2009 ANNUAL REPORT

Energy Metals Limited is pleased to provide its 2009 Annual Report as attached.

The Annual Report will be available on the Company's website and will be despatched to shareholders today together with the Notice of Annual General Meeting and proxy form.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Lindsay Dudgefield'.

LINDSAY DUDFIELD
Executive Director.

CHAIRMAN'S STATEMENT

Dear Shareholders

The financial year ended 30 June 2009 was an extraordinary year, characterised by what was on any standard an unprecedented decline in global economic conditions. This resulted in the rapid and severe decline in commodity prices (Uranium also being effected), and a significant deterioration in share markets around the world.

These circumstances had a major impact on your Company's share price and the Board together with management reacted to these circumstances by adopting a conservative approach to managing the capital and resources of the Company. This was reflected in the reduced exploration spend and control of overheads during the year.

Notwithstanding the difficulties in the severe economic and financial market circumstances the company achieved solid progress on its exploration projects. The Bigirlyi project was once again the main focus of drilling programmes during the year. The results of the drilling have added to the confidence levels in the resources at Bigirlyi and this has been the main driver of the recently announced takeover and capital raising transaction with China Guangdong Nuclear Power Holding Co. Ltd ("CGNPC"). CGNPC is a Chinese incorporated company with total assets of approximately USD 16 billion and net assets of over USD 5 billion.

Shareholders will be aware that Energy Metals has entered into an Implementation Deed with CGNPC Uranium Resources Co., Ltd. ("URC"), under which China Uranium Development Company Limited ("CUD") (both wholly owned subsidiaries of CGNPC) will offer to acquire up to 70% of the outstanding ordinary shares of Energy Metals for \$1.02 cash per share, by means of a proportional takeover bid.

Also, as part of the transaction, CUD will underwrite a 1:9 rights issue by Energy Metals at \$0.90 per share which Energy Metals intends to implement on completion of the proportional takeover bid. The rights issue will raise approximately \$11.7M.

The offer price represents a 19% premium to the closing price on 26 August 2009, and a 60% premium to the 3 month volume weighted average price of Energy Metals shares up to 26 August 2009.

The Bidder's Statement has been lodged by CUD with the ASX and ASIC pending the mail out to shareholders by CUD. A copy of this document can be sourced from the Energy Metals website. At the date of this statement the Target's Statement is close to finalisation and will be sent to shareholders in the near future.

Shareholders should read these documents carefully before making their decision in relation to the offer.

The proposed transaction is unanimously supported by the Board of Energy Metals, subject to no superior offer being tabled.

Both Energy Metals and CGNPC are aligned in their strategic intent to advance the Company's development to become a uranium producer as soon as possible. For Energy Metals, this would mean the Company may release value faster.

Energy Metals' largest shareholder, Jindalee Resources Limited (owning 40%), has stated that it intends to accept the CGNPC offer in the absence of a superior proposal.

I also wish to express our gratitude to all employees for their contributions to the strong results achieved during a year of unexpected challenges. I also compliment the management, for their co-operation and successful implementation of plans and strategies that have kept the Company in good shape during the year.

OSCAR AAMODT

Chairman

2 October 2009

REVIEW OF ACTIVITIES

Energy Metals is a dedicated uranium explorer with nine projects located in the Northern Territory (NT) and Western Australia covering over 4,000 km². Most of the projects contain uranium mineralisation discovered by major companies in the 1970's, including the advanced Bigrlyi Project (NT), which is characterised by relatively high uranium grades (with vanadium credits) and excellent metallurgical recoveries.

NORTHERN TERRITORY

Bigrlyi (EME 53.7%)

The Bigrlyi project comprises 10 granted exploration retention licences located approximately 350 km northwest of Alice Springs. The project, which is a joint venture with Paladin Energy subsidiary Valhalla Uranium (42.1%) and Southern Cross Exploration (4.2%), was subject to significant exploration activity in the period 1974 to 1982, including over 400 drill holes, resource calculations and metallurgical testwork. The project was put on care and maintenance in 1983 following the adoption by the Labor government of the "Three Mines" policy that, together with low uranium prices, stifled the development of new uranium projects in Australia.

WORK COMPLETED 2005 TO 2008

Energy Metals, as manager of the Bigrlyi Joint Venture (BJV), recommenced field activities in November 2005 after a 23 year hiatus and following a detailed environmental assessment of the project and installation of appropriate radiation monitoring procedures. Initial work included re-establishment of the exploration camp, validation of historic drilling and assay data and aboriginal heritage surveys over the Bigrlyi tenements.

REVIEW OF ACTIVITIES Continued

Bigirlyi tenements

Several drilling programs were completed at Bigirlyi from 2005 to 2007 with most holes intersecting significant uranium mineralisation. Uranium and vanadium resource models were successively calculated incorporating results from these drilling programs with an updated resource estimate (summarised below) released in March 2008:

Cut-off (ppm U ₃ O ₈)	Tonnes	U ₃ O ₈ (ppm)	V ₂ O ₅ (ppm)	U ₃ O ₈ (t)	V ₂ O ₅ (t)
Indicated Resources					
500	2,330,600	1,739	2,429	4,053	5,660
1000	1,508,000	2,288	2,877	3,450	4,339
Inferred Resources					
500	5,230,900	1,250	2,705	6,537	14,149
1000	2,527,100	1,819	3,661	4,596	9,251

Tonnes are metric (2204.62 pounds), figures may not total due to rounding.

The resources were estimated by Hellman & Schofield Pty Ltd (H&S) using ordinary kriging (OK) and are shown at 1,000ppm and 500ppm U₃O₈ cut-off grades. At the 500ppm cut-off the total resource (Indicated & Inferred) totals 23.4 million pounds (Mlb) of U₃O₈ and 43.7 Mlb of V₂O₅.

Detailed metallurgical testwork undertaken on a composite sample from the A4 deposit confirmed the major uranium bearing minerals are uraninite and coffinite, and the major vanadium bearing mineral is nolanite. This work also confirmed conventional acid leaching as the favoured process route, recording extraction rates of 98% uranium and 59% vanadium from base case acid leach tests (pH 1.5, 50°C, 50 wt% slurry, ORP=500mV, fine grind) and extraction rates of 94-95% uranium and 45% vanadium under optimum leach conditions (pH 1.8, 50°C, ORP=450 mV, coarse grind size).

Drilling at Bigrlyi

Two scoping studies were also completed during the period. Both studies investigated the potential for both open pit and underground mining and assumed a conventional 0.5 Mt per annum treatment plant employing acid leaching, followed by solvent extraction and precipitation of yellow cake and vanadium pentoxide products.

The initial scoping study, which was completed in November 2007, was based on the March 2007 resource (4.53 Mt @ 1,435ppm U_3O_8 & 1,638ppm V_2O_5 at 500ppm U_3O_8 cut-off) and was conducted by independent consultants Peter O'Bryan & Associates. The study assumed U_3O_8 and V_2O_5 metallurgical recoveries of 95% and 70% respectively, a U_3O_8 price of US\$100 per lb, a V_2O_5 price of US\$4 per lb and an Australian dollar rate of US\$0.83. This study concluded that the project was capable of producing 8.4 Mlb of U_3O_8 and 7.0 Mlb of V_2O_5 from 2.7Mt of ore over a mine life of 8 years, with 76% of ore sourced from open pit operations.

The second scoping study was conducted by BJV partner Paladin Energy Limited in July 2008. This study was based on the March 2008 resource (7.56Mt @ 1,396ppm U_3O_8 & 2,616ppm V_2O_5 at 500ppm U_3O_8 cut-off) and assumed metallurgical recoveries of 90% U_3O_8 and 50% V_2O_5 , a U_3O_8 price of US\$75 per lb, a V_2O_5 price of US\$4 per lb and an Australian dollar rate of US\$0.75. This study demonstrated that the project had the potential to produce 16.2 Mlb of U_3O_8 and 14.5 Mlb V_2O_5 over a mine life of 12 years.

The second scoping study also noted that the Bigrlyi mineralisation remained open adjacent to conceptual open pit and underground mining positions evaluated by the study with excellent scope to delineate additional resources and further enhance project economics.

REVIEW OF ACTIVITIES Continued

Work Completed in 2008/09

RESOURCE DRILLING

An RC and diamond drill program designed to extend shallow resource positions at the A4 and A15 deposits and obtain bulk samples for metallurgical testwork commenced in September 2008 and was completed in December 2008, with anomalous uranium mineralisation intersected in most holes.

New resource estimates incorporating the results from this infill drilling program (83 holes) were announced to ASX in May 2009. The resources were estimated by H&S using the OK method and are summarised below.

Indicated and Inferred Resources at 500ppm U_3O_8 cut-off – OK Estimation Method

Resource Category	Tonnes (Millions)	U_3O_8 (ppm)	V_2O_5 (ppm)	U_3O_8 (t)	V_2O_5 (t)	U_3O_8 (Mlb)	V_2O_5 (Mlb)
Indicated	2.74	1,530	2,300	4,190	6,310	9.2	13.9
Inferred	4.53	1,140	2,470	5,150	11,200	11.4	24.7

Tonnes are metric (2204.62 pounds); figures may not total due to rounding.

At a cut-off grade of 500ppm U_3O_8 the Bigirlyi OK resource totals 20.6 Mlb of U_3O_8 and 38.6 Mlb of V_2O_5 . Significantly 45% of the contained uranium metal (or 4.19 Kt U_3O_8) now reports to the Indicated Resource category, compared with 39% in the previous (March 2008) OK resource estimate.

As part of a review of alternative development options Energy Metals requested H&S re-estimate the uranium resources at Bigirlyi using the multiple indicator kriging (MIK) method with estimates at the 500ppm U_3O_8 and 250ppm U_3O_8 cut-off grades summarised below.

Indicated and Inferred Resources at 500ppm U_3O_8 cut-off – MIK Estimation Method

Resource Category	Tonnes (Millions)	U_3O_8 (ppm)	U_3O_8 (t)	U_3O_8 (Mlb)
Indicated	4.42	1,288	5,692	12.5
Inferred	3.72	1,245	4,625	10.2

Tonnes are metric (2204.62 pounds); figures may not total due to rounding.

Indicated and Inferred Resources at 250ppm U₃O₈ cut-off – MIK Estimation Method

Resource Category	Tonnes (Millions)	U ₃ O ₈ (ppm)	U ₃ O ₈ (t)	U ₃ O ₈ (Mlb)
Indicated	8.83	821	7,251	16.0
Inferred	7.76	780	6,056	13.4

Tonnes are metric (2204.62 pounds); figures may not total due to rounding.

At a cut-off grade of 500ppm U₃O₈ the MIK resource totals 22.7 Mlb of U₃O₈ whilst at the 250ppm cut-off the MIK resource increases to 29.4 Mlb of U₃O₈ with most of this resource within 200m of the surface and potentially amenable to open cut mining. At both the 500ppm and 250ppm cut-off grades approximately 55% of the contained uranium metal reports to the Indicated Resource category.

Both the OK and MIK estimates for Bigirlyi are based primarily on chemical assays, with only 15% of the assay database consisting of calibrated radiometric values. However it should be noted that the interpretation of the mineralisation differed between the two methods. The OK method used a nominal 100ppm U₃O₈ threshold resulting in narrow zones of higher grade mineralisation, whereas the MIK method used a 10ppm U₃O₈ threshold with broader zones of mineralisation including substantial lower grade material and in some case combining a number of the thinner 100ppm zones. Energy Metals considers that the MIK resource estimate better represents the resource amenable to open pit mining and potential leach processing.

The differences in the estimates reflect the uncertainty in the geological interpretation and resource estimates themselves, but are well within the limits of accuracy for Indicated and Inferred resources. These differences are not considered material for the level of resource confidence.

In July 2009, Paladin Energy completed a desk top review based on the May 2009 OK resource which indicated that a maximum of 14 Mlb of U₃O₈ would fall within conceptual open pit mining shells (maximum 200-220m depths) at the A4 and A15 deposits (cut-off grade of 250ppm U₃O₈). The desktop review suggests that further work to identify extensions to the existing resource and to assess the potential for underground mining is likely to be required prior to determining the optimal development strategy for the Bigirlyi Project.

Subsequently the BJV partners approved extensional drilling programs designed to locate shallow uranium mineralisation between the A4 and A15 deposits and immediately west of A4. Drilling commenced in September 2009 and is expected to continue until the end of the field season in early December 2009.

