 31, 2012, by contractual maturity, are shown in the next table. Securities not due on a single contractual maturity date, such as collateralized mortgage obligations, are classified in the period of final contractual maturity. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

Keeping with the Group's investment strategy, during 2012 and 2011, there were certain sales of available-for sale securities because the Group felt that gains could be realized and that there were good opportunities to invest the proceeds in other investment securities with attractive yields and terms that would allow the Group to continue protecting its net interest margin. The Group has also pursued the strategy of selling securities subject to higher prepayment speeds. In 2012, the Group sold \$1.0 billion of investment securities and paid down or extinguished \$1.4 billion of securities sold under repurchase agreements prior to their contractual maturities in furtherance of the Group's plan to deleverage its balance sheet in connection with the BBVAPR Acquisition. The BBVAPR Acquisition and the related deleverage required management to transfer held-to-maturity securities to available-for-sale in order to maintain the desired interest rate and credit risk profiles. As a result, on December 31, 2012, the securities in the held-to-maturity portfolio were transferred to the available-for-sale portfolio at a fair value of \$797.5 million with net unrealized gains of \$35.1 million.

The Group, as part of its asset/liability management, may purchase U.S. Treasury securities and U.S. government sponsored agencies discount notes close to their maturities as a short term vehicle to reinvest the proceeds of sale transactions until investment securities with attractive yields can be purchased.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group recorded a net gain on sale of securities of \$74.2 million in 2012, \$28.0 million in 2011, and \$15.0 million in 2010. The tables below present the gross realized gains and losses by category for such years:

	<u>\$ 63,455</u>	<u>\$ 11,019</u>	<u>\$ 52,436</u>

At December 31, 2011, there were no available-for-sale securities in a continuous unrealized loss position for less than 12 months. In addition, at December 31, 2011, there were no individual held-to-maturity securities in an unrealized loss position.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group conducts quarterly reviews to identify and evaluate each investment in an unrealized loss position for other-than-temporary impairment.

Any portion of a decline in value associated with credit loss is recognized in income with the remaining noncredit-related component recognized in other comprehensive income. A credit loss is determined by assessing whether the amortized cost basis of the security will be recovered by comparing the present value of cash flows expected to be collected from the security, discounted at the rate equal to the yield used to accrete current and prospective beneficial interest for the security. The shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis is considered to be the “credit loss.”

Other-than-temporary impairment analysis is based on estimates that depend on market conditions and are subject to further change over time. In addition, while the Group believes that the methodology used to value these exposures is reasonable, the methodology is subject to continuing refinement, including those made as a result of market developments. Consequently, it is reasonably possible that changes in estimates or conditions could result in the need to recognize additional other-than-temporary impairment charges in the future.

Securities in an unrealized loss position at December 31, 2012 are mainly composed of highly liquid securities that in most cases have a large and efficient secondary market. Valuations are performed on a monthly basis. The Group’s management believes that the unrealized losses of such other securities at December 31, 2012 are temporary and are substantially related to market interest rate fluctuations and not to deterioration in the creditworthiness of the issuer or guarantor. At December 31, 2012, the Group does not have the intent to sell these investments in an unrealized loss position.

On January 12, 2012, the Group made the strategic decision to sell its \$25.5 million investment in a corporate bond that was partially invested in a synthetic collateralized debt obligation (“CDO”) at a loss of \$15.0 million. This loss was accounted for as an other-than-temporary impairment in the fourth quarter of 2011, and no additional gain or loss was realized on the sale in January 2012, since this asset was sold at the same value reflected at December 31, 2011. The main considerations underlying the Group’s decision to sell the security included the continued deteriorating credit conditions surrounding the underlying reference portfolio of the CDO, including an event of default that occurred during the fourth quarter of 2011, and a projected analysis prepared by a third-party specialist that showed defaults in excess of the CDO’s subordination level in more than 50% of the scenarios modeled. The corporate bond sold was a unique and completely distinguishable investment from the rest of the Group’s portfolio, including the remaining structured credit investments. In December 2012, the Group made the strategic decision to sell \$36.4 million of collateralized loan obligations (CLOs) at a loss of \$2.4 million. The Group was not required to sell these securities, and executed these transactions primarily as a result of the flexibility provided by the successful execution of the deleverage strategy, and also based on the continued improvement in market prices of the CLOs observed during the fourth quarter of 2012.

As a result of these transactions, the Group eliminated its exposure to non-agency securities, reduced its overall credit risk in the U.S. economy, and also was able to improve its risk-based capital position.

The following table summarizes other-than-temporary impairment losses on securities for the years ended December 31, 2012, 2011, and 2010:

	Year ended December 31,		
	2012	2011	2010
	(In thousands)

Total assets not pledged	<u>\$ 2,449,414</u>	<u>\$ 1,401,737</u>

At December 31, 2012 and 2011, OIB and Oriental Overseas, each held unencumbered certificates of deposit in the amount of \$300 thousand as the legal reserve required for international banking entities under Puerto Rico law. Each certificate of deposit cannot be withdrawn by OIB or Oriental Overseas without the OCFI's prior written approval.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 5 - LOANS RECEIVABLE

The Group's loan portfolio is composed of covered loans and non-covered loans. Non-covered loans are further segregated between originated loans, acquired loans accounted for under ASC 310-20 (no credit quality deterioration at acquisition or loans with no non-accretable difference) and acquired loans accounted for under ASC 310-30 (deteriorated credit quality or loans with an accretable difference).

The risks of the Eurobank FDIC-assisted acquisition acquired loans are significantly different from those loans not covered under the FDIC loss sharing agreements because of the loss protection provided by the FDIC. Accordingly, the Group presents loans subject to the loss sharing agreements as "covered loans" in the information below and loans that are not subject to FDIC loss sharing agreements as "non-covered loans." Also, loans acquired in the BBVAPR Acquisition are included as non-covered loans in the consolidated statements of financial condition.

For a summary of the accounting policy related to loans, interest recognition and allowance for loan and lease losses refer to the summary of significant accounting policies included in Note 1 to the consolidated financial statements.

ORIENTAL FINANCIAL GROUP INC.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Non-covered Loans

Originated Loans and Leases

The Group's originated loan transactions are encompassed within four portfolio segments: mortgage, commercial, consumer and leasing.

The following table presents the aging of the recorded investment in gross originated loans, excluding mortgage loans held for sale, as of December 31, 2012 and 2011 by class of loans. Mortgage loans past due included delinquent loans in the GNMA buy-back option program. Servicers of loans underlying GNMA mortgage-backed securities must report as their own assets the defaulted loans that they have the option (but not the obligation) to repurchase, even when they elect not to exercise that option.

Acquired Loans Accounted under ASC 310-20 (Loans with revolving feature and/or acquired at a premium)

Credit cards, retail and commercial lines of credits, floor plans and performing auto loans with Fair Isaac Corporation (“FICO”) scores over 660 acquired at a premium as part of the BBVAPR Acquisition are to be accounted for under the guidance of ASC 310-20, which requires that any differences between contractually required loan payment receivable in excess of the Group’s initial investment in the loans be accreted into interest income on a level-yield basis over the life of the loan. Loans accounted for under ASC 310-20 are placed on non-accrual status when past due in accordance with the Group’s non-accruing policy and any accretion of discount or amortization of premium is discontinued.

The following table presents the aging of the recorded investment in gross acquired loans accounted for under ASC 310-20 as of December 31, 2012 by class of loans:

	December 31, 2012				Current	Total Loans
	30-59 Days Past Due	60-89 Days Past Due	90+ Days Past Due	Total Past Due

Acquired Loans Accounted under ASC 310-30 (including those accounted for under ASC 310-30 by analogy)

Loans acquired as part of the BBVAPR Acquisition, except for credit cards, retail and commercial lines of credits, floor plans and performing auto loans with Fair Isaac Corporation (“FICO”) scores over 660 acquired at a premium are accounted for by the Group in accordance with ASC 310-30.

The following table presents the carrying amount and required disclosures of loans acquired as part of the BBVAPR Acquisition accounted for pursuant to ASC 310-30 at December 18, 2012, the acquisition date. The information presented includes loans determined to be impaired at the time of acquisition (“credit impaired loans”), and loans that were considered to be performing at the acquisition date and are accounted for by analogy to ASC 310-30 (“non-credit impaired loans”). Refer to Note 1 in the consolidated financial statements for a description of the Group’s significant accounting policies related to acquired loans and criteria considered by management to apply ASC 310-30 by analogy to non-credit impaired loans.

	<u>2,083</u>	<u>-</u>
Total non-accrual loans	<u><u>\$ 147,164</u></u>	<u><u>\$ 147,140</u></u>

Loans accounted for under ASC 310-30 are excluded from the above table as they are considered to be performing due to the application of the accretion method, in which these loans will accrete interest income over the remaining life of the loans using estimated cash flow analyses.

At December 31, 2012 and 2011, loans whose terms have been extended and which are classified as troubled-debt restructuring that are not included in non-accrual loans amounted to \$52.0 million and \$41.3 million, respectively.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 6 - ALLOWANCE FOR LOAN AND LEASE LOSSES

Non-Covered Originated Loans

The Group maintains an allowance for loan and lease losses at a level that management considers adequate to provide for probable losses based upon an evaluation of known and inherent risks. The Group's allowance for loan and lease losses policy provides for a detailed quarterly analysis of probable losses. The analysis includes a review of historical loan loss experience, value of underlying collateral, current economic conditions, financial condition of borrowers and other pertinent factors. While management uses available information in estimating probable loan losses, future additions to the allowance may be required based on factors beyond the Group's control.

The following table presents the changes and the balance in the allowance for loan and lease losses of originated loans for the years ended December 31, 2012, 2011 and 2010:

	Year Ended December 31, 2012

Impaired Loans

The Group evaluates all loans, some individually and others as homogeneous groups, for purposes of determining impairment. The total investment in impaired commercial loans was \$46.2 million and \$46.4 million at December 31, 2012 and 2011, respectively. The impaired commercial loans were measured based on the fair value of collateral or the present value of cash flows method, including those identified as troubled-debt restructurings. The valuation allowance for impaired commercial loans amounted to approximately \$4.1 million and \$3.5 million at December 31, 2012 and 2011, respectively. The total investment in impaired mortgage loans was \$74.8 million and \$51.5 million at December 31, 2012 and 2011, respectively. Impairment on mortgage loans assessed as troubled-debt restructurings was measured using the present value of cash flows. The valuation allowance for impaired mortgage loans amounted to approximately \$5.3 million and \$3.4 million at December 31, 2012 and 2011, respectively.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group's recorded investment in commercial and mortgage loans that were individually evaluated for impairment, excluding loans accounted for under ASC 310-30, and the related allowance for loan and lease losses at December 31, 2012 and 2011 are as follows:

December 31, 2012				
	Unpaid Principal	Recorded Investment	Specific Allowance	Coverage
(In thousands)				
Impaired loans with specific allowance				
Commercial	\$ 16,666	\$ 14,570	\$ 4,121	28%
Residential troubled-debt restructuring	76,859	74,783	5,334	7%
Impaired loans with no specific allowance				
Commercial	36,293	31,629	N/A	N/A
Total investment in impaired loans	\$ 129,818	\$ 120,982	\$ 9,455	8%

December 31, 2011

Credit Quality Indicators

The Group categorizes non-covered originated and acquired loans accounted for under ASC 310-20 into risk categories based on relevant information about the ability of borrowers to service their debt, such as economic conditions, portfolio risk characteristics, prior loss experience, and the results of periodic credit reviews of individual loans.

