LETTER FROM THE CEO

Dear Shareholder,

2015 was a challenging year for most global companies, and Garmin was no exception. The strong U.S. dollar reduced the U.S. dollar value of the revenue we generate outside the United States. Geopolitical conflicts negatively impacted demand for our products in key markets such as Russia and Eastern Europe. Lower oil prices—something we love as consumers—had a negative impact on our sales to oil-producing markets. Stock market volatility dampened enthusiasm in segments that are linked to asset appreciation. Finally, competition intensified across many of our business segments, which led to significant changes in the market. With all of the challenges we faced, one could wonder if there was any good news to celebrate. The answer is YES, and plenty of it:

- Our revenue was down 2% for the year, but performed well despite the strong U.S. dollar. Unit deliveries were up 7% over 2014.
- Our aviation, fitness, marine, and outdoor segments grew 9% on a combined basis during 2015, and grew 13% on average over the past three years as a direct result of our investments in these segments.
- We delivered highly anticipated products and technologies. Wrist-based heart rate has become the must-have feature for fitness watches and activity trackers. Fitness delivered three new product families with wrist-based heart rate in 2015 including models with our own Elevate™ heart rate technology. Outdoor leveraged the momentum of the wearable market with the highly successful fēnix® 3. Marine launched a significant number of game-changing products resulting in increased market share. Aviation delivered several key aircraft certifications during the year, including the new Cessna Latitude and HondaJet.

Finally, our auto segment delivered strong profitability in mature market conditions allowing us to invest in new opportunities for the future. Our relationship with Honda Motor Co. expanded, resulting in Garmin navigation being available on most Honda models around the globe. In addition, our relationship with Daimler continues to expand with the introduction of the new 2017 Mercedes E-Class.

- Our Beat Yesterday™ campaign was a resounding success that delivered increased interest in our products and our brand.
- We expanded our operational footprint with a new factory in China and acquisitions that will bring new products and technologies to our portfolio.

Looking forward to 2016, we understand that we cannot control the macro environment in which we operate. Instead, we choose to focus on our mission, which is creating superior products that play an essential role in our customers' lives. We have a strong lineup of products across all of our business segments, which enable our customers to pursue the active lifestyles that they love. Our aviation, fitness, marine and outdoor segments are once again forecasted to deliver strong growth, while our auto segment remains a healthy source of profits.

I want to thank our shareholders for your interest in Garmin. We look forward to 2016 and the many exciting opportunities it presents.

CLIFF PEMBLE | PRESIDENT AND CEO

Product Innovation

\$427 million

Dollars spent on research and development (R&D) in 2015
We're committed to making great products even greater and creating exciting new ones.

PRODUCT INNOVATION

At Garmin, our mission is to create superior products for aviation, fitness, outdoor, marine and auto that are an essential part of our customers' lives. To stay true to our vision—to be the global leader in every market we serve, with products sought after for their compelling design, superior quality and best value—we focus on innovation and diversification, while never losing sight of the benefits our products bring to our customers.

It's not about the things we make. It's about the things we make possible.

They like us. They really like us.

16.2 million

Number of units shipped in 2015

125

Number of new products we released in 2015

23

Number of R&D facilities around the globe

A black and white photograph of a propeller on an aircraft. The propeller is the central focus, with its blades extending outwards. The background is a cloudy sky. The word "Aviation" is written in a cursive font over the right side of the propeller. The overall image has a high-contrast, dramatic feel.

Aviation

AVIATION

In 2015, our avionics segment did it all—general and business aviation, helicopters and experimental aircraft. We continued relationships with aftermarket, airline and military channels and worked hard to capitalize on the Federal Aviation Administration’s (FAA) NextGen transformation of the National Airspace System (NAS) and other regulatory mandates around the world. We reduced complexity, enhanced efficiency, underscored safety, shortened learning curves and vastly simplified cockpit management in all phases of flight. In short, Garmin aviation innovation is modernizing the way we fly.

12

The number of consecutive years our avionics product support has earned the top spot in *Aviation International News* and *Professional Pilot’s* annual avionics product support surveys.

60,000 feet

The maximum altitude from which the U.S Air Force fleet of RQ-4 Global Hawk aircraft will be operating with the Garmin Doppler-enabled GSX™ 70 weather radar to provide real-time weather information to improve mission effectiveness.

Fitness

FITNESS

Our fitness device users are serious about their data. And so are we. We build innovative next-generation wrist-worn and mounted devices for running, multisport activity and cycling at all levels, and our wearable activity trackers motivate and help our customers achieve their fitness goals. Made to work with Garmin Connect™ and Garmin Connect™ Mobile, Garmin fitness devices encourage our customers to analyze, share and inspire, even while on the go. No, strike that. Especially while on the go.

Auto

AUTO

In 2015, we held our position as the world leader in GPS navigation by designing and delivering driving solutions for a wide range of customers. As always, our products feature valuable tools, including situational awareness of traffic, exits, lane-departures, spoken directions, school zones and backup cameras, which deliver a more confident driving experience for our customers. But this was the year we really diversified into cameras and sensors, expanded our specialized product lines in motorcycle, trucking and RV markets and strengthened our OEM partnerships.

MARKETING

The Garmin in-house ad agency creates original and sometimes disruptive ideas that emotionally connect our innovative products with our customers' needs. We position these ideas almost anywhere and everywhere—print, television, in stores, online and out of home such as subway stations, airport terminals and highway billboards.

360°

Beat Yesterday was launched across TV, print, out of home, digital and social channels. Anywhere we can reach our customers. If you fly, you've seen it at the airport. If you stay home, you've seen it there, too. In fact, we liked the idea so much, we started using it as our own internal mantra.

**beat
yesterday.**

Beat Yesterday is a truly global campaign. It's being used in major media outlets and in major retailers in markets around the world.

279,860,660

COMPARISON OF THE 5-YEAR CUMULATIVE TOTAL RETURN

AMONG GARMIN LTD., THE NASDAQ COMPOSITE INDEX, AND THE NASDAQ 100 INDEX

The graph matches Garmin Ltd.'s cumulative 5-year total shareholder return on common stock with the cumulative total returns of the NASDAQ Composite Index and NASDAQ 100 Index. The graph tracks the performance of a \$100 investment* in our common stock and in each index (with the reinvestment of all dividends) from 12/31/2010 to 12/31/2015.

*\$100 invested on 12/31/09 in stock or index, including reinvestment of dividends. Fiscal year ending December 31. The stock price performance included in this graph is not necessarily indicative of future stock price performance.