REVIEW OF ACTIVITIES Continued

*Bigirly exploration camp***METALLURGICAL & ENVIRONMENTAL**

Six large diameter diamond core holes were drilled at Bigirly late 2008 to obtain representative samples from the A4 and A15 deposits for physical (comminution) testing and 'front-end' processing testwork. All holes were geochemically assayed prior to testwork commencing, with significant intercepts summarised below:

BO8079	8.4m @ 0.96% U ₃ O ₈ , 0.45% V ₂ O ₅	from 106.0m (A4 deposit)
BO8083	3.0m @ 1.71% U ₃ O ₈ , 1.57% V ₂ O ₅	from 34.0m (A15 deposit)

Results from the comminution studies were very encouraging, with samples of fresh material returning an average Ball Mill Work Index (BWI) of 8.4 at the coarse testwork grind size (285 µm), compared with a BWI of 12 assumed for previous scoping studies, translating to a ball mill of approximately 400kW compared with a 900kW ball mill assumed previously. The average Abrasion Index (AI) for the fresh ore was 0.3234 (compared with 0.131 assumed previously).

An independent review of the process and metallurgical components of the project run concurrently with the testwork highlighted several areas with the potential to improve project economics, including:

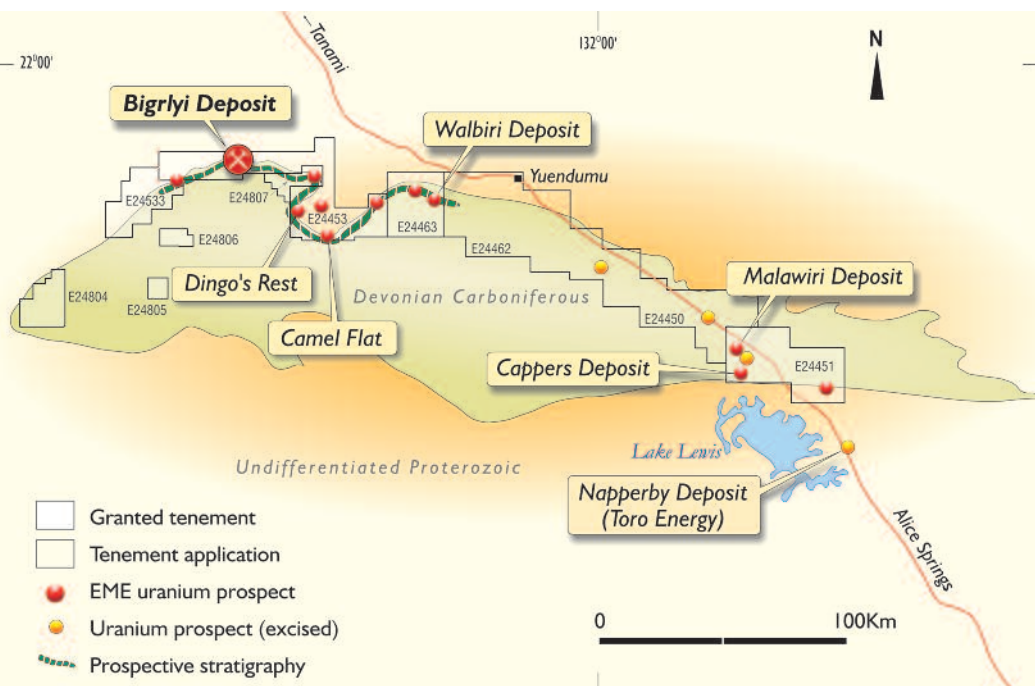

- upgrading the ore using radiometric sorting
- reducing acid consumption via reverse flotation of carbonates
- selection of the optimum uranium solvent extraction and precipitation circuits
- producing ferro-vanadium (FeV) instead of vanadium pentoxide (V₂O₅)

The review also recommended that in light of the very high dissolution characteristics of the Bigirly ore and (based on the current resource) the relatively short project life, the BJV investigate both heap leaching and vat leaching as alternatives to the conventional processing routes considered to date.

Community consultation and collection of data for environmental baseline studies continued during the period.

FUTURE ACTIVITIES

Drilling designed to extend current resource positions at Bigirly (with a focus on shallow, potentially open pittable positions) commenced in September 2009 and is expected to continue until the end of the field season. Metallurgical and engineering studies are ongoing and are expected to identify opportunities to further improve project economics. Environmental baseline studies are underway and consultations with the local aboriginal community and other stakeholders have commenced and have been very positive to date.

Ngalia Regional (EME 100%)

The Ngalia Regional project comprises ten 100% owned exploration licences (total area 2,840 km²) located in the Ngalia Basin, between 180 and 350 km northwest of Alice Springs in the Northern Territory. Seven of these tenements are contiguous and enclose the Bigrlyi project as well as containing a number of uranium occurrences including the Walbiri and Malawiri prospects, located 55 km and 150 km southeast of Bigrlyi respectively. The remaining 3 tenements are located southwest of the Bigrlyi deposits and cover discrete uranium anomalies, with no evidence of previous exploration.

Seven of the ten Ngalia Regional Exploration Licences have been granted by the Northern Territory Department of Regional Development, Primary Industry, Fisheries and Resources (DRDPIFR). The remaining three applications (EL's 24450, 24462 and 24805) are located on Aboriginal Freehold land and the consent of the Traditional Owners is required before the tenements can be granted. Energy Metals has been negotiating with the Traditional Owners through the Central Land Council (CLC) and is confident that the Company will eventually gain access to these areas.

Interpretation of data from a detailed airborne geophysical survey flown by Energy Metals in late 2007 identified a strong uranium channel anomaly which had never been drill tested. This prospect, subsequently named Cappers, is located in the southeast part of the Ngalia Basin, approximately 150 km southeast of Bigrlyi and 180 km northwest of Alice Springs.

In December 2008 the Company completed first pass drilling at Cappers to investigate this anomaly. The drilling program (50 holes) encountered anomalous uranium values at shallow levels over a distance in excess of 5 km, with the mineralisation associated with calcareous alluvium, similar to the Napperby deposit located 20 km to the southeast and currently being explored by Toro Energy.

A 300 hole follow-up aircore drilling program commenced at Cappers in September 2009. To date downhole calibrated gamma probe (eU₃O₈) results have been received from 92 holes with anomalous uranium mineralisation intersected on most traverses, including:

NAC122	2.20m @ 211ppm eU ₃ O ₈	from 3.55m
NAC175	1.45m @ 309ppm eU ₃ O ₈	from 3.35m
NAC189	2.00m @ 223ppm eU ₃ O ₈	from 3.15m
NAC284	2.25m @ 195ppm eU ₃ O ₈	from 3.55m
NAC321	1.35m @ 321ppm eU ₃ O ₈	from 4.65m

REVIEW OF ACTIVITIES Continued

Cappers Prospect (Napperby E24451) - Aircore Drilling over Radiometrics

Exploration Manager Nick Burn checking samples at Cappers

These results are preliminary and subject to confirmation by geochemical assay. However at this stage continuity between mineralised holes appears to be good, especially at the western end of the prospect. Furthermore traverses drilled at the eastern end of Cappers suggest that the mineralisation extends at least 2 km further east than previously recognised. On completion of the current drilling program Energy Metals will compile the data with the aim of completing a maiden resource estimate for Cappers.

A review of exploration undertaken in the Ngalia Basin in the 1970's highlighted several areas warranting further work. These include shallow downhole gamma probe intercepts from the Camel Flat prospect (33 km southeast of Biglyi) including 2.8m @ 2,841 eU₃O₈ from hole 55P and 0.8m @ 1,186 eU₃O₈ from hole 58P; and the updip extensions to the Dingo's Rest prospect, located 23 km southeast of Biglyi, where broad spaced drilling intersected anomalous uranium and vanadium values in reduced sediments, including 1.2m @ 1,125ppm U₃O₈ & 797ppm V₂O₅ in hole DIN-14, and 0.3m @ 1,933ppm U₃O₈ and 1,290ppm V₂O₅ in hole DIN-17.

A small RC drilling program (5 holes for 852m) was completed at Camel Flat during the period to follow up the historical intercepts referred to above and provide geological information on the mineralised setting. Downhole probing confirmed anomalous uranium mineralisation within the Mt Eclipse Sandstone (the same geological unit that hosts the Biglyi deposits), recording a best intercept of 2.5m @ 2,564 ppm eU₃O₈ from hole CF0803.

Diamond (core) drilling to follow up these encouraging results from Camel Flat will commence in the December 2009 quarter with drill testing of other targets on 100% owned tenements also planned for the 2009 field season.

Macallan Project radiometric image showing interpreted regional faults (white lines).

Macallan (EME 100%)

The Macallan project is a recent exploration licence application (ELA27333), located 460 km northwest of Alice Springs and 140 km from Bigirlyi. Newmont Australia's Callie Gold Mine is located a further 140 km to the north.

The Macallan tenement (area 225 km²) was applied for to cover a strong 3 km-long bullseye radiometric anomaly, identified through the interpretation of regional airborne geophysical data. The anomaly, which lies within the Tanami Desert, occurs in an area dominated by extensive sandplain, dune and sheetwash cover. The basement rocks are interpreted to comprise high grade metamorphosed sediments and granitoids, forming part of the Palaeoproterozoic Aileron Province.

Energy Metals considers that the Macallan anomaly may indicate the presence of shallow structurally controlled uranium mineralisation. The Northern Territory Geological Survey has interpreted a series of significant regional faults intersecting very close to the position of the target, and these faults could have acted as channelways for uranium-bearing fluids, derived from the basement rocks.

Although the area has been subject to previous gold and base metal exploration, there is no record of any past uranium exploration. Energy Metals will initiate access negotiations with the traditional owners so that testing of this target can commence as soon as possible.

Macallan Project location

REVIEW OF ACTIVITIES Continued

Anketell Project – Drilling over Radiometrics

WESTERN AUSTRALIA

Until recently the policy of the Labor state government prevented uranium mining in Western Australia. However in September 2008, following state elections, a Liberal-National Party coalition government was formed with the new government confirming support for uranium mining in the state. As a result of this encouraging development Energy Metals stepped up exploration of its WA projects during the period.

Anketell (EME 100%)

The Anketell project is located 100 km east of Mt Magnet and comprises two granted exploration licences (E's 58/289 & 58/292) with a total area of 165 km². The tenements contain shallow calcrete hosted uranium mineralisation discovered by Western Mining (WMC) in 1972. The mineralisation is similar in style to the Yeelirrie deposit, also discovered by WMC in the same year and located 150 km to the northeast.

Aircore drilling completed by Energy Metals in 2007 and 2008 confirmed the presence of uranium mineralisation in calcrete and calcareous clays with most traverses recording anomalous intercepts at shallow depths (typically within 10m of surface). An infill aircore drilling program (110 holes) was undertaken at Anketell during the period to establish a drill density of 200m x 500m over the main area of interest. Downhole gamma probing and confirmatory geochemical assaying was completed with anomalous uranium values recorded in 30 holes, including the following intercepts:

AAC 120	10m @ 343 ppm U ₃ O ₈	from 0.5m
AAC 116	6m @ 438 ppm U ₃ O ₈	from 0.5m
AAC 110	7m @ 245 ppm U ₃ O ₈	from 1.5m
AAC 107	4m @ 248 ppm U ₃ O ₈	from 1.0m

In July 2009 Energy Metals announced that independent consultants H&S had estimated an Inferred Mineral Resource at Anketell of 16.3 million tonnes averaging 167ppm U₃O₈ for a contained U₃O₈ content of 2,720 tonnes (6.0 million pounds) at a cut-off grade of 100ppm U₃O₈, as summarised in the table below.

Resource Category	Tonnes (Millions)	U ₃ O ₈ (ppm)	Contained U ₃ O ₈ Tonnes (x1,000)	Contained U ₃ O ₈ Pounds (Million)
Inferred	16.3	167	2.7	6.0

Tonnes are metric (2204.62 pounds), figures may not total due to rounding. Significant figures do not imply precision.

Both Contained Tonnes U_3O_8 and Contained Pounds U_3O_8 are based on contained metal in the ground and do not consider any mining, metallurgical or economic parameters at this stage. However the Anketell project is located close to infrastructure, being approximately 90 km east by sealed road from the mining town of Mount Magnet and 35 km from the gas pipeline at Windimurra. The project is also located approximately 45 km to the southwest of Energy Metals' Lake Mason project (3 Mlb resource) and takes the Company's total resources in the area (reportable under JORC) to 9 Mlb U_3O_8 .

The Company will continue to look at opportunities to build resources in the area to the level where either a central processing facility or a mobile treatment plant may be considered.

Lake Mason (EME 100%)

This project comprises one granted exploration licence (E 57/590) with an area of 64 km² centred 25 km north-northeast of Sandstone and 80 km southwest of the Yeelirrie deposit. Previous exploration by BP Minerals in the 1970's discovered shallow carnotite mineralisation in valley calcretes associated with the Lake Mason drainage system.

In 2008 Energy Metals announced that H&S had estimated an Inferred Mineral Resource at Lake Mason of 7.9 million tonnes averaging 170ppm U_3O_8 for a contained U_3O_8 content of 1,343 tonnes (3.0 million lbs) at a cut-off grade of 100ppm U_3O_8 , as summarised in the table below:

Resource Category	Tonnes (Millions)	U_3O_8 (ppm)	Contained U_3O_8 Tonnes (x1,000)	Contained U_3O_8 lbs (Million)
Inferred	7.9	170	1.3	3.0

Tonnes are metric (2204.62 lbs), figures may not total due to rounding.