The Group uses the following definitions for risk ratings:

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Special Mention: Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard: Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful: Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, questionable and improbable.

Loss: Loans classified loss are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off this worthless loan even though partial recovery may be affected in the future.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass rated loans.

As of December 31, 2012 and 2011, and based on the most recent analysis performed, the risk category of gross non-covered originated and acquired loans accounted for under ASC 310-20 subject to risk rating by class of loans is as follows:

For residential and consumer loan classes, the Group evaluates credit quality based on the delinquency status of the loan. As of December 31, 2012 and 2011, and based on the most recent analysis performed, the risk category of non-covered gross originated loans and acquired loans accounted for under ASC 310-20 not subject to risk rating by class of loans is as follows:

Non-covered Acquired Loans Accounted under ASC 310-30

Loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 were recognized at fair value as of December 18, 2012, which included the impact of expected credit losses, and therefore, no allowance for credit losses was recorded at acquisition date. To the extent credit deterioration occurs after the date of acquisition, the Group would record an allowance for loan and lease losses. Management determined that there was no need to record an allowance for loan and lease losses on loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 as of December 31, 2012. Considering the short period elapsed from the acquisition date, the Group does not believe that the difference between cash flows expected to be collected on the loans acquired in the BBVAPR Acquisition accounted for under ASC 310-30 and those anticipated at December 18, 2012 need further assessment.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group's recorded investment in non-covered loan pools accounted for under ASC 310-30 does not have recorded impairments as of December 31, 2012.

Covered Loans

For covered loans, as part of the evaluation of actual versus expected cash flows, the Group assesses on a quarterly basis the credit quality of these loans based on delinquency, severity factors and risk ratings, among other assumptions. Migration and credit quality trends are assessed at the pool level, by comparing information from the latest evaluation period through the end of the reporting period.

During the first quarter of 2012, the Group reviewed certain pools composed of commercial real estate, construction and development loans, which have been in non-accrual status since acquisition, whose cash flows were lower than the expectations exceeding the established thresholds. The Group reviewed the timing of the collections expected through workouts and/or the timing assessed for the particular workout loan to foreclose for the most significant loans comprising the particular pools selected for review. The credit quality assumptions for these pools were updated to reflect increases in default rates, severities and extension of recovery lags resulting in an increase in the provision for covered loan and lease losses. For other pools composed of performing commercial real estate loans and leases, the Group noted that the actual cash flows were better than expected. Thus, for these pools a reversal of previously recorded allowance and a re-yielding of the leasing pools were recorded. As a result of such assessment, during the first quarter of 2012, the Group recorded a net increase in the allowance for covered loans of \$19.2 million which was partially offset by an increase in the FDIC shared-loss indemnification asset of \$12.0 million.

As part of our quarterly assessment of the actual versus expected cash flows for covered loans during the second quarter of 2012, the Group reviewed particular loan performances and expected workout developments to derive more assumptions on certain pools secured by real estate and pools of commercial and industrial loans. Certain pools of loans secured by real estate and a pool of loans secured by farmland underperformed in their actual cash flows, and an impairment of \$2.2 million was recorded during that quarter. Such amount was partially offset by an increase in the FDIC shared-loss indemnification asset of \$724 thousand.

During 2012, the assessment of actual versus expected cash flows resulted in a net provision of \$9.8 million as certain pools of real estate backed loans and of commercial and industrial loans underperformed. The net provision also included the reversal of a previously recorded allowance in certain commercial real estate and construction pools whose loans the Group has managed to workout with better outcomes than forecasted. The loss share portion of the reversal of allowance during the year ended December 31, 2012 was proportionally higher than the allowance reversal recorded on the impaired loans. This resulted from the fact that there were some pools in which an additional allowance was recognized but no offsetting adjustment was done to the FDIC shared-loss indemnification asset as these losses were not covered by a loss share agreement.

The changes in the allowance for loan and lease losses on covered loans for the years ended December 31, 2012, 2011 and 2010 were as follows:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Balance at beginning of the period	\$ 37,256	\$ 49,286	\$ -
Provision for (recapture of) covered loan and lease losses, net	9,827	(1,387)	6,282
FDIC shared-loss portion of provision for (recapture of) covered loan and lease losses, net	7,041	(10,643)	43,004
Balance at end of the period	\$ 54,124	\$ 37,256	\$ 49,286

FDIC shared-loss portion of provision for (recapture of) covered loans and lease losses, net represents the credit impairment losses to be covered under the FDIC loss-share agreement which is increasing the FDIC loss-share indemnification asset.

The Group's recorded investment in covered loan pools that have recorded impairments and their related allowance for covered loan and lease losses as of December 31, 2012 and 2011 are as follows:

December 31, 2012

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 7 - SERVICING ASSETS

The Group periodically sells or securitizes mortgage loans while retaining the obligation to perform the servicing of such loans. In addition, the Group may purchase or assume the right to service mortgage loans originated by others. Whenever the Group undertakes an obligation to service a loan, management assesses whether a servicing asset and/or liability should be recognized. A servicing asset is recognized whenever the compensation for servicing is expected to more than adequately compensate the Group for servicing the loans and leases. Likewise, a servicing liability would be recognized in the event that servicing fees to be received are not expected to adequately compensate the Group for its expected cost.

All separately recognized servicing assets are recognized at fair value using the fair value measurement method. Under the fair value measurement method, the Group measures servicing rights at fair value at each reporting date, reports changes in fair value of servicing assets in earnings in the period in which the changes occur, and includes these changes, if any, with mortgage banking activities in the consolidated statements of operations. The fair value of servicing rights is subject to fluctuations as a result of changes in estimated and actual prepayment speeds and default rates and losses.

The fair value of servicing rights is estimated by using a cash flow valuation model which calculates the present value of estimated future net servicing cash flows, taking into consideration actual and expected loan prepayment rates, discount rates, servicing costs, and other economic factors, which are determined based on current market conditions.

At December 31, 2012, servicing assets are composed of \$10.7 million (\$10.2 million — December 31, 2011) related to residential mortgage loans and \$55 thousand (\$221 thousand — December 31, 2011) of leasing servicing assets acquired in the FDIC-assisted acquisition of Eurobank.

The following table presents the changes in servicing rights measured using the fair value method for the years ended December 31, 2012 and 2011:

	Year Ended December 31,	
	2012	2011
	(In thousands)	
Fair value at beginning of period	\$ 10,454	\$ 9,695
Servicing from mortgage securitizations or asset transfers	1,867	2,458
Changes due to payments on loans	(1,107)	(976)
Changes in fair value due to changes in valuation model inputs or assumptions	(419)	(723)
Fair value at end of period	\$ 10,795	\$ 10,454

The following table presents key economic assumption ranges used in measuring the mortgage-related servicing asset fair value for the years ended December 31, 2012 and 2011:

	Year Ended December 31,	
	2012	2011
Constant prepayment rate	9.43% - 33.05%	7.87% - 40.38%
Discount rate	10.50% - 13.50%	10.50% - 14.00%

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table presents key economic assumption ranges used in measuring the leasing-related servicing asset fair value for the years ended December 31, 2012 and 2011:

	Year Ended December 31,	
	2012	2011
Discount rate	13.19% - 17.69%	13.22% - 17.38%

The sensitivity of the current fair value of servicing assets to immediate 10 percent and 20 percent adverse changes in the above key assumptions were as follows:

	December 31, 2012
	(In thousands)
<u>Mortgage related servicing asset</u>	
Carrying value of mortgage servicing asset	\$ 10,740
Constant prepayment rate	
Decrease in fair value due to 10% adverse change	\$ (456)
Decrease in fair value due to 20% adverse change	\$ (883)
Discount rate	
Decrease in fair value due to 10% adverse change	\$ (448)
Decrease in fair value due to 20% adverse change	\$ (862)
<u>Leasing servicing asset</u>	
Carrying value of leasing servicing asset	\$ 55
Discount rate	
Decrease in fair value due to 10% adverse change	\$ (1)
Decrease in fair value due to 20% adverse change	\$ (1)

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

These sensitivities are hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 10 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in this table, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated without changing any other assumption.

Changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or offset the sensitivities. Mortgage banking activities, a component of total banking and financial service revenue in the consolidated statements of operations, include the changes from period to period in the fair value of the mortgage loan servicing rights, which may result from changes in the valuation model inputs or assumptions (principally reflecting changes in discount rates and prepayment speed assumptions) and other changes, including changes due to collection/realization of expected cash flows.

Servicing fee income is based on a contractual percentage of the outstanding principal and is recorded as income when earned. Servicing fees on mortgage loans totaled \$3.6 million in 2012, \$3.1 million in 2011 and \$2.4 million in 2010. There were no late fees and ancillary fees recorded in such years because these fees belong to the third party with which the Group is engaged in a subservicing agreement. Servicing fees on leases amounted to \$239 thousand in 2012, \$625 thousand in 2011, and \$404 thousand in 2010.

NOTE 8 — PREMISES AND EQUIPMENT

Premises and equipment at December 31, 2012 and 2011 are stated at cost less accumulated depreciation and amortization as follows:

	Useful Life (Years)	December 31, 2012	December 31, 2011
		(In thousands)	
Land	—	\$ 2,876	\$ 2,254
Buildings and improvements	40	63,133	5,890
Leasehold improvements	5 — 10	23,602	18,182
Furniture and fixtures	3 — 7	10,442	9,718
Information technology and other	3 — 7	20,872	20,008
		120,925	56,052
Less: accumulated depreciation and amortization		(35,928)	(34,532)
		<u><u>\$ 84,997</u></u>	<u><u>\$ 21,520</u></u>

Depreciation and amortization of premises and equipment totaled \$4.8 million in 2012, \$5.5 million in 2011, and \$5.8 million in 2010. These are included in the consolidated statements of operations as part of occupancy and equipment expenses.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 9- BUILDING OPERATIONS

With the BBVAPR Acquisition on December 18, 2012, the Group acquired a property where its executive offices are located. The Group also leases office and parking space from this property to third parties under various operating lease contracts for periods normally consisting of five years.

The minimum future rental revenue for agreements with remaining terms in excess of one year at December 31, 2012, is as follows:

<u>Year Ending December 31,</u>	<u>Minimum Rent</u>
	(In thousands)
2013	\$ 2,597
2014	2,597
2015	2,518
2016	2,462
2017	2,390
Thereafter	7,422
	<u>\$ 19,986</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 10 — DERIVATIVE ACTIVITIES

During the year ended December 31, 2012, losses of \$41.1 million were recognized and reflected as “Derivative Activities” in the audited consolidated statements of operations. These were mainly related to realized losses of \$37.5 million due to the terminations of forward-settlement swaps with an aggregate notional amount of \$900 million and to losses of \$3.5 million recorded on options purchased in July 2012 to enter into interest rate swaps, not designated as cash flow hedges or fair value hedges, with an aggregate notional amount of \$200 million, which were terminated in December 2012. During the year ended December 31, 2011, losses of \$13.2 million were recognized and reflected as “Derivative Activities” in the audited consolidated statements of operations. These losses were mainly due to realized losses of \$4.3 million from the termination of forward-settlement swaps with a notional amount of \$1.25 billion. During the year ended December 31, 2010, losses of \$36.8 million were recognized and reflected as “Derivative Activities” in the audited consolidated statements of operations. These losses included realized losses of \$42 million due to terminations of forward-settlement swaps with an aggregate notional amount of \$900 million.