Significant figures do not imply precision.

The resource estimate is based on data from 397 vertical aircore holes drilled by Energy Metals between September 2006 and December 2007. The holes were drilled 100m apart on east-west traverses spaced 200m apart, with chemical assays used almost exclusively for the estimation. All mineralisation is hosted in shallow calcrete layers at depths less than 5 metres below surface.

Preparations for an infill aircore drill program to increase the level of confidence of this resource are underway.

REVIEW OF ACTIVITIES Continued

Mopoke Well Project over Radiometrics

Mopoke Well (EME 100%)

The Mopoke Well project comprises a single exploration licence (E 29/568) located 55 km west of Leonora and covering an area of 135 km². Mopoke Well contains two historic uranium deposits (Peninsula and Stakeyard Well), with a third deposit (Raeside) located on the western edge of the project area. All three deposits are hosted by valley calcretes associated with the Lake Raeside drainage system.

Following extensive land access negotiations and detailed ethnographic and archaeological surveys, first pass aircore drilling at Mopoke Well commenced late in the December 2008 quarter with 95 aircore holes (total 950m) completed at the historical Peninsula and Stakeyard Well deposits.

Downhole gamma probing of these holes recorded widespread shallow uranium mineralisation from both prospects, with geochemical assaying confirming these initial results, including intercepts of 2.5m @ 265ppm U₃O₈ from 1m at Peninsula and 1.5m @ 351ppm U₃O₈ from 3.5m at Stakeyard Well.

These encouraging results will be followed up in the coming period.

Lakeside (EME 100%)

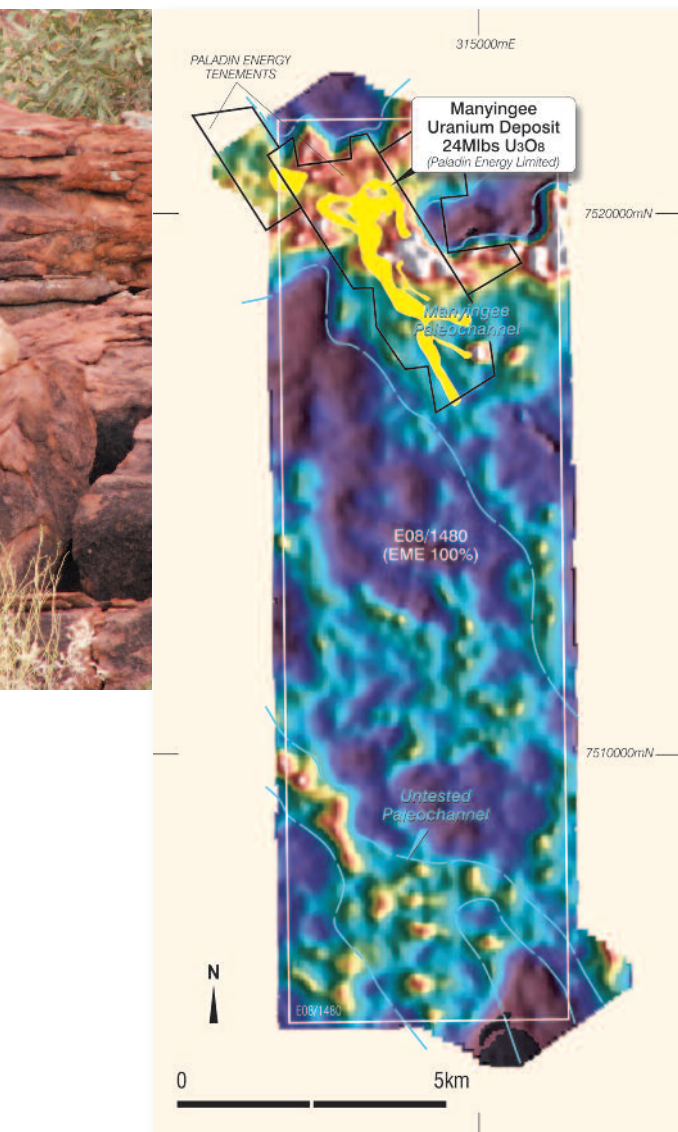

The Lakeside project is located in the Murchison district 20 km west of Cue and comprises granted exploration licence E 21/120 (area 75 km²). This project was acquired to follow up previously discovered carnotite mineralisation hosted by valley calcretes associated with major saline drainages.

First pass aircore drilling completed in 2007 (holes 200m apart on 1 km spaced traverses) confirmed the presence of uranium mineralisation in calcrete and calcareous clays with most traverses recording anomalous intercepts. Geochemical assays from infill drilling completed late 2008 returned weakly anomalous results from a number of holes.

Manyingee (EME 100%)

The Manyingee exploration licence (E08/1480) is located 85 km south of the port of Onslow. The tenement (total area 86 km²) surrounds the mining leases containing Paladin Energy's Manyingee deposit, a stacked series of paleochannel hosted roll front uranium lenses, with a total resource (indicated and inferred) of 24 Mlbs U₃O₈. Paladin reports that the Manyingee deposit is amenable to in-situ recovery (ISR), a low cost and low impact method of extracting uranium.

A review of an airborne EM survey flown by Energy Metals and historical exploration in the area has interpreted a number of palaeochannels extending into the tenement from Paladin's Manyingee deposit.

Manyingee Project over Airborne EM

During the period Energy Metals signed an access agreement with the Thalanjyi people (the registered native title holders for the area) and completed a heritage survey over part of E08/1480. An aircore drilling program (approximately 3,000m) designed to locate extensions to the palaeochannel uranium mineralisation has since been submitted for approval, with drilling expected to commence in the coming period.

Rawlinson (EME option to acquire 100%)

The Rawlinson Project comprises four exploration licence applications (total area of 1,450 km²) located in the Gibson Desert, approximately 950 km northeast of Kalgoorlie and 60 km west of the NT border.

The tenements cover strong uranium channel anomalies revealed by a government airborne geophysical survey undertaken in 1998. The Company can acquire a 100% interest in ELA's 69/2281 to 69/2283

(inclusive) by reimbursing the vendor for initial costs and issuing Energy Metals shares and options within 3 years of grant and approval of access for exploration. In addition the Company has made application for a further exploration licence (ELA 69/2303) adjacent to the three existing licence applications.

The area is part of the Central Australia Aboriginal Reserve and due to the remote location and restricted access the geology of the area is poorly understood. However it appears that the main uranium anomalies are associated with mid Proterozoic age metasediments unconformably overlain by younger sedimentary rocks with potential for unconformity and roll-front style uranium deposits, as well as surficial uranium mineralisation. There is no evidence of previous uranium exploration in the area.

The Rawlinson project provides the Company with a low cost option to control untested outcropping uranium anomalies with the potential to represent a completely new uranium province. Negotiations with the traditional aboriginal owners, including a meeting on-country, continued through the period and Energy Metals is confident that access for exploration will be granted to the Company.

REVIEW OF ACTIVITIES Continued

**CORPORATE**

In September 2009 the Company announced that it had entered into an Implementation Deed with CGNPC Uranium Resources Co. Ltd., a wholly owned subsidiary of China Guangdong Nuclear Power Company ("CGNPC"), under which China Uranium Development Company Limited ("CUD"), also a wholly owned subsidiary of CGNPC, will offer to acquire up to 70% of the outstanding ordinary shares of Energy Metals for \$1.02 cash per share by means of a proportional takeover bid. As a part of the transaction CUD will underwrite a 1:9 rights issue by Energy Metals at \$0.90 per share which Energy Metals intends to implement on completion of the proportional takeover bid. The rights issue seeks to raise approximately \$11.7M.

The \$1.02 bid price represents a 60% premium to the 3 month volume weighted average price of Energy Metals shares prior to the bid being announced. Furthermore on completion of the 1:9 rights issue Energy Metals will have cash of approximately \$14M, which will allow the Company to accelerate the development of Bigrlyi and other projects controlled by Energy Metals.

The Energy Metals Board believes that CGNPC's financial resources, technical expertise and strategic intent to develop its uranium resource portfolio will greatly assist Energy Metals in its transition from explorer to developer and producer and unanimously supports the proposed transaction, in the absence of a superior proposal being received. The proposed transaction is subject to a number of conditions, including approval by the Australian Foreign Investment Review Board (FIRB).

ABOUT CGNPC

CGNPC is a Chinese incorporated company with total assets of approximately USD 16 billion and net assets of over USD 5 billion. Established in September 1994, CGNPC now has 4 operating nuclear power stations with existing generation capacity of 4,000 MWe. Further nuclear projects currently under construction will add in excess of 20,000 MWe of capacity across various locations around China.

CGNPC has also invested in a portfolio of wind, solar energy and hydro power units with total current generating capacity of approximately 1,650 MWe. Further clean energy generating capacity is under construction. CGNPC aims to become the world's leading clean energy producer.

Note:

The information in this report relating to mineral resource estimates at Bigrlyi and Anketell is based on information compiled by Arnold van der Heyden BSc, who is a Member of The Australasian Institute of Mining and Metallurgy (MAusIMM). Mr van der Heyden has more than five years relevant experience in estimation of mineral resources and the mineral commodity uranium. Mr van der Heyden is a full time employee of Helman & Schofield and takes responsibility for the resource estimation. Mr van der Heyden has sufficient experience relevant to the assessment of this style of mineralisation to qualify as a Competent Person as defined in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code (2004)".

The information in this report relating to mineral resource estimates at Lake Mason is based on information compiled by Mr Simon Gatehouse, MAIG. Mr Gatehouse is a full time employee of Helman & Schofield and has more than five years relevant experience in estimation of mineral resources and the mineral commodity uranium and is a Competent Person as defined in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code (2004)".

The information in this report that relates to metallurgical testwork is based on information compiled by Mr Peter Banovich, MAusIMM. Peter Banovich is a full-time employee of Metallurgical Project Consultants Pty Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

The information in this report relating to mining studies is based on information compiled by Andrew Hutson BE (Mining), MAusIMM. Mr Hutson is a full time employee of Paladin Energy Limited and has sufficient experience relevant to the assessment of this style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code".

The information in this report relating to Exploration Results is based on information compiled by Nick Burn BSc(Hons), MAIG., who has more than five years relevant experience in estimation of mineral resources and the mineral commodity uranium. Mr Burn is a full time employee of Energy Metals Limited and takes responsibility for the quality of the data and geological interpretations.

Mr Burn has sufficient experience relevant to the assessment of this style of mineralisation to qualify as a Competent Person as defined in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code".

Each of the above named consents to the inclusion of the information in the report in the form and context in which it appears.

*Uranium mineralisation grades through this report are annotated with a sub-prefix 'e' because they have been reported as uranium equivalent grades derived from down-hole gamma ray logging results and should be regarded as approximations only.

Gamma logging or "total count gamma logging" (the method used by Energy Metals) is a common method used to estimate uranium grade where the radiation contribution from thorium and potassium is very small. Sandstone and calcrete hosted deposits are usually of this type. Gamma logging does not account for energy derived from thorium and potassium (as does spectral gamma logging) and thus the result is expressed as an equivalent value or eU₃O₈.

The gamma radiation from potassium, uranium and thorium is dominated by gamma rays at specific energy levels. These energy levels are sufficiently well separated such that they can be measured independently of each other. They are typically measured as narrow energy bands that contain the specific energy levels. Bands are used because the measuring systems do not have the resolution to target a specific energy wavelength. There is some scattering of higher energy gamma radiation, e.g. thorium, into lower energy radiation, e.g. uranium and potassium. This scattered radiation can be calculated from suitable calibration procedures and removed from the lower energy level measurements. This method is commonly termed spectral gamma logging.

Energy Metals uses gamma probes which are initially calibrated at the PIRSA (Primary Industry & Resources South Australia) test pits and then subjected to annual recalibration to ensure the integrity of the probe instrument.

DIRECTORS' REPORT

The Directors present their report on the consolidated entity (referred to hereafter as the Group) consisting of Energy Metals Limited and the entities it controlled at the end or during the year ended 30 June 2009.

DIRECTORS

The following persons were Directors of Energy Metals Limited during the whole of the financial year (or as disclosed) and up to the date of this report:

- Oscar Aamodt
- Lindsay George Dudfield
- Geoffrey Michael Jones (appointed 29/08/2008)
- Donald Ross Kennedy (resigned 01/09/2008)

PRINCIPAL ACTIVITIES

The principal activity of Energy Metals Limited throughout the year was uranium exploration. During the financial year there was no change in the nature of this activity.

FINANCIAL RESULTS

The consolidated profit of the Group after providing for income tax for the year ended 30 June 2009 was \$83,226 (2008: loss \$272,216).

DIVIDENDS

No dividends have been paid or declared and no dividends have been recommended by the Directors.

SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

There has been no significant change in the state of affairs of the Group during the year.

REVIEW OF OPERATIONS

Following the successful listing on the ASX, the Company has conducted uranium exploration activities on its various projects with the major focus being on the Biglryi Project in the Northern Territory.

Full details of the Company's exploration activities during the year are included within the Review of Activities section of the Annual Report.

FINANCIAL POSITION

The net assets of the Group were \$16,493,040 at 30 June 2009 (2008: \$15,876,401).

Cash and assets utilised by the Company for the period ended 30 June 2009 is consistent with the Company's business objectives since listing on the Australian Stock Exchange on 9 September 2005.

MATTERS SUBSEQUENT TO THE END OF THE FINANCIAL PERIOD

On 8 September 2009 the Company announced it has entered into an Implementation Deed with CGNPC Uranium Resources Co. Ltd., a wholly owned subsidiary of China Guangdong Nuclear Power Company ("CGNPC"), under which China Uranium Development Company Limited ("CUD"), also a wholly owned subsidiary of CGNPC, will offer to acquire up to 70% of the outstanding ordinary shares of Energy Metals for \$1.02 cash per share by means of a proportional takeover bid. As a part of the transaction CUD will underwrite a 1:9 rights issue by Energy Metals at \$0.90 per share which Energy Metals intends to implement on completion of the proportional takeover bid. The rights issue seeks to raise approximately \$11.7M.

The Implementation Deed has a number of conditions related to government approvals that are required to be satisfied before the transaction can be completed.

Further information regarding the transaction can be obtained from the Australian Securities Exchange (www.asx.com.au) and the Company's website (www.energymetals.net).

LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

The Directors are not aware of any developments that might have a significant effect on the operations of the Group in subsequent financial years that are not already disclosed in this report.

INFORMATION ON DIRECTORS

Name	Director's Experience	Special Responsibilities
Mr Oscar Aamodt <i>FCIS</i>	<p>Mr Aamodt is a member of the Institute of Chartered Secretaries and Administrators and has more than 24 years experience in the administration and management of mining and exploration listed companies in Australia and overseas. He has held a number of Directorships in Australian mining and exploration companies and was previously employed as Chief Financial Officer of a large mining company with operations in Australia and Africa.</p> <p>Other public company Directorships held by Mr Aamodt over the last three years are:</p> <p>Independence Group NL – current Brumby Resources Limited – (February 2006 – October 2006)</p>	Non-Executive Chairman
Mr Lindsay Dudfield <i>BSc</i>	<p>Mr Dudfield is a qualified geologist with 29 years experience exploring for gold and base metals in Australia and overseas, including close involvement with a number of greenfields discoveries. Member of the AusIMM, SEG, AIG and GSA. He is currently the Managing Director of Jindalee Resources Ltd.</p> <p>Other public company Directorships held by Mr Dudfield over the last three years are:</p> <p>Jindalee Resources Limited – current</p>	Executive Director
Mr Geoff Jones <i>BEng FIEAust CPEng</i> (appointed 29/08/2008)	<p>Mr Jones is a Fellow of the Institution of Engineers, Australia, with a Bachelor of Engineering (Civil) degree. He has over 25 years experience covering the areas of construction, engineering, mineral processing and project development. Mr Jones has been responsible for the preparation of feasibility studies for gold and base metals projects and has completed numerous project evaluations and due diligence reviews and has managed the successful development of projects both domestically and overseas.</p> <p>Mr Jones has operated his own project management and engineering consultancy, JMG Projects Pty Ltd, servicing the mining industry. In this capacity Mr Jones has completed works on gold and base metal projects for Australian and overseas based mining groups. Mr Jones is currently employed with Sedgman Limited - Internet Engineering as the General Manager of Metals. Internet provide innovative process design and engineering solutions to the resource sector.</p> <p>Other public company Directorships held by Mr Jones over the last three years are:</p> <p>Brumby Resources Ltd – current Matrix Metals Ltd – current Adamus Resources Limited – (March 2006 – April 2008)</p>	Non-Executive Director
Mr Donald Kennedy <i>BSc (Hons)</i> (resigned 01/09/2008)	<p>Mr Kennedy was a qualified geologist with 44 years experience in gold and base metals exploration, both in Australia and overseas. As Managing Director, then Exploration Director, of Resolute Limited, leading to the development of gold mines at Marymia, Chalice, Higginsville and Challenger in Australia and Nkran and Golden Pride in Africa.</p> <p>Other public company Directorships held by Mr Kennedy over the last three years were:</p> <p>Jindalee Resources Limited – (April 2002 – September 2008) Uran Limited – (December 2007 – September 2008) Vital Metals Limited – (January 2005 – September 2008) Great Western Resources Limited – (January 2007 – September 2008)</p>	Non-Executive Director

DIRECTORS' REPORT Continued

DIRECTORS' INTERESTS IN THE SHARES AND OPTIONS OF THE COMPANY

The particulars of Directors' interest in shares and options are as at the date of this report.

	Ordinary Shares	Unlisted 10c Options Expiring 30/06/2010
L G Dudfield	6,575,400	1,500,000
O Aamodt	236,250	750,000
G M Jones	-	-

MEETINGS OF DIRECTORS

The following table sets out the number of meetings of the Company's Directors held during the year ended 30 June 2009 and the numbers of meetings attended by each Director.

	Number Held Whilst in Office	Number Attended
L G Dudfield	9	9
O Aamodt	9	9
G M Jones	7	7

As at the date of this report, the Company did not have an Audit Committee of the Board of Directors. The Board considers that due to the Company's size, an audit committee's functions and responsibilities can be adequately and efficiently discharged by the Board as a whole, operating in accordance with the Company's mechanisms designed to ensure independent judgement in decision making.

RETIREMENT, ELECTION AND CONTINUATION IN OFFICE OF DIRECTORS

Mr Kennedy resigned as a Non-executive Director on 1 September 2008.

Mr Geoffrey Jones was appointed a Director on 29 August 2008. In accordance with the Corporations Act 2001 and the Company's constitution, the Company confirmed the appointment of Mr Jones at the 2008 Annual General Meeting.

Mr Aamodt was appointed Chairman of the Company upon the resignation of Mr Kennedy on 1 September 2008.

Mr Aamodt is the Director retiring by rotation who, being eligible, may offer himself for re-election at Annual General Meeting.

COMPANY SECRETARY INFORMATION

Ms Patricia Farr was appointed Company Secretary on 9 May 2005. She is an experienced Company administrator, having previously worked for Resolute Mining Ltd, and is currently employed by Jindalee Resources Limited.

REMUNERATION REPORT

The information provided in this remuneration report has been audited as required by section 308(3C) of the *Corporations Act 2001*.

REMUNERATION POLICY

The remuneration policy of the Company has been designed to align Directors objectives with Shareholder and business objectives. The Board of Energy Metals Limited believes the remuneration policy to be appropriate and effective in its ability to attract and retain the best Executives and Directors to run and manage the Company, as well as create goal congruence between Directors, Executives and Shareholders.

The Board's policy for determining the nature and amount of remuneration for Board members of the Company is as follows:

All Executives receive either consulting fees or a salary, part of which maybe taken as superannuation, and from time to time, options. Options issued to Directors are subject to approval by Shareholders. The Board reviews Executive packages annually by reference to the Executives performance and comparable information from industry sectors and other listed companies in similar industries. An Employee Share Option Plan was adopted by the Company following approval by Shareholders at the Company's Annual General Meeting held on 24 November 2006.

Board members are allocated superannuation guarantee contributions as required by law, and do not receive any other retirement benefits. From time to time, some individuals may choose to sacrifice their salary or consulting fees to increase payments towards superannuation.

All remuneration paid to Directors and specified Executives is valued at the cost to the Company and expensed. Options are valued using the Black-Scholes methodology.

The Board policy is to remunerate Non-executive Directors at commercial market rates for comparable companies for their time, commitment and responsibilities. Independent external advice is sought when required. The maximum aggregate amount of fees that can be paid to Non-executive Directors is subject to approval by Shareholders at the Annual General Meeting and is currently set at \$100,000 per annum. Fees for Non-executive Directors are not linked to the performance of the Company. Non-executive Directors' remuneration may also include an incentive portion consisting of options, subject to approval by Shareholders.

COMPANY PERFORMANCE, SHAREHOLDER WEALTH AND DIRECTORS AND KEY EXECUTIVE REMUNERATION

The policy, setting the terms and conditions for the Executive Directors and specified Executives, was developed and approved by the Board and is considered appropriate for the current exploration phase of the Company's development. Emoluments of Directors are set by reference to payments made by other companies of similar size and industry, and by reference to the skills and experience of Directors. Fees paid to Directors are not linked to the performance of the Company. This policy may change once the exploration phase is complete and the Company is generating revenue. At present the existing remuneration policy is not impacted by the Company's performance including earnings and changes in Shareholder wealth (dividends, changes in share price or returns of capital to Shareholders).

The following table shows the share price and the market capitalisation of the Company at the end of the financial year. No dividends have been paid during the period.

	At 30 June 2006	At 30 June 2007	At 30 June 2008	At 30 June 2009
Share Price	\$1.81	\$6.64	\$1.49*	\$0.515
Market Capitalisation	\$45M	\$178M	\$174.5M	\$60.3M
Dividend	-	-	-	-

(Note that the Company was first listed on the Australian Stock Exchange on 9 September 2005 and consequently there was no share market capitalisation of the Company prior to 30 June 2006).

* The share capital of the Company was reorganised effective 29 February 2008. The reorganisation was by way of a share split whereby each share in the Company was split into 3 shares.

DIRECTORS' REPORT Continued

DIRECTORS AND EXECUTIVES (KEY MANAGEMENT PERSONNEL) EMOLUMENTS

The Company's policy for determining the nature and amount of emoluments of key management personnel is that Directors are to be paid consulting fees at commercial rates for professional services performed.

Details of the nature and amount of each element of the emoluments of each Director of Energy Metals Limited are set out in the following tables.

		Short-term benefits		Post-employment	Share-based payment		% remuneration consisting of options
		Directors Fees \$	Cash Salary, Consulting Fees \$	Super-annuation \$	Options \$	Total \$	%
Non-Executive Directors

[#] denotes the highest paid Executives of the Company as required to be disclosed under the Corporations Act 2001.

SERVICE AGREEMENTS

On appointment to the Board, all Non-executive Directors enter into a service agreement with the Company in the form of a letter of appointment. The letter summarised the Board policies and terms of appointment, including compensation relevant to the office of Director. Remuneration and other terms of employment for the Executive Director and other Senior Managers are also formalised in service agreements as summarised below.

D R Kennedy

On 1 July 2005 the Company entered into an agreement (via a letter of appointment), appointing Mr Kennedy as a Non-executive Director. Pursuant to the terms of the letter of appointment, during the year the Company paid Mr Donald Ross Kennedy Directors fees totalling \$6,667. Mr Kennedy resigned as Non-executive Director effective 1 September 2008.

O Aamodt

On 8 July 2005 the Company entered into an agreement (via a letter of appointment), appointing Mr Aamodt as a Non-executive Director. The appointment is contingent upon satisfactory performance and successful re-election by Shareholders of the Company as and when required by the Constitution of the Company and the Corporations Act. Mr Aamodt is entitled to Directors fees of \$25,000 per annum and additional fees based on an hourly rate of \$120 per hour for special duties or services outside the scope of ordinary duties of a Non-executive Director.

SERVICE AGREEMENTS

L G Dudfield

Mr Dudfield is employed via a Consultancy Agreement between Mr Dudfield and Jopan Management Pty Ltd trading as Western Geological Services whereby Western Geological Services has agreed to provide Mr Dudfield's services for not less than 50 hours per month. In consideration for providing Mr Dudfield's services the Company will pay Western Geological Services a retainer of \$4,000 per month. If the number of hours in a working month exceed 50 hours the Company has agreed to pay additional fees at reasonable commercial rates. Unless extended for a further period the current agreement will expire on 1 July 2011. The agreement may be terminated by either party on 90 days notice or earlier in the event of a default not remedied within 14 days.

P A Farr^

Ms Farr is Company Secretary of Energy Metals Limited. Ms Farr is employed by Jindalee Resources Limited and as such receives no direct salary or consulting fees from the Company. Details regarding payment for Ms Farr's services is disclosed in Note 22(d).

N R Burn

Mr Burn was appointed Exploration Manager on 14th July 2008 pursuant to the terms and conditions of his employment contract with the Company which unless extended for a further period will expire 30 June 2010. Mr Burn's salary is reviewed annually and is currently set at \$180,000 per annum. Upon termination of the contract for any reason the Company will pay all entitlements due to the Employee.

D L Hughes

Mr Hughes was appointed Exploration Manager on 20 January 2006 pursuant to the terms and conditions of his employment contract with the Company. Mr Hughes resigned from this position effective 21 February 2008 and was paid all entitlements due.

T Saul

Mr Saul was appointed Exploration Manager on 25 February 2008 pursuant to the terms and conditions of his employment contract with the Company. Mr Saul resigned from this position effective 10 June 2008 and was paid all entitlements due.