The following table details “Derivative Assets” and “Derivative Liabilities” as reflected in the consolidated statements of financial condition at December 31, 2012 and December 31, 2011:

	December 31, 2012	December 31, 2011
	(In thousands)	
Derivative assets:		
Options tied to S&P 500 Index	\$ 13,233	\$ 9,317
Interest rate swaps not designated as hedges	8,426	-
Interest rate caps	230	-
	<u>\$ 21,889</u>	<u>\$ 9,317</u>
Derivative liabilities:		
Interest rate swaps designated as cash flow hedges	\$ 17,665	\$ 47,425

Interest rate caps	230	
	<u>\$ 26,260</u>	<u>\$ 47,425</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Interest Rate Swaps

The Group enters into interest rate swap contracts to hedge the variability of future interest cash flows of forecasted wholesale borrowings, attributable to changes in a predetermined variable index rate. Once the forecasted wholesale borrowings transactions occur, the interest rate swap will effectively fix the Group's interest payments on an amount of forecasted interest expense attributable to the variable index rate corresponding to the swap notional stated rate. These forward-settlement swaps are designated as cash flow hedges for the forecasted wholesale borrowings transactions and are properly documented as such, and therefore, qualify for cash flow hedge accounting. Changes in the fair value of these derivatives are recorded in accumulated other comprehensive income to the extent there is no significant ineffectiveness in the cash flow hedging relationships. Currently, the Group does not expect to reclassify any amount included in other comprehensive income related to these interest rate swaps to earnings in the next twelve months.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table shows a summary of these swaps and their terms at December 31, 2012:

Type	Notional Amount	Fixed Rate	Variable Rate Index	Trade Date	Settlement Date	Maturity Date
	(In thousands)					
Interest Rate Swaps	\$ 25,000	2.4365%	1-Month Libor	05/05/11	05/04/12	05/04/16
	25,000	2.6200%	1-Month Libor	05/05/11	07/24/12	07/24/16

	100,000	2.6750%	1-Month Libor	05/05/11	08/16/12	08/16/16
	<u>\$ 225,000</u>					

An unrealized loss of \$17.7 million was recognized in accumulated other comprehensive income related to the valuation of these swaps at December 31, 2012, and the related liability is being reflected in the accompanying consolidated statements of financial condition.

At December 31, 2012, interest rate swaps not designated as hedging instruments that were offered to clients represented an asset of \$8.4 million and were included as part of derivative assets in the consolidated statements of financial position. At December 31, 2012, interest rate swaps not designated as hedging instruments that are the mirror-images of the derivatives offered to clients represented a liability of \$8.4 million and were included as part of derivative liabilities in the consolidated statements of financial position.

The following table shows a summary of these interest rate swaps not designated as hedging instruments and their terms at December 31, 2012:

Type	Notional Amount	Fixed Rate	Variable Rate Index	Settlement Date	Maturity Date
	(In thousands)

Options Tied to Standard & Poor's 500 Stock Market Index

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group has offered its customers certificates of deposit with an option tied to the performance of the S&P 500 Index. The Group uses option agreements with major broker-dealers to manage its exposure to changes in this index. Under the terms of the option agreements, the Group receives the average increase in the month-end value of the index in exchange for a fixed premium. The changes in fair value of the option agreements used to manage the exposure in the stock market in the certificates of deposit are recorded in earnings. At December 31, 2012 and December 31, 2011, the purchased options used to manage the exposure to the S&P 500 Index on stock indexed deposits represented an asset of \$13.2 million (notional amount of \$66.6 million) and \$9.3 million (notional amount of \$130.9 million), respectively, and the options sold to customers embedded in the certificates of deposit and recorded as deposits in the consolidated statements of financial condition, represented a liability of \$12.7 million (notional amount of \$62.3 million) and \$9.4 million (notional amount of \$125.8 million), respectively.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

At December 31, 2012, the yearly contractual maturities of options tied to the S&P Index were as follows:

<u>Year Ending December 31,</u>	Derivative asset (S&P purchased options) <u>Minimum Rent</u> (In thousands)	Derivative liability (S&P embedded options) <u>Minimum Rent</u> (In thousands)
2013	38,590	35,187
2014	17,340	16,519
2015	7,330	7,419
2016	3,375	3,191
	<u>\$ 66,635</u>	<u>\$ 62,316</u>

Interest rate caps

The Group has entered into interest rate cap transactions with various clients with floating-rate debt who wish to protect their financial results against increases in interest rates. The Group simultaneously enters into mirror-image interest rate cap transactions with financial counterparties. None of these cap transactions qualify for hedge accounting; therefore, they are marked to market through earnings. The outstanding notional amount of interest rate caps at December 31, 2012 was \$94.0 million. At December 31, 2012, the interest rate caps sold to clients represented a liability of \$230 thousand and were included as part of derivative liabilities in the audited consolidated statements of financial position. At December 31, 2012, the interest rate caps purchased as mirror-images represented an asset of \$230 thousand and were included as part of derivative assets in the audited consolidated statements of financial position. At December 31, 2011, the Group did not have interest rate caps outstanding.

NOTE 11 — ACCRUED INTEREST RECEIVABLE AND OTHER ASSETS

Accrued interest receivable at December 31, 2012 and 2011 consists of the following:

	December 31, 2012	December 31, 2011
	(In thousands)	
Non-covered loans	\$ 10,533	\$ 5,519
Investments	7,021	14,663
	<u>\$ 17,554</u>	<u>\$ 20,182</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Other assets at December 31, 2012 and 2011 consist of the following:

	December 31, 2012	December 31, 2011
	(In thousands)	
Prepaid FDIC insurance	\$ 6,451	\$ 11,599
Other prepaid expenses	19,674	7,014
Servicing advances	7,976	13,990
Mortgage tax credits	8,706	1,303
Core deposit and customer relationship intangibles	14,490	1,185
Investment in Statutory Trust	1,086	1,086
Debt issuance costs	734	1,067
Other repossessed assets	6,084	708
Accounts receivable and other assets	58,483	14,550
	<u>\$ 123,684</u>	<u>\$ 52,502</u>

On November 12, 2009, the FDIC adopted a final rule requiring insured depository institutions to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011, and 2012, on December 31, 2009, along with each institution's risk-based deposit insurance assessment for the third quarter of 2009. The prepayment balance of the assessment covering fiscal years 2012 and 2011 amounted to \$6.5 million and \$11.6 million at December 31, 2012 and 2011, respectively.

Other prepaid expenses amounting to \$19.7 million and \$7.0 million at December 31, 2012 and 2011, respectively, include prepaid municipal, property and income taxes aggregating to \$12.0 million and \$3.2 million, respectively.

Servicing advances amounting to \$8.0 million and \$14.0 million at December 31, 2012 and 2011, respectively, represent the advances made to Bayview Loan Servicing, LLC in order to service some of the loans acquired in the FDIC-assisted acquisition of Eurobank.

In December 2007, the Commonwealth of Puerto Rico established mortgage loan tax credits for financial institutions that provided financing for the acquisition of new homes. At December 31, 2012 and 2011, tax credits for the Group amounted \$8.7 million and \$1.3 million, respectively. Mortgage loan tax credits acquired as part of the BBVAPR Acquisition amounted to \$7.4 million at December 31, 2012.

As part of the FDIC-assisted acquisition of Eurobank and the recent BBVAPR Acquisition, the Group recorded a core deposit intangible representing the value of checking and savings deposits acquired. At December 31, 2012 and 2011, this core deposit intangible amounted to \$9.5 million and \$1.2 million, respectively. In addition, as part of the BBVAPR Acquisition in December 2012, the Group recorded a customer relationship intangible representing the value of customer relationships acquired in the broker-dealer and insurance subsidiaries. At December 31, 2012, this customer relationship intangible amounted to \$5.0 million.

Other repossessed assets totaled \$6.1 million and \$708 thousand at December 31, 2012 and 2011, respectively. At December 31, 2012, the Group recorded \$5.9 million in repossessed auto loans acquired as part of the BBVAPR Acquisition.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 12 — DEPOSITS AND RELATED INTEREST

Total deposits as of December 31, 2012 and 2011 consist of the following:

	December 31, 2012	December 31, 2011
	(In thousands)	
Non-interest bearing demand deposits	\$ 799,667	\$ 201,318
Interest-bearing savings and demand deposits	2,282,305	1,078,625
Individual retirement accounts	376,611	361,411
Retail certificates of deposit	699,983	375,891
Institutional deposits	602,828	162,301
Total core deposits	<u>4,761,394</u>	<u>2,179,546</u>
Brokered deposits	928,165	256,597
	<u>\$ 5,689,559</u>	<u>\$ 2,436,143</u>

At December 31, 2012 and 2011, the weighted average interest rate of the Group's deposits was 1.33% and 1.81%, respectively, inclusive of non-interest bearing deposits of \$799.7 million and \$201.3 million, respectively. Interest expense for the years ended December 31, 2012, 2011 and 2010 is set forth below:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Demand and savings deposits	\$ 11,232	\$ 16,287	\$ 18,083
Certificates of deposit	20,370	28,372	30,462
	<u>\$ 31,602</u>	<u>\$ 44,659</u>	<u>\$ 48,545</u>

At December 31, 2012 and 2011, demand and interest-bearing deposits and certificates of deposit included deposits of the Puerto Rico Cash & Money Market Fund, which amounted to \$101.5 million and \$64.9 million, respectively, with a weighted average rate of 0.77% and 0.82%, and were collateralized with investment securities with a fair value of \$80.3 million and \$62.7 million, respectively.

At December 31, 2012 and 2011 time deposits in denominations of \$100 thousand or higher, excluding accrued interests and unamortized discounts, amounted to \$1.87 billion and \$456.1 million, including public fund time deposits from various Puerto Rico government municipalities, agencies, and corporations of \$78.3 million and \$65.2 million, respectively, at a weighted average rate of 0.72% in 2012 and 0.50% in 2011.

At December 31, 2012 and 2011, public fund deposits from various Puerto Rico government agencies were collateralized with investment securities with a fair value of \$114.6 million and \$71.9 million, respectively, and with commercial loans amounting to \$485.8 million at December 31, 2012. There were no commercial loans pledged as collateral for public fund deposits at December 31, 2011.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Excluding equity indexed options in the amount of \$12.7 million, which are used by the Group to manage its exposure to the S&P 500 Index, and also excluding accrued interest of \$3.9 million and unamortized deposit discounts in the amount of \$17.6 million, the scheduled maturities of certificates of deposit at December 31, 2012 are as follows:

	<u>December 31, 2012</u>
	<u>(In thousands)</u>
Within one year:	
Three (3) months or less	\$ 585,187
Over 3 months through 1 year	1,085,025
	<u>1,670,212</u>
Over 1 through 2 years	454,628
Over 2 through 3 years	215,250
Over 3 through 4 years	114,553
Over 4 through 5 years	116,474
Thereafter	11,278
	<u><u>\$ 2,582,395</u></u>

The aggregate amount of overdraft in demand deposit accounts that were reclassified to loans amounted to \$2.8 million and \$456 thousand as of December 31, 2012 and 2011, respectively.