OPTIONS GRANTED AS PART OF REMUNERATION

Options over shares in Energy Metals Limited are granted under the Energy Metals Employee Share Option Plan. Participation in the plan and any vesting criteria, is at the Board's discretion and no individual has a contractual right to participate in the plan or to receive any guaranteed benefits. Any options issued to Directors of the Company are subject to Shareholder approval and are not linked to company financial performance.

SHARE-BASED COMPENSATION

Details of options over ordinary shares in the Company provided as remuneration to each Director of Energy Metals Limited and Senior Managers of the Company are set out below. All options are vested on grant date.

Name	Number of options granted during the year		Number of options vested during the year	
	2009	2008	2009	2008
Directors				
D R Kennedy	-	-	-	-
O Aamodt	-	-	-	-
L G Dudfield	-	-	-	-
G M Jones	-	-	-	-
Senior Managers				
P Farr	-	-	-	-
N Burn	-	-	-	-
D L Hughes	-	-	-	-
T Saul	-	-	-	-

DIRECTORS' REPORT Continued

SHARE-BASED COMPENSATION (continued)

The fair value of services received in return for share options granted to employees is measured by reference to the fair value of options granted. The estimate of the fair value of the services is measured based on Black-Scholes option valuation methodology. The life of the options and early exercise option are built into the option model.

Further information on the fair value of share options and assumptions is set out in Note 15 to the financial statements.

SECURITIES POLICY

The Company has implemented a policy on trading in the Company's securities designed to ensure that all Directors, Senior Management and Employees of the Company act ethically and do not use confidential inside information for personal gain. The policy states acceptable and unacceptable times for trading in Company securities and outlines the responsibility of Directors, Senior Management and Employees to ensure that trading complies with the Corporations Act 2001, the Australian Securities Exchange (ASX) Listing Rules and Company Policy.

Any transaction conducted by Directors with regards to shares of the Company requires notification to the ASX. Each Director has entered into an agreement to provide any such information with regards to Company dealings directly to the Company Secretary promptly to allow the Company to notify the ASX within the required reporting timeframes.

SHARES PROVIDED ON EXERCISE OF OPTIONS

Details of ordinary shares in the Company provided as a result of the exercise of remuneration options to each Director of Energy Metals Limited and Senior Managers of the Company are set out below.

	Date of exercise of options	Number of ordinary shares issued on exercise of options during the year		Amount paid per share issued	
		2009	2008	2009	2008
Directors					
D R Kennedy	-	-	-	-	-
O Aamodt	-	-	-	-	-
L G Dudfield	-	-	-	-	-
G M Jones	-	-	-	-	-
Senior Managers					
P Farr	-	-	-	-	-
T Saul	23/07/2008	-	20,000	-	\$3.00

No amounts are unpaid on any shares issued on the exercise of options.

End of Remuneration Report.

SHARES UNDER OPTION

There were no options granted during the year ended 30 June 2009.

The details of unlisted share options on issue and fully vested at the date of this report by the Company are as follows:

Grant Date	Number	Date vested & exercisable	Expiry Date	Exercise Price	Value per option at grant date
06/12/2005	3,750,000	06/12/2005	30/06/2010	\$0.10	\$0.27
05/01/2007	450,000*	05/01/2007	30/06/2011	\$0.98	\$0.84

**includes the balance of options as disclosed in Note 15 as at the date of this report.*

SHARES ISSUED ON EXERCISE OF OPTIONS

There were no shares issued on exercise of options during the year and up to the date of this report. No amounts are unpaid on any of the shares.

DIRECTORS AND OFFICERS INSURANCE

The Company has paid a premium to insure the Directors and Officers of the Company for the period 30/10/2008 to 30/10/2009 against those liabilities for which insurance is permitted under section 199B of the Corporations Act 2001. Details of the nature of the liabilities insured for and the amount of the premium are subject to a confidentiality clause under the contract of insurance.

PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purpose of taking responsibility on behalf of the Company for all or part of those proceedings.

No proceedings have been brought or intervened in on behalf of the Company with leave of the Court under section 237 of the Corporations Act 2001.

ENVIRONMENTAL REGULATION

The Company is subject to significant environmental regulation in respect of its exploration activities. Tenements in the Northern Territory and Western Australia are granted subject to adherence to environmental conditions with strict controls on clearing, including a prohibition on the use of mechanised equipment or development without the approval of the relevant government agencies and with rehabilitation required on completion of exploration activities.

Energy Metals Limited conducts its exploration activities in an environmentally sensitive manner and the Company is not aware of any breach of statutory environmental conditions or obligations.

The Directors have considered compliance with the National Greenhouse and Energy Reporting Act 2007 which requires entities to report annual greenhouse gas emissions and energy use. For the first measurement period 1 July 2008 to 30 June 2009 the Directors have assessed that there are no current reporting requirements, but may be required to do so in the future.

AUDITOR'S INDEPENDENCE DECLARATION

A copy of the auditor's independence declaration as required by section 307C of the Corporations Act 2001 is included on page 54 of this report.

NON-AUDIT SERVICES

The external auditor did not perform any non-audit services during the year ended 30 June 2009.

This report which includes the accompanying Corporate Governance Statement is signed in accordance with a resolution of the Directors.

14th day of September 2009, at Perth, Western Australia

L G DUDFIELD

Executive Director.

CORPORATE GOVERNANCE STATEMENT

FOR THE YEAR ENDED 30 JUNE 2009

It is the responsibility of the Board of Directors of Energy Metals Limited to monitor the business affairs of the Company and to protect the rights and interests of the Shareholders. The Board believes that high standards of corporate governance are an essential prerequisite for creating sustainable value for Shareholders. This statement summarises the Company's main corporate governance policies and practices in place throughout the reporting period ended 30 June 2009. The policies and practices have aimed to ensure the implementation of a strategic business plan and an integrated framework of accountability over the Company's resources, functions and assets.

The Company's most significant governance policies are available on the Company's website www.energymetals.net

PRINCIPAL 1: LAY SOLID FOUNDATIONS FOR MANAGEMENT AND OVERSIGHT

The Board is responsible for the overall Corporate Governance of the Company including the strategic direction, establishing goals for management and monitoring the achievement of these goals. Due to the size of the Board, all issues are considered by the full Board. The Board is responsible for corporate strategy, implementation of business plans, allocation of resources, approval of budgets and capital expenditure, and the adherence to Company policies.

The appointment of Non-executive Directors are formalised in accordance with the requirements of the Corporations Act 2001 and the Company's constitution.

On appointment to the Board, all Non-executive Directors enter into a service agreement with the Company in the form of a letter of appointment. The letter summarised the Board policies and terms of appointment, including compensation relevant to the office of Director. Remuneration and other terms of employment for the Executive Director and other Senior Managers are formalised in service agreements which are summarised in the Directors Report.

The Directors of the Company in office at the date of this statement are:

Name	Age	Position	Special Expertise
Oscar Aamodt	63	Non-Executive Director	Company Management
Lindsay George Dudfield	52	Executive Director	Resource Industry
Geoffrey Michael Jones	47	Non-Executive Director	Engineering & Project Management

The Board comprises of a Non-executive Chairman, one other Non-executive Director and one Executive Director. The Board believes this structure is effective for the current range of duties of the Board to be properly discharged.

The Company's Executive Director has the responsibility for guiding management in effectively carrying out tasks and achieving Company objectives.

The Company's Chairman is responsible for leadership and governance of the Board and ensuring its efficient organisation and conduct.

The only publicly available copy of matters reserved for the Board is the Corporate Governance Statement in the annual report. At every Annual General Meeting one third of the Directors must retire and sit for re-election.

The other Senior Executive of the Company is the Company Secretary whose responsibilities include ensuring the Board received regular financial information and reports, preparation of statutory financial statements, corresponding with corporate regulators the Australian Securities Exchange and Australian Securities & Investments Commission and maintaining details of the Company's banking arrangements and funds on hand.

The Board reviews the performance of Senior Executives whose performance is assessed against their performance in their respective roles and responsibilities. The reviews are done at least annually and more often when deemed necessary. The Senior Executives were reviewed during the 2009 financial year in accordance with this procedure.

The only publicly available copy of matters reserved for Senior Executives is the Corporate Governance Statement in the annual report.

PRINCIPLE 2: STRUCTURE THE BOARD TO ADD VALUE

The Corporate Governance Council recommends that a majority of the Board should be independent Directors. The guidelines define independence as not being a member of management and being free from any business or other relationships that could materially interfere with, or could reasonably be perceived to materially interfere with, the exercise of their judgement. The two Non-executive Directors on the Board are considered to be independent as they comply with this definition.

In the first quarter of 2008 changes were made to the composition of the Board. With the appointment of Mr Geoff Jones as Non-executive Director on 29/08/2008 the Board meets the recommendation of the ASX Guidelines that a majority of the Board are independent Directors and that the chair is an independent Director who does not hold the position of chief Executive officer.

The ASX Guidelines recommends listed entities establish a nomination committee. During the year ended 30 June 2009, Energy Metals Limited did not have a separately established nomination committee. However, responsibilities of the full Board include the duties and responsibilities typically delegated to such a committee and given the size and the Company's current stage of development, the Board does not believe that any marked efficiencies or enhancements would be achieved by the creation of a separate nomination committee. When a new Director appointment is to be made the remaining Board members seek a candidate that has relevant industry experience, is willing to serve on the Board and following appointment that Director stands for re-election by Shareholders at the next annual general meeting. The only publicly available policy for the nomination and appointment for Directors is the Corporate governance statement in the annual report.

Due to the nature of the Company's activities and small size of the Company there is currently no internal formal process for performance evaluation of the Board, however, Shareholders are able to assess the performance of the Board by the way they manage the Company and vote for or against their re-appointment at the annual general meeting.

The skills, experience and expertise relevant to the position held by each Director is disclosed in the Directors' Report which forms part of this report.

The Directors may, in fulfilling their duties, obtain independent professional advice at the Company's expense, however prior notification by the Director to the Board is required.

PRINCIPLE 3: PROMOTE ETHICAL AND RESPONSIBLE DECISION-MAKING

The Board is responsible for setting the tone of legal, ethical and moral conduct to ensure that the Company is considered reputable by the industry and other outside entities. This involves considering the impact of the Company's decisions on the industry, colleagues and the general community. The Code of Conduct adopted by the Company requires that all employees abide by the laws, regulations and business practices wherever the Company operates. The Board maintains an approach that preserves the integrity of any laws or regulations under which the Company operates. The Company has also put in place various internal policies which provide internal controls to ensure employees only act within the authority given to them by the Board. This is to ensure that the Board has responsibility for any material transactions and dealings with outside parties, and that any legal, environmental and social consequences of such dealings will be properly considered before any action is taken.

The Company has an Environmental Policy which requires that all employees comply with the environmental regulations in force in the region in which work is undertaken. The Company is committed to dealing fairly and equitably with interested parties relating to environmental issues, such as landholders, governmental agencies and native title claimants.

The Company is committed to maintaining the highest standards of integrity and seeks to ensure that all its activities are undertaken with efficiency, honesty and fairness. The Company also maintains a high level of transparency regarding its actions consistent with the need to maintain the confidentiality of commercial-in-confidence material and market integrity. The Company has implemented a policy on trading in the Company's securities designed to ensure that all Directors and Employees of the Company act ethically and do not use confidential information for personal gain.

Any transaction conducted by Directors with regards to shares of the Company requires notification to the ASX. Each Director has entered into an agreement to provide any such information with regards to Company dealings directly to the Company Secretary promptly to allow the Company to notify the ASX within the required reporting timeframes.

A copy of the Company's Code of Conduct, Environmental and Share Trading policy is available on the Company's website.

CORPORATE GOVERNANCE STATEMENT Continued

PRINCIPLE 4: SAFEGUARD INTEGRITY IN FINANCIAL REPORTING

The ASX Guidelines recommend listed entities establish an audit committee. During the year ended 30 June 2009 Energy Metals Limited did not have a separately established audit committee. The Board considers that due to the Company's size, an audit committee's functions and responsibilities can be adequately and efficiently discharged by the Board as a whole, operating in accordance with the Company's mechanisms designed to ensure independent judgement in decision making. The Board as a whole meets with the Company auditor prior to the final sign-off of the half yearly and final annual accounts.

The Board considers and deals with matters which would ordinarily be attended to by an audit committee including:

- monitoring the Company's performance against strategy;
- approving and monitoring all significant or major business transactions;
- designing and implementing an appropriate organisational structure;
- appointing and monitoring the conduct and performance of management and personnel, and overseeing all remuneration, development and succession;
- approving and monitoring financial reporting and compliance;
- monitoring the principal risks and opportunities of the Company's business;
- ensuring appropriate risk management systems are established and reviewed;
- overseeing control and accountability systems; and
- reviewing and approving corporate governance systems.

The Executive Director is accountable to the Board for management of the Company within authority levels approved by the Board and is subject to the supervision of the Board. The Executive Director and Company Secretary are required to periodically state in writing to the Board that the Company's financial report presents a true and fair view of the Company's financial condition and that results are reported in accordance with relevant accounting standards.

External auditor

The Company's policy is to appoint external auditors who clearly demonstrate quality and independence. It is the auditor's policy to rotate engagement partners on listed companies at least every five years.

The auditor is required to attend the Annual General Meeting of Shareholders. The Chairman will permit Shareholders to ask questions about the conduct of the audit and the preparation and content of the audit report, in accordance with section 250T of the Corporations Act 2001.

PRINCIPLE 5: MAKE TIMELY AND BALANCED DISCLOSURE

The Company must comply with the continuous disclosure requirements of the ASX Listing Rules and Corporations Act 2001. The Company is required to disclose to the ASX any information which a reasonable person would expect to have a material effect on the price or value of the Company's securities unless certain exemptions from the requirements apply. To ensure it meets its continuous disclosure obligations, the Board has nominated the Executive Director and Company Secretary as responsible for all disclosure matters. Their role is to collate and, where appropriate, disclose share price sensitive information.

In the Company's current stage of development, matters of crucial importance arise regularly. The Executive Director will discuss significant issues with Board members who jointly will make a decision on the timely release of factual and balanced information concerning the Company's activities.

Presentations that are made to analysts or investors are posted on the Company's website. If the presentations contain information that has not previously been announced to ASX that could have a material effect on the share price, the presentation is released to the ASX before the presentation is made.

A copy of the Company's continuous disclosure policy is available on the Company's website.

PRINCIPLE 6: RESPECT THE RIGHTS OF SHAREHOLDERS

The Board of Energy Metals Limited endeavours to ensure that Shareholders are informed of all the activities affecting the Company. Information is conveyed to Shareholders via the annual report, quarterly reports and other announcements which are delivered to the Australian Stock Exchange and posted on the Company's website (<http://www.energymetals.net>). Shareholders with access to the internet are encouraged to submit their email addresses to receive electronic copies of information distributed by the Company. Hard copies of this information are available on request.

The Board encourages the attendance and participation of Shareholders at the Annual General Meeting and specifically convened General Meetings by holding those meetings in a location accessible by a large number of Shareholders.

The Board of Energy Metals Limited adopted a policy to promote effective communication with Shareholders.

A copy of the policy is available from the Company's website.

PRINCIPLE 7: RECOGNISE AND MANAGE RISK

Taking and managing risk are central to business and building Shareholder value. The Board is responsible for the identification of significant areas of business risk, implementing procedures to manage such risks and developing policies regarding the establishment and maintenance of appropriate ethical standards to:

- ensure compliance in legal, statutory and ethical matters;
- monitor the business environment, identify potential opportunities & risk areas therein; and
- monitor systems established to ensure prompt and appropriate responses to Shareholders complaints and enquiries.

The Board meets on a regular basis and reviews and monitors the parameters under which such risks will be managed. The Board has established a Risk Management Team ("RMT") which comprises the Executive Director and Company Secretary and any other Senior Executives the RMT consider appropriate to oversee the daily management of risk and make recommendations to the Board on risk management matters. The RMT is not a committee of the Board and the Board acknowledges that it is ultimately responsible for the implementation of any policies, actions or decisions made by the RMT.

The Executive Director and Company Secretary are required to periodically report to the Board that the Company has a sound system of risk management, that internal compliance and control systems are in place to ensure the implementation of Board policies, and that those systems are operating efficiently and effectively in all material aspects.

The Board also receives a declaration pursuant to s295A of the Corporations Act from the Chief Executive Officer (Executive Director) prior to the approval of financial statements.

A copy of the policy is available from the Company's website.

PRINCIPLE 8: REMUNERATE FAIRLY AND RESPONSIBLY

The Company does not have a formal remuneration policy and has not established a separate remuneration committee. Due to the early state of development and small size of the Company a separate remuneration committee was not considered to add any efficiency to the process of determining the levels of remuneration for the Directors and key Executives. The Board considers that it is more appropriate to set aside time at a Board meeting each year to specifically address matters that would ordinarily fall to a remuneration committee. In addition, all matters of remuneration will continue to be in accordance with the Corporations Act requirement, especially with regard to related party transactions. That is, none of the Directors participate in any deliberations regarding their own remuneration or related issues.

Remuneration is currently in accordance with the general principles recommended by the ASX, that is, Non-executive Directors receive a fixed fee for their services and do not receive performance based remuneration. Fees for Non-executive Directors are not linked to the performance of the Company.

Non-executive Directors' remuneration may also include an incentive portion consisting of options to subscribe for shares, subject to approval by Shareholders. The Company has not complied with the ASX Guideline in this regard but considers the nature and quantum of remuneration of its Non-executive Directors to be appropriate and reasonable for a Company of its size and the granting of options is a useful tool for attracting and retaining quality Directors without diminishing the Company's cash resources.

All Executives receive either consulting fees or a salary, part of which maybe taken as superannuation, and from time to time, options. Options issued to Directors are subject to approval by Shareholders. The Board reviews Executive packages annually by reference to the Executives performance and comparable information from industry sectors and other listed companies in similar industries.

There are no schemes for retirement benefits for Non-executive Directors.

The Company is required to disclose in its annual report details of Directors remuneration. A detailed explanation of the basis and quantum of Directors' remuneration is set out in the Directors' Report.

INCOME STATEMENT

FOR THE YEAR ENDED 30 JUNE 2009

	Note	Consolidated		Company	
		2009 \$	2008 \$	2009 \$	2008 \$

The above statement of changes in equity should be read in conjunction with the accompanying notes.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2009

1. CORPORATE INFORMATION

The financial report of Energy Metals Limited for the year ended 30 June 2009 was authorised for issue in accordance with a resolution of Directors on 11 September 2009.

The financial report covers the Group of Energy Metals Ltd and its controlled entities, and Energy Metals Ltd as an individual parent entity. Energy Metals Ltd is a Company limited by shares incorporated in Australia whose shares are publicly traded on the Australian Securities Exchange.

The nature of the operations and principal activities of the Company are described in Note 3.

Unless otherwise stated, policies adopted in the preparation of the financial report are consistent with those of the previous year.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

In order to assist in the understanding of the accounts, the following summary explains the material accounting policies that have been adopted in the preparation of the accounts.

(a) STATEMENT OF COMPLIANCE

This financial report is a general purpose financial report which has been prepared in accordance with the requirements of applicable Accounting Standards including Australian Interpretations and the Corporations Act. The financial report includes the separate financial statements of the Company and the consolidated financial statements of its controlled entity.

Accounting Standards include Australian equivalents to International Financial Reporting Standards ("AIFRS"). Compliance with AIFRS ensures that the financial statements and notes thereto comply with International Financial Reporting Standards ("IFRS").

The financial report is presented in the Australian currency.

(b) NEW ACCOUNTING STANDARDS AND INTERPRETATIONS

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2009 reporting periods. The Company's assessment of the impact of these new standards and interpretations is set out below. New standards and interpretations not mentioned are considered unlikely to impact on the financial reporting of the Company.

(i) AASB 8 Operating Segments and AASB 2007/3 Amendments to Australian Accounting Standards arising from AASB 8

AASB 8 and AASB 2007-3 are effective for annual reporting period commencing on or after 1 January 2009. AASB 8 will result in a significant change to the approach to segment reporting, as it requires adoption of a 'management approach' to reporting on financial performance. The information being reported will be based on what the key decision makers use internally for evaluating segment performance and deciding how to allocate resources to operating segments. The Company has not yet decided when to adopt AASB 8. Adoption of AASB 8 may result in different segments, segment results and different types of information being reported in the segment note of the financial report. However, at this stage it is not expected to affect any of the amounts recognised in the financial statements.

(ii) Revised AASB 101 Presentation of Financial Statements and AASB 2007-8 Amendments to Australian Accounting Standards arising from AASB 101

A revised AASB 101 was issued in September 2007 and is applicable for annual reporting period beginning on or after 1 January 2009. It requires the presentation of a statement of comprehensive income and makes changes to the statement of changes in equity, but will not affect any of the amounts recognised in the financial statements. If an entity has made a prior period adjustment or has reclassified items in the financial statements, it will need to disclose a third balance sheet (statement of financial position), this one being as at the beginning of the comparative period. The Company intends to apply the revised standard from 1 July 2009.

(iii) AASB 2008-1 Amendments to Australian Accounting Standards – Share Based Payments Vesting Conditions and Cancellations

The amendments clarify the definition of 'vesting conditions' introducing the term 'non-vesting conditions' for conditions other than vesting conditions as specifically defined and prescribe the accounting treatment of an award that is effectively cancelled because a non-vesting condition is not satisfied. The consolidated entity does not have share-based payment arrangements that are affected by these amendments.

(iv) AASB 127(revised) Consolidated and Separate Financial Statements

Under the revised standard a change in the ownership interest of a subsidiary (that does not result in loss of control) will be accounted for as an equity transaction. If the consolidated entity changes its ownership interest in the existing subsidiary in the future, the change will be accounted for as an equity transaction. This will have an impact on goodwill, nor will it give rise to a gain or a loss in the consolidated entity's income statement.

(c) BASIS OF PREPARATION/ACCOUNTING.

The Financial Report has been prepared on an accruals basis and is based on historical costs and does not take into account changing money values or, except where stated, current valuations of non-current assets. Cost is based on the fair values of the consideration given in exchange for assets.

In applying AIFRS, management is required to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported. These accounting policies have been consistently applied throughout the period.

The significant accounting policies set out below have been applied in the preparation and presentation of the financial report for the year ended 30 June 2009 and the comparative information.

(d) BASIS OF CONSOLIDATION

The consolidated financial statements comprise the financial statements of Energy Metals Limited and its controlled entity. A controlled entity exists where Energy Metals Ltd has the capacity to dominate the decision making in relation to the financial and operating policies of another entity so that the other entity operates with Energy Metals Ltd to achieve the objectives of Energy Metals Ltd. The controlled entity is contained in Note 23 to the financial statements.

All inter-company balances and transactions between entities in the group, including any unrealised profits or losses, have been eliminated on consolidation.

Where controlled entities have entered or left the group during the year, their operating results have been included from the date control was obtained or until the date control ceased.

(e) CASH AND CASH EQUIVALENTS

For the purposes of the cash flow statement, cash and cash equivalents includes cash on hand, and deposits repayable on demand with a financial institution. The cash and cash equivalents balance primarily consists of funds on term deposit with original maturity at time of purchase of three months or less that are readily convertible to known amounts of cash and which are subject to minimal risk of changes in value.

(f) TRADE AND OTHER RECEIVABLES

Receivables are initially recognised at fair value and subsequently measured at amortised cost, less provision for doubtful debts and impairment. Current receivables for GST are due for settlement within 30 days and other current receivables within 12 months. Cash on deposit in respect of environmental bonds is not due for settlement until rights of tenure are forfeited or performance obligations are met.

Collectibility of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off by reducing the carrying amount directly. An allowance account (provision for doubtful debts and impairment) is used when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**(f) TRADE AND OTHER RECEIVABLES (continued)**

The amount of the impairment loss is recognised in the income statement within other expenses. When a trade receivable for which an impairment allowance had been recognised becomes uncollectible in a subsequent period, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against other expenses in the income statement.

(g) REVENUE

Interest revenue is recognised on a proportional basis taking into account the interest rates applicable to the financial assets.

Fee revenue from joint venture activities is measured at fair value of the consideration received or receivable. Amounts disclosed as revenue are net of returns, allowances, rebates and amounts collected on behalf of third parties.

All revenue is stated net of the amount of goods and services tax.

(h) PROPERTY, PLANT AND EQUIPMENT

Plant and equipment is stated at cost less accumulated depreciation and any impairment in value.

Depreciation is calculated using the diminishing value and prime cost methods and is brought to account over the estimated economic lives of all property, plant and equipment. The rates used are based on the useful life of the assets and range from 10% to 40%.

Depreciation methods, useful lives and residual values are reassessed at each reporting date.

(i) IMPAIRMENT OF ASSETS

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of its fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets and the asset's values in use cannot be estimated to be close to its fair value. In such cases the asset is tested for impairment as part of the cash generating unit to which it belongs. When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset or cash-generating unit is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses relating to continuing operations are recognised in those expense categories consistent with the function of the impaired asset unless the asset is carried at revalued amount (in which case the impairment loss is treated as a revaluation decrease).

As assessment is also made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had the impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss unless the asset is carried at the revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

(j) EXPLORATION AND EVALUATION EXPENDITURE

The Company's policy with respect to exploration and evaluation expenditure is to use the area of interest method. Under this method exploration and evaluation expenditure is carried forward on the following basis:

- i) Each area of interest is considered separately when deciding whether, and to what extent, to carry forward or write off exploration and evaluation costs.
- ii) Exploration and evaluation expenditure related to an area of interest is carried forward provided that rights to tenure of the area of interest are current and that one of the following conditions is met:
 - such evaluation costs are expected to be recouped through successful development and exploitation of the area of interest or alternatively, by its sale; or
 - exploration and/or evaluation activities in the area of interest have not yet reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves and active and significant operations in relation to the area are continuing.