NOTE 13 — BORROWINGS

Short term borrowings

At December 31, 2012, short term borrowings amounted to \$92.2 million, which mainly consist of unsecured fixed rate borrowings with a weighted average rate of 0.30%. There were no short term borrowings at December 31, 2011.

Securities Sold under Agreements to Repurchase

At December 31, 2012, securities underlying agreements to repurchase were delivered to, and are being held by, the counterparties with whom the repurchase agreements were transacted. The counterparties have agreed to resell to the Group the same or similar securities at the maturity of the agreements.

At December 31, 2012 and 2011, securities sold under agreements to repurchase (classified by counterparty), excluding accrued interest in the amount of \$2.3 million and \$6.2 million, respectively, were as follows:

	<u>December 31,</u>		<u>December 31,</u>	
	<u>2012</u>		<u>2011</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

During the year ended December 31, 2012, the Group sold \$1.0 billion of investment securities and paid down or extinguished \$1.36 billion of securities repurchase agreements prior to their contractual maturities in furtherance of the Group's plan to deleverage its balance sheet in connection with the BBVAPR Acquisition. The early termination fees paid by the Group is presented in the consolidated statement of operations as a net loss on the early extinguishment of repurchase agreements, and such fees amounted to \$26.1 million for the year ended December 31, 2012.

The Group's remaining structured repurchase agreement from the \$2.65 billion it had before the deleverage plan in the amount of \$500 million have original terms of ten years, maturing on March 2, 2017, and the counterparty has the right to exercise its put option on such structured repurchase agreement at par on a quarterly basis before its contractual maturity. Such repurchase agreement also provides for an optional early termination by either party upon no less than two business days' prior written notice to the other party. In the event of any such optional early termination, the amounts owed by or to the terminating party by the other party on the optional early termination date must take account of the termination value of the transaction, as determined by the calculation agent in the manner described in the repurchase agreement.

The following table shows a summary of the Group's repurchase agreements and their terms, excluding accrued interest in the amount of \$2.3 million, at December 31, 2012:

Year of Maturity	Borrowing Balance (In thousands)	Weighted- Average Coupon	Settlement Date	Maturity Date	Next Put Date
2013	68,650	0.62%	12/11/2012	1/7/2013	N/A
	20,568	0.52%	12/7/2012	1/7/2013	N/A
	21,444	0.50%	12/14/2012	1/8/2013	N/A
	30,000	0.47%	12/3/2012	1/8/2013	N/A
	80,000	0.48%	12/6/2012	2/7/2013	N/A
	70,000	0.58%	12/6/2012	2/7/2013	N/A
	67,023	0.52%	12/7/2012	2/7/2013	N/A
	70,246	0.48%	12/6/2012	2/8/2013	N/A
	<u>427,931</u>

	255,000	0.55%	12/10/2012	6/13/2014	N/A
	85,000	0.68%	12/3/2012	12/3/2014	N/A
	170,000	0.68%	12/6/2012	12/8/2014	N/A
	<u>765,000</u>				
2017	500,000	4.67%	3/2/2007	3/2/2017	3/4/2013
	<u>500,000</u>				
	<u>\$ 1,692,931</u>	<u>1.77%</u>			

None of the structured repurchase agreements referred to above with maturity dates up to the date of this report were renewed.

In December 2012, the counterparty to the repurchase agreement that amounted to \$1.25 billion exercised its right to put back such repurchase agreement at par. As a result of this event, the Group entered into new repurchase agreements for a total amount of \$1.193 billion with different counterparties at different rates and with maturity dates ranging from January 2013 to December 2014. None of these new repurchase agreements is subject to a put option that allows the counterparty to terminate it before its contractual maturity.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Advances from the Federal Home Loan Bank

Advances are received from the FHLB under an agreement whereby the Group is required to maintain a minimum amount of qualifying collateral with a fair value of at least 110% of the outstanding advances. At December 31, 2012 and 2011, these advances were secured by mortgage and commercial loans amounting to \$1.3 billion and \$47.3 million, respectively. Also, at December 31, 2012, the Group had an additional borrowing capacity with the FHLB of \$480.1 million. At December 31, 2012 and 2011, the weighted average remaining maturity of FHLB's advances was 3.5 months and 11.2 months, respectively. The original terms of these advances range between one month and seven years, and the FHLB has the right to exercise put options at par on a quarterly basis before the contractual maturity of the long-term advances that mature in 2014. The following table shows a summary of these advances and their terms, excluding accrued interest in the amount of \$55 thousand and unamortized premium in the amount of \$1.0 million, at December 31, 2012:

<u>Year of Maturity</u>	<u>Borrowing Balance</u>	<u>Weighted- Average Coupon</u>	<u>Settlement Date</u>	<u>Maturity Date</u>	<u>Next Put Date</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

All of the advances referred to above with maturity dates up to the date of this report were renewed as one-month short-term advances.

FDIC-Guaranteed Term Notes — Temporary Liquidity Guarantee Program

On March 16, 2012, the Group's banking subsidiary repaid at maturity the \$105 million in senior unsecured notes that it issued in March 2009 under the FDIC's Temporary Liquidity Guarantee Program.

Subordinated Capital Notes

Subordinated capital notes amounted to \$146.0 million and \$36.1 million at December 31, 2012 and 2011, respectively.

In August 2003, the Statutory Trust II, a special purpose entity of the Group, was formed for the purpose of issuing trust redeemable preferred securities. In September 2003, \$35.0 million of trust redeemable preferred securities were issued by the Statutory Trust II as part of a pooled underwriting transaction. Pooled underwriting involves participating with other bank holding companies in issuing the securities through a special purpose pooling vehicle created by the underwriters.

The proceeds from this issuance were used by the Statutory Trust II to purchase a like amount of a floating rate junior subordinated deferrable interest debenture ("subordinated capital note") issued by the Group. The subordinated capital note has a par value of \$36.1 million, bears interest based on 3-month LIBOR plus 295 basis points (3.26% at December 31, 2012; 3.30% at December 31, 2011), is payable quarterly, and matures on September 17, 2033. The subordinated capital note purchased by the Statutory Trust II may be called at par after five years and quarterly thereafter (next call date March 2013). The trust redeemable preferred securities have the same maturity and call provisions as the subordinated capital note. The subordinated deferrable interest debenture issued by the Group is accounted for as a liability denominated as a subordinated capital note on the consolidated statements of financial condition.

The subordinated capital note is treated as Tier 1 capital for regulatory purposes. Under Federal Reserve Board rules, restricted core capital elements, which are qualifying trust preferred securities, qualifying cumulative perpetual preferred stock (and related surplus) and certain minority interests in consolidated subsidiaries, are limited in the aggregate to no more than 25% of a bank holding company's core capital elements (including restricted core capital elements), net of goodwill less any associated deferred tax liability. However, under the Dodd-Frank Act, bank holding companies are prohibited from including in their Tier 1 capital hybrid debt and equity securities, including trust preferred securities, issued on or after May 19, 2010. Any such instruments issued before May 19, 2010 by a bank holding company, such as the Group, with total consolidated assets of less than \$15 billion as of December 31, 2009, may continue to be included as Tier 1 capital. Therefore, the Group is permitted to continue to include its existing trust preferred securities as Tier 1 capital.

As part of the BBVAPR Acquisition on December 18, 2012, the Group's banking subsidiary assumed three subordinated capital notes issued by BBVAPR Bank consisting of the following:

- Subordinated capital notes issued in September 2004 amounting to \$50.0 million at a variable rate of three-month LIBOR plus 1.44% (1.75% at December 31, 2012), due September 23, 2014. Interest on these subordinated notes is payable quarterly since September 23, 2009. The Bank has the option to redeem these subordinated capital notes in whole or in part from time to time before maturity at 100% of the principal amount plus any accrued but unpaid interest to the date of redemption, beginning September 23, 2009, and at each payment date thereafter.
- Subordinated capital notes issued in September 2006 amounting to \$37.0 million at a fixed rate of 5.76% through September 29, 2011, and three-month LIBOR plus 1.56% thereafter (1.87% at December 31, 2012), due September 29, 2016. Interest on these subordinated notes is payable semiannually during the fixed-rate period and quarterly thereafter. The Bank has the option to redeem these subordinated capital notes in whole or in part from time to time before maturity at 100% of the principal amount plus any accrued but unpaid interest to the date of redemption, beginning September 29, 2011, and at each payment date thereafter.
- Subordinated capital notes issued in September 2006 amounting to \$30.0 million at a variable rate of three-month LIBOR plus 1.56% thereafter (1.87% at December 31, 2012), due September 29, 2016. Interest on these subordinated notes is payable quarterly. The Bank has the option to redeem these subordinated capital notes in whole or in part from time to time before maturity at 100% of the principal amount plus any accrued but unpaid interest to the date of redemption, beginning September 29, 2011, and at each payment date thereafter.

These notes qualify as Tier 2 capital at a discounted rate, which totals \$50.2 million at December 31, 2012. Generally speaking, subordinated notes are included as Tier 2 capital if they have a maturity greater than 5 years and comply with certain other

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

requirements. As the notes approach and are within 5 years of maturity, they take on characteristics of short term instruments which are generally not included as Tier 2 capital. As such, both the FDIC and the FRB require that the balance of the notes included as Tier 2 capital be discounted by 20% of the total balance each year commencing 5 years prior to maturity with 0% counted as Tier 2 capital during the last year prior to maturity of the note.

Under the requirements of Puerto Rico Banking Act, the Bank must establish a redemption fund for the subordinated capital notes by transferring from undivided profits pre-established amounts as follows:

	Redemption fund
	(In thousands)
Redemption fund - December 31, 2012	\$ 83,125
2013	11,700
2014	11,700
2015	10,475
	\$ 117,000

Federal Funds Purchased

A summary of federal funds purchased, presented in the consolidated statement of financial condition within Advances from FHLB and other borrowings, as of and for the years ended December 31, 2012 and 2011, is as follows.

	December 31,	
	2012	2011
	(In thousands)	
Balance at end of year	\$ 9,901	\$ -
Average daily aggregate balance outstanding	\$ 10,167	\$ -
Maximum outstanding balance at any month-end	\$ 9,901	\$ -
Weighted average interest rate during the year	0.30%	0%
Weighted average interest rate at year end	0.30%	0%

Other borrowings

Other borrowings, presented in the consolidated statement of financial condition within Advances from FHLB and other borrowings, amounted to \$7.7 million and \$6.0 million at December 31, 2012 and 2011 with a weighted average interest rate of 0.67% and 0.0%, respectively, which mainly consists of unsecured fixed-rate borrowings.