Exploration and evaluation costs accumulated in respect of each particular area of interest include only net direct expenditure.

(k) INTEREST IN A JOINTLY CONTROLLED OPERATION

The Company has an interest in a joint venture that is a jointly controlled operation. A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control. A joint controlled operation involves the use of assets and other resources of the venturers rather than establishment of a separate entity. The Company recognises its interest in the jointly controlled operation by recognising the assets that it controls and the liabilities that it incurs. The Company also recognises the expenses that it incurs and its share of the income that it earns from the sale of goods or services by the jointly controlled operation.

(l) TRADE AND OTHER PAYABLES

Trade payables and other payables are carried at cost and represent liabilities for goods and services provided to the Company prior to the end of the financial year that are unpaid and arise when the Company becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and usually paid within 30 days of recognition.

(m) EMPLOYEE ENTITLEMENTS

The Company's liability for employee entitlements arising from services rendered by employees to balance date are recognised in other payables. Employee entitlements expected to be settled within one year together with entitlements arising from wages and salaries, and annual leave which will be settled within one year, have been measured at their nominal amount and include related on-costs.

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to the expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(n) SHARE BASED PAYMENT TRANSACTIONS

Share based payments

Under AASB 2 Share Based Payments, the Company must recognise the fair value of options granted to Directors, employees and consultants as remuneration as an expense on a pro-rata basis over the vesting period in the income statement with a corresponding adjustment to equity.

The Company provides benefits to employees (including Directors) of the Company in the form of share based payment transactions, whereby employees render services in exchange for shares or rights over shares ("equity-settled transactions"). The cost of these equity-settled transactions with employees (including Directors) is measured by reference to fair value at the date they are granted. The fair value is determined using a black-scholes model.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**(o) EARNINGS PER SHARE****(i) Basic Earnings Per Share**

Basic earnings per share is determined by dividing the operating profit/(loss) attributable to the equity holder of the Company after income tax by the weighted average number of ordinary shares outstanding during the financial period.

(ii) Diluted Earnings Per Share

Diluted earnings per share adjusts the figures used in determination of basic earnings per share by taking into account amounts unpaid on ordinary shares and any reduction in earnings per share that will arise from the exercise of options outstanding during the period.

(p) CONTRIBUTED EQUITY

Issued and paid up capital is recognised at the fair value of the consideration received by the Company. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received.

(q) INCOME TAX

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is provided on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all taxable temporary differences except:

- When the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- When the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- When the deductible temporary difference is associated with investments in subsidiaries, associates or interest in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Income taxes relating to items recognised directly in equity are recognised in equity and not in profit or loss.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Balance Sheet.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flow arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(r) CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

Accounting for capitalised exploration and evaluation expenditure

The Group's accounting policy is stated at 1(j). There is some subjectivity involved in the carrying forward as capitalised or writing off to the income statement exploration and evaluation expenditure, however management give due consideration to areas of interest on a regular basis and are confident that decisions to either write off or carry forward such expenditure fairly reflect the prevailing situation.

Financial Instruments

The Company has exposure to interest rate risk which is the risk that the Company's financial position will be adversely affected by movements in interest rates. Interest rate risk on cash and short term deposits is not considered to be a material risk due to the short term nature of these financial instruments.

The Company has no monetary foreign currency assets or liabilities.

(s) PROVISIONS

Provisions are measured at the present value of managements best estimate of the expenditure required to settle the present obligation at the reporting date. The discount rate used to determine the present value reflects current market assessments of the time value of money and the risks specific to the liability.

(t) COMPARATIVES

Comparatives have been adjusted where necessary to ensure comparability with the 2009 accounts.

3. SEGMENT INFORMATION

The Groups primary reporting format is business segments and its secondary reporting format is geographical segments.

Business Segment

During the financial year the Company operated in one segment, the mining exploration and prospecting industry.

Geographical Segments

During the financial year the Company operated within Australia only, specifically the Northern Territory and Western Australia.

4. REVENUES AND EXPENSES				
(a) Revenue from continuing operations includes the following revenue items:				
Insurance recovery	-	1,745	-	1,745
Interest received from other parties	342,828	267,366	342,828	267,366
Joint Venture revenue received	631,006	650,415	631,006	650,415
Fuel rebate	24,154	83,161	24,154	83,161
	997,988	1,002,687	997,988	1,002,687
(b) Profit (Loss) includes the following specific expenses:				
Depreciation	70,731	65,274	70,731	65,274
Exploration expenditure written off	13,153	-	13,153	-
	83,884	65,274	83,884	65,274
(c) Employee benefit expenses:				
Wages & superannuation	71,042	295,284	71,042	295,284
Directors fees	50,780	35,000	50,780	35,000
Consultants	24,019	43,233	24,019	43,233
	145,841	373,517	145,841	373,517

5. TAXATION

The reconciliation between tax expense and the product of accounting profit/(loss) before income tax multiplied by the Company's applicable income tax rate is as follows:

Profit/(Loss) before income tax	83,226	(272,216)	83,718	(271,939)
Income tax expense (benefit) @ 30%	24,968	(81,665)	25,115	(81,582)
Tax effect of amounts which are not deductible in calculating taxable income:				
Other costs not deductible	2,806	191	2,806	191
Deferred tax assets relating to tax losses not recognised	(27,774)	81,474	(27,921)	81,391
Total income tax expense	-	-	-	-

The franking account balance at year end was \$nil (2008: \$nil).

Deferred tax assets and liabilities not recognised relate to the following:

Deferred tax assets

Tax losses	214,861	277,538	214,861	277,261
Other temporary differences	-	399	-	399

Deferred tax liabilities

Other temporary differences	-	-	-	-
Net deferred tax assets not recognised	214,861	277,937	214,861	277,660

Net deferred tax assets have not been brought to account as it is not probable within the immediate future that tax profits will be available against which deductible temporary differences and tax losses can be utilised.

The use of losses is dependent on the Company satisfying the required criteria within the Income Tax Assessment Act 1936 & 1997 at the time the losses are incurred and used. The provisions of the Acts may change or the ownership of the Company may vary resulting in losses being lost in the future.

6. RECONCILIATION OF PROFIT (LOSS) AFTER INCOME TAX TO NET CASH OUTFLOW FROM OPERATING ACTIVITIES

	<u>189,859</u>	<u>2,125,602</u>	<u>191,285</u>	<u>2,126,536</u>

* Other receivables of \$1,778,120 relate to options that were exercised 30 June 2008.

Trade and other receivables are denominated in Australian dollars are interest free with settlement terms of between 7 and 30 days. As at 30 June 2009 there were current trade receivables totalling \$185,931 which do not contain impaired assets and are not past due. It is expected that these amounts will be received in total when due.

Due to the short-term nature of these receivables their carrying value is assumed to be their fair value. Please refer to Note 18 for information on credit risk.

21,929,579 fully paid ordinary shares @ \$0.10 each on exercise of options on various dates	-	2,192,958	-	2,192,958
Balance at the end of year	17,337,555	16,804,142	17,337,555	16,804,142

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

14. CONTRIBUTED EQUITY (continued)

The share capital of the Company was reorganised effective 29 February 2008. The reorganisation was by way of a share split whereby each fully paid ordinary share was split into 3 fully paid ordinary shares. Each listed option exercisable at \$0.30 on or before 30 June 2008 was split into 3 listed options exercisable at \$0.10 on or before 30 June 2008. Each unlisted option in the Company was split into 3 unlisted options with expiry dates remaining unchanged and the relevant exercise price reduced to one third in accordance with the Listing Rules of the Australian Securities Exchange.

Ordinary shares participate in dividends. On winding up of the Company any proceeds would be distributed in proportion to the number of the shares held. At Shareholder meetings, each ordinary share is entitled to one vote when a poll is called, otherwise each Shareholders has one vote on a show of hands.

15. SHARE BASED PAYMENT TRANSACTIONS

Share based payments transactions are recognised at fair value in accordance with AASB 2. The adoption of AASB 2 is equity-neutral for equity-settled transactions. The expense in the year was \$Nil (2008: \$Nil).

Employee Option Plan

The establishment of the Energy Metals Employee Share Option Plan was approved by Shareholders at the 2006 annual general meeting. The Employee Share Option Plan is designed to provide eligible employees, Executive officers and Directors of the Company an opportunity, in the form of Options to subscribe for Shares in the Company. An "eligible employee" is a person who is at the time of an offer under the plan, a full or part time employee or Director of the Company or an associated body corporate of the Company. Any offer of options to Directors will be subject to Shareholder approval.

Under the plan, the Board may offer to eligible persons the opportunity to subscribe for such number of Options in the Company as the Board may decide and on the terms set out in the rules of the plan. Options granted under the plan will be offered to participants in the plan on the basis of the Board's view of the contribution of the eligible person to the Company. When exercisable, each option is convertible into one ordinary share. Options granted under the plan carry no dividend or voting rights.

Set out below are summaries of options previously granted under the plan:

Grant Date	Expiry Date	Exercise Price	Balance at the start of the year Number	Granted during the year Number	Exercised during the year Number	Forfeited during the year Number	Balance at end of the year Number	Vested and exercisable at end of the year Number
Consolidated and parent entity - 2008								
22/12/2006	30/06/2011	\$1.00	165,000	-	(165,000)	-	-	-
22/12/2006	30/06/2011	\$2.00	200,000	-	-	600,000*	-	-
05/01/2007	30/06/2011	\$0.98	330,000	-	(20,000)	-	990,000*	990,000*
Weighted average exercise price			-	-	\$0.997	-	-	-
Consolidated and parent entity - 2009								
05/01/2007	30/06/2011	\$0.98	990,000	-	(540,000)	-	450,000	450,000
Weighted average exercise price			-	-	\$0.98	-	-	-

* Following the reorganisation of capital (share split) all options were adjusted in accordance with the Listing Rules of the Australian Securities Exchange. Refer Note 14 for further information.

Fair Value of share options and assumptions

The fair value of services received in return for share options granted to employees is measured by reference to the fair value of options granted. The estimate of the fair value of the services is measured based on Black-Scholes option valuation methodology. The life of the options and early exercise option are built into the option model.

The assumptions used for the options valuation are as follows:

Exercise Price	\$1.00	\$2.00	\$0.98*
Expected Life	4.49 years	4.49 years	4.49 years
Share Price at time of issue	\$3.60	\$3.60	\$3.95
Expected volatility	70%	70%	68%
Dividend yield	0%	0%	0%
Risk free interest rate	5.75%	5.75%	6.27%
Option value	\$2.989	\$2.592	\$2.5227

* These assumptions are as per the original valuation pre-share split.

16. RESERVES

Share-based option reserve

Balance at the beginning of the year	2,419,100	2,419,100	2,419,100	2,419,100
Balance at the end of the year	2,419,100	2,419,100	2,419,100	2,419,100

Nature and purpose of the reserve:

The share-based payments reserve is used to recognise the fair value of options issued but not exercised

17. ACCUMULATED LOSSES

Accumulated losses at the beginning of the financial year	(3,346,841)	(3,074,625)	(3,345,907)	(3,073,968)
Net profit (loss) attributable to members of the Company	83,226	(272,216)	83,718	(271,939)
Accumulated (losses) at the end of the financial year	(3,263,615)	(3,346,841)	(3,262,189)	(3,345,907)

18. FINANCIAL AND CAPITAL RISK MANAGEMENT

(a) CAPITAL RISK MANAGEMENT

The Company is funded entirely by equity raisings and manages its capital to ensure that it will be able to continue as a going concern.

The capital structure of the Company consists of cash and cash equivalents (Note 9) and equity attributable to equity holders of the Company, comprising issued capital, reserves and retained earnings (accumulated losses) as disclosed in Notes 14, 15, 16 and 17 respectively.

(b) SIGNIFICANT ACCOUNTING POLICIES

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 2 of the financial statements.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

18. FINANCIAL AND CAPITAL RISK MANAGEMENT (continued)

(c) CATEGORIES OF FINANCIAL INSTRUMENTS

	Consolidated		Company	
	2009	2008	2009	2008
	\$	\$	\$	\$
Financial Assets				
<i>Current</i>				
Cash and cash equivalents	5,060,371	5,329,275	5,060,371	5,329,275
Trade and other receivables	189,859	2,125,602	191,285	2,126,536
	5,250,230	7,454,877	5,251,656	7,455,811
Financial Liabilities				
<i>Current</i>				
Trade and other payables	35,002	81,592	35,002	81,592
Total Current Liabilities	35,002	81,592	35,002	81,592

(d) CREDIT RISK EXPOSURE

As at the reporting date, the Company has no significant concentrations of credit risk. The carrying amount of trade and other receivables and cash & cash equivalents reflected above represents the Company's maximum exposure to credit risk. The Company holds cash deposits with Australian banking financial institutions, namely Bankwest, National Australia Bank Adelaide Bank Ltd and Bank of Queensland.