NOTE 14 — EMPLOYEE BENEFIT PLAN

The Group has a profit sharing plan containing a cash or deferred arrangement qualified under Sections 1081.01(a) and 1081.01(d) of the 2011 Code, and Sections 401(a) and 401(k) of the United States Internal Revenue Code of 1986, as amended (the “U.S. Code”). This plan is subject to the provisions of Title I of the Employee Retirement Income Security Act of 1976, as amended (“ERISA”). This plan covers all full-time employees of the Group who are age twenty-one or older. Under this plan, participants may contribute each year up to \$17,000. The Group currently contributes 80 cents for each dollar contributed by an employee, up to \$832 per employee. The Group’s matching contribution is invested in shares of its common stock. During 2013, the Group is changing the matching contribution to 50 cents for each dollar contributed by an employee, up to 4% of such employee’s base salary. The new matching contribution will be invested in accordance with the employee’s decision between the available investment alternatives provided by the plan. This plan is entitled to acquire and hold qualified employer securities as part of its investment of the trust assets pursuant to ERISA Section 407. The Group contributed 29,317 shares in 2012, 24,128 shares in 2011, and 15,242 shares in 2010 of its common stock at a cost of approximately \$60,938, \$42,789, and \$29,267, respectively, at the time of contribution. The Group’s contribution becomes 100% vested once the employee completes three years of service.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Also, the Group offers to its senior management a non-qualified deferred compensation plan, where executives can defer taxable income. Both the employer and the employee have flexibility because non-qualified plans are not subject to ERISA contribution limits nor are they subject to discrimination tests in terms of who must be included in the plan. Under this plan, the employee's current taxable income is reduced by the amount being deferred. Funds deposited in a deferred compensation plan can accumulate without current income tax to the individual. Income taxes are due when the funds are withdrawn.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 15 — RELATED PARTY TRANSACTIONS

The Bank grants loans to its directors, executive officers and to certain related individuals or organizations in the ordinary course of business. These loans are offered at the same terms as loans to unrelated third parties. As of December 31, 2012 and 2011, these loan balances amounted to \$6.1 million and \$3.8 million, respectively. The activity and balance of these loans for the years ended December 31, 2012 and 2011, were as follows:

		Year Ended December 31,	
		2012	2011
		(In thousands)	
Balance at the beginning of period	\$	3,772	\$ 3,452
New loans		2,435	615
Repayments		(95)	(108)
Credits of persons no longer considered related parties		(57)	(187)
Balance at the end of period	\$	6,055	\$ 3,772

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 16 — INCOME TAXES

Under Puerto Rico law, all companies are treated as separate taxable entities and are not entitled to file consolidated returns. The Group and its subsidiaries are subject to Puerto Rico regular income tax or AMT on income earned from all sources. The AMT is payable if it exceeds regular income tax. The excess of AMT over regular income tax paid in any one year may be used to offset regular income tax in future years, subject to certain limitations.

The components of income tax expense (benefit) for the years ended December 31, 2012, 2011 and 2010 are as follows:

	Year Ended December 31,		
	2012	2011	2010
	(In thousands)		
Current income tax expense	\$ 1,788	\$ 2,229	\$ 5,794
Deferred income tax expense (benefit)	1,513	(1,363)	(10,092)
	<u>\$ 3,301</u>	<u>\$ 866</u>	<u>\$ (4,298)</u>

The Group maintained an effective tax rate lower than the maximum marginal statutory rate of 30.00%, 30.00%, and 40.95% as of December 31, 2012, 2011 and 2010, respectively, mainly due to exempt income generated by OIB in 2012, and income generated by OIB in 2011 and 2010, which was taxed at 5%, and to the interest income arising from investments exempt from Puerto Rico income taxes, net of expenses attributable to the exempt income. For 2012, 2011 and 2010 the Bank's investment securities portfolio and loans portfolio generated tax-exempt interest income of \$6.2 million, \$9.8 million, and \$28.6 million, respectively. For 2012, OIB generated \$15.3 million in exempt income. For 2011 and 2010 OIB, generated \$36.9 million and \$15.5 million in income taxable at a 5% income tax rate.

Pursuant to the Declaration of Fiscal Emergency and Plan for Economic Stabilization and Restoration of the Puerto Rico Credit Act of March 9, 2009, for the 2009 and 2010 taxable years every taxable corporation engaged in trade or business in Puerto Rico, including banks and insurance companies, was subject to an additional 5% surcharge on corporate income tax, increasing the maximum tax rate from 39% to 40.95%. Also, income earned by international banking entities, which was previously fully exempt, was subject to a 5% income tax for the 2009, 2010 and 2011 tax years. These taxes were imposed on a temporary basis as a measure to generate additional revenue to address the fiscal crisis of the government of Puerto Rico.

The Group's income tax expense differs from amounts computed by applying the applicable statutory rate to income before income taxes as follows:

	Year Ended December 31,					
	2012		2011		2010	
	Amount	Rate	Amount	Rate	Amount	Rate
	(Dollars in thousands)					
Tax at statutory rates	\$ 8,357	30.00%	\$ 10,595	30.00%	\$ 2,267	40.95%

Other items, net	823	2.96%	739	2.10%	2,034	36.74%
Income tax expense (benefit)	<u>\$ 3,301</u>	<u>11.85%</u>	<u>\$ 866</u>	<u>2.45%</u>	<u>\$ (4,298)</u>	<u>-77.64%</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The tax effect expected of the income earned by OIB is included in the “tax effect of exempt income, net” caption on the table above and amounted to \$4.6 million, \$9.2 million and \$5.6 million for the years ended December 31, 2012, 2011 and 2010, respectively.

The determination of deferred tax expense or benefit is based on changes in the carrying amounts of assets and liabilities that generate temporary differences. The carrying value of the Group’s net deferred tax assets assumes that the Group will be able to generate sufficient future taxable income based on estimates and assumptions. If these estimates and related assumptions change in the future, the Group may be required to record valuation allowances against its deferred tax assets resulting in additional income tax expense in the consolidated statements of operations.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The components of the Group's deferred tax asset, net, at December 31, 2012 and 2011 are as follows:

	December 31,	
	2012	2011
	(In thousands)	
Deferred tax asset:		
Allowance for loan and lease losses and other reserves	\$ 28,214	\$ 22,281
FDIC-assisted acquisition	9,537	11,967
BBVAPR loans and other real estate valuation adjustments	82,637	-
BBVAPR operating loss carryforwards	5,250	-
BBVAPR deposit and borrowings valuation adjustment	4,069	-
BBVAPR other deferred tax assets, net	4,381	-
Deferred loan origination fees, net	1,906	1,417
Unrealized net loss included in other comprehensive income	5,299	5,312
S&P option contracts	4,663	4,670
Net capital and operating loss carryforwards	9,192	7,368
Other deferred tax assets	3,914	2,605
Total gross deferred tax asset	<u>159,062</u>	<u>55,620</u>
Deferred tax liability:		
FDIC shared-loss indemnification asset	(16,330)	(12,072)
BBVAPR core deposit and customer relationship intangibles	(4,034)	-
BBVAPR building valuation adjustment	(8,708)	-
Unrealized net gain on available-for-sale securities	(6,598)	(4,273)
Servicing asset	(3,222)	(3,070)
Other deferred tax liabilities	(552)	(1,211)
Total gross deferred tax liabilities	<u>(39,444)</u>	<u>\$ (20,626)</u>
Less: valuation allowance	<u>(2,417)</u>	<u>(2,971)</u>
Net deferred tax asset	<u><u>\$ 117,201</u></u>	<u><u>\$ 32,023</u></u>

In assessing the realizability of the deferred tax asset, management considers whether it is more likely than not that some portion or the entire deferred tax asset will not be realized. The ultimate realization of the deferred tax asset is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax asset are deductible, management believes it is more likely than not that the Group will realize the benefits of these deductible differences, net of the existing valuation allowances at December 31, 2012. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

The holding company and its subsidiaries have operating and capital loss carry-forwards for income tax purposes which are available to offset future taxable income and capital gains. Operating loss carry-forwards are available until December 2022 and capital loss carry-forwards are available until December 2017. The majority of these operating and capital loss carry-forwards are at the Bank amounting to approximately \$36.0 million as of December 31, 2012.

The Group follows a two-step approach for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation process, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement.

The Group classifies unrecognized tax benefits in income taxes payable. These gross unrecognized tax benefits would affect the effective tax rate if realized. The balance of unrecognized tax benefits at December 31, 2012 and 2011 was \$1.5 million and \$1.4

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

million, respectively. Currently, only the 2010 tax period remains subject to examination by the Puerto Rico Treasury Department. It is the Group's policy to include interest and penalties related to unrecognized tax benefits within the provision for taxes on the consolidated statements of operations. The Group had accrued \$796 thousand at December 31, 2012 (December 31, 2011 — \$342 thousand) for the payment of interest and penalties relating to unrecognized tax benefits.

As part of the BBVAPR Acquisition there are unrecognized tax benefits amounting to \$3.9 million, including \$665 thousand in interest and penalties. This balance was recorded as part of the purchase accounting and mainly relates to the methodology followed in allocating interest expense among the Bank and the IBE Unit.

NOTE 17 — STOCKHOLDERS' EQUITY

Regulatory Capital Requirements

The Group (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by federal and Puerto Rico banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Group's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Group and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. This has changed under the Dodd-Frank Act, which requires federal banking regulators to establish minimum leverage and risk-based capital requirements, on a consolidated basis, for insured institutions, depository institutions, depository institution holding companies, and non-bank financial companies supervised by the Federal Reserve Board. The minimum leverage and risk-based capital requirements are to be determined based on the minimum ratios established for insured depository institutions under prompt corrective action regulations.

Quantitative measures established by regulation to ensure capital adequacy require the Group and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined in the regulations) and of Tier 1 capital to average assets (as defined in the regulations). As of December 31, 2012 and 2011, the Group and the Bank met all capital adequacy requirements to which they are subject. As of December 31, 2012 and 2011, the FDIC categorized the Bank as "well capitalized" under the regulatory framework for prompt corrective action. To be categorized as "well capitalized," an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The Group's and the Bank's actual capital amounts and ratios as of December 31, 2012 and 2011 are as follows:

	Actual		Minimum Capital Requirement	
	Amount	Ratio	Amount	Ratio

Bank Ratios

As of December 31, 2012

Total capital to risk-weighted assets	\$ 719,675	14.03%	\$ 410,268	8.00%	\$ 512,835	10.00%
Tier 1 capital to risk-weighted assets	\$ 604,997	11.80%	\$ 205,134	4.00%	\$ 307,701	6.00%
Tier 1 capital to total assets	\$ 604,997	5.75%	\$ 420,607	4.00%	\$ 525,759	5.00%

As of December 31, 2011

Total capital to risk-weighted assets	\$ 643,065	31.07%	\$ 165,573	8.00%	\$ 206,967	10.00%
Tier 1 capital to risk-weighted assets	\$ 616,590	29.79%	\$ 82,787	4.00%	\$ 124,180	6.00%
Tier 1 capital to total assets	\$ 616,590	9.06%	\$ 272,177	4.00%	\$ 340,221	5.00%

The Group's ability to pay dividends to its shareholders and other activities can be restricted if its capital falls below levels established by the Federal Reserve Board's guidelines. In addition, any bank holding company whose capital falls below levels specified in the guidelines can be required to implement a plan to increase capital.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Equity-Based Compensation Plan

The Omnibus Plan provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, and dividend equivalents, as well as equity-based performance awards. The Omnibus Plan replaced and superseded the Stock Option Plans. All outstanding stock options under the Stock Option Plans continue in full force and effect, subject to their original terms.

The activity in outstanding options for the years ended December 31, 2012, 2011 and 2010 is set forth below:

	Year Ended December 31,					
	2012		2011		2010	
	Number Of Options	Weighted Average Exercise Price	Number Of Options	Weighted Average Exercise Price	Number Of Options	Weighted Average Exercise Price
Beginning of period	786,704	\$ 15.02	765,989	\$ 15.25	514,376	\$ 16.86
Options granted	204,543	11.83	85,000	11.90	262,700	11.97

	922,593	\$ 14.50	5.7	453,728	\$ 17.19
Aggregate Intrinsic Value	\$ 947,210			\$ 252,455	

The average fair value of each option granted during 2012, 2011 and 2010 was \$5.41, \$6.48 and \$6.66, respectively. The average fair value of each option granted was estimated at the date of the grant using the Black-Scholes option pricing model. The Black-Scholes option-pricing model was developed for use in estimating the fair value of traded options that have no restrictions and are fully transferable and negotiable in a free trading market. Black-Scholes does not consider the employment, transfer or vesting restrictions that are inherent in the Group's stock options. Use of an option valuation model, as required by GAAP, includes highly subjective assumptions based on long-term predictions, including the expected stock price volatility and average life of each option grant.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following assumptions were used in estimating the fair value of the options granted during the years ended December 31, 2012, 2011 and 2010:

	Year Ended December 31,		
	2012	2011	2010
Weighted average assumptions:			
Dividend yield	1.80%	1.62%	1.47%
Expected volatility	51.13%	58.99%	60.00%
Risk-free interest rate	1.70%	3.11%	3.07%
Expected life (in years)	8.0	8.0	8.0

The following table summarizes the restricted units' activity under the Omnibus Plan for the years ended December 31, 2012, 2011 and 2010:

	Year Ended December 31,					
	2012		2011		2010	
	Restricted Units	Weighted Average Grant Date Fair Value	Restricted Units	Weighted Average Grant Date Fair Value	Restricted Units	Weighted Average Grant Date Fair Value
Beginning of period	205,149	\$ 11.27	243,525	\$ 13.43	147,625	\$ 14.64
Restricted units granted	57,350	11.85	39,500	11.88	131,000	11.88
Restricted units lapsed	(47,210)	8.29	(59,916)	20.65	(30,000)	12.49
Restricted units forfeited	(17,789)	11.48	(17,960)	11.67	(5,100)	14.12
End of period	197,500	\$ 12.13	205,149	\$ 11.27	243,525	\$ 13.43

Preferred Stock

In connection with the BBVAPR Acquisition, as discussed in Note 2, on July 3, 2012, the Group completed its sale to various institutional purchasers of \$84 million of its Convertible Preferred Stock, with a conversion price, subject to certain conditions, of \$11.77 per share of common stock, through a private placement, pursuant to a Subscription Agreement dated June 28, 2012, between the Group and each of the purchasers. In addition, on November 5, 2012 the Group sold 960,000 shares of its Series D Preferred Stock at an offering price of \$25 per share in a registered public offering.

Common Stock

In connection with the BBVAPR Acquisition, as discussed in Note 2, on October 31, 2012 the Group sold 4,829,267 shares of its common stock at an offering price of \$11.10 per share in a registered public offering.

Additional paid-in capital

Additional paid-in capital represents contributed capital in excess of par value of common and preferred stock net of costs of the issuance. As of December 31, 2012, accumulated issuance costs charged against additional paid in capital amounted to \$10.1 million and \$13.6 million for preferred and common stock, respectively.

Legal Surplus

The Puerto Rico Banking Act requires that a minimum of 10% of the Bank's net income for the year be transferred to a reserve fund until such fund (legal surplus) equals the total paid in capital on common and preferred stock. At December 31, 2012 and 2011, legal surplus amounted to \$52.1 million and \$50.2 million, respectively. The amount transferred to the legal surplus account is not available for the payment of dividends to shareholders.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Earnings per Common Share

The calculation of earnings per common share for the years ended December 31, 2012, 2011 and 2010 is as follows:

	Year Ended December 31,		
	2012	2011	2010
Net income	\$ 24,555	\$ 34,450	\$ 9,834
Less: Dividends on preferred stock			
Non-Convertible Preferred Stock (Series A, B, and D)	(6,264)	(4,802)	(4,802)
Convertible preferred stock (Series C)	(3,675)	-	(533)
Less: Deemed dividend on preferred stock beneficial conversion feature	-	-	(22,711)
Income available to common shareholders	\$ 14,616	\$ 29,648	\$ (18,212)
Effect of assumed conversion of the Convertible Preferred Stock	3,675	-	533
Income available to common shareholders assuming conversion	\$ 18,291	\$ 29,648	\$ (17,679)
Weighted average common shares and share equivalents:			
Average common shares outstanding	41,626	44,433	36,704
Effect of dilutive securities:			
Average potential common shares-options	109	91	106
Average potential common shares-assuming conversion of convertible preferred stock	3,569	-	-
Total weighted average common shares outstanding and equivalents	45,304	44,524	36,810
Earnings (loss) per common share - basic	\$ 0.35	\$ 0.67	\$ (0.50)
Earnings (loss) per common share - diluted	\$ 0.35	\$ 0.67	\$ (0.50)

In computing diluted earnings per common share, the 84,000 shares of convertible preferred stock, which remained outstanding at December 31, 2012, with a conversion rate, subject to certain conditions, of 84.9798 shares of common stock per share, were included as average potential common shares from the date they were outstanding. Moreover, in computing diluted earnings per common share, the dividends declared during the year ended December 31, 2012 on the convertible preferred stock were added back as income available to common shareholders.

The conversion of the Group's Mandatorily Convertible Non-Cumulative Non-Voting Perpetual Preferred Stock, Series C, into shares of the Group's common stock during the year ended December 31, 2010, resulted in a non-cash beneficial conversion feature of \$22.7 million, representing the intrinsic value between the conversion rate of \$15.015 and the common stock closing price of \$16.72 on April 30, 2010, the date the preferred shares were offered. Upon conversion, the beneficial conversion feature was recorded as a deemed dividend to the preferred stockholders reducing retained earnings, with a corresponding offset to surplus (paid in capital), and thus did not affect total stockholders' equity or the book value of the common stock. However, the deemed dividend increased the net loss applicable to common stock and affected the calculation of basic and diluted EPS for the year ended December 31, 2010. Moreover, in computing diluted EPS, dilutive convertible securities that remained outstanding for the period prior to actual conversion were not included as average potential common shares because the effect would have been antidilutive. In computing both basic and diluted EPS, the common shares issued upon actual conversion were included in the weighted average calculation of common shares after the date of conversion.

For the years ended December 31, 2012, 2011 and 2010, weighted-average stock options with an anti-dilutive effect on earnings per share not included in the calculation amounted to 697,976, 529,093 and 214,256, respectively.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Treasury Stock

On February 3, 2011, the Group announced that its Board of Directors had approved a stock repurchase program pursuant to which the Group was authorized to purchase in the open market up to \$30 million of its outstanding shares of common stock. On June 29, 2011, the Group announced the completion of the \$30 million stock repurchase program and the approval by the Board of Directors of a new program to purchase an additional \$70 million of common stock in the open market.

Any shares of common stock repurchased are held by the Group as treasury shares. The Group records treasury stock purchases under the cost method whereby the entire cost of the acquired stock is recorded as treasury stock. Under the \$30 million program, initiated in February 2011, the Group purchased a total of 2,406,303 shares at an average price of \$12.10 per share. During 2012, the Group purchased approximately 603,000 additional shares under this program for a total of \$7.0 million, at an average price of \$11.61 per share. During 2011, the Group purchased approximately 2,783,000 shares under the \$70 million program for a total of \$29.4 million, at an average price of \$10.57 per share.

The activity in connection with common shares held in treasury by the Group for the years ended December 31, 2012, 2011 and 2010 is set forth below:

	Year Ended December 31,					
	2012		2011		2010	
	Shares	Dollar Amount	Shares	Dollar Amount	Shares	Dollar Amount
	(In thousands, except shares data)					
Beginning of period	6,564,124	\$ 74,808	1,459,067	\$ 16,732	1,504,309	\$ 17,142
Common shares used upon lapsing of restricted stock units	(47,210)	(494)	(59,916)	(656)	(30,000)	(380)
Common shares repurchased as part of the stock repurchase program	603,000	7,022	5,189,101	58,775	-	-
Common shares repurchased (used) to match defined contribution plan, net	(29,317)	(61)	(24,128)	(43)	(15,242)	(30)
End of period	7,090,597	\$ 81,275	6,564,124	\$ 74,808	1,459,067	\$ 16,732

Accumulated Other Comprehensive Income

Accumulated other comprehensive income, net of income tax, as of December 31, 2012 and 2011 consisted of:

	December 31,	
	2012	2011
	(In thousands)	
Unrealized gain on securities available-for-sale which are not other-than-temporarily impaired	\$ 75,347	\$ 86,404
Income tax effect of unrealized gain on securities available-for-sale	(7,102)	(7,160)
Unrealized loss on cash flow hedges	(17,664)	(47,425)
Income tax effect of unrealized loss on cash flow hedges	5,299	5,312
	\$ 55,880	\$ 37,131

At December 31, 2012 and 2011, OIB had \$504 thousand and \$2.9 million, respectively, in the income tax effect of unrecognized gain on available-for-sale securities included in other comprehensive income. Following the change in OIB's applicable tax rate from 5% to 0% as a result of a new Puerto Rico law adopted in 2011, this remaining tax balance will flow through income as these securities are repaid or sold in future periods. During 2012, \$2.4 million related to this residual tax effect from OIB was reclassified from accumulated other comprehensive income into income tax provision. This transaction had no effect during 2011.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 18 — COMMITMENTS

Loan Commitments

In the normal course of business, the Group becomes a party to credit-related financial instruments with off-balance-sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby and commercial letters of credit, and financial guarantees. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated statements of financial condition. The contract or notional amount of those instruments reflects the extent of the Group's involvement in particular types of financial instruments.

Commitments to Extend Credit and Commercial Letters of Credit — The Group's exposure to credit losses in the event of nonperformance by the counterparty to the financial instrument for commitments to extend credit, including commitments under credit card arrangements, and commercial letters of credit is represented by the contractual notional amount of those instruments, which do not necessarily represent the amounts potentially subject to risk. In addition, the measurement of the risks associated with these instruments is meaningful only when all related and offsetting transactions are identified. The Group uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Summarized credit-related financial instruments at December 31, 2012 and 2011, were as follows:

	December 31,	
	2012	2011
	(In thousands)	
Commitments to extend credit	\$ 591,679	\$ 92,841
Commercial letters of credit	2,918	204

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Commitments from loans acquired as part of the BBVAPR Acquisition amounted to \$461.6 at December 31, 2012. Commitments to extend credit represent agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Group evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Group upon the extension of credit, is based on management's credit evaluation of the counterparty.