(e) INTEREST RATE RISK EXPOSURE

The Company's exposure to interest rate risk arises from assets and liabilities bearing variable interest rates. The weighted average interest rate on cash holdings was 5.61% at 30 June 2009. All other financial assets and liabilities are non interest bearing. The net fair value of the Company's financial assets and liabilities approximates their carrying value.

The Company invests its surplus funds with Australian banking financial institutions, namely Bankwest, National Australia Bank, Adelaide Bank Ltd and Bank of Queensland. The National Australia Bank and Bankwest have an A1+ rating with Standard & Poors and Adelaide Bank and Bank of Queensland have an A2- rating. The Company has been advised that none of these institutions has any exposure to the US sub-prime market.

The interest rate risk for the unlisted securities is immaterial in terms of the possible impact on profit or loss or total equity. It has therefore not been included in the sensitivity analysis.

(f) LIQUIDITY RISK

The liquidity position of the Company is managed to ensure sufficient liquid funds are available to meet our financial commitments in a timely and cost-effective manner.

The Board reviews the Company's liquidity position on a regular basis including cash flow statements to determine the forecast liquidity position and maintain appropriate liquidity levels. Note 13 details the Company's current obligations.

There are no unused borrowing facilities from any financial institution.

(g) FAIR VALUES

The carrying amounts and estimated fair values of financial assets and financial liabilities are as follows:

Consolidated	Carrying Amount		Fair Value	
	2009 \$	2008 \$	2009 \$	2008 \$
Financial Assets				
<i>Current</i>				
Cash and cash equivalents	5,060,371	5,329,275	5,060,371	5,329,275
Trade and other receivables	189,859	2,125,602	191,285	2,126,536
	5,250,230	7,454,877	5,251,656	7,455,811
Financial Liabilities				
<i>Current</i>				
Trade and other payables	35,002	81,592	35,002	81,592
Total Current Liabilities	35,002	81,592	35,002	81,592

The methods and assumptions used to estimate the fair value of financial instruments are outlined below:

Cash

The carrying amount is fair value due to the liquid nature of these assets.

Receivables/payables

Due to the short term nature of these financial rights and obligations, their carrying amounts are estimated to represent their fair values.

(h) CAPITAL

In managing its capital, the Company's primary objective is to ensure its continued ability to provide a consistent return for its equity Shareholders. In order to achieve this objective, the Company seeks to maintain a gearing ratio that balances risks and returns at an acceptable level and also to maintain a sufficient funding base to enable the Company to meet its working capital and strategic investment needs. In making decisions to adjust its capital structure to achieve these aims, either through new share issues, or the reduction of debt, the Company considers not only its short-term position but also its long-term operational and strategic objectives.

There have been no other significant changes to the Company's capital management objectives, policies and processes in the year nor has there been any change in what the Company considers to be its capital.

19. CONTINGENCIES

Contingent Liabilities

Claims of Native Title

To date the Company has been notified by the Native Title Tribunal of native title claims which cover some of the Company's licence holdings. Until further information arises in relation to the claims and its likelihood of success, the Company is unable to assess the likely effect, if any, of the claims.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

	Consolidated		Company	
	2009	2008	2009	2008
	\$	\$	\$	\$
20. COMMITMENTS				
Tenement Expenditure Commitments:				
The Company is required to maintain current rights of tenure to tenements, which require outlays of expenditure in 2009/2010. Under certain circumstances these commitments are subject to the possibility of adjustment to the amount and/or timing of such obligations, however, they are expected to be fulfilled in the normal course of operations. Estimated expenditure on mining, exploration and prospecting leases for 2009/2010.	675,500	176,000	675,500	176,000

Capital Commitments

There are no capital expenditure commitments for the Company as at 30 June 2009.

21. PERFORMANCE BONDS AND SECURITY DOCUMENTS

In support of titles granted to or operated by the Company, various securities have been submitted to the Department of Mines and Petroleum. These consist of unconditional performance bonds, securities or Form 32 security documents with a total potential liability of \$45,000.

22. KEY MANAGEMENT PERSONNEL**(a) DETAILS OF DIRECTORS (KEY MANAGEMENT PERSONNEL)**

The following persons were Directors of Energy Metals Limited during the financial year:

Mr O Aamodt	- Non-Executive Chairman
Mr L Dudfield	- Executive Director
Mr G Jones	- Non-Executive Director (appointed 28/08/2008)
Mr D R Kennedy	- Non-Executive Director (resigned 01/09/2008)

Key Management Personnel are persons having authority and responsibility for planning, directing and controlling the activities of the Company. Aside from the Directors, there were no other key management personnel during the year ended 30 June 2009.

(b) KEY MANAGEMENT PERSONNEL COMPENSATION

	Consolidated		Company	
	2009	2008	2009	2008

* The Company completed a rights issue (1:20) in December 2007 and completed a reorganisation of capital (3:1 share split) in March 2008. Pursuant to the share split each unlisted option in the Company was split into 3 unlisted options with expiry dates remaining unchanged and the relevant exercise price reduced to one third in accordance with the Listing Rules of the Australian Securities Exchange.

** Balance held at date of resignation.

(d) OTHER TRANSACTIONS WITH KEY MANAGEMENT PERSONNEL

- i) Pursuant to a Consulting Agreement dated 6 June 2009, between the Company and Jopan Management Pty Ltd ("Jopan"), the Company paid a total of \$166,045 during the year to Western Geological Services (a division of Jopan). The fees were for the provision of technical and management services provided to the Company by Mr Lindsay Dudfield. Mr Dudfield's spouse is the major Shareholder of, and sole Director and Company Secretary of Jopan.
- ii) During the year the Company paid Mr Donald Ross Kennedy, \$6,667 being Directors Fees.
- iii) During the year the Company paid Mr Geoffrey Michael Jones \$19,113 in Directors fees and \$1,720 in superannuation. Mr Jones consulting Company GMJ Projects provided consultancy services to the Company and was paid \$618 during the period.
- iv) During the year the Company paid Mr Oscar Aamodt \$25,000 being Directors Fees.
- v) During the year the Company paid a total of \$230,000 to Jindalee Resources Limited for provision of registered and serviced offices and the provision of staff (employed by Jindalee) to provide administrative, secretarial, bookkeeping, Company Secretarial and reception services. During the year the Company reimbursed Jindalee Resources a total of \$2,892 being reimbursement for goods purchased by Jindalee on behalf of Energy Metals. Jindalee Resources is a substantial Shareholder in Energy Metals holding 46,794,273 fully paid ordinary shares in Energy Metals representing approximately 40% issued capital. Lindsay George Dudfield was a Director of Jindalee Resources Limited during the year ended 30 June 2009.

23. CONTROLLED ENTITIES

Controlled Entities	% held		Class	State of Incorporation	Date of Incorporation	Investment at Cost

25. REMUNERATION OF AUDITORS

Amounts paid or payable at 30 June to the auditors for:

Audit and review of the financial reports	36,808	38,231	36,808	38,231
Other assurance service	-	-	-	-
	36,808	38,231	36,808	38,231

The auditor of Energy Metals Limited is BDO Kendalls Audit & Assurance (WA) Pty Ltd.

26. INTEREST IN JOINT VENTURE OPERATIONS

The Company has the following interest in unincorporated Joint Ventures:

Joint Venture	Principal Activity	% Interest	
		2009	2008
Bigirlyi Joint Venture	Uranium Exploration	53.74*	53.74*

The Joint Venture is a contractual arrangement between participants for the sharing of costs and outputs and does not generate revenue and profit. The Joint Venture does not hold any assets and the Company's share of exploration and evaluation expenditure is accounted for in accordance with the policy set out in Note 2.

*The Company is a participant in the Bigirlyi Joint Venture with a 53.74% interest (2008: 53.74%). The Company's interest in the Joint Venture increased during the previous period as a result of dilution by Southern Cross Exploration NL. Southern Cross have disputed the dilution and pursuant to the joint venture agreement the parties operate under, the matter will be resolved via a process of arbitration. A settlement proposal dated 22 July 2009 was put forth by Southern Cross to the other venturers however as at the date of this report the matter has not been settled. The other participants in the Joint Venture are Valhalla Uranium Limited (42.06%) and Southern Cross Exploration NL (4.20%).

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS Continued

26. INTEREST IN JOINT VENTURE OPERATIONS (continued)

The Company has brought to account its percentage interest of the operating costs of the Joint Venture in the Income Statement, and its percentage interest of the assets in the Balance Sheet.

The Company's share of assets employed in the Joint Venture is:

	Consolidated		Company	
	2009	2008	2009	2008
	\$	\$	\$	\$
CURRENT ASSETS				
Cash and cash equivalents	337,365	422,232	337,365	422,232

TOTAL ASSETS	7,728,851	5,825,723	7,728,851	5,825,723

a) COMMITMENTS

There are no capital expenditure commitments for the Joint Venture as at 30 June 2009.

Estimated 2009/2010 minimum expenditure commitments for the Joint Venture tenements is \$600,000.

b) CONTINGENT LIABILITIES**Claims of Native Title**

There are no claims of Native Title that affect the joint venture licence holdings.

27. EVENTS OCCURRING AFTER BALANCE SHEET DATE

On 8 September 2009 the Company announced it has entered into an Implementation Deed with CGNPC Uranium Resources Co. Ltd., a wholly owned subsidiary of China Guangdong Nuclear Power Company ("CGNPC"), under which China Uranium Development Company Limited ("CUD"), also a wholly owned subsidiary of CGNPC, will offer to acquire up to 70% of the outstanding ordinary shares of Energy Metals for \$1.02 cash per share by means of a proportional takeover bid. As a part of the transaction CUD will underwrite a 1:9 rights issue by Energy Metals at \$0.90 per share which Energy Metals intends to implement on completion of the proportional takeover bid. The rights issue seeks to raise approximately \$11.7M.

The Implementation Deed has a number of conditions related to government approvals that are required to be satisfied before the transaction can be completed.

Further information regarding the transaction can be obtained from the Australian Securities Exchange (www.asx.com.au) and the Company's website (www.energymetals.net).

DIRECTORS' DECLARATION

The Directors of the Company declare that:

1. the financial statements, comprising the income statement, balance sheet, cash flow statement, statement of changes in equity and accompanying notes are in accordance with the Corporations Act 2001, including:
 - (a) complying with Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements; and
 - (b) give a true and fair view of the financial position as at 30 June 2009 and of the performance for the year ended on that date of the Company and the consolidated entity.
2. In the Directors' opinion, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
3. The audited remuneration disclosures included under the heading "remuneration Report" in the Directors Report comply with section 300A of the Corporations Act 2001.
4. The Directors have been given the declarations by the Chief Executive Officer and Chief Financial Officer as required by section 295A of the Corporations Act 2001.

This declaration is made in accordance with a resolution of the Board of Directors and is signed for and on behalf of the Directors by:

L G DUDFIELD

Executive Director

Perth, Western Australia

Dear Sirs,

DECLARATION OF INDEPENDENCE BY CHRIS BURTON TO THE DIRECTORS OF ENERGY METALS LIMITED

As lead auditor of Energy Metals Limited for the year ended 30 June 2009, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Energy Metals Limited and the entities it controlled during the year.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF ENERGY METALS LIMITED

We have audited the accompanying financial report of Energy Metals Limited, which comprises the balance sheet as at 30 June 2009, and the income statement, statement of changes in equity and cash flow statement for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration of the consolidated entity comprising the disclosing entity and the entities it controlled at the year's end or from time to time during the financial year.

Directors' Responsibility for the Financial Report

The directors of the disclosing entity are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In Note 2, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that compliance with Australian equivalents to International Financial Reporting Standards ensures that the financial report, comprising the financial statements and notes, complies with International Financial Reporting Standards.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

BDO Kendalls is a national association of separate partnerships and entities. Liability limited by a scheme approved under Profession Standards Legislation.

AUDITOR'S REPORT Continued

BDO Kendalls

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*. We confirm that the independence declaration required by the *Corporations Act 2001* would be in the same terms if it had been given to the directors at exactly the same time that this auditor's report was made.

Auditor's Opinion

In our opinion the financial report of Energy Metals Limited is in accordance with the *Corporations Act 2001*, including:

- (a) (i) giving a true and fair view of the company's and consolidated entity's financial position as at 30 June 2009 and of their performance for the year ended on that date; and
(ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*.
- (b) the financial report also complies with International Financial Reporting Standards as disclosed in Note 2.

Report on the Remuneration Report

We have audited the Remuneration Report included in the directors' report for the year ended 30 June 2009. The directors of the company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's Opinion

In our opinion, the Remuneration Report of Energy Metals Limited for the year ended 30 June 2009, complies with section 300A of the *Corporations Act 2001*.