At December 31, 2012 and 2011, commitments to extend credit consisted mainly of undisbursed available amounts on commercial lines of credit, construction loans, and revolving credit card arrangements. Since many of the unused commitments are expected to expire unused or be only partially used, the total amount of these unused commitments does not necessarily represent future cash requirements. These lines of credit had a reserve of \$362 thousand and \$518 thousand at December 31, 2012 and 2011, respectively.

Commercial letters of credit are issued or confirmed to guarantee payment of customers' payables or receivables in short-term international trade transactions. Generally, drafts will be drawn when the underlying transaction is consummated as intended. However, the short-term nature of this instrument serves to mitigate the risk associated with these contracts.

The summary of instruments that are considered financial guarantees in accordance with the authoritative guidance related to guarantor's accounting and disclosure requirements for guarantees, including indirect guarantees of indebtedness of others, at December 31, 2012 and 2011, is as follows:

	December 31,	
	2012	2011
	(In thousands)	
Standby letters of credit and financial guarantees	\$ 69,789	\$ 2,350
Loans sold with recourse	172,492	10,147
Commitments to sell or securitize mortgage loans	83,663	66,142

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Standby letters of credit and financial guarantees are written conditional commitments issued by the Group to guarantee the payment and/or performance of a customer to a third party (“beneficiary”). If the customer fails to comply with the agreement, the beneficiary may draw on the standby letter of credit or financial guarantee as a remedy. The amount of credit risk involved in issuing letters of credit in the event of nonperformance is the face amount of the letter of credit or financial guarantee. These guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. The amount of collateral obtained, if it is deemed necessary by the Group upon extension of credit, is based on management’s credit evaluation of the customer. During the years ended December 31, 2012 and 2011, no performance was required on any financial guarantees. As part of the BBVAPR Acquisition, the Group assumed \$65.9 million of standby letters of credit and \$169.3 million of loans sold without recourse commitments at December 31, 2012. The Group does not expect any significant losses under these obligations.

Lease Commitments

The Group has entered into various operating lease agreements for branch facilities and administrative offices. Rent expense for the years ended December 31, 2012, 2011, and 2010 amounted to \$6.7 million, \$6.1 million, and \$7.6 million, respectively, and is included in the “occupancy and equipment” caption in the consolidated statements of operations. Future rental commitments under leases in effect at December 31, 2012, exclusive of taxes, insurance, and maintenance expenses payable by the Group, are summarized as follows:

<u>Year Ending December 31,</u>	<u>Minimum Rent</u>
	<u>(In thousands)</u>
2013	\$ 9,481
2014	8,720
2015	8,375
2016	7,516
2017	7,923
Thereafter	24,051
	<u>\$ 66,066</u>

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

NOTE 19 — CONTINGENCIES

The Group and its subsidiaries are defendants in a number of legal proceedings incidental to their business. In the ordinary course of business, the Group and its subsidiaries are also subject to governmental and regulatory examinations. Certain subsidiaries of the Group, including the Bank, Oriental Financial Services, OFS Securities and Oriental Insurance, are subject to regulation by various U.S., Puerto Rico and other regulators.

The Group seeks to resolve all litigation and regulatory matters in the manner management believes is in the best interests of the Group and its shareholders, and contests allegations of liability or wrongdoing and, where applicable, the amount of damages or scope of any penalties or other relief sought as appropriate in each pending matter.

Subject to the accounting and disclosure framework under the provisions of ASC 450, it is the opinion of the Group's management, based on current knowledge and after taking into account its current legal accruals, that the eventual outcome of all matters would not be likely to have a material adverse effect on the consolidated statements of financial condition of the Group. Nonetheless, given the substantial or indeterminate amounts sought in certain of these matters, and the inherent unpredictability of such matters, an adverse outcome in certain of these matters could, from time to time, have a material adverse effect on the Group's consolidated results of operations or cash flows in particular quarterly or annual periods. The Group has evaluated all litigation and regulatory matters where the likelihood of a potential loss is deemed reasonably possible. The Group has determined that the estimate of the reasonably possible loss is not significant.

NOTE 20 - FAIR VALUE

As discussed in Note 1, the Group follows the fair value measurement framework under GAAP.

Fair Value Measurement

The fair value measurement framework defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This framework also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs previously described that may be used to measure fair value.

Money market investments

The fair value of money market investments is based on the carrying amounts reflected in the consolidated statements of financial condition as these are reasonable estimates of fair value given the short-term nature of the instruments.

Investment securities

The fair value of investment securities is based on quoted market prices, when available, or market prices provided by recognized broker-dealers. If listed prices or quotes are not available, fair value is based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument. The Group holds two securities categorized as other debt that are classified as Level 3. The estimated fair value of the other debt securities is determined by using a third-party model to calculate the present value of projected future cash flows. The assumptions are highly uncertain and include primarily market discount rates, current spreads, and an indicative pricing. The assumptions used are drawn from similar securities that are actively traded in the market and have similar characteristics as the collateral underlying the debt securities being evaluated. The valuation is performed on a monthly basis.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Derivative instruments

The fair value of the interest rate swaps is largely a function of the financial market's expectations regarding the future direction of interest rates. Accordingly, current market values are not necessarily indicative of the future impact of derivative instruments on earnings. This will depend, for the most part, on the shape of the yield curve, the level of interest rates, as well as the expectations for rates in the future. The fair value of most of these derivative instruments is based on observable market parameters, which include discounting the instruments' cash flows using the U.S. dollar LIBOR-based discount rates, and also applying yield curves that account for the industry sector and the credit rating of the counterparty and/or the Group.

Certain other derivative instruments with limited market activity are valued using externally developed models that consider unobservable market parameters. Based on their valuation methodology, derivative instruments are classified as Level 2 or Level 3. The Group has offered its customers certificates of deposit with an option tied to the performance of the S&P Index and uses equity indexed option agreements with major broker-dealers to manage its exposure to changes in this index. Their fair value is obtained through the use of an external based valuation that was thoroughly evaluated and adopted by management as its measurement tool for these options. The payoff of these options is linked to the average value of the S&P Index on a specific set of dates during the life of the option. The methodology uses an average rate option or a cash-settled option whose payoff is based on the difference between the expected average value of the S&P Index during the remaining life of the option and the strike price at inception. The assumptions, which are uncertain and require a degree of judgment, include primarily S&P Index volatility, forward interest rate projections, estimated index dividend payout, and leverage.

Servicing assets

Servicing assets do not trade in an active market with readily observable prices. Servicing assets are priced using a discounted cash flow model. The valuation model considers servicing fees, portfolio characteristics, prepayment assumptions, delinquency rates, late charges, other ancillary revenues, cost to service and other economic factors. Due to the unobservable nature of certain valuation inputs, the servicing rights are classified as Level 3.

Loans receivable considered impaired that are collateral dependent

The impairment is measured based on the fair value of the collateral, which is derived from appraisals that take into consideration prices in observed transactions involving similar assets in similar locations, in accordance with the provisions of ASC 310-10-35. Currently, the associated loans considered impaired are classified as Level 3.

Foreclosed real estate

Foreclosed real estate includes real estate properties securing residential mortgage and commercial loans. The fair value of foreclosed real estate may be determined using an external appraisal, broker price option or an internal valuation. These foreclosed assets are classified as Level 3 given certain internal adjustments that may be made to external appraisals.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Assets and liabilities measured at fair value on a recurring and non-recurring basis, including financial liabilities for which the Group has elected the fair value option, are summarized below:

During 2012, 2011 and 2010 there were purchases and sales of assets and liabilities measured at fair value on a recurring basis. There were no transfers into and out of Level 1 and Level 2 fair value measurements during the years ended December 31, 2012, 2011 and 2010.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The table below presents quantitative information for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) at December 31, 2012:

December 31, 2012				
	Fair Value (In thousands)	Valuation Technique	Unobservable Input	Range
Investment securities available-for-sale:				
Other debt securities	\$ 20,012	Market comparable bonds	Indicative pricing	100.4% - 101.5%
			Option adjusted spread	223.7% - 287.9%
			Yield to maturity	2.5% - 3.3%
			Spread to maturity	223.7% - 287.5%
Derivative assets (S&P Purchased Options)	\$ 13,233	Option pricing model	Implied option volatility	13.1% - 33.9%
			Counterparty credit risk (based on 5-year credit default swap ("CDS") spread)	89.8% - 167.2%
Servicing assets	\$ 10,795	Cash flow valuation	Constant prepayment rate	9.43% - 33.05%
			Discount rate	10.50% - 13.50%
Derivative liability (S&P Embedded Options)	\$ (12,707)	Option pricing model	Implied option volatility	13.1% - 33.9%
			Counterparty credit risk (based on 5-year CDS spread)	89.8% - 167.2%
Collateral dependant impaired loans	\$ 35,917	Fair value of property or collateral	Appraised value	Not meaningful

Information about Sensitivity to Changes in Significant Unobservable Inputs

CLOs – The significant unobservable inputs used in the fair value measurement of the Group’s CLOs are prepayment rates, probability of default, and loss severity in the event of default. Significant changes in any of those inputs in isolation would result in a significantly different fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally, although not equally proportional, opposite change in the assumption used for prepayment rates.

Other debt securities – The significant unobservable inputs used in the fair value measurement of one of the Group’s other debt securities are indicative comparable pricing, option adjusted spread (“OAS”), yield to maturity, and spread to maturity. Significant changes in any of those inputs in isolation would result in a significantly different fair value measurement. Generally, a change in the assumption used for indicative comparable pricing is accompanied by a directionally opposite change in the assumption used for OAS and a directionally, although not equally proportional, opposite change in the assumptions used for yield to maturity and spread to maturity.

Derivative asset (S&P Purchased Options) – The significant unobservable inputs used in the fair value measurement of Group’s derivative assets related to S&P purchased options are implied option volatility and counterparty credit risk. Significant changes in any of those inputs in isolation would result in a significantly different fair value measurement. Generally, a change in the assumption used for implied option volatility is not necessarily accompanied by directionally similar or opposite changes in the assumption used for counterparty credit risk.

Servicing assets – The significant unobservable inputs used in the fair value measurement of the Group’s servicing assets are constant prepayment rates and discount rates. Changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or offset the sensitivities. Mortgage banking activities, a component of total banking and financial service revenue in the consolidated statements of operations, include the changes from period to period in the fair value of the mortgage loan servicing rights, which may result from changes in the valuation model inputs or assumptions (principally reflecting changes in discount rates and prepayment speed assumptions) and other changes, including changes due to collection/realization of expected cash flows.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Derivative liability (S&P Embedded Options) – The significant unobservable inputs used in the fair value measurement of the Group’s derivative liability related to S&P purchased options are implied option volatility and counterparty credit risk. Significant changes in any of those inputs in isolation would result in a significantly different fair value measurement. Generally, a change in the assumption used for implied option volatility is not necessarily accompanied by directionally similar or opposite changes in the assumption used for counterparty credit risk.

The table below presents a detail of investment securities available-for-sale classified as Level 3 at December 31, 2012:

<u>Type</u>	December 31, 2012				
	Amortized Cost	Unrealized Gains (Losses)	Fair Value	Weighted Average Yield	Principal Protection
	(In thousands)				
Other debt securities	\$ 20,000	\$ 12	\$ 20,012	3.50%	N/A
Total	\$ 20,000	\$ 12	\$ 20,012	3.50%	

Fair Value of Financial Instruments

The information about the estimated fair value of financial instruments required by GAAP is presented hereunder. The aggregate fair value amounts presented do not necessarily represent management’s estimate of the underlying value of the Group.

The estimated fair value is subjective in nature, involves uncertainties and matters of significant judgment, and therefore, cannot be determined with precision. Changes in assumptions could affect these fair value estimates. The fair value estimates do not take into consideration the value of future business and the value of assets and liabilities that are not financial instruments. Other significant tangible and intangible assets that are not considered financial instruments are the value of long-term customer relationships of retail deposits, and premises and equipment.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The estimated fair value and carrying value of the Group's financial instruments at December 31, 2012 and 2011 is as follows:

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following methods and assumptions were used to estimate the fair values of significant financial instruments at December 31, 2012 and 2011:

- Cash and cash equivalents (including money market investments and time deposits with other banks), accrued interest receivable, securities purchased under agreements to resell, accrued expenses and other liabilities have been valued at the carrying amounts reflected in the consolidated statements of financial condition as these are reasonable estimates of fair value given the short-term nature of the instruments.
- Investments in FHLB stock are valued at their redemption value.
- The fair value of investment securities, including trading securities, is based on quoted market prices, when available, or market prices provided by recognized broker-dealers. If listed prices or quotes are not available, fair value is based upon externally developed models that use both observable and unobservable inputs depending on the market activity of the instrument. The estimated fair value of the structured credit investments is determined by using a third-party cash flow valuation model to calculate the present value of projected future cash flows. The assumptions used, which are highly uncertain and require a high degree of judgment, include primarily market discount rates, current spreads, duration, leverage, default, home price depreciation, and loss rates. The assumptions used are drawn from a wide array of data sources, including the performance of the collateral underlying each deal. The external-based valuation, which is obtained at least on a quarterly basis, is analyzed and its assumptions are evaluated and incorporated in either an internal-based valuation model when deemed necessary, or compared to counterparties' prices and agreed by management.
- The fair value of the FDIC shared-loss indemnification asset represents the present value of the estimated cash payments (net of amounts owed to the FDIC) expected to be received from the FDIC for future losses on covered assets based on the credit assumptions on estimated cash flows for each covered asset pool and the loss sharing percentages. The ultimate collectability of the FDIC shared-loss indemnification asset is dependent upon the performance of the underlying covered loans, the passage of time and claims paid by the FDIC which are impacted by the Bank's adherence to certain guidelines established by the FDIC.
- The fair value of servicing assets is estimated by using a cash flow valuation model which calculates the present value of estimated future net servicing cash flows, taking into consideration actual and expected loan prepayment rates, discount rates, servicing costs, and other economic factors, which are determined based on current market conditions.
- The fair values of the derivative instruments are provided by valuation experts and counterparties. Certain derivatives with limited market activity are valued using externally developed models that consider unobservable market parameters. The Group has offered its customers certificates of deposit with an option tied to the performance of the S&P Index, and uses equity indexed option agreements with major broker-dealers to manage its exposure to changes in this index. Their fair value is obtained through the use of an external based valuation that was thoroughly evaluated and adopted by management as its measurement tool for these options. The payoff of these options is linked to the average value of the S&P Index on a specific set of dates during the life of the option. The methodology uses an average rate option or a cash-settled option whose payoff is based on the difference between the expected average value of the S&P Index during the remaining life of the option and the strike price at inception. The assumptions, which are uncertain and require a degree of judgment, include primarily S&P Index volatility, forward interest rate projections, estimated index dividend payout, and leverage.
- Fair value of derivative liabilities, which include interest rate swaps and forward-settlement swaps, are based on the net discounted value of the contractual projected cash flows of both the pay-fixed receive-variable legs of the contracts. The projected cash flows are based on the forward yield curve, and discounted using current estimated market rates.
- The fair value of the covered and non-covered loan portfolio (including loans held-for-sale) is estimated by segregating by type, such as mortgage, commercial, consumer, and leasing. Each loan segment is further segmented into fixed and adjustable interest rates and by performing and non-performing categories. The fair value of performing loans is calculated by discounting contractual cash flows, adjusted for prepayment estimates (voluntary and involuntary), if any, using estimated current market discount rates that reflect the credit and interest rate risk inherent in the loan. This fair value is not currently an indication of an exit price as that type of assumption could result in a different fair value estimate.
- The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is based on the discounted value of the contractual cash flows, using estimated current market discount rates for deposits of similar remaining maturities.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

- For short term borrowings, the carrying amount is considered a reasonable estimate of fair value. The fair value of long-term borrowings, which include securities sold under agreements to repurchase, advances from FHLB, FDIC-guaranteed term notes, other term notes, and subordinated capital notes is based on the discounted value of the contractual cash flows using current estimated market discount rates for borrowings with similar terms, remaining maturities and put dates.
- The fair value of commitments to extend credit and unused lines of credit is based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standings.

NOTE 21 - SEGMENT REPORTING

The Group segregates its businesses into the following major reportable segments of business: Banking, Financial Service, and Treasury. Management established the reportable segments based on the internal reporting used to evaluate performance and to assess where to allocate resources. Other factors such as the Group's organization, nature of its products, distribution channels and economic characteristics of the products were also considered in the determination of the reportable segments. The Group measures the performance of these reportable segments based on pre-established goals of different financial parameters such as net income, net interest income, loan production, and fees generated. The Group's methodology for allocating non-interest expenses among segments is based on several factors such as revenue, employee headcount, occupied space, dedicated services or time, among others. These factors are reviewed on a periodical basis and may change if the conditions warrant. The operations and results of BBVAPR for the period from December 18, 2012 to December 31, 2012 are considered a separate segment from those reportable segments detailed above. During that period, management evaluated the performance of this acquired business as a stand-alone segment rather than allocated to the aforementioned reportable segments. The Group is in the process of assessing the distribution of said operations into existing or new reportable segments. The integration process is expected to occur during the year 2013 and will result in the distribution of said operations into the existing or new reportable segments, as deemed applicable.

Banking includes the Bank's branches and traditional banking products such as deposits and commercial, consumer and mortgage loans. Mortgage banking activities are carried out by the Bank's mortgage banking division, whose principal activity is to originate mortgage loans for the Group's own portfolio. As part of its mortgage banking activities, the Group may sell loans directly into the secondary market or securitize conforming loans into mortgage-backed securities.

Financial Services is comprised of the Bank's trust division, Oriental Financial Services, OFS Securities, Oriental Insurance, and CPC. The core operations of this segment are financial planning, money management and investment banking, brokerage services, insurance sales activity, corporate and individual trust and retirement services, as well as pension plan administration services.

The Treasury segment encompasses all of the Group's asset/liability management activities, such as purchases and sales of investment securities, interest rate risk management, derivatives, and borrowings. Intersegment sales and transfers, if any, are accounted for as if the sales or transfers were to third parties, that is, at current market prices.

NOTE 22 - ORIENTAL FINANCIAL GROUP INC. (HOLDING COMPANY ONLY) FINANCIAL INFORMATION

As a bank holding company subject to the regulations and supervisory guidance of the Federal Reserve Board, the Group generally should inform the Federal Reserve Board and eliminate, defer or significantly reduce its dividends if: (i) its net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (ii) its prospective rate of earnings retention is not consistent with its capital needs and overall current and prospective financial condition; or (iii) it will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios. The payment of dividends by the Bank to the Group may also be affected by other regulatory requirements and policies, such as the maintenance of certain regulatory capital levels. For the year ended December 31, 2012, the Bank paid \$385 million in dividends to the Group. For the year ended December 31, 2011, the Bank and Oriental Insurance paid \$85 million and \$2 million in dividends to the Group, respectively. No dividends were paid during the year ended December 31, 2010.

The following condensed financial information presents the financial position of the holding company only as of December 31, 2012 and 2011, and the results of its operations and its cash flows for the years ended December 31, 2012, 2011 and 2010:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Group's management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. As of December 31, 2012, an evaluation was carried out under the supervision and with the participation of the Group's management, including the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO"), of the effectiveness of the design and operation of the Group's disclosure controls and procedures. Based upon such evaluation, the CEO and CFO have concluded that, as of the end of the period covered by this annual report on Form 10-K, the Group's disclosure controls and procedures provided reasonable assurance of effectiveness in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Group in the reports that it files or submits under the Securities Exchange Act of 1934. Notwithstanding the foregoing, a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that it will detect or uncover failures within the Group to disclose material information otherwise required to be set forth in the Group's periodic reports.

Management's Annual Report on Internal Control over Financial Reporting

The Management's Annual Report on Internal Control over Financial Reporting is included in Item 8 of this report.

Report of the Registered Public Accounting Firm

The registered public accounting firm's report on the Group's internal control over financial reporting is included in Item 8 of this report.

Changes in Internal Control over Financial Reporting

The internal control over financial reporting of the acquired BBVAPR Companies was excluded from the evaluation of effectiveness of the Group's disclosure controls and procedures as of the period end covered by this report because of the timing of the acquisition. As a result of the BBVAPR Acquisition, the Group will be evaluating changes to processes, information technology systems, and other components of internal control over financial reporting as part of its integration process.

There have not been any changes in the Group's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15 (f) under the Exchange Act) during the last quarter of the year ended December 31, 2012, that has materially affected, or is reasonably likely to materially affect, the Group's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

Items 10 through 14 are incorporated herein by reference to the Group's definitive proxy statement to be filed with the SEC no later than 120 days after the end of the fiscal year covered by this report, except with respect to the information set forth below under item 12.

ORIENTAL FINANCIAL GROUP INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The Group's 2007 Omnibus Performance Incentive Plan, as amended and restated (the "Omnibus Plan"), provides for equity-based compensation incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted units and dividend equivalents, as well as equity-based performance awards. The Omnibus Plan was adopted in 2007, amended and restated in 2008, and further amended in 2010. It replaced and superseded the Group's 1996, 1998 and 2000 Incentive Stock Option Plans (the "Stock Option Plans"). All outstanding stock options under the Stock Option Plans continue in full force and effect, subject to their original terms and conditions. The following table shows certain information pertaining to the awards under the Omnibus Plan and the Stock Option Plans as of December 31, 2012:

	(a)		(b)		(c)
	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights		Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights		Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding those reflected in column (a))
Plan Category					
Equity compensation plans approved by shareholders:					
Omnibus Plan	769,574 ⁽¹⁾	\$	8.93 ⁽²⁾	\$	62,824
Stock Option Plans	350,519		18.56 ⁽²⁾		-
	1,120,093	\$	11.95		62,824

(1) Includes 572,074 stock options and 197,500 restricted stock units.

(2) Exercise price related to stock options.

The Group recorded approximately \$1.552 million, \$1.317 million and \$1.194 million related to stock-based compensation expense during the years ended December 31, 2012, 2011 and 2010, respectively.

Other information required by this Item is incorporated herein by reference to the Group's definitive proxy statement to be filed with the SEC no later than 120 days after the end of the fiscal year covered by this report.

PART IV
